Since both the Forest Service and BLM are subject to the provisions of the Wild Free-Roaming Horse and Burro Act as amended by the Federal Land Policy and Management Act of 1976, both Agencies are issuing rulemaking proposals in the FEDERAL REGISTER. During the period allowed for public comment, joint public hearings will be held on the subject of using helicopters and motorized vehicles as proposed in the rulemaking. Written comments and comments received at the hearings will be carefully analyzed prior to final rulemaking. Public meetings will be held in each District prior to a scheduled gathering of wild free-roaming horses or burros. Procedures to be used in the conduct of such roundups, including the use of helicopters, will be discussed at that time.

The hearings listed below are intended to provide the public an opportunity to comment on, and seek answers to questions about, the proposed rules. The hearing schedule is as follows:

State	Date/time (1977)	Place
Arizona	Mar. 2, 1 p.m. to 5 p.m.	Maricopa County Board of Supervisors Auditorium, 205 West Jefferson St., Phoenix, Ariz.
California	Mar. 5, 10 a.m. to 4 p.m.	Yuba Room, Sacramento Community Center, 14th and K Sts., Sacramento Calif.
Colorado	Mar 23, 10 a.m.	City Hall Auditorium, 5th and Rood Sts., Grand Junction, Colo.
Idaho	Mar. 15, 7:30 p.m.	Rodeway Inn, 29th and Chinden Blvd., Boise, Idaho.
Montana	Mar 15, 2 p.m.	Room 152, Library Building, Eastern Montana College, Billings, Mont.
Nevada	Mar. 15, 3 to 5 p.m. and 7 to 9 p.m.	Pioneer Motor Inn, 221 South Virginia, Reno, Nev.
New Mexico	Mar. 3, 7 p.m.	Albuquerque Convention Center, Navajo Nambe Room, Albuquerque, N. Mex.
Oregon	Mar. 2, 7:30 p.m.	Harney County Court House, Burns, Oreg.
Utah	Mar. 2, 7 p.m.	Salt Palace, Room 256, Salt Lake City, Utah.
Wyoming	Mar. 16, 7:30 p.m.	College Meeting Room, Western Wyoming College, Rock Springs, Wyo.

The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)) is not required.

In accordance with the Federal Land Policy and Management Act of 1976, interested parties may submit written comments, suggestions, or objections with respect to the proposed rules to the Director (210), Bureau of Land Management, Washington, D.C. 20240, until April 22, 1977.

Copies of comments, suggestions, or objections made pursuant to this notice will be available for public inspection in the Division of Legislation and Regulatory Management, Bureau of Land Management, Room 5555, Interior Building, Washington, D.C., during regular business hours (7:45 a.m.–4:15 p.m.).

It is therefore proposed to revise 43 CFR 4700 in the manner set forth below.

1. Section 4700.0–3 is revised to read as follows:

§ 4700.0–3 Authority.

The Act of December 15, 1971 (16 U.S.C. 1331–1340), as amended, and the Act of June 28, 1934 (43 U.S.C. 314–315r).

2. Section 4700.0–5 is amended by revising paragraph (i) and by adding new paragraphs (k), (l), and (m) to read as follows:

§ 4700.0–5 Definitions.

* * * * *

(i) "Act" means the Act of December 15, 1971 (16 U.S.C. 1331–1340), as amended.

* * * * *

(k) "Malicious harassment" means any intentional act which creates a likelihood of injury, or is detrimental to normal behavior patterns of wild free-roaming horses and burros including feeding, watering, resting, and breeding. Such acts include, but are not limited to, unauthorized chasing, pursuing, herding, roping, or attempting to gather or catch wild free-roaming horses and burros. It does not apply to lawfully conducted activities by or on behalf of the Bureau of Land Management or the Forest Service in implementation or performance of duties and responsibilities under this Act.

(l) "Captured animal" means a wild free-roaming horse or burro taken and held in the custody of the authorized officer. This term does not apply to an animal placed in private custody through a cooperative agreement under § 4740.2 (b) or § 4750.2.

(m) "Humane procedure" means kind and merciful treatment, without causing unnecessary stress or suffering to the animal in all actions involving roundups, other capture operations, handling, transporting, or other involvement with wild free-roaming horses and burros.

3. Section 4720.2 is amended by revising paragraph (a) to read as follows:

§ 4720.2 Claimed animals.

(a) Any person claiming ownership under State branding and estray laws of unbranded or branded horses or burros on public land where such animals are not authorized must present evidence of ownership to justify a roundup before permission will be granted to gather such animals. Claims of ownership with supporting evidence were required to be filed during a 90-day claiming period which expired November 15, 1973. Unauthorized privately owned horses or burros entering onto the public lands after November 15, 1973, may be claimed by filing an application with the District Manager. All written authorizations to gather claimed animals shall be on a form approved by the Director and shall provide for compliance with appropriate provisions of Subpart 4720. After such public notice as the authorized officer deems appropriate to inform interested parties, he may authorize the gathering or roundup. The authorized officer shall provide in the authorization that the gathering or roundup shall be consistent with these regulations and shall exclude the use of aircraft or motor vehicles solely to capture claimed horses or burros; shall establish in the authorization a reasonable period of time to allow the gathering of the claimed animals; and shall provide such other conditions in the authorization which he deems necessary to minimize stress on any associated wild free-roaming horses or burros and to protect other resources.

* * * * *

4. Subpart 4730 is amended by adding §§ 4730.7, 4730.7–1, 4730.7–2 and 4730.7–3 to read as follows:

§ 4730.7 Aircraft and motor vehicles.

§ 4730.7–1 Fixed-wing aircraft.

Fixed-wing aircraft may be used for inventory, observation, and surveillance purposes required for the administration of the Act. Such aircraft use shall be consistent with the Act of September 8, 1959, as amended (18 U.S.C. 41 et seq.). Fixed-wing aircraft shall not be used in connection with capture operations.

§ 4730.7–2 Helicopters.

Helicopters may be used in all phases of the administration of the Act including, but not limited to, inventory, observation, surveillance, and capture operations (see § 4740.4). The authorized officer shall supervise all helicopter use as follows:

(a) The authorized officer shall have the means to communicate with the pilot and be able to direct the use of the helicopter.

(b) The authorized officer shall be able to observe the effects of the use of the helicopter on the well-being of the animals.

§ 4730.7–3 Motor vehicles.

Motor vehicles may be used in the administration of the Act except that such vehicles shall not be used in connection with capture operations for driving or chasing the animals. The use of motor vehicles for the purpose of transporting captured animals is subject to the provisions of § 4740.4(b).

5. Subpart 4740 is amended by adding § 4740.4 to read as follows:

§ 4740.4 Humane use of helicopters and motor vehicles.

(a) The use of helicopters is authorized to locate the animals involved and for related purposes such as to transport personnel and equipment (including veterinarians and medical supplies). The condition of the animals shall be continuously observed by the authorized officer and should signs of unnecessary stress be noted, the source of stress shall be removed so as to allow for recovery. Helicopters may be used in roundups or other capture operations subject to the following humane procedures:

(1) Helicopters shall be used in such a manner that bands or herds will tend to remain together.

(2) The rate of movement shall not exceed limitations set by the authorized officer who shall consider terrain, weather, distance to be traveled, and condition of animals.

(3) The helicopter shall be used to enable the authorized officer to look for the presence of dangerous areas and move the animals away from hazards during the capture operation.

(4) During capture operations, animals shall be moved in such a way as to prevent unnecessary stress.

(b) Motor vehicles may be used for the purposes of transporting captured animals, subject to the following humane procedures:

(1) All such transportation shall be in compliance with appropriate State and Federal laws and regulations applicable to the transportation of animals (horses and burros).

(2) Vehicles shall be in good repair, of adequate rated capacity, and safely operated so as to insure that captured animals are transported without undue risk of injury.

(3) Vehicles shall be inspected and approved by an authorized officer prior to use.

(4) Animals shall be sorted as to age, size, and condition when transporting them so as to minimize, to the extent possible, injury due to fighting and trampling.

(5) The authorized officer shall consider the condition of the animals, weather conditions, type of vehicles, and distance to be transported when planning for the movement of captured animals.

CHRIS FARRAND,
Acting Assistant,
Secretary of the Interior.

JANUARY 19, 1977.

Office of Education

[45 CFR Part 185]

EMERGENCY SCHOOL AID

Waivers of Ineligibility for Discriminatory Assignment of Students to Classes

Under the authority of the Emergency School Aid Act (Title VII of Pub. L. 92–318, as amended; 20 U.S.C. 1601–1619), the U.S. Commissioner of Education, with the approval of the Assistant Secretary for Education and the Secretary of Health, Education, and Welfare, proposes to amend the regulation governing approval of waivers of ineligibility in the case of discriminatory assignment of students to classes (45 CFR 185.44(f)(3)) as set forth below.

The Emergency School Aid Act provides desegregation-related financial aid to educational agencies and other organizations. Section 706(d) of the Act (20 U.S.C. 1605(d)) prohibits aid to educational agencies which have engaged in certain prohibited practices, including racially discriminatory assignment of students to classes and other groupings. However, an educational agency found to have engaged in one of these practices may establish its eligibility for aid by applying for a waiver of ineligibility and showing that the practice has ceased to exist and will not reoccur.

The Commissioner has determined that the present regulations are not wholly adequate to ensure the proper corrective action in the case of waivers of ineligibility based on discriminatory assignment of students to groupings (particularly special education classes). The present regulations apply to all racially identifiable groupings that cannot be justified educationally, and do not make it clear that remedies appro-

priate for one kind of grouping (such as unjustified ability grouping) may not be appropriate for another kind (such as unjustified assignment to educable mentally retarded classes). During last year's funding cycle, this deficiency contributed to abrupt changes in the educational programs of educational agencies applying for waivers, and to the possible deprivation of needed services to some of the students affected. Further, the regulations do not expressly take into account statutory requirements pertaining to the proper treatment of handicapped students which have been enacted since the passage of the Emergency School Aid Act in 1972. Nor do the regulations ensure that students reassigned out of discriminatorily-constituted groupings receive special help in adjusting to their new educational settings.

The revised regulations proposed by this document are designed to accomplish three main purposes:

(a) Make it clear that waiver applications in the case of discriminatory assignment of students to special education groupings are not approvable if the applicant disbands the groupings even temporarily and reassigns students in them to regular classes;

(b) Condition the approval of waivers in the case of discriminatory assignment of students to special education groupings on the completion of evaluations and placements required for handicapped students under Pub. L. 94–142 (The Education of all Handicapped Children Act of 1975) and section 504 of Pub. L. 93–112 (The Rehabilitation Act of 1973); and

(c) Require that a student reassigned from any discriminatorily constituted grouping to a new grouping be provided transitional services to help the student adjust to the new grouping. In addition, the revised regulations incorporate other minor and editorial changes.

If you wish to comment on the proposed revised regulations, write or call:

Thomas B. Irvin, Donohue Building, Room 4926, 400 6th St., S.W., Washington, D.C. 20202. (202) 245–9805.

All comments received by 4:30 p.m. Washington, D.C. time on March 11, 1977 will be considered.

The U.S. Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance Numbers 13.525, 13.526, 13.528, and 13.529.)

Dated: January 12, 1977.

VIRGINIA Y. TROTTER,
Assistant Secretary for Education.

Approved: January 12, 1977.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Revised 45 CFR 185.44(f)(3) is proposed to read as follows:

§ 185.44 Waiver of ineligibility.

* * * * *

(f) Discrimination against children:

* * * * *

(3) (i) In the case of the assignment of students to racially or ethnically identifiable groups, tracks, or classes which cannot be justified educationally, as described in § 185.43(d)(5), an educational agency shall submit the following information:

(A) If the assignment was to a grouping to provide special education or related services to handicapped students, evidence that the students so assigned have been evaluated and placed in accordance with requirements for evaluation and placement of handicapped students under Pub. L. 94–142 and section 504 of Pub. L. 93–112, and any regulations under those statutes; or

(B) If the assignment was to other groupings, evidence that the students so assigned have been nondiscriminatorily reassigned to groupings that are not racially or ethnically identifiable, or evidence that the students so assigned have been reassigned to groupings in accordance with the criteria in § 185.43(c)(1)–(3).

(ii) If the educational agency reassigns any student to a new grouping under paragraph (f)(3)(i) of this section, it shall also submit evidence that it has made provision for such transitional services as are necessary to enable the student to participate meaningfully in the educational program of the new grouping.

(Pub. Law 92–318, secs. 706(d)(1)–(3).)

Farmers Home Administration

[Designation Number A425]

LOUISIANA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Caldwell Parish, Louisiana, as a result of drought June 1 through October 31, 1976.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Edwin Edwards that such designation be made.

Applications for emergency loans must be received by this Department no later than March 10, 1977, for physical losses and October 7, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, DC, this 18th day of January, 1977.

FRANK B. ELLIOTT,
Administrator, Farmers Home Administration.

[FR Doc.77–2368 Filed 1–24–77;8:45 am]

[Designation Number A428]

TEXAS

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Lee County, Texas, as a result of excessive rainfall during the growing season April 1 through June 30, 1976, and again during harvest season September 15 through December 13, 1976.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

Applications for emergency loans must be received by this Department no later than March 10, 1977, for physical losses and October 7, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, DC, this 18th day of January, 1977.

FRANK B. ELLIOTT,
Administrator, Farmers Home Administration.

Forest Service

BANKHEAD NATIONAL FOREST TIMBER MANAGEMENT PLAN

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Bankhead National Forest Timber Management Plan, National Forests in Alabama, USDA–FS–RS–FES (Adm.) 76–23.

This unit contains 179,294 acres of National Forest land located in Winston, Lawrence and Franklin Counties. Major actions are harvesting timber products, development and maintenance of wildlife improvements, development of recreation facilities for dispersed recreation and construction and reconstruction of roads.

This final environmental statement was transmitted to CEQ January 17, 1977. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Rm. 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, 1720 Peachtree Street, NW., Rm. 804, Atlanta, Georgia 30309.
U.S. Forest Service, 1765 Highland Avenue, Box 40, Montgomery, Alabama 36101.

A limited number of single copies are available upon request to Forest Supervisor, National Forests in Alabama, 1765 Highland Avenue, Box 40, Montgomery, Alabama 36101.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

Dated: January 17, 1977.

ROBERT F. WILLIAMS,
Regional Environmental Coordinator.

NATIONAL MEAT AND POULTRY INSPECTION ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that a meeting of the National Meat and Poultry Inspection Advisory Committee will be held on February 9, 1977, beginning at 9 a.m. in Room 4306, South Building, U.S. Department of Agriculture, Washington, D.C.

The purpose of this Committee is to advise and make recommendations to the Secretary of Agriculture regarding operations pertaining to meat and poultry inspection programs pursuant to section 301 of the Federal Meat Inspection Act and section 5 of the Poultry Products Inspection Act. Matters to be discussed will include administrative procedures relating to letters of credit for State funds; cooperative agreements; inplant quality control programs; survey and study of dry sausage; review of the Salmonella Advisory Committee activities; and an update on the recommendations of the Expert Panel on Nitrates and Nitrosamines, contact study of meat and poultry inspection and litigation activities.

This meeting is open to the public, but space and facilities are limited. Comments of interested person may be filed with the Committee before or after the meeting.

Information pertaining to this meeting may be obtained from Dr. James K. Payne, Room 4347, South Building, U.S.

Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC 20250, Area Code (202) 447-6313.

Dated: January 21, 1977.

F. J. MULHERN,
Vice Chairman.

CIVIL AERONAUTICS BOARD

[Order 77-1-39; Docket 29123; Agreement C.A.B. 26256; R-1 through R-8]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 10, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 2 (Europe/Africa/Middle East) of the International Air Transport Association (IATA). The agreement was adopted at the Composite Passenger Traffic Conference held in Miami during September/October 1976, and has been assigned the above C.A.B. agreement number.

We will approve the first- and economy-class fares, which are combinable with fares to/from United States points and thus have indirect application in air transportation as defined by the Act, but will disclaim jurisdiction with respect to creative fares which are not similarly combinable.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14:

1. It is not found that the following resolutions, incorporated in Agreement C.A.B. 26256 as indicated, and which have indirect application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
26256:			
R-1	001b	TC2—Special Effectiveness Resolution (Tie-in)	2
R-2	002	Standard Readoption Resolution	2
R-3	022b	TC2 (Except Within Europe) Adjustment Factors For Sales of Passenger Air Transportation (New).	2
R-4	052	TC2 First Class Fares	2
R-5	062	TC2 Economy Class Fares	2

2. It is not found that the following resolutions, incorporated in Agreement C.A.B. 26256, affect air transportation within the meaning of the Act:

Agreement CAB	IATA No.	Title	Application
26256:			
R-6	072b	TC2 Creative Fares Except Europe (Readopting and Amending)	2
R-7	075a	TC2 Common Interest Group Fares (Readopting and Amending)	2
R-8	093	TC2 Teachers Fares (Readopting and Amending)	2

Accordingly, *It is ordered*, That:

1. Those portions of Agreement C.A.B. 26256 described in finding paragraph 1 above, which have indirect application in air transportation as defined by the Act, be and hereby are approved; and

2. Jurisdiction be and hereby is disclaimed with respect to those portions of Agreement C.A.B. 26256 described in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-2163 Filed 1-24-77;8:45 am]

[Order 77-1-53; Docket 27573; Agreement C.A.B. 26316 R-1 through R-3; Agreement C.A.B. 26325 R-1 through R-3]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 11, 1977.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA).

The agreements name additional specific commodity rates as set forth below, reflecting reductions from general cargo rates; and were adopted pursuant to unprotested notice to the carriers and promulgated in IATA letters dated December 17 and 23, 1976.

Agreement CAB	Specific commodity Item No.	Description and rate
26316:		
R-1	2206	Clothing, footwear, outerwear, undergarments, finished or semifinished.[1] 310 c/kg minimum weight 500 kg. From New York to Lagos.
R-2	2006	Clothing, footwear, outerwear, undergarments, finished or semifinished.[1] 146 c/kg,[2] minimum weight 200 kg. From Bucharest to New York.
R-3	4375	Totalizators (pari-Mutuel) including ticket rolls. 275 c/kg, minimum weight 1,000 kg. From Sydney to New York.
26325:		
R-1	1407	Floral and nursery stock and seeds, excluding cut flowers. 153 c/kg,[3] minimum weight 200 kg. From Copenhagen to New York.
R-2	3405	Stoves and ranges, pans, kettles and baking tins,[4] 104 c/kg,[3] minimum weight 500 kg. 99 c/kg,[3] minimum weight 1,000 kg. From Paris to New York. 106 c/kg,[3] minimum weight 500 kg. 101 c/kg,[3] minimum weight 1,000 kg. From Lyon to New York.
R-3	4204	Parts of automobiles, motorscooters, motorcycles, bicyles,[4] 145 c/kg, minimum weight 100 kg. 107 c/kg, minimum weight 200 kg. From New York to Budapest.

[1] See applicable tariffs for complete commodity descriptions.
[2] Expires Sept. 30, 1977.
[3] Expires Dec. 31, 1977.
[4] See applicable tariffs for complete commodity descriptions.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreements are adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *it is ordered*, That:

Agreements C.A.B. 26316, R-1 through R-3 and C.A.B. 26325, R-1 through R-3, are approved, provided that (a) approval shall not constitute approval of the specific commodity description contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-2164 Filed 1-24-77;8:45 am]

[Order 77-1-55; Docket 27573; Agreement C.A.B. 26234]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 11, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 2 of the International Air Transport Association (IATA). The agreement was adopted at the 38th Meeting of the TC2 Specific Commodity Rates Board in Geneva held November 15-20, 1976.

The agreement would establish several new specific commodity descriptions and change the area of application on several descriptions as well as change the descriptions as shown in the Attachment and establish specific commodity rates for several items to apply between various world markets outside of air transportation (Europe/Africa/Middle East). We will approve the descriptions as shown in the Attachment which have general application within air transportation as defined by the Act but will disclaim jurisdiction with respect to the rates which involve points solely outside of air transportation.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the specific commodity descriptions incorporated in Agreement C.A.B. 26324, which have general application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act.

2. It is not found that the specific commodity rates incorporated in Agreement C.A.B. 26324 which involve transportation solely between foreign points affect air transportation within the meaning of the Act.

Accordingly, *it is ordered*, That:

1. Those portions of Agreement C.A.B. 26324 set forth in the Attachment which have general application in air transportation as defined by the Act, be and hereby are approved; and

2. Jurisdiction be and hereby is disclaimed with respect to that portion of Agreement C.A.B. 26324 described in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

AGREEMENT C.A.B. 26324

Item No.	*Description*
0176	Chocolate and chocolate manufactures.[1]
0230Q	Eggs—fresh.[1]
0306	Fish and fish products.[1]
0326	Fish—excluding live, inedible.[1]
0356	Fish, crabs and or shrimps—excluding fish, live, inedible.[1]
0609	Turkey meat.[1 2]
1435	Carnation and chrysanthemum cuttings.[1]
1436	Carnation and chrysanthemum cuttings.[1]
1926	Artificial sausage casings.
2315	Tee-shirts and slips.[1 2]
2413	Cotton denim outwear.[4]
2811	Blankets, bed sheets, bedspreads, pillowcases, mosquito nets and towels.[4]
4414	Loudspeakers, tape recorders, record players, radios, amplifiers and accessories thereof.[1 2]
4456	Electrical parts for automobiles.[1 2]
4816	Tools consisting of twist drills, masonry drills, milling cutters, reamers, tool bits, hacksaw blades, punches, builders levels, screwdrivers, hammers, pliers, vices, shifting and/or adjustable spanners.[4]
4951	Pneumatic equipment and tools, namely compressors, hoists, rock drill machines, hand-held power tools, centrifugal and reciprocating pumps, steam jet ejectors.[3]
4953	Compressors.[4]
4969	Pistons and piston rings.[4]
5706	Quartz, raw.[1 2]
6112	Plastic sheets in rolls/strips.[4]
6230	Cylinders—empty or filled—with medical gases.[1 2]
7123	Religious books.[4]
7184	Technical documents for drilling operations.[4]
7448	Rubber seals.[3]
7610	Wooden furniture unassembled, plywood, veneer wood, sawn timber.[1 2]
8419	Films and photographs excluding newsreel film and motion picture film, or 35 mm or larger dimensions.[3]
9592	Empty fire extinguishers.[4]
9969	Safety and/or racing helmets, work gloves, safety harnesses used by an individual for construction, building, maintenance and mining.[4]

[1] Area of application changed.
[2] Description changed.
[3] Deleted.
[4] New description.

[FR Doc.77-2165 Filed 1-24-77;8:45 am]

[Order 77-1-85; Docket 29123; Agreement C.A.B. 26211, R-1 through R-8]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 14, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement was adopted at the Composite Passenger Traffic Conference held in Miami, Florida during October 1976.

Agreement C.A.B. 26211, which only affects air transportation indirectly, would establish new fare levels between points within South America effective May 1, 1977 through March 31, 1978. In general, all first-class, economy, and promotional fares would be increased by five percent. However, special fares to/from Venezuela would be increased by seven percent, except for special fares between Venezuela and Brazil which would be increased by the five percent formula. We will approve those portions of the agreement governing fares which are combinable with fares to/from United States points and thus have indirect application in air transportation as defined by the Act. Jurisdiction will be disclaimed on the balance of the resolutions which govern noncombinable fares and thus have no application in air transportation.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the following resolutions, incorporated in the agreement as indicated and which have indirect application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
26211:			
R-1	001h 111	TC1—Special Effectiveness Resolution (Tie-in)	1 (South America).
R-2	002 111	Standard Adoption Resolution	1 (South America).
R-3	051d	TC1 First-Class Fares	1 (South America).
R-4	061d	TC1 Economy-Class Fares	1 (South America).
R-5	070j	TC1 Excursion Fares—Within South America (New)	1.

2. It is not found that the following resolutions, incorporated in the agreement as indicated, affect air transportation within the meaning of the Act:

Agreement CAB	IATA No.	Title	Application
26211:			
R-6	075L	TC1 30-Day Group Excursion Fares (Within South America) (Revalidating and Amending).	1
R-7	084hh	TC1 Group Inclusive Tour Fares—South America (Revalidating and Amending).	1
R-8	084w	TC1 Group Inclusive Tour Fares—Bolivia/Chile/Colombia/Ecuador/Peru.	1

Accordingly, *it is ordered*, That:

1. Those portions of Agreement C.A.B. 26211, described in finding paragraph 1 above and which have indirect application in air transportation as defined by the Act, be and hereby are approved; and

2. Jurisdiction be and hereby is disclaimed with respect to those portions of Agreement C.A.B. 26211 described in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-2162 Filed 1-24-77;8:45 am]

[Order 77-1-58; Docket 29123; Agreement C.A.B. 26356]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Delayed Inaugural Flights Agreement

ORDER

Issued under delegated authority January 11, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

The agreement would permit Ecuatoriana to postpone to a date not later than March 31, 1977, the performance of its inaugural flight between Nassau, Bahamas and Quito, Ecuador.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14, it is not found that resolution 100 (Mail 90) 200h incorporated in Agreement C.A.B. 26356 as indicated, is adverse to the public interest or in violation of the Act.

Accordingly, *it is ordered*, That:

Agreement C.A.B. 26356 be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

COMMISSION ON CIVIL RIGHTS

NEW YORK ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the New York Advisory Committee (SAC) of the Commission will convene at 4:30 p.m. and end at 7:30 p.m. on February 9, 1977, at the Phelps Stokes Fund, New York, New York 10028.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Northeast Regional Office of the Commission, 26 Federal Plaza, Room 1639, New York, New York 10007.

The purpose of this meeting is to discuss ongoing Asian American project and plans for new project.

This meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.77-2333 Filed 1-24-77;8:45 am]

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

BOWMAN GRAY SCHOOL OF MEDICINE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00492. Applicant: Bowman Gray School of Medicine of Wake Forest University, 300 South Hawthorne Road, Winston-Salem, North Carolina 27103. Article: Electron Microscope, Model EM 9S-2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for viewing biological tissue specimens of various types. Research to be conducted will include:

1. The identification and characterization of synaptosomes from specially treated and prepared nervous tissue.

2. The identification of myelin figures by negative staining procedures and research concerning muscle metabolism.

3. Effects of intrauterine devices and prostaglandines on the female reproductive system and regenerative repair in the vertebrate central nervous system.

The article will also play a major role in a training program and will be used as the teaching instrument in an electron microscope course entitled, "Methods in Histological Research—Anatomy 407."

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time Customs received this application (July 23, 1976).

Reasons: The foreign article is a relatively simple, easy to operate, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programming. The article provides 7 Angstroms point to point resolution, an accelerating voltage of 60 kilovolts (KV), and low distortion magnifications from 140-60,000X (Magnifications of 140 to 1000X are within the normal, light microscopic range). Thus the article covers the range of light and electron microscopy. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 10, 1976 that the low distortion, low magnification capabilities available specifically in the optical range at 140X, as well as, simplicity and ease of operation are pertinent to the purposes for which the foreign article is intended to be used. HEW also advises that it knows of no domestic instrument or apparatus which provided the pertinent features of the article at the time customs received this application.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used, which was being manufactured in the United States at the time Customs received this application.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Imports Programs Division.

[FR Doc.77-2276 Filed 1-24-77;8:45 am]

CARNEGIE INSTITUTION OF WASHINGTON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00523. Applicant: Carnegie Institution of Washington, Department of Embryology, 115 W. University Parkway, Baltimore, Md. 21210. Article: Electron Microscope Model JEM-100S and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of DNA molecules, artificial membranes, membranes of cultured cells, and ultrastructure of nerve and muscle cells. The experiments to be conducted will include measuring the length of single- and double-stranded regions of DNA molecules that have been enzymatically digested, observing the fusion of artificial and natural membranes, locating and quantifying specific proteins in nerve and muscle cells, and characterizing the distribution and structure of synapses in the nervous system. The article will also be used for training graduate students and postdoctoral trainees who are working on the research described above.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be use, was being manufactured in the United States at the time the foreign article was ordered (September 9, 1976).

Reasons: The foreign article is equipped with a eucentric side entry goniometer stage with a specified resolving power of 7Å point to point. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 20, 1976 that the eucentric goniometer stage of the article is pertinent to the applicant's studies. HEW further advises that it knows of no domestic instrument which provided the pertinent feature at the time of order.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Open Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Computer Systems Technical Advisory Committee will be held on Thursday, February 10, 1977, at 9:30 a.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The agenda for the meeting is:

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Reports on the work programs of the Subcommittees:
(a) Technology Transfer;
(b) Foreign Availability;
(c) Licensing Procedures; and
(d) Hardware.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available upon written request

addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

Dated: January 19, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.77-2255 Filed 1-24-77;8:45 am]

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE; FOREIGN AVAILABILITY SUBCOMMITTEE

Open Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee will be held on Wednesday, February 9, 1977, at 1 p.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was intially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to section 5(c) (1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c) (1) and the Federal Advisory Committee Act. The Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (CO COM) controls. The Foreign Availability Subcommittee was formed to ascertain if certain kinds of equipment are available in non-COCOM and Communist bloc countries, and if such equipment is available, then to ascertain if it is technically the same or similar to that available elsewhere.

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discuss new work program for 1977.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

Dated: January 19, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.77-2253 Filed 1-24-77;8:45 am]

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE; HARDWARE SUBCOMMITTEE OF THE

Open Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Hardware Subcommittee of the Computer Systems Technical Advisory Committee will be held on Wednesday, February 9, 1977, at 9 a.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue, NW, Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to section 5(c) (1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Hardware Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to (a) maintenance of the processor performance tables and further investigation of total systems performance; and (b) investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

The agenda for the meeting is:

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion of computer performance measurements.

(4) Discuss new work program for 1977.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

Dated: January 19, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.77-2254 Filed 1-24-77;8:45 am]

CORNELL UNIVERSITY MEDICAL COLLEGE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the partment of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00510. Applicant: Cornell University Medical College, 525 East 68 Street, New York, New York 10021. Article: Blood Gas Electrode Meter Type D 22—modified for 110 V, 60C current. Manufacturer: L. Escheweiler & Co., West Germany. Intended use of article: The article is a replacement part for an existing blood gas instrument being used for investigation of oxygen and carbon dioxide tension in blood and cerebral spinal fluid.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to an accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The Department of Health, Education, and Welfare advises in its memorandum dated December 10, 1976 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses.

The Department of Commerce knows of no other similar accessory being manufactured in the United States, which are interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.77-2273 Filed 1-24-77;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00508. Applicant: DHEW, National Institutes of Health, Laboratory of Biophysics, IRP, NINCDS, Marine Biological Laboratory, L-320, Woods Hole, Mass. 02543. Article: Ultramicrotome, Model LKB 8800A with cryokit. Model 14800-1 and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of the nervous system of several species of invertebrates and vertebrates. Special attention will be given to histochemistry with frozen sections.

Investigators will study the subcellular localization of enzymes especially those involved with neurotransmitters metabolism. The distribution of diffusible substances within the cell after being taken up by the cell will also be investigated. Tracing specific synapses and other cell to cell contact with membrane specialization will be conducted after intracellular injection of markers to identified cells. Changes in intracellular spaces and in membrane structure or in membrane interaction between two neighboring cells induced by changes in their biochemical and biophysical environments will also be studied. Application received by Commissioner of Customs: August 12, 1976. Advice submitted by the Department of Health, Education, and Welfare on December 10, 1976.

Docket Number: 76-00527. Applicant: Deborah Heart and Lung Center, Clinical Laboratory, Department of Pathology, Trenton Road, Browns Mills, New Jersey 08015. Article: Ultramicrotome, Model LKB 8800A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations that will include ultrastructural studies on normal and pathologic plant and animal tissues, developmental studies on fungal systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at host-parasite interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environments. In addition, the article will be used in the courses Ultrastructure and Cytochemistry which involve a study of general principles on techniques and the use of the electron microscope to study the fine structure of cells and various subcellular organelles and the employment of cytochemical staining methods to localize various enzymes. Application received by Commissioner of Customs: September 3, 1976. Advice submitted by the Department of Health, Education, and Welfare on December 20, 1976.

Docket Number: 76-00529. Applicant: University of Texas System Cancer Center, Department of Laboratory Medicine, 6723 Bertner Drive, Houston, Texas 77025. Article: Ultramicrotome, Model LKB 8800A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of human hematopoietic tissues including bone marrow and peripheral blood specimens. Investigations will include ultrastructural studies on normal and pathologic hematopoietic tissue for the purpose of diagnostic studies. Application received by Commissioner of Customs: September 3, 1976. Advice submitted by the Department of Health, Education, and Welfare on December 20, 1976.

Docket Number: 76-00532. Applicant: Cornell University Medical College, Department of Pathology, Room C-346, 1300 York Avenue, New York, N.Y. 10021. Article: Ultramicrotome, Model LKB 8900A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations that will include (1) ultrastructural studies on formal and pathologic plant and animal tissues, developmental studies on fungal systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at hostparasite interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environments. The article will also be used for educational purposes in the courses Ultrastructure and Cytochemistry which will involve a study of general principles on techniques and the use of the electron microscope to study the fine structures of cells and various subcellular organelles and the employment of cytochemical staining methods to localize various enzymes. Application received by Commissioner of Customs: September 9, 1976. Advice submitted by the Department of Health, Education, and Welfare on December 20, 1976.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States.

Reasons: Each of the foreign articles provides a range of cutting speeds from 0.1 to 20 millimeters per second. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket Number 69-00665-33-46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting, (among such (other) factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket Number 70-00077-33-46500) which also relates to an article that is identical to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that the "pro-

duction of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments. For these reasons, we find that the Sorvall Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

SOUTHERN ILLINOIS UNIVERSITY SCHOOL OF MEDICINE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Material Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number 76-00530. Applicant: Southern Illinois University School of Medicine, P.O. Box 3926, Springfield, Ill. 62708. Article: Cryokit, Model LKB 14800-1 for use with LKB Ultratome III. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of immune complex localization in kidney disease as well as other biological materials and for microanalysis of biological specimens in the future. Conjugation with various antigens will be carried out on frozen sectioned material for both immunofluorescence and electron microscope studies.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to an accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The Department of Health, Education, and Welfare advises in its memorandum dated December 20, 1976 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses.

The Department of Commerce knows of no other similar accessory being manufactured in the United States, which are interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

UNIVERSITY OF IOWA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00511. Applicant: The University of Iowa, College of Medicine, Department of Physiology & Biophysics, Iowa City, Iowa 52240. Article: Flow scintillation counting system and accessories. Manufacturer: Berthold Instruments, West Germany. Intended use of article: The article is intended to be used for the study of peptide hormones and blood factors. Specifically, the article will be used for determination of the primary sequence of Somantomedian C isolated from human blood plasma which would allow synthesis of large quantities for clinical treatment of patients having growth hormone deficiencies.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a small volume (100 microliters) measuring flow cell. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 10, 1976 that the capability described above is pertinent to the applicant's research studies. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF MASSACHUSETTS MEDICAL SCHOOL, ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C.

Docket number: 76-00522. Applicant: University of Massachusetts Medical School, Department of Anatomy, 55 Lake Ave., North, Worcester, MA 10605. Article: Electron Microscope, Model JEM-100S and accessories. Manufacturer: Jeol, Japan. Intended use of article: The article is intended to be used for examination of biological tissues which will include both the male and female reproductive system in various stages of differentiation and development, the organ of corti in the inner ear and the nerves leading to that organ, bone and connective tissue under various experimental pathological disease states, kidney following induced experimental disease, lymphoid and blood elements from pathological disease states, both peripheral and central nervous systems from a number of genetic diseases and disorders. Experiments to be conducted will be aimed at determining the structure of cells and the role of various components in the economy of the cell. The article will also be used to teach and train graduate students involved in a new graduate program and to teach microscopy to medical students who elect to do research in microscopy anatomy. Application received by Commissioner of Customs: August 25, 1976. Advice submitted by the Department of Health, Education, and Welfare on: December 20, 1976. Article ordered: August 17, 1976.

Docket number: 76-00526. Applicant: University of Massachusetts Medical School, Department of Pathology, 55 Lake Avenue North, Worcester, MA 01605. Article: Electron Microscope, Model JEM 100S and Haskris recirculating water chiller. Manufacturer: Jeol, Japan. Intended use of article: The article is intended to be used for examination of biological tissues which will include the heart and great vessels of animals with experimental cardiovascular disease, the pancreas, kidneys and skeletal muscle of animals with experimental diabetes, the brain and other tissues after the induction of inflammation. In addition, bone marrow specimens, biopsies of human tumors, kidney and liver biopsies and other tissue specimens obtained for diagnostic and educational purposes will be examined. Experiments to be conducted will be aimed at determining the pathophysiology of inflammation, atherosclerosis, diabetes mellitus and leukemia. Studies of a variety of human tumors will assist in the understanding and treatment of cancer. The article will also be used to teach and train post doctoral fellows, pathology residents and staff as well as to teach microscopy to medical students who elect to do research in pathology. Application received by Commissioner of Customs: September 3, 1976. Advice submitted by the Department of Health, Education, and Welfare on: December 20, 1976. Article ordered: August 17, 1976.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered. Reasons: Each foreign article provides distortion free micrographs over a magnification range of 100 to 200,000× without a pole-piece change. The Department of Health, Education, and Welfare (HEW) advises in its respectively cited memoranda that each article's low distortion in the low magnification range is pertinent to each applicant's intended use. HEW further advises that it knows of no domestic instrument which provided the pertinent feature at the time of order.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States at the time the articles were ordered.

VETERANS ADMINISTRATION HOSPITAL—TACOMA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00445. Applicant: Veterans' Administration Hospital, American Lake, Tacoma, WA 98493. Article: Microtome, Universal Cut-All, Spare Parts and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to prepare undermineralized human bone biopsies for quantitative histological measurements. Several experimental groups are to be evaluated in order to determine the pathology of bone diseases and to evaluate the efficacy of specific therapeutic programs in controlled studies. Renal bone disease, primarily osteoporosis, and vitamin D deficiency are scheduled for study.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is a sophisticated, massive and rigid microtome which is capable of providing 0.1 micron sections of raw bone consistently. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 10, 1976 that the capabilities of the article described above are pertinent to the applicant's intended use. HEW also advises that it knows of no domestic instrument which provides all the pertinent features of the article.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

VETERANS ADMINISTRATION, WADSWORTH HOSPITAL CENTER—LOS ANGELES

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00533. Applicant: Veterans Administration, Wadsworth Hospital Center, Wilshire and Sawtelle Blvds., Los Angeles, California 90073. Article: Electron Microscope, Model EM 400 with single condenser lens and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article will be used for studies of the glomerular capillary wall in rats and humans including the arrangement of the glycoprotein macromolecular filaments, 12 Å wide, in the free surface coat of the visceral epithelial cell, the cell-membrane relationships in the vicinity of the glomerular epithelial slit, the relationships between the outer layer of the trilaminar-plasma membrane and the surface coat, and the relationships between the slit membrane and the surface coat. The specific aim of the investigations is to define those factors or influences which prevent, stabilize or heal injury to the glomerulus. The article will also be used for educational purposes in the course Approved Residency in Pathology and a Clinical Laboratory Technological Trainee Program.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (March 4, 1976).

Reasons: The foreign article provides a magnification range of 50 to 800,000X and adequate illumination over this range due to built-in electronically ad-

justable anode to shield distance. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 20, 1976 that the capabilities described above are pertinent to the applicant's intended purposes. HEW further advises that it knows of no domestic instrument which provided the pertinent features at the time of order.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

Economic Development Administration

FLOWER HANDBAG MANUFACTURING CORP.

Petition for a Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Flower Handbag Manufacturing Corporation, 25 Hall Street, Brooklyn, New York 11205, a producer of handbags for women and girls, was accepted for filing on January 17, 1977, pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of February 4, 1977.

JACK W. OSBURN, JR.,
Chief, Trade Act Certification Division, Office of Planning and Program Support.

National Fire Prevention and Control Administration

ADVISORY COMMITTEE ON FIRE TRAINING AND EDUCATION FOR THE NATIONAL ACADEMY FOR FIRE PREVENTION AND CONTROL

Meeting Change

The time and place of the Advisory Committee on Fire Training and Education for the National Academy for Fire Prevention and Control meeting, previously announced to be held on January 31 and February 1, 1977, from 8:30 a.m. to 5 p.m., in the Press Room, Washington Hotel, 15th Street at Pennsylvania Avenue NW., Washington, D.C., has been changed to January 31, 1977, 8:30 a.m.-12:15 p.m., at 2400 M Street NW., Room 114, Washington, D.C., 2 p.m.-5 p.m., in the Press Room, Washington Hotel, 15th Street at Pennsylvania Avenue NW., Washington, D.C.; and on February 1, 1977, 8:30 a.m.-4 p.m., in the Capitol Room, Washington Hotel, 15th Street at Pennsylvania Avenue NW., Washington, D.C. The notice of this meeting was previously published in the January 6, 1977, FEDERAL REGISTER, Volume 42, No. 4, pages 1286-87, FR Doc. 77-530. All other information related to this meeting announcement remains as originally published.

Dated: January 19, 1977.

HOWARD D. TIPTON,
Administrator, National Fire Prevention and Control Administration.

Office of the Secretary

WEATHER MODIFICATION ADVISORY BOARD

Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App I (Supp. V, 1975)) and the Office of Management and Budget Circular A-63 of March 1974, and after consultation with OMB, the Secretary of Commerce has determined that the establishment of the Weather Modification Advisory Board is in the public interest in connection with the performance of duties imposed on the Department by law.

The Board will advise and make recommendations to the Secretary, through the Administrator of the National Oceanic and Atmospheric Administration, on matters of a national policy, a national research and development program, and other aspects of weather modification as outlined in the National Weather Modification Policy Act of 1976 (Pub. L. 94-490), enacted October 13, 1976. The scope of the Board's activities covers research; development; operations; economic, social, environmental, and legal impacts; funding; program management; legislation; regulation; and international implications and agreements.

The Board will consist of about 17 members, with a balanced representation of scientific groups, academia, operators, users, environmentalists, lawyers, consumers, government officials, etc., appointed by the Secretary of Commerce.

The Board will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act.

Interested persons are invited to submit comments regarding the establishment of the Weather Modification Advisory Board. Such comments as well as any inquiries, may be addressed to the Associate Administrator, Environmental Monitoring and Prediction, National Oceanic and Atmospheric Administration, Rockville, Maryland 20852, phone: 301-443-8646.

Dated: January 18, 1977.

JOSEPH E. KASPUTYS,
Assistant Secretary for Administration.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Additions

Notice is hereby given pursuant to section 2(a)(2) of Pub. L. 92-28; 85 Stat. 77, of the proposed addition of the following services and commodities to Procurement List 1977, November 18, 1976 (41 FR 50975).

Tax Form Order Fulfillment Services, Buffalo and Western New York, N.Y.
Campground Cleanup and Trash Removal. U.S.D.A., Forest Service, Laramie, Wyoming.

Class 4910

Creeper, Mechanics
4810-00-106-7834

Class 7340

Spoon, Plastic
7340-00-J19-1300

If the Committee approves the proposed additions, all entities of the Government will be required to procure the above services and commodities from workshops for the blind or other severely handicapped.

Comments and views regarding the proposed deletions may be filed with the Committee on or before February 24, 1977. Communications should be addressed to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

This notice is automatically cancelled six months from the date of this FEDERAL REGISTER.

By the Committee.

C. W. FLETCHER,
Executive Director.

CONSUMER PRODUCT SAFETY COMMISSION

PROPOSED EXEMPTION FROM PREEMPTION FOR CALIFORNIA'S CHILDREN'S CLOTHING FLAMMABILITY REGULATIONS

Oral Proceedings

The purpose of this notice is to announce that the Consumer Product Safety Commission will offer interested persons an opportunity for oral presentations concerning the proposed exemption from preemption under section 16(c) of the Flammable Fabrics Act (FFA) (15 U.S.C. 1203(c)) for California's children's clothing flammability regulations. The oral presentations will be in Washington, D.C. on February 7; in San Francisco, California, on February 14; and in Los Angeles, California on February 15. The Commission invites any interested person to submit by February 2 a request to make an oral presentation at any of the three locations.

BACKGROUND

In a letter dated October 25, 1976, the California State Fire Marshal requested the Commission to grant an exemption from preemption under the FFA for its regulations. The Commission published the proposed exemption, with a memorandum from the California State Fire Marshal, in the FEDERAL REGISTER of December 27, 1976 (41 FR 56294), in accordance with section 16 of the FFA (15 U.S.C. 1203) and the Commission's proposed and interim procedures concerning applications for exemption from preemption under the FFA. (July 29, 1976, 41 FR 31569).

The California regulations require items of children's clothing meeting only the criteria of acceptance of Federal Standard CS 191-53 (16 CFR Part 1610) to bear cautionary labeling, when sold or offered for sale in California on or after July 1, 1977. The California regulations also require items of children's clothing sold or offered for sale in California on or after July 1, 1979 to meet the criteria of acceptance stipulated in the Federal flammability standards for children's sleepwear, FF 3-71 (16 CFR Part 1615) and FF 5-74 (16 CFR Part 1616), or any other standard approved by the State Fire Marshal. If the Commission grants the proposed exemption, the California flammability regulations for children's clothing would not be preempted under section 16 of the FFA.

Prior to granting any application for an exemption from preemption under the FFA, the Commission must provide an opportunity for the presentation of written and oral views concerning the proposal, in accordance with Section 16 of the Act and the proposed and interim procedures. In the December 27, 1976 FEDERAL REGISTER notice proposing the exemption, the Commission solicited written comments from interested persons, to be received by the Commission's Office of the Secretary on or before February 25, 1977. In this notice, the Commission is providing for oral proceedings concerning the proposed exemption.

RELEVANT ISSUES TO BE ADDRESSED IN ORAL PRESENTATIONS

Section 16(c) of the FFA permits the Commission to grant an exemption from preemption if: (1) Compliance with the State or local flammability requirement would not cause the fabric, product, or related material to be in violation of the Federal requirement, (2) the State or local flammability requirement provides a significantly higher degree of protection than the Federal requirement, and (3) the State or local requirement would not unduly burden interstate commerce. To assist the Commission in reaching conclusions concerning the degree of protection provided by the California regulations and the extent to which the regulations would burden interstate commerce, the Commission would like oral presentations to address the following questions, in addition to any other relevant matters the participants wish to address:

1. Whether the California regulations concerning the flammability of children's clothing would provide a significantly higher degree of protection from the risk of occurrence of fire with respect to which the Federal standard, CS 191-53, is in effect.

2. Whether the California regulations concerning the flammability of children's clothing would unduly burden interstate commerce, specifically,

(a) Whether it is technologically feasible to comply with the California regulations.

(b) Whether it is economically feasible to comply with the California regulations.

(c) Whether the cost of complying with the California regulations would unduly burden interstate commerce.

(d) The present geographic distribution of the items to which the California regulations would apply, and projections of future geographic distribution.

(e) The probability that other States or local governments will apply for an exemption for a similar flammability standard or other regulation.

(f) Whether there are any particular circumstances affecting the State of California that make it necessary for California to establish its regulations.

PROCEDURES FOR ORAL PROCEEDINGS

The oral proceedings will be informal, nonadversary, legislative type proceedings at which there will be no formal pleadings or adverse parties.

The proceedings will be conducted impartially, thoroughly, and expeditiously to allow interested persons an opportunity for oral presentation of data, views or arguments while preserving the basic informal nature of rulemaking under section 553 of title 5 of the United States Code. The oral presentations will be transcribed. A copy of the transcript for each oral proceeding will be available for examination by interested persons in the Commission's Office of the Secretary shortly after the presentations.

It is anticipated that a Commissioner will preside at each of the oral proceedings. The presiding officer will chair the proceedings; make appropriate provision for testimony, comments, and questions; and will be responsible for the orderly conduct of the proceedings. The presiding officer will have all the powers necessary or appropriate to contribute to the equitable and efficient conduct of the oral proceedings, including the following:

(1) The right to apportion the time of persons making presentations in an equitable manner in order to complete the presentations within the time period allotted for the proceedings.

(2) The right to terminate or shorten the presentation of any party when, in the view of the presiding officer, such presentation is repetitive or is not relevant to the purpose of the proceedings.

(3) The right to confine the presentations to the issues specified in this notice of oral proceeding.

(4) The right to require a single representative to present the views of two or more persons or groups who have the same or similar interests. The presiding officer will have the authority to identify groups or persons with the same or similar interests in the proceedings.

The presiding officer and Commission representatives will have the right to question persons making an oral presentation as to their testimony and any other matter relating to the proposed rule. Persons in attendance may submit questions, in writing, to the presiding officer.

Persons wishing to comment on, or rebut, statements by other participants in

the oral proceedings may do so by sending written comments (preferably in five copies) to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207 on or before February 25, 1977, which is the deadline for submitting written comments on the proposed exemption. Persons making an oral presentation may also submit, on or before February 25, a written presentation of their views or any other written statement for the record. Materials received by the Office of the Secretary after February 25 will be considered to the extent practicable. Received comments and other relevant material may be seen in the Office of the Secretary, Third Floor, 1111 18th Street NW., Washington, D.C. during working hours Monday through Friday.

REQUESTS TO PARTICIPATE IN ORAL PROCEEDINGS

The February 7 Washington, D.C. proceeding has been tentatively scheduled to begin at 9:30 a.m. at the Commission's third floor hearing room, 1111 18th Street NW., Washington, D.C. The February 14 San Francisco proceeding has been tentatively scheduled to begin at 9:30 a.m. at the Federal Building, 450 Golden Gate Avenue, Room 2007, San Francisco, California. The February 15 Los Angeles proceeding has been tentatively scheduled to begin at 9:30 a.m. at the Patriotic Hall, 1816 Figueroa Street, Los Angeles, California. The locations and times for these proceedings may be confirmed with the Commission's Office of the Secretary. Any changes will be published in the FEDERAL REGISTER and the Commission's public calendar prior to these proceedings.

All persons who wish to make an oral presentation should notify Richard Danca of the Office of the Secretary, CPSC, Washington, D.C. 20207, telephone 202–634–7700, no later than close of business February 2, 1977 for scheduling purposes. Persons wishing to make a presentation should indicate the city in which they desire to make a presentation and the amount of time they request. A summary or outline of each oral presentation should be filed with the Office of the Secretary at least 2 working days prior to the oral presentation.

In order to facilitate presentations by interested persons who are unable to attend during normal working hours, the Commission is willing to provide an opportunity for presentations after 5:00 p.m. If persons wish to make a presentation after 5:00 p.m., they should so notify the Office of the Secretary.

The following persons have already submitted requests to make an oral presentation and need not submit another request: Textile Distributors Association; National Cotton Council of America; Sears, Roebuck and Company; American Apparel Manufacturers Association; National Retail Manufacturers Association; Coalition of Apparel Industries in California; Springs Mills, Inc.; Cotton Incorporated; Man-Made Fiber Producers Association; Inc., National Knitwear Manufacturers Association; American Textile Manufacturers Institute; State Fire Marshall of the State of California. If they have not already done so, these persons should notify the Office of the Secretary of the amount of time they request for a presentation and should indicate the city in which they desire to make a presentation.

Dated: January 19, 1977.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Receipt

Environmental impact statements received by the Council on Environmental Quality from January 10 through January 14, 1977. The date of receipt fo reach statement is note in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements in forty-five (45) days from this FEDERAL REGISTER notice of availability. (March 7, 1977). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies will also be available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Coordinator of Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 359–A, Washington, D.C. 20250, 202–447–3965.

FOREST SERVICE

Draft

U.S. Borax Mining Access Rd., Quartz Hill Prospect, Alaska, January 12: Proposed, by the United States Borax & Chemical Corporation (in behalf of Pacific Coast Mines, Inc.), is the development of a mining exploration road due east of Ketchikan on the mainland of southeast Alaska. This road is to be used for intensive development drilling of the prospect to depths below 600 feet and for the extraction of about 500 tons of ore for pilot testing (bulk sampling). The greatest adverse impact will be a major development in an otherwise undeveloped area of the Tongass National Forest. Greater pressure will be put on fish and other aquatic life. (ELR Order No. 70047.)

Cannery Creek Timber Sale, Chugach N.F., Alaska, January 12: Proposed is a timber sale near Cannery Creek, Unawik Inlet, Prince William Sound, approximately 70 miles northwest of Cordova, Alaska. The sale is a combination salvage and reservoir right-of-way clearing project for a proposed Alaska Department of Fish and Game salmon hatchery project. The estimated volume is 2,230 MBF which will be coming from 6 clearcut units totalling approximately 166 acres. The gross sale area is 480 acres. The scenic value of the area will be altered by the proposed sale over the next 30 to 40 years. (ERL Order No. 70049.)

Final

Wilderness Suitability, Oregon Dunes N.R.A., Douglas Lane, Coos County, Oreg., January 11: The proposed action is the implementation of a management plan for the Oregon Dunes National Recreation Area, Siuslaw N.F. in Lane, Douglas, and Coos Counties, Oregon. The area will be managed primarily for dispersed use, while providing for a broad spectrum of recreational activities. Existing campgrounds will be retained and a large campground will be provided near Butterfield Lake, as well as 4 primitive hiker-boater camps on Siltcoos Lake, Tahkenitch Lake and the Umpqua River. Impacts on the environment will be beneficial. Comments made by: HUD, USDA, DOT, FPC, DOC, DOI, COE, EPA, State and local agencies, concerning citizens. (ELR Order No. 70042.)

SOIL CONSERVATION SERVICE

Final

Central Madison Watershed Project, Madison County, La., January 10: The proposed project is for watershed protection, flood prevention, and drainage in Madison Parish, Louisiana. Approximately 52 miles of channel work with appurtenant measures will be installed. Land treatment measures will be applied on 38,700 acres of cropland and pastureland, and 16,200 acres will be managed for wildlife habitat. About 796 acres of forestland, 2 acres of wooded channel banks, and 285 acres of open land will be disturbed by construction. Comments made by: COE, DOI, HEW, DOT, OEO, EPA, State and local agencies, concerned citizens. (ELR Order No. 70033.)

DEPARTMENT OF DEFENSE, AIR FORCE

Contact: Dr. Billy Welch, Room 4D 873, The Pentagon, Washington, D.C. 20330, 202–OX 7–9297.

Final

U.S.A.F. Communications Relocation to Scott AFB, St. Clair County, Ill., January 12: Proposed is the relocation of Headquarters Air Force Communications Service and all of its technical units at Richards-Gebaur AFB including four C–140 aircraft to Scott AFB, Illinois (approximately 2,184 military and civilian manpower authorizations), except result of the proposed action, approximately 42 military manpower authorizations) would be relocated to Keesler AFB, Mississippi. As a result of the proposed action, approximately 3,769 military and civilian manpower authorizations and would be deleted from the Richards-Gebaur AFB which would result in a savings of about 1,543 manpower positions. Comments made by: EPA, VA, USDA, DOC, HEW, HUD, State and local agencies, concerned groups and persons. (ELR Order No. 70039.)

DEPARTMENT OF DEFENSE, ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Development, Attn: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, S.W., Washington, D.C. 20314, 202–693–6795.

Draft

Redbank and Fancher Creeks Investigation, Fresno County, Calif., January 12: The proposed plan includes construction of flood control facilities east of the Fresno-Clovis metropolitan area in Fresno County, California, to provide increased flood protection to eastern Fresno, Clovis, and surrounding rural and agricultural lands. The plan calls for a dam on Fancher Creek, enlargement of the existing Big Dry Creek project, and construction of three detention basins, one on Pupcreek, one on Redbank Creek, and one on Alluvial Drain. Adverse effects include loss of agricultural land, riparian vegetation, and wildlife habitat. (Sacramento District) (ELR Order No. 70043.)

Charlotte Co. Beach Erosion Control, etc. Study, Charlotte County, Fla., January 10: This statement considers beach fill and periodic nourishment for the northerly 17,400 linear feet (3.3 miles) of Charlotte County on Manasota Peninsula, construction of a 550-foot rubble-mound terminal groin on the southwest tip of the peninsula, and construction of a 700-foot rubble-mound revetment easterly along the north shore of Stump Pass. Adverse effects include temporary degradation of water quality at specific sites. (Jackson District). (ELR Order No. 70028.)

Papillion Creek and Tributaries Lakes (2), Nebraska, January 10: The proposed project is to modify the plan for the Big Papillion Creek portion of the basin to authorize Dam 3A in lieu of Dams 1 through 9. It is also the intent of the District Engineer to complete the development of Dams 16 and 11 as authorized, initiate the construction of Dam 10 as authorized, and defer construction of any of the dams in the West Branch Papillion Creek portion of the basin until a restudy is completed. Adverse impacts include acquisition of 7,656 acres of land, displacement of 62 families, loss of riparian wildlife habitat, and some degradation of downstream and lake water quality. (Omaha District). (ELR Order No. 70026.)

Hudson R. Project, N.E. U.S. Water Supply Study, New York, January 12: Proposed is the construction of a water intake structure, pumping station, water treatment facility and sixty mile tunnel through deep rock for utilizing Hudson River water as a supplement to the existing New York City System when the existing system reservoirs reach predetermined low levels indicative of potential shortages. The project also entails completion of portions of New York City Water Tunnel No. 3 and rehabilitation of an existing pipeline between the New York City System and Nassau County. Impacts associated with operation include minor adverse local effects on water quality. (North Atlantic Division). (ELR Order No. 70040.)

Final

Patchogue River Maintenance Dredging, Middlesex County, Conn., January 13: The proposed action is to conduct maintenance dredging on the Patchogue River Federal Navigation Project in Westbrook, Connecticut. A hydraulic dredge will remove approximately 17,600 cubic yards of sediment to a land disposal area in the mouth of the Patchogue River. Future maintenance will utilize ocean disposal at the Cornfield Shoals dumping ground. Adverse impacts include the continued disruption of benthic communities, increase of solids, nutrients, and chemicals in the water column, and temporary runoff of drainage at the disposal site. Comments made by: EPA, DOC, DOI, DOT, State and local agencies, and concerned citizens. (ELR Order No. 70058.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

New Milford Wasterwater Collection and Treatment, Connecticut, January 12: This statement proposes the development of a regional wastewater treatment and collection system to serve the towns of New Milford and Brookfield, Connecticut. Included is the expansion in three phases of an already existing system which currently serves only the downtown area of New Milford. The treatment facility will be located in New Milford, on the west bank of the Housatonic River. Limited adverse effects are anticipated. (Region I). (ELR Order No. 70048.)

Final

Exhaust and Crankcase Regulations—1978 Models, January 12: The proposed action is the institution of exhaust and crankcase regulations for 1978 and later model year street-legal motorcycles with displacements greater than 50 cc. Exhaust emission standards for hydrocarbons (HC) will be set at 5 to 14 grams per kilometer with the exact standard being a function of engine displacement. Carbon monoxide (CO) emissions must not exceed 17 g/km for all motorcycles. In 1980 the HC emission standard will be 5 g/km regardless of engine size and the size and the CO emission standard will be reduced to 12 g/km. Environmental effects will be beneficial. Comments made by: DOC, DOT, concerned groups and persons. (ELR Order No. 70038.)

W. Contra Costa Co. Wastewater Program, Contra Costa County, Calif., January 10: Proposed is the development of a wastewater management plan for the Western Contra Costa County area primarily to meet the needs of municipal wastewater dischargers. The objectives relate to upgrading the method of effluent disposal and providing adequate treatment, while enhancing the early reclamation and reuse of wastewater effluent. Adverse effects related to construction will occur mostly along the interceptor routes from Pinole to Richmond and at the dredging sites for submarine outfall extensions. Comments made by: COE, USCS, EPA, HEW, DOI, DOT, AHP, GSA, FPC, State and county agencies, concerned citizens. (ELR Order No. 70032.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Impact, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue, NW, Washington, D.C. 20461, 202–961–8621.

Draft

Central Rock Mine, SPR, Fayette County, Ky., January 12: The proposed project involves the implementation of the Strategic Petroleum Reserve, Title I, Part B, of the Energy Policy and Conservation Act (P.L. 94–163). This action is part of the Early Storage Reserve and proposes to store 14 million barrels of oil in an underground limestone mine located in Lexington, Kentucky. The proposed storage of oil at Central Rock Mine would be implemented at an existing underground limestone mine presently owned and operated by the Central Rock Company. Adverse socioeconomic impacts may result if the limestone mine is closed temporarily. (ELR Order No. 70052.)

Ironton Mine, SPR, Lawrence County, Ohio, January 12: This project involves the implementation of the Strategic Petroleum Reserve, Title I, Part B, of the Energy Policy and Conservation Act of 1975 (Pub. L. 94–163). The present action is part of the Early Storage Reserve and proposes to store 21 million barrels of oil in an underground limestone mine located near Ironton, Ohio. The proposed storage of oil at Ironton Mine would be implemented at an abandoned underground limestone mine presently owned by the Alpha-Portland Cement Company. (ELR Order No. 70053.)

Final

West Hackberry Salt Dome—SPR, Cameron County, La., January 13: Proposed is the implementation of the Strategic Petroleum Reserve (SPR), Title I, Part B, of the Energy Policy and Conservation Act of 1975 through the development of a 60 million barrel crude oil facility at the West Hackberry salt dome. Under the initial phase of the SPR, referred to as the Early Storage Reserve (ESR), 150 million barrels of oil will be stored by 1978. The West Hackberry site, a salt dome with existing cavities located in Cameron Parish, Louisiana, has been identified as a candidate site for the ESR. Adverse effects include the risk of oil spills. Comments made by: AHP, COE, EPA, FPC, HEW, NRC, TVA, DOT, TREA, State and local agencies, organizations and individuals. (ELR Order No. 70060.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Room 7258, 451 7th Street, S.W., Washington, D.C. 20410, 202–755–6308.

Draft

Vista Verde Subdivision, Dade Co., Dade County, Fla., January 11: Proposed is the development of a subdivision project Vista Verde, located 14 miles northwest of Miami, Florida. The 240-acre project will include 142 single family detached residences, 306 cluster residences, 833 townhouse units, and a 12-acre school-park site. The completion of the development will create additional demand on utilities, and municipal and community services and facilities. Other impacts include increases in surface water run-off, congestion of traffic, and increases in air and noise pollution. (ELR Order No. 70036.)

Sugar Land, 1st Colony Subdivision, Fort Bend County, Tex., January 10: The proposed action is the development of 7,530 acres for multipurpose use in the city of Sugar Land, Texas. The project will include up to 13,200 units under the HUD/FHA home mortgage programs. Plans call for additional construction of a golf course and several lakes. The major impact would be the transition of the area from its present predominantly agricultural state into a planned urban development providing a wide range of living accommodations for 63,000 people. (ELR Order No. 70027.)

Final

St. Charles Communities, Charles County Md., January 12: Proposed is the development of St. Charles Communities, located approximately 25 miles southeast of Washington, D.C. It is bounded on the north and east by Maryland Route 5, on the south by Maryland Route 448, and on the west by U.S. Route 301. Adverse effects of development include the degradation of the Zekiah Swamp. The existing and proposed transportation network for the area may also prove to be inadequate. Comments made by: USDA, COE, DOI, ERDA, EPA, FPC, State and local agencies, concerned citizens. (ELR Order No. 70045.)

Supplement

Merced, Atwater, Castle AFB (S–1), Merced County, Calif., January 13: This statement supplements a draft EIS filed with CEQ in April, 1976, concerning Merced, Atwater, Castle Air Force Base and Environs. It consists of consideration of major areas acceptable for HUD programs, including mortgage insurance. Major potential beneficial impacts result in the availability of mortgage insurance, preservation of select natural areas, and encouragement of residential development in areas of moderate noise levels. Potential adverse impacts are the loss of open space and agricultural land (ELR Order No. 70056.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202–343–3891.

BUREAU OF LAND MANAGEMENT

Draft

San Luis Resource Area, Grazing Management, Colorado, January 10: Proposed is a grazing management program on national resource lands in the San Luis Valley, located in south-central Colorado. The components of the proposal are (1) intensive management of grazing (allotment management plans of AMPs) on 473,916 acres; (2) custodial management of grazing on 16,625 acres; (3) elimination of grazing on 5,930 acres; and (4) continuation of unallotted atatus of range on 19,900 acres. Construction of various range improvements would be required to implement the AMPs, and fencing would be required to eliminate grazing in some areas. (ELR Order No. 70034.)

Final

Northwest Colorado Coal, Routt, Moffat, and Rio Blanco Counties, Colo., January 10: Proposed is the approval by the Department of the Interior of a variety of formal and anticipated proposals relating to the development of Federal coal. The cumulative effects of increased coal exploration and development, additional Federal coal leasing, and right-of-way approval are analyzed on a regional basis. Coal related developments would total 3 mines, 3 power plants, 86 miles of new railroads, 90 miles of new roads, and 350 miles of new powerlines by 1990. Adverse impacts include modification of natural contours, sedimentation, increases in air pollution, and loss of 19,000 acres of habitat. Comments made by: AHP, ERDA, EPA, HEW, HUD, ICC, DLAB, State and local agencies, concerned groups and persons. (ELR Order No. 70030.)

Challis Planning Unit Grazing Program, Custer County, Idaho, January 10: Proposed are domestic livestock management plans for the Challis Unit, which includes 330,617 acres of national resource lands. The plan would include permanent grazing systems, range improvements including water developments, fencing, cattleguards and gates, vegetative manipuation and stock trails. Adverse impacts would include periodic increases of sedimentation in pastures where livestock would be concentrated for early spring use, short-term impacts of vegetation because of plants not being permitted to meet growth requirements, occasional competition of wildlife and wild horses for vegetation, and a decrease of grazing for operators. Comments made by: USDA, EPA, DOI, AHP, State and local agencies, concerned citizens. (ELR Order No. 70035.)

DEPARTMENT OF LABOR

Draft

Occupational Exposure to Cotton Dust, Standard. Proposed is the regulation of employee exposure to cotton dust by prohibiting their exposure to respirable particulates above the concentration limit of 200 $\mu g/m^3$. The proposal also provides for employee exposure measurements, methods of compliance, personal protective equipment, training, work practices, including housekeeping, medical surveillance, and recordkeeping. No adverse impacts on the environment external to the workplace are expected as a result of the promulgation of the proposed standard. (ELR Order No. 70059.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, 202-426-4357.

FEDERAL HIGHWAY ADMINISTRATION

Draft

U.S. 24 Relocation, U.S. 24 Bypass—S.R. 37, Wabash and Huntington Counties, Ind., January 12: Proposed is the relocation of U.S. 24, commencing at the existing intersection with S.R. 13, northeast of the City of Wabash, then northeasterly for between 15.6 and 18.8 miles (subject to the alternate selected) to the existing S.R. 9–S.R. 37 Bypass west of the City of Huntington. Secondary terminal being considered are the west end of the U.S. 24 Bypass around the City of Wabash and eastern termini the west city limits of the City of Fort Wayne. Adverse effects include the relocation of from 3 to 5 families and as many as 10 businesses. (Region 5). (ELR Order No. 70046.)

N. & S. Tigard Exchange, Pacific Hwy—I–5, Clackamas, Multnomah, and Washington Counties, January 12: The proposed action calls for the widening of 1.44 miles of existing four lane freeway to six lanes, completing the six-lane freeway from Salem to Portland. Two safety features are proposed in addition: reconstruction of Haines Interchange and construction of an exclusive 1 truck bypass lane. The bypass lane would join an existing shoulder which would be converted to an exclusive truck climbing lane. Three alternatives are currently under consideration, each having its respective impact. (Region 10). (ELR Order No. 70041.)

Final

Florida Street Extension, Mobile, Mobile County, Ala., January 13: Proposed is the construction of an extension of Florida Street from Government Boulevard to Springhill Avenue in Mobile, Alabama. The project length ranges from 2.2 to 2.4 miles, depending upon the alternative selected. The most significant negative impact of the project is the potential dislocation of approximately 19 families, 13 businesses, and 2 non-profit organizations. Temporary construction disruption would result. Comments made by: DOC, USDA, HUD, HEW, EPA, State and local agencies, concerned citizens. (ELR Order No. 70054.)

Interstate 210, Los Angeles, Los Angeles County, Calif., January 10: The proposed action is the construction of a 5.6-mile segment of I–210 Freeway between 0.1 mile west of Van Nuys Blvd. and 1.0 mile east of Sunland Blvd. in Los Angeles, California. This will be the last link of the 48.7-mile freeway to be completed. Adverse impacts include dislocation of 142 families, taking of 17.704 acres of undeveloped land leased for park purposes from the 1,437 acre Hansen Dam Recreational Area, loss of flood storage capacity in the dam Basin, and loss of wildlife habitat. Comments made by: DOT, HEW, USDA, EPA, COE, DOI, HUD, State and local agencies, concerned citizens. (ELR Order No. 70031.)

U.S. 18 Expressway, Clayton County, Clayton County, Iowa, January 12: Proposed is the construction of a section of the US 18 Arterial in Clayton County. The 4-mile project begins on present U.S. 18 near the western section line of Section 29, T95, R3W, in Clayton Co., and proceeds north to a point in the Basil Giard Claim No. 1 near Station 6390. The section curves northeasterly, then easterly to the new Mississippi River Bridge at Marquet. The acquisition of 140 acres of land, including 95 acres of timber and pastureland and 25 acres of tillable land, will be necessary. Other negative impacts include removal of natural wildlife habitat from the deepest section of the creek valley to the agricultural fields surrounded by woodland. Comments made by: HEW, HUD, DOI, EPA, State and local agencies, concerned citizens. (ELR Order No. 70044.)

I–471, from I–275 to Cincinnati, Campbell and Kenton Counties, Ky., January 12: The proposed action is construction of a north-south interstate connector between I–275 and Cincinnati. The 3.51-mile facility is to be a 6-lane divided highway from Lexington Avenue in Newport south to U.S. 27 in the vicinity of Moock Road and the Intersection with U.S. 27 at Sunset Avenue. Adverse impacts will be displacement of residents and businesses, increases in air and noise pollution, and disruption of wildlife. (Region 4) Comments made by: HEW, HUD, EPA, DOC, DOI, USDA, State and local agencies, concerned citizens. (ELR Order No. 70037.)

S.R. 61, Oliver Springs-S.R. 61, Anderson and Roane Counties, Tenn. The proposed project is a relocation of State Route around the northern portion of Oliver Springs, Tennessee. The 2.2-mile project begins on the southwest side of Oliver Springs and extends to existing S.R. 61, southeast of Oliver Springs. The facility will be a 5-lane city-type cross section for the first part and then a 4-lane divided facility for the last portion. Negative effects include the displacement of residences and businesses, introduction of noise and air pollution, soil erosion and siltation of water courses, a visual impact on the community, and a potential for side slope instability. (Region 4) Comments made by: HUD, DOI, FPC, DOT, COE, EPA, HEW, State and local agencies, concerned citizens. (ELR Order No. 70050.)

U.S. 2 Belknap Viaduct, Superior, Douglas County, January 13: The proposed project involves replacement of the Belknap Street Viaduct which carries local and USH 2 traffic in the City of Superior, Douglas County, Wisconsin. The new structure would be a 4-lane bridge and would be from 1500 to 1900 feet long, depending upon its new location. Adverse effects include right of way requirements; disruption of families, business, and wildlife in the center drainage area; and damages to haul roads not designed for heavy loads. Comments made by: EPA, DOI, HEW, HUD, DOT, State and local agencies, concerned citizens. (ELR Order No. 70055.)

NUCLEAR REGULATORY COMMISSION

Contract: Mr. Benard Rersche, Director of Division of Reactor Licensing, P–722, NRC, Washington, D.C. 20555, 301–492–7373.

Supplement

Midland Plant, Units 1 and 2 (S–1), Midland County, Mich., January 13: This statement supplements a final EIS filed with CEQ in March, 1972. The proposed action is the continuance of the construction permits issued on December 15, 1972 to Consumers Power Company for the construction of Midland Plant Units 1 and 2. The Midland Plant Units 1 and 2 will have two pressurized water reactors that will generate about 1,300 megawatts of electricity for distribution to the applicant's system. In addition, up to about 4,000,000 pounds per hour of steam are designated to be delivered to the Dow Chemical Company. (ELR Order No. 70057.)

DAVID TUNDERMAN,
Acting General Counsel.

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JANUARY 6, 1977.

The USAF Scientific Advisory Board Space and Missile Systems Organization Advisory Group, Air Force Systems Command, will hold meetings on February 14, 1977 from 8:30 a.m. to 5 p.m and February 15, 1977 from 8:30 a.m. to 1 p.m. at the Los Angeles Air Force Station, California in the Command Presentation Center, Building 105.

The Group will receive classified briefings and hold classified discussions on selected space programs.

The meetings concern matters listed in section 552(b) of Title 5, United States Code, specifically subparagraph (1) thereof, and that accordingly the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at 202–697–8404.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JANUARY 13, 1977.

The USAF Scientific Advisory Board ad hoc Committee on the EF–111A will hold meetings at Kirtland AFB, New Mexico on February 15 and 16, 1977 from 9 a.m. to 5 p.m. each day.

The Committee will receive classified briefings and hold classified discussions on the EF–111A.

The meetings concern matters listed in section 552(b) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–8404.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JANUARY 17, 1977.

The USAF Scientific Advisory Board ad hoc Committee on Aeronomy will hold a meeting on February 18, 1977 in the Pentagon.

The Committee will have a working session to discuss and complete work on the final draft report on the study of Aeronomy.

The meeting will be open to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–4648.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

Office of the Secretary

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, NY 10014 on 15 February 1977.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The microwave area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly, this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

JANUARY 19, 1977.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group C (Mainly Imaging and Display) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at the Institute for Defense Analysis, 400 Army Navy Drive, Arlington, Virginia 22202, on 16 February 1977 vice the 27 January 1977 meeting which was cancelled.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the military Departments propose to initiate with industry, universities or in their laboratories. This special device area includes such programs as Infrared and Night Vision Sensors. The review will include classified program details throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

MANAGEMENT OF INTERMEDIATE LEVEL RADIOACTIVE WASTE, OAK RIDGE NATIONAL LABORATORY, OAK RIDGE, TENNESSEE

Availability of Draft Environmental Statement

Notice is hereby given that a Draft Environmental Statement, ERDA–1553–D, Management of Intermediate Level Radioactive Waste, Oak Ridge National Laboratory, Oak Ridge, Tennessee, was issued pursuant to the Energy Research and Development Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared to support an administrative action to select a preferred technique for the management of intermediate level radioactive waste (ILW) and the construction and operation of a facility to implement the technique at the Oak Ridge National Laboratory in Roane County, Tennessee.

Copies of the draft statement have been distributed for review and comment to Federal and Tennessee State and local agencies and other organizations and individuals. Copies of the draft statement are available for public inspection at the ERDA public document rooms at:

ERDA Headquarters, 20 Massachusetts Avenue, Washington, D.C.
Albuquerque Operations Office, Kirtland Air Force Base East, Albuquerque, New Mexico.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee.
Richland Operations Office, Federal Building, Richland, Washington.
San Francisco Operations, 1333 Broadway, Oakland, California.
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.

Comments and views concerning the draft statement are requested from other interested agencies, organizations and individuals. Single copies of the draft environmental statement will be furnished for review and comment upon request addressed to W. H. Pennington, Director, Office of NEPA Coordination, U.S. Energy Research and Development Administration, Mail Station E–201, Washington, D.C. 20545, (301) 353–4241. Comments shoud be sent to the same address.

In accordance with guidelines from the Council on Environmental Quality, agencies and members of the public submitting comments on the draft environ-

mental statement should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of form in the impact statement. It would assist in the review of comments if the comments were organized in a manner consistent with the structure of the draft statement. Emphasis should be placed on the assessment of the environmental impacts of the waste management activities, and the acceptability of those impacts on the quality of the environment, particularly as contrasted with the impacts of reasonable alternatives. Commenting entities may recommend modifications and/or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Comments on the draft environmental statement will be placed in the above referenced document rooms and will be considered in the preparation of the final environmental statement if received within 60 days of the date of publication of this notice.

Dated at Germantown, Md., this 18th day of January 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for Environment and Safety.

[ERDA-1551-D]

NEVADA TEST SITE, NYE COUNTY, NEVADA

Availability of Draft Environmental Impact Statement

Notice is hereby given that a Draft Environmental Impact Statement, ERDA-1551-D, Nevada Test Site, Nye County, Nevada (January 1977), has been issued pursuant to the Energy Research and Development Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared to support ERDA administrative actions related to the continuation of ERDA's underground nuclear testing program and other activities at the Nevada Test Site for Fiscal Year 1978 and beyond.

Copies of the draft statement have been distributed for review and comment to Federal, State and local agencies and other organizations and individuals. Copies of the draft statement are available for public inspection at the ERDA public document rooms at:

ERDA Headquarters, 20 Massachusetts Avenue, Washington, D.C.
Albuquerque Operations Office, Kirtland Air Force Base East, Albuquerque, New Mexico.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee.
Richland Operations Office, Federal Building, Richland, Washington.
San Francisco Operations, 1333 Broadway, Oakland, California.
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.

Comments and views concerning the draft statement are requested from other interested agencies, organizations and individuals. Single copies of the draft environmental statement will be furnished for review and comment upon request addressed to W. H. Pennington, Director, Office of NEPA Coordination, U.S. Energy Research and Development Administration, Mail Station E-201, Washington, D.C. 20545, (301) 353-4241. Comments should be sent to the same address.

In accordance with guidelines from the Council on Environmental Quality, agencies and members of the public submitting comments on the draft environmental statement should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of form in the impact statement. It would assist in the review of comments if the comments were organized in a manner consistent with the structure of the draft statement. Emphasis should be placed on the assessment of the environmental impacts of the NTS activities, and the acceptability of those impacts on the quality of the environment, particularly as contrasted with the impacts of reasonable alternatives. Commenting entities may recommend modifications and/or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Comments on the draft environmental statement will be placed in the above referenced document rooms and will be considered in the preparation of the final environmental impact statement if received within 60 days of the date of publication of this notice.

Dated at Germantown, Md., this 18th day of January 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for Environment and Safety.

[ERDA-1552-D]

SAFETY RESEARCH EXPERIMENT FACILITIES, IDAHO NATIONAL ENGINEERING LABORATORY, IDAHO

Availability of Draft Environmental Impact Statement

Notice is hereby given that a Draft Environmental Impact Statement, ERDA-1552-D, Safety Research Experiment Facilities, Idaho National Engineering Laboratory, Idaho, was issued pursuant to the Energy Research and Development Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared in support of legislative action related to the ERDA request for appropriation of funds for Fiscal Year 1978 for the project.

The statement addresses the potential environmental impacts associated with the construction and operation of a new safety test facility and modifications to existing facilities at the Argonne National Laboratory-West which is part of the Idaho National Engineering Laboratory in Butte County, Idaho. The facilities will be used to confirm the calculated safety of liquid metal fast breeder reactor fuel elements under a variety of abnormal conditions.

Copies of the draft environmental statement have been distributed for review and comment to appropriate Federal, Idaho State and local agencies and organizations and individuals who are known to have an interest in this activity. Copies of the statement are available for public inspection in the ERDA public document rooms at:

ERDA Headquarters, 20 Massachusetts Avenue, NW., Washington, D.C.
Albuquerque Operations Office, Kirtland Air Force Base East, Albuquerque, New Mexico.
Chicago Operations Office, 8900 South Cass Avenue, Argonne, Illinois.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee.
Richland Operations Office, Federal Building, Richland, Washington.
San Francisco Operations Office, 1333 Broadway, Oakland, California.
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.

Comments and views concerning the draft environmental statement are requested from other interested agencies, organizations and individuals. Single copies of the statement will be furnished for review and comment upon request addressed to W. H. Pennington, Director, Office of NEPA Coordination, Mail Station E-201, Energy Research and Development Administration, Washington, D.C. 20545, (301) 353-4241. Comments should be sent to the same address.

In accordance with the guidelines of the Council on Environmental Quality, those submitting comments on the draft environmental impact statement should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of form in the impact statement. However, it would assist in the review of comments if the comments were organized in a manner consistent with the structure of the draft environmental statement. Emphasis should be placed specifically on the assessment of the environmental impacts of the proposed project, and the acceptability of those impacts on the quality of the environment, particularly as contrasted with the impacts of reasonable alternatives to the proposed action. Commenting entities may recommend modifications and/or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Copies of comments received on the draft environmental statement will be placed in the above referenced public

document rooms for inspection and will be considered in the preparation of the final environmental impact statement if received within 60 days of the date of publication of this notice.

Dated at Germantown, Md., this 18th day of January 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for Environment and Safety.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 674-6]

AGENCY COMMENTS ON ENVIRONMENTAL IMPACT STATEMENTS AND OTHER ACTIONS IMPACTING THE ENVIRONMENT

Availability

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of November 1, 1976 and November 30, 1976.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but no commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, and the source of the EPA review as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in Appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listed in Appendices I, III, IV, and V.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW., Washington, D.C. 20460, telephone 202/755-2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

Dated: January 18, 1977.

REBECCA W. HANMER,
Director,
Office of Federal Activities.

APPENDIX I.—*Draft environmental impact statements for which comments were issued between Nov. 1, 1976, and Nov. 30, 1976*

APPENDIX II—DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LO—Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1—Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate

EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III.—*Final environmental impact statements for which comments were issued between Nov. 1, 1976, and Nov. 30, 1976*

Identifying No.	Title	General nature of comments	Source for copies of comments
	CORPS OF ENGINEERS		
F-COE-A39032-IA	Evansdale Local Protection Project, Black Hawk County, Iowa.	EPA's concerns were adequately addressed in the final statement. However, EPA informed the Corps of Engineers that the discharge of water from a borrow pit to the Cedar River will probably require a national pollutant discharge elimination of Public Law 92-500.	H
F-COE-E35023-NC	Maintenance of the Waterway Connecting Pamlico Sound and Beaufort Harbor, N.C.	EPA's concerns were adequately addressed in the final EIS.	E
F-COE-F32014-MI	Maintenance and Dredging, Monroe Harbor, Monroe County, Mich.	EPA's concerns were adequately addressed in the final EIS. EPA recommended that remedial measures be developed and implemented as soon as possible at the old disposal site to prevent adverse water quality effects from lake water overtopping and escaping soil material.	F
	DEPARTMENT OF AGRICULTURE		
F-AFS-J61011-UT	Four Seasons Development, Uinta National Forest, Provo, Utah County, Utah.	EPA's review of the final EIS indicated the EIS was unresponsive to the previous comments made by EPA on the potential air quality and noise impacts of the traffic to be attracted to this development. In addition, EPA recommended further evaluation be performed of the secondary impacts of transportation to the resort, especially air quality and noise impacts.	I
F-SCS-F36036-IN	Rock Creek Watershed, Cass and Carroll Counties, Ind.	EPA's concerns were adequately addressed in the final EIS.	F

DEPARTMENT OF DEFENSE			
FS-UAF-A52015-00	Disposition of Orange herbicide by incineration.	EPA agreed with the USAF that reprocessing herbicide orange was the best available disposal alternative; however, EPA identified several concerns and questions which had not been fully addressed and answered by this amendment. Those points included protection, control and storage of the contaminated residuals, and quality control of the reprocessed herbicide.	A
DEPARTMENT OF THE INTERIOR			
F-BLM-A02100-00	Proposed 1976 oil and gas lease sale No. 44, Outer Continental Shelf, (OCS), Gulf of Mexico, Louisiana and Texas.	EPA's concerns were adequately addressed in the final EIS.	A
F-BLM-A65015-00	Ten Year Timber Management Program, Western United States.	EPA's concerns were adequately addressed in the final EIS. EPA noted that the preparation of this programmatic EIS would not obviate the need for more site specific EIS's.	A
DEPARTMENT OF TRANSPORTATION			
F-DOT-A40960-WI	Stadium Freeway, I-894 to I-94, Milwaukee County, Wisc.	EPA's concerns were adequately addressed in the final EIS.	F
F-FHW-A42410-IL	U.S. 460, IL-15, FA-821, 24th to 13th St., Mt. Vernon, Jefferson County, Ill.	EPA continues to have environmental reservations on the proposed project with regard to excessive noise levels. EPA recommended that soundproofing measures be utilized.	F
F-FHW-A42411-MI	Charlotte to I-96 to northwest of Lansing, I-69, Clinton and Eaton Counties, Mich. (FHW-EIS-MICH-73-03-F).	EPA's concerns were adequately addressed in the final EIS.	F
F-FHW-A42412-WI	U.S. 51, Merrill to CTH "K", Lincoln and Oneida Counties, Wisc.	EPA's concerns were adequately addressed in the final EIS. However, EPA feels qualitative analysis should be provided on the impacts the project will have upon the wetland areas involved.	F
FS-FHW-C40013-VI	Sion Farm to Christiansted Highway, St. Crois, V.I.	EPA's concerns were adequately addressed in the supplement to the final EIS.	C
NF-FHW-F40050-IN	IN-1, Bridge over the Penn Central Railroad, Dearborn, County, Ind.	EPA's concerns were adequately addressed in the final negative declaration.	F
F-FHW-H40029-NB	U.S. 6 and U.S. 34, junction with NB-23, Holdrege, Phelps County, Nebr.	EPA continues to have environmental reservations with the proposed project because projected noise levels at 3 motels, 12 homes and 9 Businesses will exceed FHPM 7-7-3 noise standards. EPA requested the FHWA to contact the people affected by highway noise, inform them of the adverse noise impacts and discuss possible mitigtive actions on an individual basis. In addition, EPA stated the need for an overall assessment of improving the entire segmented approch currently being used.	H
F-FHW-K40019-CA	March Lane Expressway, El Dorado St. to West Lane, Calif.	EPA's concerns were adequately addressed in the final EIS.	J
FEDERAL POWER COMMISSION			
F-FPC-K05002-CA	California Aqueduct Project No. 2426, California.	EPA's continues to have environmental concerns on proposed project relative to algae control, severe silkation, erodion, and turbidity problems, the quality of the reservoir releases, and the generation of power. EPA also expressed concern that the preparation of the EIS as directed by FPC opinion No. 688 has precluded the complete addressing of environmental impacts associated with the project.	J
GENERAL SERVICES ADMINISTRATION			
F-GSA-F81005-WI	U.S. Courthouse, Madison, Dane County, Wisc.	EPA's concerns were adequately addressed in the final EIS. Additionally, EPA offered its assistance to the GSA in establishing a program to recycle paper wastes.	F
DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT			
FS-HUD-A35033-NY	Canada New Community, Wayne County, N.Y.	EPA's concerns were adequately addressed in the final EIS.	C
RF-HUD-A36078-00	Revised Flood Plain Management Regulations of the National Flood Insurance Program.	EPA had no objections to the action, but suggested procedures to discourage the unwise use of the flood plain. These included, prohibition of flood water impeding structures in the floodway, protection of wetlands and wildlife habitats within the flood plain, acceleration of the rate mapping program and higher priority to rate mapping in communities undergoing rapid growth.	A

DEPARTMENT OF AGRICULTURE—Continued			
F-HUD-B80007-MA	Fall River Central Business District, Urban Renewal Project, Bristol County, Mass. (HUD-R01-EIS-75-06-F).	Generally, EPA's concerns on air and water quality and noise were adequately addressed in the final EIS. However, the final EIS was deficient in two respects: (1) It did not respond to concerns raised by EPA and the Department of The Interior over the fact that the EIS was prepared after the project was well underway: And, (2) That since the final EIS consisted only of comments, responses, new exhibits, and recommendations, it is apparent that changes were not incorporated into the body of the EIS itself.	B
F-HUD-C85009-NY	Rochester South East Loop Urban Renewal Project No. 175, Monroe County, N.Y.	EPA continues to have environmental reservations on the proposed project. The project as proposed has the potential to significantly increase particulate levels, possibly in violation of ambient air quality standards. In addition, EPA suggested further analysis is necessary to assess the impact upon carbon monoxide concentration.	C
F-HUD-E85012-GA	Bedford-Pine Urban Renewal Area, Atlanta, Fulton County, Ga. (HUD-R04-EIS-75-06-F).	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA reiterated the need for an analysis for the eight-hour carbon monoxide standard.	E
F-HUD-F85006-MN	Edenvale 11th Addition, Eden Prairie, Minn.	Generally, EPA's concerns were adequately addressed in the final EIS.	F
F-HUD-J85007-CO	Harriman Park and Lakehurst West III Planned Developments, Jefferson County, COLO.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA requested the cumulative regional impacts on air and water quality be addressed in more detail.	I
NUCLEAR REGULATORY COMMISSION			
F-NRC-F06001-IN	Marble Hill Nuclear Generating Station Units 1 and 2, Public Service Company of Indiana, Inc. et. al., docket nos. STN 50-546, STN 50-547. Jefferson County, IND). (NUREG-0067).	EPA continues to have environmental reservations on the proposed project. The issue of a continuously operating traveling screen and a fish return system has not been resolved. These concerns will be addressed during subsequent review under section 316(b) of the FWPCA. However, at this time, EPA recommended that the intake be designed to accommodate future measures which may be required to reduce mortality resulting from impingement.	F

APPENDIX V.—*Regulations, legislation and other Federal agency actions for which comments were issued between Nov. 1, 1976, and Nov. 30, 1976*

Identifying No.	Title	General nature of comments	Source for copies of comments
Department of Commerce			
R-BLM-A03066-AK	43 CFR Part 2360, National Petroleum Reserves in Alaska, Surface Management and protection.	EPA noted that the proposed regulations depend on the effective review of individual plans and the nature and careful use of stipulations being developed by USDI. Accordingly, EPA urges wide distribution plans, accompanied by the stipulations to be imposed, among the public and concerned agencies.	A
R-IGS-A01038-00	30 CFR Part 211, coal mining operations, regulations, adoption of requirements of Montana's Reclamation Laws and Requirements.	EPA generally concurred with the proposed rulemaking. However, EPA suggested the USDI strengthen the rule by adding reference to EPA's "Coal Mining Point Source Category Effluent Guidelines and Standards." (FEDERAL REGISTER dated May 13, 1976.)	A
Department of Transportation			
A-DOT-A03065-AK	Notices, Trans-Alaska Pipeline, anticipated petition for waivers.	EPA advised against the granting of waivers of the applicable DOT regulations for the remaining welds in question. However, if it could be shown by an environmental assessment, that due to the sensitivity of the location of a certain weld, it would clearly be more environmentally beneficial to leave the weld intact, EPA would acknowledge the appropriateness of the waiver.	A
A-UMT-A54036-00	Paratransit Services, proposed policy (UMTA Docket No. 76-05).	EPA commented in favor of UMTA's proposed policy statement which will serve to foster the increased use of paratransit. In addition, EPA asked to be afforded the opportunity to comment on the specific implementing guidance developed for the policy.	A
Federal Energy Administration			
A-FEA-A00040-00	International Energy Agency's long-term cooperation program, request for expression of interest and public comments.	EPA expressed its continued interest in the IEA program and offered assistance to FEA as the program is pursued. EPA recommended the development of IEA projects in pollution control techniques for coal cleaning, coal gasification and coal liquefaction technologies.	A
Department of Housing and Urban Development			
R-HUD-A80140-00	24 CFR Part 600, comprehensive planning assistance, review and approval process Docket No. R-76-310.	Based on the review, EPA recommended that air quality planning be included as a part of the comprehensive plan similar to EPA's "208" Water Quality Planning Program. In addition, EPA suggested a change which would maximize mutual consistency between the plans.	A

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21043, File No. 8296-CM-P-72; Docket No. 21044, File No. 9450-CM-P-72]

MOBIL SIGNAL CO., INC. AND MIDWEST CORP.

Applications for Construction Permits in the Multipoint Distribution Service

1. The Commission has before it the above-referenced applications of Mobile Signal Company, Inc. (Mobile Signal) (File No. 8296-CM-P-72), filed on May 22, 1972 and Midwest Corporation (Midwest) (File No. 9450-CM-P-72), filed on June 27, 1972. Both applications propose Channel 1 operation in the Mobile, Alabama area, and thus are mutually exclusive and require comparative consideration. Both applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications have been received.

2. Mobile Signal has only the subject application before the Commission, though two of its principals are corporations engaged in "* * * some significant but non-broadcast aspect of the communications business * * *" One, Signal Engineering and Sales, Inc., is in the design and construction of communications equipment. The other, National Telecommunications Associates, Inc., was formed to provide "* * * consulting, design, or implementation * * * relating to telecommunications, including * * * software * * *" and is expected to assist with operations and arrangement of the proposed station. Louis H. Pfau is a principal of Mobile Signal and its parent corporations as well as signatory to MDS applications in several other cities, including Jackson, Mississippi and Columbus, Georgia. Midwest, owned by APS, Inc., has MDS applications pending in twenty cities, including Winston-Salem and Greensboro, North Carolina, and is permittee in Greenville, South Carolina.

3. Upon review of the captioned applications, we find that both applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

4. Accordingly, *it is hereby ordered*, That pursuant to section 309(e) of the Communications Act of 1934, as amended, and § 0.291 of the Commission's rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience, and necessity. In making such a determination, the following factors shall be considered: [1]

(a) The relative merits of each proposal with respect to service area and efficient frequency use;

(b) The nature of the services and facilities proposed, and whether they will satisfy service requirements known to exist or likely to exist in the Mobile, Alabama area;

(c) The anticipated quality and reliability of the service proposed, including selection of equipment, installation, subscriber security, and maintenance;

(d) The charges, regulations and conditions of the service to be rendered, and their relation to the nature, quality and costs of service; and

(e) The managerial and entrepreneurial qualifications of the applicants.

5. *It is further ordered*, That Mobile Signal Company, Inc., Midwest Corporation, and the Chief, Common Carrier Bureau, are made parties to this proceeding.

6. *It is further ordered*, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's rules.

Adopted: December 29, 1976.

Released: January 19, 1977.

JOSEPH A. MARINO,
Deputy Chief,
for Chief, Common Carrier Bureau.

[FR Doc.77-2340 Filed 1-24-77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

SUPPLY AND PRICE LEVELS OF MIDDLE DISTILLATE FUELS

Public Hearing and Opportunity for Comment

The Federal Energy Administration ("FEA") hereby gives notice that it will hold public hearings in Minneapolis, Minnesota, and Boston, Massachusetts, and will also receive written comments, with respect to the current price levels for and the adequacy of supplies of middle distillates. FEA has determined to solicit public comment at this time on these matters to provide the Agency with background information as to any supply or pricing problems that may arise this heating season, particularly in the North Central states and New England, so that the FEA may anticipate and take appropriate action should any such problems develop. FEA will use information received in this proceeding to consider whether any regulatory action is required and, if required, what type of modifications to FEA's regulatory programs would be most appropriate, including, for example, the reimposition of controls on a partial or total basis.

On June 15, 1976, FEA issued amendments to the Mandatory Petroleum Allocation and Price Regulations exempting middle distillates from those regulations (41 FR 24516, 41 FR 24518, June 16, 1976). The amendments became effective July 1, 1976, following Congressional review as provided in section 551 of the Energy Policy and Conservation Act ("EPCA"), Pub. L. 94-163. In response to Congressional concerns related to the exemptions, FEA committed that it would take action following the effectiveness of the exemptions both to assure that no unwarranted price increases would occur once controls were removed and to protect marketers' ability to obtain supplies during the transitional period following removal of controls. These commitments resulted in the adoption of a monitoring system for middle distillate prices (41 FR 41155, September 21, 1976) and Special Rule No. 3 for Subpart A of Part 211, establishing a set-aside program for middle distillates (41 FR 33881, August 11, 1976).

FEA is conducting this inquiry to receive data, views and arguments from the public on whether the exemption of middle distillates continues to be consistent with the objectives of the Emergency Petroleum Allocation Act ("EPAA") and whether any further actions may be necessary to implement FEA's commitments to the Congress. In particular, FEA requests comments on whether the extremely cold weather that has occurred this heating season has either resulted in, or has the potential to result in, inequitable prices for consumers or has created, or has the potential to create, supply dislocations or shortages.

Comments should address particularly the situations in the North Central states and New England. For that reason, FEA is holding the public hearing in each of those regions. Information available to FEA indicates that inventories of No. 1 fuel oil have been reduced to levels that have the potential for creating supply disruptions in the North Central states, primarily due to exceptionally high demand and to certain changes in marketing methods.

In addition, FEA has been monitoring the recent price increases in the areas affected by the severe weather, and wishes to learn whether the increases have taken place principally at the retail level or the wholesale or refiner levels. Comments are specifically invited on whether current price levels are justified, taking into account normal seasonal increases and the higher costs of any imports into the particular region.

Finally, FEA requests comments on whether any specific changes are required in its current regulatory programs For example, FEA is interested in receiving views on whether entitlements benefits should be extended to imported middle distillates.

[1] Consideration of these factors shall be made in light of the Commission's discussion in Peabody Telephone Answering Service, et al., 55 F.C.C. 2d 626 (1975).

PUBLIC HEARINGS AND WRITTEN COMMENT PROCEDURES

The public hearings, will be held in Minneapolis, Minnesota, and Boston, Massachusetts, beginning at 9:30 a.m., local time, on Friday, January 28, 1977, to be continued, if necessary, at 9:30 a.m., local time, Saturday, January 29, 1977. The Minneapolis hearing will be held in Courtroom No. 3, Federal Courthouse, 110 South Fourth Street, Minneapolis, Minnesota. The Boston hearing will be held in Room 208 (P.O.C.H.), John W. McCormick Post Office and Courthouse, Post Office Square, Boston, Massachusetts (use Milk Street entrance).

Any person who has an interest in the subject matter of this notice or who is a representative of a group or class of persons that has an interest in the subject matter of this notice may make a written request for an opportunity to make an oral presentation. Persons requesting time to testify at the Minneapolis hearing should direct their request to FEA Region V, 175 South Jackson Street, Room A-333, Chicago, Illinois 60604, Attention: Richard Williams. Persons requesting time to testify at the Boston hearing should direct their requests to FEA Region I, Room 700, 150 Causeway Street, Boston, Massachusetts 02114, Attention: Diane Novick. Requests to testify must be received before 4:30 p.m. local time, Tuesday, January 25, 1977. Requests should be labeled both on the document and on the envelope "Supply and Price Levels of Middle Distillates."

The person making the request should briefly describe the interest concerned; if appropriate, state why he or she is proper representative of a group or class of persons that has such an interest, and give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through Wednesday, January 26, 1977. Each person selected to be heard will be so notified by the FEA before 4:30 p.m., January 26, 1977 and must, if feasible, submit 100 copies of his or her statement to FEA at the location of the hearing on the day the statement is scheduled to be delivered.

The FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearings will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal state-

ments will be given in the order in which the initial statements were made and will be subject to time limitations.

Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The presiding officer, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Interested persons are also invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposals set forth in this notice to Executive Communications, Room 3309, Federal Energy Administration, Box KK, Washington, D.C. 20461. Comments should be identified on the documents and on the envelope "Supply and Price Levels of Middle Distillates." Fifteen copies should be submitted. Comments in this proceeding will be considered if received by January 31, 1977.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in accordance with the procedures stated in 10 CFR 205.9(f). FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., January 18, 1977.

DAVID G. WILSON,
Acting General Counsel.

PACIFIC COAST-EUROPE RATE AGREEMENT

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before February 14, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

David C. Nolan, Esquire, Graham & James, One Maritime Plaza, San Francisco, California 94111.

Agreement No. 10052-2, among the members of the above-named rate agreement, extends the term of the basic agreement through August 28, 1978.

By order of the Federal Maritime Commission.

Dated: January 19, 1977.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.77-2329 Filed 1-24-77;8:45 am]

[Docket No. 77-1; Certificate (performance) No. P-88]

PACIFIC FAR EAST LINE, INC.

Order of Hearing

In accordance with the provisions of 46 CFR 540.8(a), the Federal Maritime Commission on October 1, 1976, served on Pacific Far East Line, Inc. (PFEL) a Notice of Intention to Revoke Certificate (Performance) No. P-88. In that notice the Commission set forth in detail the reasons for its intention: (a) to revoke the waiver heretofore granted to PFEL as to the amount of working capital required for qualification for a Certificate (Performance) as a self-insurer in accordance with 46 CFR 540.5(d); and (b) to revoke Certificate (Performance) No. P-88 covering the SS *Mariposa* and the SS *Monterey*.

Under the authority granted it by section 3 of Pub. L. 89-777, 46 U.S.C. 817e (d), the Commission issued its General Order 20, (46 CFR 540) which provides that in order to qualify for a Certificate (Performance) for Financial Responsibility, an applicant must maintain financial responsibility coverage for performance in an amount not less than 110 percent of the greatest amount of unearned passenger revenue held by the applicant on any date during the immediately preceding two fiscal years (46 CFR 540.5). Evidence of adequate coverage may be established by one or a combination of methods: insurance, guaranties, escrow accounts, or by qualifying as a self-insurer. In order to qualify for a Certificate (Performance) as a self-insurer, an applicant must demonstrate, among other things, that it has working capital in an amount not less than 110% of the greatest amount of unearned passenger revenue held by it on any date during the immediately preceding two fiscal years, and that it has had continued and stable passenger operations over an extended period of time (46 CFR 540.5(d)). The regulations of the Commission do permit the Commission, for good cause shown, to waive the requirement as to the amount of working capital (46 CFR 540.5(d)).

If an applicant does not establish adequate evidence of financial responsibility by the methods of insurance, guaranties, escrow accounts and/or self-insurance, the regulations of the Commission require the applicant to obtain a surety bond in the required amount of coverage before it may receive a Certificate (Performance) and arrange, offer, advertise or provide passage on its vessels (46 CFR 540.1 and 540.6).

PFEL has at no time qualified for its Certificate (Performance) No. P-88 by the methods of insurance, guaranties, or escrow accounts. It has, however, since November 6, 1970, qualified for its Certificate (Performance) as a self-insurer. Because its working capital had dropped below the required amount, on January 31, 1972, PFEL was granted a waiver of the working capital requirement for self-insurance status. The Commission at that time found the requisite good cause for the waiver in representations made by PFEL that the reduction in its working capital was only temporary in nature.

When it became apparent to the Commission that PFEL's working capital in late 1973 and early 1974 had drastically deteriorated to a deficit in excess of $10,000,000, the Commission explored with PFEL various possible methods of increasing its evidence of financial responsibility in order to avoid, if possible, revocation of the waiver of working capital requirement and/or the Certificate (Performance). In November of 1974, PFEL committed itself to obtain a surety bond in the amount of $300,000 and to increase the amount of that bond by $100,000 per month each month thereafter. Based upon this commitment, and the resulting monthly increase in protection thus made available for the benefit of passengers, the Commission took no action at that time to revoke the waiver of working capital requirement or the Certificate (Performance).

However, circumstances at the present time are substantially different from those which obtained in 1972 and 1974. The alleged temporary reasons given by PFEL for its decline in working capital have long since ended, and PFEL has had a four-year history of financial instability. Furthermore, in March of 1976 PFEL unilaterally and without the consent of the Commission, decided not to further increase the face amount of the bond which had reached a level of $1,900,000. PFEL has since that time declined to further increase the face amount of the bond.

Without a waiver of the working capital requirement it does not appear that PFEL meets the working capital requirement of self-insurer status. 110% of PFEL's highest unearned passenger revenue within its immediately preceding two fiscal years (calendar years 1974 and 1975) is $5,051,539. The working capital of PFEL as of July 2, 1976, according to a company-prepared unaudited, uncertified balance sheet, was $1,849,028. This working capital of PFEL is $3,202,511 less than, and only 35.6% of, that required by the regulation of the Commission. The last audited, certified financial statement of PFEL as of December 31, 1975, shows that the working capital of PFEL was $747,782, an amount $4,303,757 less than,

and only 14.8% of, that required by Commission regulations. Thus, PFEL has apparently not met the working capital requirement for self-insurer status, whether its financial state is measured by either the unaudited, uncertified balance sheet of July 2, 1976 or by the audited, certified statement of December 31, 1975.

Furthermore, the history of PFEL's financial operating results and working capital situation for the years 1972 through 1975 and July 2, 1976, demonstrates drastic fluctuations and indicates that PFEL has apparently not met the requirement for continued and stable passenger operations over an extended period of time.

Based upon the evidence subsequent to January 31, 1972, including the unilateral decision by PFEL not to increase the bond beyond $1,900,000, it now appears that good cause no longer exists for continued waiver of the working capital requirement for PFEL.

In response to the Commission's Notice of Intention to Revoke, PFEL, on October 19, 1976, filed a Request for Hearing and Statement of Position. In accordance with the provisions of 46 CFR 540.8(a), that filing requested a hearing to show, with respect to any intended revocation, suspension, or modification of Certificate (Performance) No. P-88, that the evidence of financial responsibility filed by PFEL with the FMC does meet the requirements of 46 U.S.C. 817e and the provisions of Subpart A of 46 CFR 540.

Now, therefore, it is ordered, Pursuant to 46 CFR 540.8(a), that a hearing is hereby ordered to determine: (a) whether good cause exists for the continued waiver of PFEL's working capital requirement; and (b) whether PFEL's Certificate (Performance) No. P-88 should be revoked for failure to comply with the financial responsibility requirements of 46 U.S.C. 817e and 46 CFR Part 540, Subpart A. Such hearing shall afford PFEL the requested opportunity to demonstrate that good cause exists for the continued waiver of PFEL's working capital requirement and/or that the evidence of its financial responsibility filed with the Commission does meet the requirements of 46 U.S.C. 817e and 46 CFR Part 540, Subpart A, and that PFEL does therefore qualify to retain its existing Certificate (Performance) No. P-88.

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hearing shall commence no later than March 28, 1977.

It is further ordered, That PFEL is hereby made a respondent in this proceeding pursuant to Rule 3(a) of the Commission's rules of practice and procedure (46 CFR 502.41).

It is further ordered, That notice of this order be published in the FEDERAL REGISTER and that a copy thereof and notice of hearing be served on respondent.

It is further ordered, That any persons other than respondent who desire to become a party to this proceeding and to participate therein, shall file a petition to intervene in accordance with Rule 5(1) of the Commission's rules of practice and procedure (46 CFR 502.72).

It is further ordered, That all further notices issued by or on behalf of the Commission in this proceeding, including notice and time and place of hearing or prehearing conference shall be mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

PUERTO RICO PORTS AUTHORITY AND UNIVERSAL SHIPPING, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before February 14, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

Mr. Jose Ysern de la Cruz, Executive Assistant to the Executive Director, Puerto Rico Ports Authority, Commonwealth of Puerto Rico, G.P.O. Box 2829, San Juan, Puerto Rico 00936.

Agreement No. T-3231-1, between the Puerto Rico Ports Authority (Port) and Universal Shipping, Inc. (Universal), modifies the parties' basic agreement providing for Universal's two-year preferential use of certain marine facilities at Isla Grande Pier, San Juan, Puerto Rico, for the docking, mooring, loading and discharge of vessels and the handling and temporary storage of outbound cargo, as well as the exclusive use of 160 square feet of office space. The purpose of the modification is to extend the term of the agreement for an additional two-year period.

By order of the Federal Maritime Commission.

Dated: January 19, 1977.

FRANCES C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-7115, et al.]

COASTAL STATES GAS PRODUCING CO., ET AL.

Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

JANUARY 7, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20462, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket Nos. RP75-1, RP75-53 and RP76-24]

FLORIDA GAS TRANSMISSION CORP.

Order Approving Settlement Agreement

JANUARY 13, 1977.

Certification of a proposed Stipulation and Agreement in Docket No. RP76-24 was made on September 14, 1976, by Presiding Administrative Law Judge Samuel Gordon. This Agreement resolves not only all issues in that docket, but also the reserved issue of rate of return for common equity in Docket Nos. RP75-1 and RP75-53.[1] For the reasons stated herein, the Commission shall approve the Settlement Agreement.

The proposed Settlement Agreement provides that the reserved issue of return on equity in Docket Nos. RP75-1 and RP75-53 will be resolved by providing a return of 13.00% on equity in these two dockets. Resolution of this issue will terminate the proceedings in these dockets. On the basis of this settlement, Florida Gas Transmission Company (Florida Gas) agrees to refund to its Rate Schedule G customers the resulting $557,375 in excess revenues it collected during the locked-in periods covered by Docket Nos. RP75-1 and RP75-53. This refund shall be made with simple interest at a 9% rate per annum.

The proposed Settlement Agreement resolves the return issue in Docket No. RP76-24 by allowing a return on equity of 13.00% with an overall return of 9.83%. In addition, it provides for the refund of excess revenues in the instant docket of $773,629 based upon stipulated test period costs. This reduction provides also a basis for calculation of rate reductions for transportation service rate schedules. Finally, the settlement provides for contingent additional refunds for sales in excess of test period volume of 80,936,300 MMBtu for the period April 15, 1976, through April 14, 1977. Refunds will be calculated by multiplying the excess sales for each rate schedule by the established unit fixed costs for each rate schedule. Refunds of all amounts under the proposed Agreement will be made with simple interest at the rate of 9% per annum.

Aside from these refund provisions, the proposed Agreement provides for the filing of refund reports; reaffirms Florida Gas's obligation to flow through the jurisdictional portion of supplier refunds; provides for an increase in the basic transmission plant depreciation rate to 5.5% with the understanding that approval of the Agreement would indicate approval of this depreciation rate under Section 9 of the Natural Gas Act; and refers to the understanding of all parties that Florida Gas is conforming to the requirements of Section 167(e) of the Internal Revenue Code relating to the normalization method of accounting. The Agreement contains a provision that it requires approval in total and that should approval of the total Agreement be given, Docket Nos. RP75-1, RP75-53 and RP76-24 shall be considered terminated.

Attached as Appendix A hereto is the settlement cost of service for these dockets. The Commission's review of the proposed Agreement and settlement cost of service indicates that it provides a just and reasonable resolution of the contested issues in the dockets covered by the Agreement. Accordingly, the Commission believes that the proposed Agreement should be approved and that these dockets should be terminated, except for the refund obligations.

The Commission orders: (A) The proposed Stipulation and Agreement certified on September 14, 1976, in the referenced dockets is hereby approved. The Agreement is hereby incorporated by reference to this order.

(B) Florida Gas shall file within thirty days of the issuance of this order revised tariff sheets, to be effective April 15, 1976, in accordance with Article IV of the Agreement, to reflect the reduced rates resulting from approval of this Agreement.

(C) Florida Gas shall file a report of refunds within thirty days of the issuance of this order showing refunds required by the Agreement together with interest calculated at the rate of 9% per annum.

(D) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against Florida Gas or any person or party.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

Florida Gas Transmission Co.—Cost of service for docket No. RP75-1

Line No.	Description (1)	Amount (2)
	A. Total cost of service—12 mo ended June 30, 1975: [1]

[Docket No. CI77-199]

GULF OIL CORP.

Notice of Application for Abandonment Authorization [1]

JANUARY 12, 1977.

Take Notice that the Applicant listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before January 24, 1977, file with the Federal Power Commission, Wash-

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

ington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time herein, if the Commission on its own review of the matter finds that an abandonment is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on this application if no petition to hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Applications for "Small Producer" Certificates [1]

JANUARY 12, 1977.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2041 Filed 1-24-77;8:45 am]

FEDERAL RESERVE SYSTEM

COMMERCIAL BANK, DELPHOS, OHIO

Order Approving Application for Merger of Banks

The Commercial Bank, Delphos, Ohio, (Applicant) a member of bank has applied for approval to the Board of Governors of the Federal Reserve System, pursuant to the Bank Merger Act, (12 USC 1828(c)), to acquire by merger, The Farmers Bank of Elida, Elida, Ohio, (Bank), a nonmember bank, under the name and charter of Applicant. It is proposed that upon consummation of this merger the present office of Bank will be operated as a branch of Applicant.

As required by the Act, notice of the proposed merger, in the form approved by the Board, has been published and the Federal Reserve Bank of Cleveland has requested reports on competitive factors from the Attorney General of the United States, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation. A copy of the application has also been sent to the Superintendent of Banks of Ohio for his comments.

The Federal Reserve Bank of Cleveland has considered the application and all comments and reports in the light of factors set forth in the Act.

Applicant, ranking 131st among banking organizations in Ohio, holds deposits of $23.2 million representing 0.1 percent of total deposits in Commercial banks in the State.[1]

Applicant operates its head office in Delphos, Ohio, and has one branch in town and another branch in Gomer, Ohio, which is located approximately 7 miles east of its head office and 5 miles northeast of Bank. Applicant holds approximately 7.9 percent of total deposits of commercial banks in the Lima banking market (which includes all of Allen County, southern Putnam County and a small portion of eastern Van Wert County) and is the fifth largest of 11 banks in that market.

Bank operates a single banking office in Elida, which is located in the predominately rural northwest section of Allen County, approximately 7 miles from Delphos. Bank holds deposits of $3.2 million and is the smallest bank operating in the Lima market. The merger would eliminate some existing and future competition between Applicant and Bank. Both Applicant and Bank operate in the same banking market and the service area of Bank is entirely contained within that of Applicant. Applicant derives approximately 1.5 percent of its deposit volume and 4.4 percent of its loan volume from Bank's service area, and Bank derives approximately 7.0 percent of its deposit volume and 4.0 percent of its loan volume from the portion of Applicant's service area, which lies outside its own. Consummation of the proposed merger of Applicant with Bank would not materially increase Applicant's share of total deposits in the State and Applicant's share of deposits in the relevant market would increase from 7.9 percent to 9.0 percent. Applicant would retain its present rank in the market.

Although consummation of the proposal would eliminate one banking alternative from the Lima market, it would not significantly increase the concentration of market deposits. Based on these considerations, the proposed merger would have slightly adverse effects on competition in the market.

The financial and managerial resources of Applicant are satisfactory. Bank is in need of leadership and successor management which Applicant would be able to furnish. The future

[1] All deposit data are as of June 30, 1975.

prospects for Applicant after consummation of the proposal appear favorable.

There is no evidence in the record to indicate that the needs of the Allen banking market are not being met at the present time. However, if the merger is approved, Applicant has indicated that it will offer indirect installment loans, more extensive checking account services, and establish Saturday banking hours at Bank. Therefore, considerations relating to the convenience and needs of the communities to be served lend weight toward approval of the application.

It is the judgment of the Federal Reserve Bank of Cleveland that the slightly adverse effect of the proposed merger on existing and future competition are outweighed by the benefits to the banking convenience and needs of the customers to be served by Applicant.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Cleveland, acting pursuant to delegated authority.

By order of the Federal Reserve Bank of Cleveland, acting pursuant to delegated authority, for the Board of Governors of the Federal Reserve System, effective January 13, 1977.

WILLIS J. WINN,
President.

[FR Doc.77-2320 Filed 1-24-77;8:45 am]

MONTGOMERY BANCORPORATION, INC.

Order Approving Formation of Bank Holding Company

Montgomery Bancorporation, Inc., Winchester, Kentucky, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 percent or more of the voting shares of Montgomery National Bank of Mt. Sterling, Mt. Sterling, Kentucky ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a nonoperating corporation organized under the laws of Kentucky for the purpose of becoming a bank holding company through the acquisition of bank. Upon acquisition of bank, Applicant would hold .15 of one percent of the total deposits in commercial banks in the State.[1] Bank (deposits of approximately $15 million) is the fourth largest of eight commercial banks in the relevant banking market[2] and holds 16.5 percent of total deposits in commercial banks in the market. Four of Applicant's principals in their individual capacities own an aggregate of 46 percent of the voting shares of Clark County National Bank of Winchester, Winchester, Kentucky ("Winchester Bank"), which is located 16 miles west of Bank, in a separate banking market. Since Winchester Bank is located in a separate banking market from that of Bank, it appears that no meaningful competition would be eliminated as a result of consummation of this proposal. Inasmuch as this proposal represents essentially a reorganization of the ownership of Bank from individuals to a corporation owned by the same individuals, the acquisition of Bank by Applicant would not have any significant adverse effect upon either existing or potential competition within the relevant banking market. Accordingly, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, Winchester Bank, and Bank are regarded as satisfactory. As part of the proposal, Applicant has committed to credit to the income account of Bank all insurance commission income from the sale of credit life and credit accident and health insurance in connection with extensions of credit by Bank. Applicant proposes to service the debt it will incur in acquiring shares of Bank over a twelve-year period, through dividends to be declared by Bank and through the tax benefits to be derived from the filing of consolidated tax returns. In the Board's view, Applicant's earnings prospects appear to be adequate in order to service that debt without impairing the financial condition of Bank.[3] Accordingly, the Board concludes that the banking factors are consistent with approval of the application. Applicant has proposed several improvements in the services offered by Bank including an extension of the business hours of Bank and an increase in the effective interest rate on passbook savings accounts through the implementation of day-of-deposit-to-day-of-withdrawal computation and daily compounding of interest. Considerations with respect to the convenience and needs of the community to be served are regarded as being consistent with approval of the application. Accordingly, it is the Board's judgment that the proposed transaction would be in the public interest and the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Cleveland, pursuant to delegated authority.

By order of the Board of Governors,[4] effective January 18, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-2321 Filed 1-24-77;8:45 a.m.]

[1] Deposit data are as of December 31, 1975.

[2] The relevant banking market is approximated by Bath, Menifee, and Montgomery Counties.

[3] In making this determination, the Board specifically considered Applicant's commitment to credit to Bank's income account all commission income derived from the sale of credit life and credit accident and health insurance related to extensions of credit by Bank. Accordingly, this Order is conditioned upon the fulfillment of that commitment.

[4] Voting for this action: Vice Chairman Gardner and Governors Coldwell and Lilly. Voting against this action: Governor Wallich. Absent and not voting: Chairman Burns and Governors Jackson and Partee.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

RESEARCH SCIENTIST DEVELOPMENT REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of February 1977:

Research Scientist Development Review Committee, February 10–12; 8:30 a.m., Plaza Room, Dupont Plaza Hotel, Connecticut and Massachusetts Aves., N.W., Washington, D.C. Open—February 10, 11 a.m.–12 noon. Closed—Otherwise. Contact Ms. Jeannette Raley, Parklawn Building, Room 9C–24, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–4347.

Purpose: The Committee reviews applications for Research Scientist Development Awards, and Research Scientist Awards administered by the National Institute of Mental Health and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 11 to 12 noon, February 10, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact person listed above.

The NIMH Information Officer who will furnish summaries of the meeting and a roster of the committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–3600.

Dated: January 19, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc.77-2219 Filed 1-24-77;8:45 am]

Food and Drug Administration

ADVISORY COMMITTEES

Notice of Meetings

This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and the FDA regulations, 21 CFR Part 2, Subpart D, relating to advisory committees. The following advisory committee meetings are announced:

Committee name	Date, time, and place	Type of meeting and contact person
1. FDA/NIDA Drug Abuse Research Advisory Committee.	Feb. 10 and 11; 1 p.m. on Feb. 10; rm. C8895 on Feb. 10, rm. C8861 on Feb. 11, Neuropsychiatric Institute, University of California at Los Angeles, Los Angeles, Calif.	Closed committee deliberations Feb. 10, 9 a.m. to 12 m.; open public hearing Feb. 10, 1 to 2 p.m.; open committee discussion Feb. 10, 2 to 5 p.m., Feb. 11 9 a.m. to 5 p.m., John A. Seigliano, Ph. D., (HFD-123), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3504.

General function of the committee. Advises the Food and Drug Administration on action to be taken with respect to investigational use of substances with abuse potential. Advises the National Institute on Drug Abuse (NIDA) about supplies of substances for clinical studies and quantities of substances for animal and in vitro studies. Advises FDA and NIDA on development of broad outlines for studies of substances with abuse potential and new methods and tests in animals and man by which the dependence liability of investigational drugs may be estimated.

Agenda—Open public hearing. Any interested person may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Progress reports on cannabis—tolerance and withdrawal properties, psychological effects on flying, use for glaucoma (effect on intra-ocular pressure), use for nausea and vomiting in patients under cancer chemotherapy, and laboratory demonstrations on the effect on driving (using a simulator).

Closed committee deliberations. Report on actions taken on previous committee recommendations, review of investigational new drug (IND) applications and amendments, and staff actions on drug shipments. This portion of the meeting will be closed to protect trade secret data and personal information, disclosure of which would constitute a clearly unwarranted invasion of personal privacy (5 U.S.C. 552(b) (4) and (6)).

Committee name	Date, time, and place	Type of meeting and contact person
2. Neurological Panel	Feb. 11 and 12; on Feb. 11, 9 a.m., rm. 6821, FB-8, 200 C St. SW., Washington, D.C.; on Feb. 12, 9 a.m., rm. 421, Crystal City Marriott Hotel, Arlington, Va.	Open public hearing Feb. 11, 9 to 10 a.m.; open committee discussion Feb. 11, 10 a.m. to 3 p.m.; closed committee deliberations Feb. 11, 3 to 4 p.m.; open committee discussion Feb. 12, 9 a.m. to 4 p.m.; James R. Veale (HFK-450), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7226.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present to the executive secretary, information pertinent to classification of devices listed in this announcement or devices previously considered by the panel. Submission of data relative to tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by February 4, 1977, and submit a brief statement about the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also the approximate time required to make their comments.

Open committee discussion. Review classification recommendations of the November 5, 1976 meeting of the Diagnostic and Monitoring Devices and Instruments Subcommittee; review classification recommendations of the November 6, 1976 meeting of the Surgical Implants and Instruments Subcommittee; classification of the following devices: physiological signal amplifiers; EEG spectrum analyzers; ataxiagraphs; chronaximeters; electronystagmograph units; EEG test signal generator; skin potential measurement devices; temperature measurement devices (direct contact, powered); peripheral autonomic function measuring/monitoring devices; physiological signal conditioners/couplers; spike enhancer; tremor transducers; alpha monitors; EEG monitors; aneurysm clip applicators; ligature passing and knot-tying instruments; shunt

system implantation instruments; microsurgical instruments (excluding optical devices); specialized knives and accessories; rasps; manual retractors and accessories; self-retaining retractors and accessories; manual rongeurs; powered rongeurs; manual saws and accessories; powered saws and accessories; scissors; separators; spatulas; spoons; cottonoid paddies; cotton sponges; gauze sponges; hemostatic clip applicators; clip forming/cutting instruments; clip removal instruments; clip racks; cranial electrotherapy (electrosleep) stimulators; induction coagulation generators; radiofrequency lesion generators; leukotomes; coagulation probes; cryogenic systems; induction coagulation seeds (implantable); lesion temperature monitors; lesion impedance monitors; biofeedback devices; aversive conditioning devices.

Closed committee deliberations. The panel will discuss a proposed regulatory action to be taken by the agency under authority granted under the Food, Drug, and Cosmetic Act as amended. This portion of the meeting will be closed to protect investigatory files compiled for law enforcement purposes (5 U.S.C. 552(b)(7)).

Committee name	Date, time, and place	Type of meeting and contact person
3. Allergenic Extracts Panel	Feb. 11 and 12; 9 a.m., on Feb. 11, 8:30 a.m. on Feb. 12, rm. 130, 6110 Executive Blvd., Rockville, Md.	Open public hearing Feb. 11, 9 to 11 a.m.; open committee discussion Feb. 11, 11 a.m. to 5:30 p.m., Feb. 12, 8:30 to 10 a.m.; closed committee deliberations Feb. 12, 10 a.m. until adjournment; Clay Sisk, (11 FTS-5), 8800 Rockville Pike, Bethesda, Md 20014, 301-443-5455.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of biological products.

Agenda—Open public hearing. Any interested person may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of alum precipitated allergenic extracts, food extracts for immunotherapy, recommendations for further testing, standardization of allergenic extracts, revision of draft generic statements on several allergenic extracts, and draft label recommendations.

Closed committee deliberations. Review of data submissions from allergenic extract producers on the subject of manufacturing techniques for epidermal allergenic extracts and for food allergenic extracts. This portion of the meeting will be closed to permit discussion of trade secret data (5 U.S.C. 552(b)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be obtained from the Public Records and Documents Center (HFC-18), 5600 Fishers Lane, Rockville, MD 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 2, Subpart D, published in the FEDERAL REGISTER of November 26, 1976 (41 FR 52148).

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94-409), permit such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably, deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

The Commissioner approves the scheduling of meetings at locations outside of the Washington, D.C., area on the basis of the criteria of § 2.307 (21 CFR 2.307) of FDA's regulations relating to public advisory committees.

Dated: January 18, 1977.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

[FR Doc.77-2402 Filed 1-24-77;8:45 am]

[Docket No. 76N-0403; DESI 11250]

ARGININE GLUTAMATE

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

The Food and Drug Administration is reclassifying the drug arginine gultamate to lacking substantial evidence of effectiveness and offering an opportunity for a hearing on the proposal to withdraw its approval. Persons who wish to request a hearing may do so on or before February 24, 1977.

In a notice (DESI 11250) published in the FEDERAL REGISTER of June 3, 1971 (36 FR 10815), the Food and Drug Administration announced its conclusions that the drug product described below containing arginine glutamate is possibly effective for its labeled indications relating to use in conditions associated with elevated blood ammonia levels.

NDA 11-640; Modumate Solution for Injection containing arginine glutamate; Abbott Laboratories, 14th and Sheridan Rd., North Chicago, Ill. 60064.

Other drugs included in the June 3, 1971 notice are not affected by this notice.

Modumate was subsequently included in the list of drugs that may remain on the market pending completion of scientific studies to determine effectiveness, as announced in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623).

No clinical studies have been undertaken, and on June 29, 1976, Abbott Laboratories requested that approval of the new drug application be withdrawn. No other person has submitted data or protocols or has expressed an intention to perform additional clinical studies on arginine glutamate. Accordingly, in a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Commissioner of Food and Drugs is revoking the exemption granted in the December 14, 1972 notice for continued marketing of the drug. The drug is now reclassified to lacking substantiial evidence of effectiveness.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), demonstrating the effectiveness of the drug.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder of the new drug application specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product that is identical, related, or similar to the drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to the drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, Md. 20857.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug product subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before February 24, 1977, a written notice of appearance and request for hearing, and (2) on or before March 28, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk during working hours, Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.31) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262).)

Dated: December 30, 1976.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[FR Doc.77-2223 Filed 1-24-77;8:45 am]

ARGININE GLUTAMATE

Drugs for Human Use; Drug Efficacy Study Implementation; Revocation of Exemption

In a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Food and Drug Administration is reclassifying the possibly effective indication for arginine glutamate (DESI 11250) to lacking substantial evidence of effectiveness and is offering an opportunity for hearing. That drug, described below, has been allowed to remain on the market beyond the time limit established for implementation of the Drug Efficacy Study on the condition that manufacturers undertake additional clinical studies to determine its effectiveness. The temporary exemption to permit continued marketing was announced in a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623). Since no person has submitted additional data, or expressed an intention to perform such studies, the exemption granted by the December 14, 1972 notice is hereby revoked.

NDA 11-640; Modumate Solution for Injection containing arginine glutamate; Ab-

bott Laboratories, 14th and Sheridan Rd., North Chicago, IL 60064.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)).

Dated: January 17, 1977.

JOSEPH P. HILE,
Associate
Commissioner for Compliance.

[FR Doc.77-2220 Filed 1-24-77;8:45 am]

DENTIFRICE AND DENTAL CARE PANEL

Cancellation

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770–776 (5 U.S.C. App. I)), the Food and Drug Administration announced in a notice published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3348), public advisory committee meetings and other required information in accordance with provisions set forth in section 10(a)(1) and (2) of the act.

Notice is hereby given that the meeting of the Dentifrice and Dental Care Panel scheduled for February 16 and 17, 1977, Conference Rm. K, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD, is cancelled.

Dated: January 17, 1977.

JOSEPH P. HILE,
Associate
Commissioner for Compliance.

MEDICAL RADIATION ADVISORY COMMITTEE

Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770–776 (5 U.S.C. App. I)), the Food and Drug Administration announces the renewal of the Medical Radiation Advisory Committee by the Secretary, Department of Health, Education, and Welfare, for an additional period of 2 years beyond January 5, 1977.

Authority for this committee will expire on January 5, 1979, unless the Secretary formally determines that continuance is in the public interest.

Dated: January 17, 1977.

JOSEPH P. HILE,
Associate
Commissioner for Compliance.

Health Services Administration

PROJECT GRANTS FOR SUDDEN INFANT DEATH SYNDROME INFORMATION AND COUNSELING

Announcement of Availability of Grants

The Bureau of Community Health Services, Health Services Administration, announces that competitive applications for Sudden Infant Death Syndrome Information and Counseling project grants are being accepted under authority of section 1121(b), of the Public Health Service Act.

Section 1121(b) of the Public Health Service Act (42 U.S.C. 300c–11) authorizes grants to public and nonprofit private entities for support of sudden infant death syndrome (SIDS) projects. Grants to eligible applicants may be made by the Secretary for projects which include both: (1) The collection, analysis, and furnishing of information (derived from post mortem examinations and other means) pertaining to the causes of SIDS; and (2) The provision of information and counseling to families affected by SIDS.

Application kits, including all necessary forms, instructions and information may be obtained from, and completed applications returned to, the address below:

Grants Management Branch
Bureau of Community Health Services
Health Services Administration
Public Health Service
Room 7A-39, Parklawn Building
5600 Fishers Lane
Rockville, Maryland 20857

Programmatic information relative to development of an application is available from the Office of Maternal and Child Health, Bureau of Community Health Services, Room 7-15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland, 20857, telephone number 301–443–6600.

Completed applications must be received by March 1, 1977.

The amount available for grants under this announcement is $250,000.

Dated: January 11, 1977.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

National Institute of Education

PANEL FOR THE REVIEW OF LABORATORY AND CENTER OPERATIONS

Deadline for Receipt of Documentation to Support Nominations

Notice is hereby given that the Director, National Institute of Education, has established January 31, 1977, as the deadline for the receipt of documentation to support nominations to the Panel for the Review of Laboratory and Center Operations. The deadline for receipt of nominations for the Panel was January 17, 1977.

The initiation for Panel nominations, originally published at 41 FR 53547, December 7, 1976, is authorized pursuant to the provisions of Section 403(f)(3)(A) of the General Education Provisions Act, as amended by the Education Amendments of 1976 (Pub. L. 94-482). In accordance with this statute, the initiation is limited to designated educational laboratories, research and development centers, and to "professional, commercial, scholarly and educational associations, particularly associations or organizations engaged in educational research". For additional information contact:

Steve Scheier, Task Force on Laboratories and Centers, National Institute of Education, 1200 19th Street, NW., Room 714, Washington, D.C. 20208.

Dated: January 18, 1977.

RICHARD S. WERKSMAN,
Committee Management Officer.

ALLERGY AND IMMUNOLOGY RESEARCH COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Allergy and Immunology Research Committee, National Institute of Allergy and Infectious Diseases on March 3-4, 1977 at the National Institutes of Health, Building 31B, Conference Room 5, Bethesda, Maryland. This meeting will be open to the public from 9 a.m. to 10 a.m. on March 3 for the discussion of general policy matters and administrative reports. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting of the committee will be closed to the public from 10 a.m. on March 3 to adjournment on March 4 for the review, discussion, and evaluation of individual initial pending and renewal grant applications. The closed portions of the meetings involve solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, NIAID, National Institutes of Health, Building 31, Room 7A32, Bethesda, Maryland 20014, (301) 496-5717, will furnish rosters of committee members, summaries of the meetings, and other information pertaining to the meetings.

(Catalog of Federal Domestic Assistance Program No. 13.855, National Institutes of Health.)

Dated: January 18, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-2210 Filed 1-24-77;8:45 am]

ANIMAL RESOURCES ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Animal Resources Advisory Committee, Division of Research Resources, March 1-2, 1977, National Institutes of Health, Building 31, Conference Room 7, Bethesda, Maryland 20014. This meeting will be open to the public on March 1 from 9 a.m. to 10:30 a.m., during which

time there will be a brief staff presentation on the current status of the Animal Resources Program. The Committee will select future meeting dates. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10:30 a.m. to 5 p.m. on March 1 and from 9 a.m. to adjournment on March 2 for the review, discussion and evaluation of initial pending and renewal research grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of Committee members on individual grant applications containing detailed research protocols, designs and other technical information; financial data such as salaries; and personal information concerning individuals associated with the applications.

Mr. James Augustine, Information Officer, Division of Research Resources, Building 31, Room 5B39, Bethesda, Maryland 20014, 301/496-5545, will provide summaries of the meeting and rosters of Committee members. Dr. Dennis O. Johnsen, Executive Secretary, Animal Resources Advisory Committee, Building 31, Room 5B33, Bethesda, Maryland 20014, 301/496-5507, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.306, National Institutes of Health.)

Dated: January 18, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BREAST CANCER TASK FORCE PROJECT PRESENTATIONS

Meeting

Notice is hereby given of the Breast Cancer Project Presentations sponsored by the Breast Cancer Task Force, National Cancer Institute, March 9, 1977, Holiday Inn, Versailles Rooms I and II, Bethesda, Maryland.

This meeting will be open to the public from 8:30 a.m. to adjournment on March 9, 1977, for discussion of research projects related to breast cancer. Attendance by the public will be limited to space available.

For additional information, please contact Dr. D. Jane Taylor, Landow Building, Room A-422, Division of Cancer Biology and Diagnosis, National Cancer Institute, National Institutes of Health, Bethesda, Maryland 20014, (301) 496-6718.

Dated: January 13, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-2213 Filed 1-24-77;8:45 am]

BREAST CANCER VIRUS WORKSHOP ON MASON PFIZER MONKEY VIRUS AND RELATED VIRUSES

Meeting

Notice is hereby given of the Breast Cancer Virus Workshop on Mason Pfizer Monkey Virus and Related Viruses sponsored by the Virus Cancer Program, March 28 and 29, 1977, Building 31, Conference Room 9, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on March 28, 1977, from 9 a.m. to 5 p.m. and on March 29, 1977, from 9 a.m. to 5 p.m. for presentation of scientific papers. Attendance by the public will be limited to space available.

Dr. Clarice E. Gaylord, Acting Head, Breast Cancer Virus Studies Section, Collaborative Research Branch, Landow Building, Room C306, Division of Cancer Cause and Prevention, National Cancer Institute, National Institutes of Health, Bethesda, Maryland 20014 (301/496-4533) will provide additional information.

Dated: January 13, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS DIVISION OF CANCER BIOLOGY AND DIAGNOSIS

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCBD, National Cancer Institute, March 11 and 12, 1977, Building 31A, Conference Room 11A-10, National Institutes of Health. This meeting will be open to the public on March 11, 1977, from 9 a.m. to 5 p.m. to discuss the scientific research program of the Laboratory of Cell Biology, DCBD. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 12, 1977, from 9 a.m. to adjournment, for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Alan S. Rabson, Director, Division of Cancer Biology and Diagnosis, National Cancer Institute, Building 31, Room 3A03, National Institutes of Health, Bethesda, Maryland 20014 (301/496-4345) will furnish summary minutes, rosters of committee members, and substantive program information.

Dated: January 13, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS, NINCDS

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Neurological and Communicative Disorders and Stroke, National Institutes of Health, April 14 and 15, 1977, in Conference Room 1B07, Bldg. 36, NIH, Bethesda, Maryland 20014. This meeting will be open to the public from 10:30 a.m. to 5 p.m. on April 14th to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 9 a.m. until the conclusion of the meeting on April 15th for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Chief, Office of Scientific and Health Reports, Mrs. Ruth Dudley, Bldg. 31, Room 8A03, NIH, NINCDS, Bethesda, Maryland 20014, telephone 301/496-5751, will furnish summaries of the meeting and rosters of committee members.

The Executive Secretary from whom substantive program information may be obtained is: Dr. Thomas N. Chase, Director of Intramural Research, NINCDS, Bldg. 36, Room 5A05, NIH, Bethesda, Maryland, 20014, telephone 301/496-4297.

DIAGNOSTIC RESEARCH ADVISORY GROUP

Amended Notice of Meeting

Notice is hereby given of a change in the meeting of February 16, 1977 8:30 a.m. at Building 31-C, Conference Room 9, of the Diagnostic Research Advisory Group, National Cancer Institute, which was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 859).

This committee was to have convened at 8:30 a.m. on February 16, 1977 but has been changed to 8:30 a.m., February 17, 1977, at Building 31-A, Conference Room 8A30.

The meeting will be open to the public from 8:30 a.m. to 10:30 a.m. on February 17, 1977, and closed from 10:30 a.m. to adjournment. Attendance by the public will be limited to space available.

Dated: January 18, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-2206 Filed 1-24-77;8:45 a.m.]

MINORITY ACCESS TO RESEARCH CAREERS REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Minority Access to Research Careers Review Committee, National Institute of General Medical Sciences, on February 28-March 1, 1977, 9 a.m., National Institutes of Health, Building 31C, Conference Room 8. The Committee will host the Conference of Black Graduate Deans, and will be open to the public on Monday, February 28, 9 a.m. until 12 noon. The meeting will consist of opening remarks, discussion of procedural matters and a seminar of general interest. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on February 28 from 12 noon to 5 p.m. and on March 1 from 9 a.m. to 5 p.m. for the review, discussion, and evaluation of individual grant applications under the National Research Service Awards Program (42 U.S.C. 4821-1). The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications which contain detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. Paul Deming, Staff Assistant to the Director, NIGMS, Westwood Building, 5333 Westbard Avenue, Room 9A-05, Bethesda, Maryland 20014, telephone (301) 496-7301, will furnish summary minutes of the meeting and a roster of committee members.

Substantive program information may be obtained from Dr. Prince Rivers, Executive Secretary, Westwood Building, Room 9A-18, Bethesda, Maryland 20014, telephone (301) 496-7357.

(Catalog of Federal Domestic Assistance Programs 13-859, 13-860, 13-861, 13-862, General Medical Sciences.)

Dated: January 18, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NATIONAL ARTHRITIS ADVISORY BOARD

Establishment

The National Institutes of Health announces the establishment on December 16, 1976, of the National Arthritis Advisory Board, under the authority of section 440 of Pub. L. 94-562 (42 U.S. Code 289c-7). This Board is governed by provisions of Pub. L. 92-463 which sets forth standards for the formation and use of advisory committees.

The Board shall review and evaluate the implementation of the Arthritis Plan formulated by the National Commission on Arthritis and Related Musculoskeletal Diseases. In carrying out this function the Board shall advise and recommend to the Congress, the Secretary, and the heads of other appropriate Federal agencies with respect to the Arthritis Plan and the guidelines, policies and procedures of Federal programs relating to arthritis. The Board may collect such data as it deems advisable and necessary to enable it to perform these functions. The data collection responsibilities of the Board and the activities of its subcommittees are intended to allow it to perform the function of assessing the implementation of the Arthritis Plan and in submitting its annual report.

Authority for this Board will expire on September 30, 1980.

Dated: January 14, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

[FR Doc.77-2204 Filed 1-24-77;8:45 am]

NATIONAL COMMISSION ON DIGESTIVE DISEASES

Establishment

The National Institutes of Health announces the establishment on December 16, 1976, of the National Commission on Digestive Diseases, under the authority of section 301 of Pub. L. 94-562 (42 U.S. Code 289a note). This Commission is governed by provisions of Pub. L. 92-463 which sets forth standards for the formation and use of advisory committees.

The Commission shall: conduct a comprehensive study of the present state of knowledge of the incidence, duration, and morbidity of, and mortality rates resulting from digestive diseases and of the social and economic impact of such diseases; evaluate the public and private facilities and resources (including trained personnel and research activities) for the diagnosis, prevention, and treatment of, and research in such diseases; and identify programs (including biological, behavioral, nutritional, environmental, and social programs) in which, and the means by which, improvement in the management of digestive diseases can be accomplished. Each Federal entity administering health programs and activities related to digestive diseases shall, upon request, assist the Commission in carrying out its duties under this paragraph.

Based on the study, evaluation, and identification made pursuant to the above stated function, the Commission shall develop and recommend a long-range plan for the use and organization of national resources to effectively deal with digestive diseases. The plan shall provide for: research studies; investigations; development of preventive measures; detection of digestive disease; evaluation of new and improved methods of screening for digestive diseases; development of criteria for the diagnosis and the clinical management and control of digestive diseases; development of coordinated health care systems; education and training of scientists, clinicians, educators, and allied health professionals; the conduct and direction of field studies and clinical trials; establishment of a standardized nomenclature of all digestive diseases for use in basic and clinical research and to facilitate collaborative studies; and establishment of a system of periodic surveillance of the research potential and research needs in digestive diseases corresponding with the recently completed survey organized by the National Institute of Arthritis, Metabolism, and Digestive Diseases.

The Commission shall within eighteen months following its initial meeting publish and transmit directly to Congress a final report respecting its activities. The Commission shall cease to exist on the thirtieth day following the date of submission of this report.

Dated: January 14, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

[FR Doc.77-2205 Filed 1-24-77;8:45 am]

NATIONAL DIABETES ADVISORY BOARD

Establishment

The National Institutes of Health announces the establishment on December 16, 1976, of the National Diabetes Advisory Board, under the authority of section 201 of Pub. L. 94-562 (42 U.S. Code 289c-3a(a)). This Board is governed by provisions of Pub. L. 92-463 which sets forth standards for the formation and use of advisory committees.

The Board shall review and evaluate the implementation of the long-range plan to combat diabetes mellitus formulated by the National Commission on Diabetes. In carrying out this function the Board shall advise and recommend to the Congress, the Secretary, and the

heads of other appropriate federal agencies. with respect to the guidelines, policies and procedures of federal programs relating to diabetes. The Board may collect such data as it deems advisable and necessary to enable it to perfrom these functions. The Board shall submit to the Secretary and to the Congress an annual report that describes and evaluates the progress made during the year in diabetes research, treatment, education and training, and summarizes and analyzes expenditures made by the federal government for diabetes related activities.

Authority for this Board will expire on September 30, 1980.

Dated: January 14, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE SCIENCE INFORMATION PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Neurological and Communicative Disorders and Stroke Science Information Program Advisory Committee, National Institute of Neurological and Communicative Disorders and Stroke, March 10 and 11, 1977, at the National Institutes of Health, Building 31, Room 8A-30, Bethesda, MD 20014.

This meeting will be open to the public on March 10, 1977, from 12:30 p.m. to 5 p.m., and on March 11, 1977, from 9 a.m. until conclusion of the meeting, to discuss the status and plans for the Institute's science information program. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552(b)(4) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 10, 1977, from 9:30 a.m. to 12:30 p.m., for the review, discussion, and evaluation of individual contract proposals. The proposals contain information of a proprietary or confidential nature, including financial data, such as salaries, and personal information concerning individuals associated with the proposals.

Mrs. Ruth Dudley, Chief, Office of Scientific and Health Reports, NINCDS, NIH, Building 31, Room 8A-06, Bethesda, Maryland 20014, (301) 496-5751, will provide summaries of the meeting and rosters of committee members.

Mr. Alfred Weissberg, Executive Secretary, NINCDS, NIH, Building 31, Room 8A-03, Bethesda, Maryland 20014, (301) 496-9271, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.854, National Institutes of Health.)

Dated: January 13, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

POPULATION RESEARCH COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Population Research Committee, National Institute of Child Health and Human Development, on March 3-4, 1977, in the Landow Building, Room C-418, 7910 Woodmont Avenue, Bethesda, Maryland.

The meeting will be open to the public on March 3, from 9 a.m. to 10:30 a.m. to discuss the program status, new developments and projections for population research centers, program projects and national research service award applications. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 3 from 10:30 a.m. to adjournment, on March 4 for the review, discussion and evaluation of individual initial pending and supplemental grant applications. The closed portion of the meeting will involve solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Building 31, Room 2A-04, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-1848, will provide a summary of the meeting and a roster of committee members. Dr. William A. Sadler, Executive Secretary of the Population Research Committee, NICHD, Landow Building, Room C-704, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-6515, will furnish substantive program information.

TUMOR VIRAL IMMUNOLOGY WORKSHOP

Meeting

Notice is hereby given that the RNA Virus Studies Section, Viral Oncology Program of the Division of Cancer Cause and Prevention, NCI will hold a workshop entitled "Tumor Viral Immunology", March 8 & 9, 1977, from 9 a.m. to 5 p.m. each day at the King and Prince Hotel, St. Simon Island, Georgia.

The main purpose of the workshop is to review the current knowledge and present state of research regarding oncornaviral antigens and immune responses to these antigens. Particular emphasis will be placed on establishing the nomenclature for these antigens. This is not an advisory committee meeting. The workshop will be open to the public but attendance will be limited to available space.

For additional information contact Dr. Wilna Woods, National Cancer Institute, Landow Building, Room C306, 7910 Woodmont Avenue, Bethesda, Maryland 20014, (301) 496-6085.

Dated: January 18, 1977.

NATIONAL PETROLEUM RESERVE IN ALASKA

Memorandum of Understanding

The purpose of this publication is to give notice of a memorandum of understanding (MOU) for cooperative procedures which provides a mechanism to carry out the Secretary's responsibility of continuing the ongoing exploration program of the National Petroleum Reserve in Alaska (NPRA) and to take necessary and appropriate measures to protect the subsistence, environmental, fish and wildlife, historical, and scenic values of the Reserve during such exploration activities. This MOU will cover the limited period and purpose of exploration.

The Naval Petroleum Reserves Production Act of April 5, 1976 (43 U.S.C. 6501 et seq.) (hereafter called the "Act"), transfers the administrative responsibility of the NPRA to the Secretary of the Interior. The Act reserved and withdrew, subject to valid existing rights, all lands within the exterior boundaries of NPRA from all forms of entry and disposition under the public land laws including the mining and mineral leasing laws and all other acts. All uses within the Reserve must be consistent with the purposes of the legislation. The transfer of jurisdiction over the Reserve from the Secretary of the Navy to the Secretary of the Interior as it relates to petroleum exploration is to take effect on June 1, 1977. In order to accomplish his dual responsibilities on the Reserve, the Secretary of the Interior has delegated the management of the continuing exploration program, the enforcement of stipulations related to petroleum exploration, and the operation of the South Barrow gas field or other necessary gas fields as specified in the Act to the U.S. Geological Survey (GS). He has delegated to the Bureau of Land Management (BLM) the surface management and protection of surface values from environmental degradation.

The MOU identifies procedures to facilitate the interfacing of these two secretarial responsibilities delegated to GS and BLM through their respective Assistant Secretaries.

The Act requires the exploration of the Reserve and also mandates that it be accomplished in a manner that requires every precaution be taken to avoid unnecessary surface damage and minimize ecological disturbances throughout the Reserve.

The Act requires that two separate studies be conducted in the Reserve. One study under section 105(b)(1) will determine the best overall procedures to be used in the development, production, transportation, and distribution of petroleum resources. The MOU will allow the coordination of exploration activities that must be carried out to provide for the gathering of data needed to complete the study. The other study under section 105(c) will determine the values of, and best uses for, the lands in the Reserve. Both studies with appropriate recommendations will be forwarded to Congress by January 1, 1980, and April 5, 1979, respectively. Congress will then decide how to develop the known petroleum resources and to protect and preserve the other resource values.

On September 20, 1976, proposed regulations were published in the FEDERAL REGISTER regarding surface management and environmental protection of NPRA. The drafting of these proposed regulations involved considerable input from various local, State, and Federal agencies and other interested parties in Alaska. Following publication, numerous public comments and suggestions were submitted to the Department for consideration.

Due to the mandatory petroleum exploration operations and critical scheduling requirements necessary to conduct these activities, it has been determined that regulations governing these operations and related activities are not appropriate. This does not mean that such exploration activities will be conducted without regard to the environmental values and concerns which are found in the Reserve. The protection of the various resource values as mandated by the Act will be accomplished and facilitated by the cooperative procedures as outlined in the MOU. Briefly, these procedures provide for the preparation of preliminary and final plans; the coordination and consultation with other Federal, State, and local agencies, the Native community, and other interested parties; preparation of stipulations; and inspections to insure full compliance with environmental protection measures and rehabilitation requirements. After Congress determines how future development and production will take place, regulations could, at that time, be developed and issued to provide for the development and production of petroleum resources. Such regulations would come under the provisions of the Administrative Procedures Act.

Uses for other than the petroleum exploration will be authorized under regulations being promulgated in Chapter 2360 of Title 43 of the Code of Federal Regulations.

The legislation does not allow for the development and production of petroleum except on a limited basis from the South Barrow gas field or such other designated fields to supply gas to the Native village of Barrow and installations near Point Barrow.

Those areas that have been identified as having any significant subsistence, recreational, fish and wildlife, historic or scienic values, such as the Utukok River and Teshekpuk Lake areas, shall receive maximum protection to control activities which would unduly disrupt the surface values or disturb the associated fish and wildlife habitat values and related subsistence requirements of the Alaska Natives. Such maximum protection efforts are not intended as a prohibition of exploration activities within such areas, only that such activities are conducted in a manner which will minimize the adverse impact on the environment.

This MOU is effective January 18, 1977.

COOPERATIVE PROCEDURES OF JANUARY 18, 1977 FOR NATIONAL PETROLEUM RESERVE IN ALASKA BETWEEN BUREAU OF LAND MANAGEMENT AND THE U.S. GEOLOGICAL SURVEY

COOPERATIVE PROCEDURES

These procedures provide for the mutual cooperation and interface of authority and responsibility between the U.S. Geological Survey (GS) and the Bureau of Land Management (BLM) concerning petroleum exploration activities (i.e., geophysical and drilling operations) and the protection of the environment during such activities in the National Petroleum Reserve in Alaska (NPRA). This agreement supplements and is consistent with Secretarial Order No. 2948 of October 26, 1972. Such activities will be conducted in those designated Areas of Operations (AO) and other designated sites as identified in the Annual Plan of Operations. The procedures are based upon the following listed documents: Naval Petroleum Reserves Production Act of April 5, 1976 (42 U.S.C. 6501 et seq.); the Secretary's decision of April 6, 1976, as contained in the Executive Secretary's memorandum of April 15, 1976; Cooperative Procedures Agreement between GS and BLM dated August 29, 1975, and Secretrial Order No. 2948, and the reservations, terms, and conditions as stated in documents conveying land to Native corporations located within NPRA and, specifically the agreement of May 14, 1974, between the Department of the Navy, the Arctic Slope Regional Corporation, and four Native village corporations. These procedures may be further constrained by valid existing rights, statute, or court decree that may be applicable to NPRA or a particular site within the boundary of the Reserve.

The Naval Petroleum Reserves Production Act of 1976 assigned to the Secretary of the Interior all responsibilities with respect to any activities related to the protection of environmental, fish and wildlife, historical, or scenic values, as of April 5, 1976, the date of enactment. In addition, it requires that the Secertary assume total jurisdiction over the Reserve on June 1, 1977. This includes the commencement of further petroleum exploration and the assumption of any contracts which may be in effect with respect to such activities within the Reserve.

The Secretary of the Interior has delegated these responsibilities to the Assistant Secretary—Energy and Minerals, and Assistant Secretary—Land and Water Resources. The two Assistant Secretaries have in turn redelegated these assignments to their respective Bureaus.

Briefly, the basic responsibility for each agency is as listed below:

GEOLOGICAL SURVEY

a. The management of the continuing exploration program during the interim between the transfer of jurisdiction from Navy to Interior and the effective date of any legislation for a permanent development and production program.

b. Enforcement of regulations and stipulations issued relating to the exploration of petroleum resources.

c. Operation of the South Barrow gas field

BUREAU OF LAND MANAGEMENT

a. Surface management of NPRA and protection of surface values from environmental degradation.

b. Prepare such rules and regulations as are necessary to carry out the surface management and protection duties.

To carry out these responsibilities, the intent of Congress as stated in the Conference Report of the Act is quite evident. Maximum protection of designated special areas or protection of the remaining area of the Reserve does not imply a prohibition of exploration or related activities. However, it is expected and intended that such exploration operations will be conducted so that every precaution is taken to avoid unnecessary surface damage and to minimize ecological disturbances throughout the Reserve.

The designation of BLM in this agreement shall refer to the responsibilities of the BLM Alaska State Director.

The designation of GS in this agreement shall refer to the responsibilities of the Chief, Office of National Petroleum Reserve in Alaska (ONPRA).

With only those exceptions herein specified, the GS shall be the sole representative of the Secretary with respect to direct contact with the contractor consistent with Section 2(c)(2) of Secretarial Order No. 2948.

For the purpose of this working agreement, the AO and other designated ancillary facility sites shall be outlined on the map enclosed in the approved Annual Plan of Operations. Such sites will involve joint GS/BLM management roles and responsibilities. Operations on that portion of the AO involving exploration (or development and production (as specified in the Act) of the South Barrow gas field, or other designated fields) shall be the exclusive jurisdiction of the GS. All other uses not appurtenant to the petroleum operations will be the exclusive jurisdiction of the BLM. The following general guidelines are provided to describe the exterior boundaries of an AO:

1. *For an exploratory well:* For wells two miles or from the nearest producing well, the AO shall be established as 160 acres if it is an oil resources test and 640 acres if a gas test.

2. *For the South Barrow Gas producing field:* For wells within or adjacent to the South Barrow producing field, or such other designated fields (as specified in the Act), the AO shall embrace the actual acreage then spaced for production from the target reservoir plus, if necessary, the spacing unit for the well then under consideration. However, only the surface use area delineated on the map enclosed in the plan of operations and approved by both the GS and BLM shall be for the exclusive use of the operator while such operations are being conducted thereon

3. *For Geophysical Operations:* For geophysical operations, the AO shall be the entire length of the line to be covered by the geophysical survey and a width as mutually agreed upon. For those areas that are selected for camp sites, the AO shall be established as mutually agreed upon.

Regardless of the AO so established, the GS shall be solely responsible for all petroleum exploration operations conducted thereon, including the enforcement of the surface protection and rehabilitation remedies, as well as on other approved surface

use areas whereon such operations are normally conducted as follows:

a. Well sites—includes the area required for drilling the well, normally 5 to 10 acres. Should a well projected as an oil test be completed as a gas well, or vice versa, any additional surface use required by such completion will be subject to the procedures hereinafter set forth.

b. Tank batteries and treatment area—actual areas are established by the approved plan of operations.

c. Gathering lines to and from the wells to the tank batteries or treatment facilities and access roads covered by the plan of operations.

d. Airport facilities at the well sites.

For surface uses within the AO other than those related to operations, the BLM shall be solely responsible for authorizing such uses and the prospective surface user (resources operators or other parties such as recreationists, special use permittees, etc.) shall submit proposals directly to BLM who shall consult with GS to prevent any surface use conflicts. BLM will not approve any surface use within an AO which is contrary to GS recomendations without further discussions with GS.

All surface use requirements not related to exploration operations outside the limits of established Areas of Operations shall be the sole responsibility of the BLM.

Any unresolved isue between the BLM Alaska State Director and the GS Chief, ONPRA, will be immediately referred to the respective Associate Directors for resolution.

Nothing in this agreement is intended to modify in any manner the present or future cooperative programs of either Agency with States, other public agencies, the Native corporations, or educational institutions. However, any future cooperative programs involving NPRA will have to be within the procedures as established by this agreement.

Nothing in this agreement shall be construed as obligating either party to the expenditure of funds in excess of appropriations authorized by law or otherwise commit either Agency to actions for which it lacks statutory authority.

This agreement shall become effective upon the date subscribed by the last signatory, and shall remain in force until terminated by either Agency upon 90 days written notice. It shall be reviewed by all parties at the end of each fiscal year for adequacy and timeliness. Amendments to existing wording within this agreement may be proposed by either Agency and shall become effective upon joint approval.

A—Preparation of Preliminary Plan

A preliminary plan for the petroleum exploration, production (as specified in the Act), and environmental protection measures will be jointly prepared. The respective Bureaus will cover their areas of responsibility in the preparation of this plan. The plan will cover those activities which are tentatively scheduled for the 12-month period commencing November 1 of the succeeding year. The plan will provide as much advance information and data concerning anticipated operations and mitigating measures as available to facilitate preparation of the Annual Plan of Operations and to meet the critical time frames for such activities.

GS will: 1. Submit information for the preliminary plan to BLM by October 31 of each year, unless otherwise mutually agreed upon.

2. Participate and assist BLM in the consultation with other concerned Federal, State, and local agencies and the Arctic Slope Regional Corporation and affected village corporations as appropriate, and other Native community groups through the North Slope Borough and other interested parties.

BLM will: 1. Ascertain valid existing rights, land ownership patterns, and other constraints that may be associated with the land.

2. Review the submitted data as forwarded by GS and make appropriate and timely comments and input for the preliminary plan.

3. Take appropriate steps to notify, coordinate, and consult with other Federal, State, and local agencies having statutory and regulatory responsibilities, the Arctic Slope Regional Corporation and affected village corporations as appropriate, other Native communities through the North Slope Borough, and other interested parties concerning such preliminary plans.

B—Preparation of Annual Plan of Operations

An Annual Plan of Operations will be developed to facilitate the petroleum exploration program and protection of the environment responsibilities. In developing this plan, each agency recognizes the mandate of Congress regarding the interrelationship between these two responsibilities. This plan will cover site specifics for the ensuring field season.

The following procedures will provide guidance in the development of the plan.

GS will: 1. Prepare a draft Annual Plan of Operation. Such plan will include but is not limited to the following listed information for:

a. Drilling Operations.

(1) A brief description of the type of operations which will be undertaken.

(2) Description of well site layout including equipment and facilities needed.

(3) Map or maps with scale of 1:63,000 or other maps of sufficient detail to allow for adequate evaluation, showing lands to be entered or disturbed by the proposed exploration operations.

(4) The approximate dates of commencement and termination of operations.

(5) Location of access routes and means of access including any construction activities and types of vehicles used.

(6) Location and development of water sources including means of transport.

(7) Location, development, and description of communication sites and facilities.

(8) Type, location, and description of materials sites, including method of material recovery, type of material, estimated quantity, and method and route of transport.

(9) Method of handling waste materials.

(10) Plans for restoration and rehabilitation of the surface.

(11) Airstrips and other aircraft landing sites.

(12) Any standard or special applicable stipulations to be imposed.

(13) Any other facets of the proposed operation which may be of assistance during evaluation of the plan.

b. Geophysical Operations.

(1) The type of geophysical operations or surveys such as reflection or refraction surveys.

(2) The line of shot holes displayed on a map of appropriate scale.

(3) Distance between shot holes.

(4) Depth of shot holes.

(5) The type of tools and associated equipment to be utilized.

(6) The testing, logging, and coring programs to be followed with provisions made for required flexibility.

(7) The anticipated starting date and duration of the operation.

(8) Long and short-term camp sites.

(9) Access routes, airstrips, and other aircraft landing sites.

(10) Construction materials to be utilized during operations and source of such materials.

(11) Disposal of all waste material.

(12) Communication sites.

(13) Any standard or special applicable stipulations to be imposed.

(14) Any other facets of the proposed operation which may be of assistance during evaluation of the plan.

c. Cultural Resource Inventory Reports.

NOTE.—An intensive cultural resource inventory must be conducted on those sites and alternative sites identified for exploration operations that involve surface disturbing activities. This inventory shall be conducted under the requirement of a Federal Antiquities Permit by a qualified professional. The need for an intensive inventory may be waived only if it is determined by BLM that equivalent data are available or that something less than intensive data are available and acceptable. These inventory data should be prepared in the form of a report. See Appendix I for the format of the report.

2. Participate with BLM in the consultation with other concerned Federal, State, and local agencies, the Arctic Slope Regional Corporation, and effected village corporations as appropriate, and other Native community groups through the North Slope Borough and other interested parties.

3. Submit such draft plans to the BLM not later than July 15, unless another date is mutually agreed upon, to allow sufficient time to conduct a field examination, coordinate with other concerned agencies, prepare a joint environmental analysis, assemble and prepare proposed stipulations, and jointly finalize and approve the plan. (See C—Field Investigation.)

BLM will: 1. Upon receipt of the draft Annual Plan of Operations, be responsible for notifying, coordinating, and consulting with other Federal, State, and local agencies having statutory or regulatory responsibilities, the Arctic Slope Regional Corporation, and effected village corporations as appropriate, and other Native communities through the North Slope Borough and other interested parties regarding the plan. The Bureau will review all environmental concerns and recommended stipulations concerning the proposed program from such agencies, Alaska Native interests, and other parties. (See C—Field Investigations.)

2. Review submitted stipulations and, as appropriate, prepare its proposed environmental stipulations to mitigate adverse environmental impacts for inclusion in the plan and submit to GS for joint finalizing action.

GS and BLM will: 1. Jointly prepare an environmental analysis covering all aspects of the Annual Plan of Operations. Basically, each agency will be responsible for their respective areas of expertise (i.e., GS—technical program aspects/BLM—surface management aspects), although some overlap will be required. Guidelines for this joint action, including sharing of professional skills, will be as identified in the Cooperative Procedure Agreement of August 6, 1975, for Coordinating Preparation of Environmental Analysis and Environmental Statement (BLM WO–55).

2. Jointly finalize and approved the Annual Plan of Operations before the date scheduled for commencing exploration operations.

C—Field Investigations

For purposes of indentifying and analyzing the environmental concerns and anticipated impacts regarding proposed exploration operations, field investigations, as needed, will be conducted. Such field examinations will be applicable to the preparation of the preliminary plans and/or Annual Plan of Operations. To the extent possible, they should be conducted jointly when it is determined by either agency that such an examination is necessary.

Because of the high priority of such field investigations, they will be scheduled as early as possible, particularly after GS submits the draft Annual Plan of Operations to BLM. The GS may designate a number of future sites so that they may be inspected at one time.

GS and BLM will jointly: 1. Determine and schedule the date to conduct field investigations.

2. Arrange and conduct field investigations.

BLM will: 1. Make arrangements for other concerned Federal, State, and local agencies and the Arctic Slope Regional Corporation and affected village corporations as appropriate, and other Native communities through the North Slope Borough to participate in the fied investigation.

GS will: 1. Make arrangements for participation of its contractor in the field investigation.

D—Compliance With Terms and Conditions and Emergency Situations

GS will: 1. Conduct inspections to insure that the contractor is in compliance and accordance with terms and conditions of the approved Annual Plan of Operations.

2. Notify and seek BLM assistance and expertise in surface management problems involving noncompliance with terms and conditions or stipulations, rehabilitation measures, or for modifications requested by the contractor.

3. As appropriate, request the BLM to make inspections to assure compliance with the surface protection requirements of the approved Annual Plan of Operations.

4. Seek all available help, including BLM, on major accidents or spills involving flowline or gathering facility spills, breaks in sludge pits, etc. Seek BLM expertise in rehabilitation and clean-up operations.

BLM will: 1. Conduct inspections to insure compliance with the surface protection requirements of the approved Annual Plan of Operations and will note contractor noncompliance therewith. Except in an emergency, no instructions or directions will be given to the contractor or his subcontractors without GS approval.

2. Notify GS immediately of all such incidents of noncompliance with the surface protection requirements of the approved Annual Plan of Operations.

3. Exercise jurisdiction over activities within the area of operations (AO) only in emergency situations, and may issue orders to the operator only under the following circumstances and conditions:

(a) The emergency situation shall be such as to clearly threaten immediate and serious damage to the environment, resources, or the health and safety of the public, and the GS official is not available to take the necessary immediate action.

(b) Order, in such emergency situation, immediate cessation of activities responsible for the emergency situation, such orders to be followed by prompt notification to the GS who will take over jurisdiction and order immediate remedial action.

4. As requested, furnish help during and after the emergency for clean-up operations, and also furnish expertise for any required rehabilitation.

The agency responsible for seeking curative action on instances of noncompliance with the terms and conditions of the approved Annual Plan of Operations will take the necessary action when notified of the noncompliance by the other agency.

E—Maintenance of Field Activities Inside the Area of Operations

GS will: 1. Submit to BLM for review and joint approval an amendment to the Plan of Operations prior to undertaking any new construction, reconstruction, or alteration of facilities, including roads, dams, reservoirs, etc., which will result in additional surface disturbance.

2. Inspect operations to insure that the contractor is in compliance with and is conducting operations in accordance with the stipulations and the approved Annual Plan of Operations.

3. Report to the BLM infrations of stipulations and incidents of noncompliance.

4. Take the appropriate administrative action upon receiving BLM reports of contractor's unauthorized activities outside the area of operations.

5. Furnish BLM with the name, address, and both the office and home numbers of the GS official to contact in case of emergencies or incidents of noncompliance with the surface use and rehabilitation requirements of the approved Annual Plan of Operations.

6. Seek all available help, including BLM, on accidents which might result in damage to other resources. Seek BLM expertise in clean-up operations.

7. Make periodic inspections to assure that the contractor is properly maintaining the facilities.

BLM will: 1. Respond timely to GS's submission after an amended Annual Plan of Operations has been forwarded for additional surface use within an AO by providing its proposed surface protection or rehabilitation requirements and jointly approving the amended plan.

2. Where activities not included in an approved Annual Plan of Operations constitute unauthorized activity on such lands by the contractor, these activities will be reported to GS for the appropriate corrective action.

3. When requested by the GS, assist in resolving noncompliance with terms and conditions or stipulations of any approved Annual Plan of Operations.

4. Make periodic inspections to assure that the contractor is complying with the surface protection and rehabilitation requirements of the approved Annual Plan of Operations and will notify GS when it becomes aware of any operating condition warranting correction. The BLM, on its own initiative, may make recommendations to GS for the maintenance or rehabilitation of existing conditions adversely affecting the surface or other resources within AO.

5. Notify GS of all applications which involve other surface uses of the lands within the AO for GS recommendations prior to approval or disapproval of the application.

F—Surface Use Management Outside the Area of Operation

BLM will: 1. Resolve surface use conflicts to the satisfaction of all users if possible; failing this, BLM will take appropriate steps to eliminate the conflict with priority consideration given to the continued petroleum exploration and/or development and production (as specified in the Act). In that regard the comments and recommendations of the GS will be requested.

2. Work directly with all surface users in the area, including the contractor, regarding maintenance of roads and other support facilities, preventing damage to the surface resources, and encouraging public health and safety awareness.

3. Notify GS of all applications involving lands outside the AO where surface use may cause conflicts. Approval or disapproval of applications will be based upon all considerations including recommendations from the GS.

GS will: 1. Contact BLM immediately if it becomes aware of any conflicts involving surface use.

2. Make recommendations to BLM if production (as specified in the Act) facilities are being vandalized so protection measures, such as limiting or restricting public access into the area, may be initiated.

3. Make recommendations to both the contractor and BLM to improve public health and safety conditions and other conditions such as road maintenance in the general area.

4. Work with BLM to resolve any surface use conflicts which may arise.

G—Abandonment of Drilling and/or Geophysical Operations

GS will: 1. Notify BLM of cancellation or termination of any approved Annual Plan of Operations under which no activity has taken place.

2. Send BLM a copy of all notices of intention to abandon wells, including any special procedures to be required. If the permit is to remain in effect, any proprietary data contained in a notice will be deleted. If that portion of the approved Annual Plan of Operations covering surface rehabilitation does not contain information as to whether the well's casing is to be cut off below the ground surface or the abandonment marker is to be waived, or both, the BLM will be orally contacted for its recommendations.

3. Approve the surface and subsurface plugging program to be followed by the contractor.

4. As necessary, request the BLM work directly with the contractor.

5. Approve the subsequent report of abandonment only after a joint inspection by BLM and GS confirms that surface rehabilitation requirements of the approved Annual Plan of Operations have been completed satisfactorily.

BLM will: 1. Upon request, advise GS if the well's casing should be cut off below ground surface.

2. Upon request, advise the GS whether the required surface abandonment marker should be waived.

3. When requested by GS, work directly with the contractor concerning surface rehabilitation.

4. Notify GS of any failure on the part of the contractor to undertake surface rehabilitation measures which are required by the approved plan of operations.

5. Notify GS of the contractor's satisfactory completion of surface rehabilitation.

H—General

GS will: 1. Coordinate and communicate with the BLM concerning exploration, also development and production (as specified in the Act) plans, and other information requirements prior to submission of preliminary plans and/or the Annual Plan of Operations.

2. To facilitate BLM's monitoring role and responsibilities, make arrangements with GS's contractor to provide (a) billeting for one person at each drilling and geophysical site, (b) two billets and one desk at Lonely Base Camp, and (c) transportation on a need basis for scheduled and unscheduled trips for field investigations, compliance checks, and other matters relating to BLM responsibilities.

BLM will: 1. Coordinate and communicate with the GS prior to submission of the Annual Plan of Operations to expedite BLM's input concerning surface management and environmental concerns and stipulations.

2. Reimburse billeting and transportation expenses provided by GS's contractor.

BLM and GS will: 1. Periodically hold joint meetings with GS's contractor and other involved Federal, State, and local agencies and the Arctic Slope Regional Corporation and

affected village corporations as appropriate, and other Native communities through the North Slope Borough to discuss problems, stipulations, working agreements, and other items of common concern and interest.

2. Meet on a bi-weekly basis at the BLM State Office or the GS ONPRA Office to discuss past and future procedures under these instructions and other matters of mutual concern and interest.

3. Offer suggestions for revision of these procedures to their Washington Offices for improving their workability and to reduce duplication of effort in conducting these cooperative and joint efforts.

Date December 10, 1976.

GEORGE L. TURCOTT,
Associate Director,
Bureau of Land Management.

Date December 16, 1976.

W. A. RADLINSKI,
Associate Director,
Geological Survey.

I concur:

Date January 18, 1977.

JACK HOATON,
Assistant Secretary,
Land and Water Resources.

Date January 18, 1977.

WILLIAM L. FISHER,
Assistant Secretary for
Energy and Minerals.

APPENDIX I

Cultural resource inventory report. The report should contain at a minimum the following:

a. Identification of the Federal Antiquities Permit under which the work was performed.

b. Description of data review and field inventory methods used, intensity of field inventories, the names of individuals employed in the work, and the commencement and termination dates of field inventory.

c. Identification of the project, and the BLM serial case file number, if any, for which the report is being written.

d. A general background discussion of cultural resources of the area.

e. Identification and description of specific cultural resource sites and values found, and evaluation of their significance, and whether such sites might be eligible for placement in the National Register of Historic Places with specific citation to qualifying criteria under 36 CFR 800.10.

f. Site inventory records (BLM Form 6230–2 or other acceptable form) completed for each cultural property inventoried with appropriate maps indicating the location of each site.

g. Suitable maps that clearly define all areas surveyed and intensity of survey in relation to identified cultural resources and the relationship of sites found to the project. Minimum acceptable base map should be with a scale of 1: 63,000 or other maps of sufficient detail.

h. Catalog of all cultural resource objects collected and indication of where they are stored.

i. Identification of the probability of finding additional sites and their probable significance.

j. Identification of the probable direct and indirect effects of the project upon known and unknown cultural resources.

k. Professional recommendations to realistically mitigate the direct and indirect adverse effects upon cultural resources which will result from the project.

[FR Doc.77-2185 Filed 1-24-77;8:45 am]

Geological Survey

NATIONAL PETROLEUM RESERVE IN ALASKA

Memorandum of Understanding

CROSS REFERENCE.—For a document concerning the above entitled matter filed jointly by the Bureau of Land Management and the Geological Survey, see FR Doc. 77-2185 in the notices section of the FEDERAL REGISTER.

LESSEES AND OPERATORS OF FEDERAL ONSHORE OIL AND GAS LEASES

Procedures for Reporting and Accounting for Royalties

Notice is herby given that the Geological Survey has finalized its procedures and reporting forms for reporting and accounting for royalties and other compensation accruing to onshore Federal oil and gas leases. This notice also prescribes certain information which a lessee or operator must provide in support of reports and payments made to the Geological Survey.

On March 1, 1976, the Geological Survey published in the FEDERAL REGISTER (Vol. 41, No. 41, pp. 8802–8805) a notice which set forth its proposed requirements for: (1) The submittal of Monthly Report(s) of Operations (Form 9–329), Monthly Report(s) of Sales and Royalty (Form 9–361), and Rental and Royalty Remittance Advice(s) (Form 9–614–A); (2) the submittal of related supporting documentary evidence and Application(s) for Establishment of Royalty (Form 9–1926); and (3) the procedures for remitting all payments to the Geological Survey. Said Notice solicited the submittal of written comments from interested parties by March 25, 1976. On March 24, 1976, the Geological Survey published in the FEDERAL REGISTER (Vol. 41 41, No. 58, p. 12235) a notice extending the period for written comments to May 1, 1976.

Written and oral comments received by the Geological Survey have been carefully considered in the preparation of this final Notice, whether received before or after May 1, 1976. Comments were received from 13 oil and gas companies and 1 oil and gas association. Even though the industry responses received represent only a small percentage of companies and individuals operating Federal oil and gas leases, those received were very comprehensive. Certain of the comments were adopted or essentially satisfied, and the Geological Survey has made other changes on its own motion.

Many of the comments received concerning the proposed Notice published on March 1, 1976, indicate that certain terms used therein engendered some confusion as to the intent and effect of various provisions of the proposed NTL–1. Therefore, the following general explanatory comments are provided in an attempt to alleviate some of the more repetitive items of concern. However, in the event of a conflict between these general comments and the specific language of NTL–1, the provisions of NTL–1 will prevail.

The terms "lessee" and "operator" are often used almost interchangeably in this and other Notices to Lessees and Operators (NTL's). Although the Geological Survey considers a lessee as ultimately responsible for the proper performance of all obligations established by the lease, NTL–1 recognizes that a lessee may be an operator, a nonoperating working interest owner, or the owner of record title with all operating rights vested in other parties. Thus, NTL–1 should not be inferred as requiring a lessee to submit reports and payments to the Supervisor except when a lessee is also an operator or a nonoperating working interest owner who separately disposes of its proportionate share of jointly owned production or merely elects to make separate payments for said proportionate share.

The requirements of NTL–1 should not be construed as requiring all rental payments due under Federal oil and gas leases to be made to the Geological Survey. However, advance rental payments for those old form leases which are in a producing status, as well as rentals for nonproducing leases which are committed to producing units, are to be made to the Geological Survey. Thus, where rentals are now paid directly to another agency, that practice should be continued unless notification is subsequently received that the lease account has been transferred to the jurisdiction of the Geological Survey.

The provisions of NTL–1 apply only to onshore Federal oil and gas leases, certain private and State lands subject to cooperative agreements to the extent, and only to the extent, provided in such formal agreements and, on rare occasion, to unleased Federal land subject to a formal agreement. The provisions of NTL–1 do not apply to any Indian lands or leases, nor to Outer Continental Shelf lands or leases, nor to any Federal leases for minerals other than oil and gas. However, notice is hereby given of the Geological Survey's intent to publish shortly a final NTL–1A which will set forth the procedures for reporting and accounting for royalties on Indian oil and gas leases, except those on the Osage Indian Reservation. NTL–1A will be identical in all respects to NTL–1, except to recognize certain basic differences between Federal and Indian leases as related to payments, remittance advices, overpayments, royalties on gas production, and reimbursement of taxes paid by a lessee or operator.

All forms described in NTL–1 are to be filed with the appropriate Supervisor's office, regardless of past instructions that required a copy of certain forms to be filed with District offices. Moreover, all other directives concerning the subject matter addressed by NTL–1 are superseded and cancelled by this final NTL–1 to the extent that they conflict therewith. In other words, where a conflict exists, the provisions of the final NTL–1 will prevail.

The principal changes in this final NTL–1 from that proposed on March 1, 1976, are:

Package reporting. The final NTL–1 does not require all reports, documentary evidence, payments, and remittance advices to be filed as a package. However, the Notice does require that the Monthly Report of Sales and Royalty (Form 9–361), with its supporting documentary evidence, be submitted as a package beginning with the report for the production month of April 1977. Payments and related Rental and Royalty Remittance Advices (Form 9–614–A) are to be submitted together as a package beginning with the payments made for the production month of October 1977. The Monthly Report of Operations (Form 9–329) need not accompany either package.

Due date for submittal of continuing monthly reports. The due date for submittal of the Monthly Reports of Sales and Royalty (Form 9–361) and Operations (Form 9–329) has been changed to the 10th day of the second month following the production month. No change was made concerning the submittal of royalty payments which will continue to be due on the last day of the month next following the production month.

Effective dates for mandatory use of revised forms. The effective date for mandatory use of revised Forms 9–329, 9–361, and 9–614–A is established as those submitted for the production month of October 1977.

Time for filing other data. The time for filing Division Orders and Sales Agreements/Contracts was extended from 30 to 60 days following the date of first sales. Further clarification has also been provided in relation to the time frame in which Applications for Establishment of Royalty Values (Form 9–1926) are to be filed.

Division orders. The language concerning Division Orders in the proposed Notice of March 1, 1976, unequivocally required the filing of Division Orders for all leases. Such language has been revised to require the filing of Division Orders only in those instances where used.

Other notices to lessees and operators. All references or citations related to other NTL's have been eliminated in the final NTL–1.

Rental and royalty remittance advice (Form 9–614–A). Operators are encouraged to file separate remittance advices and payments for those rental payments made to the Geological Survey in order to assure proper and timely credit to the appropriate lease account.

Application for establishment of royalty value (Form 9–1926). Provision was made to permit an operator to file one Form 9–1926 for multiple leases so long as the pricing elements applicable to the leases are identical. The Supervisor will advise the applicant by return letter concerning the value(s) established for royalty computation purposes rather than countersigning the application form. After the initial filing of Form 9–1926 for any given lease, it will be necessary to file a new or revised Form 9–1926 for that lease only for major changes such as price deregulation, a change in purchaser, or subsequent opinions, or rulings which affect permitted prices, e.g., a revision of FPC's Opinion 770. It will not be necessary to file a new or revised Form 9–1926 for every price fluctuation such as those due to differences in measured API gravity during separate runs or changes in the calculated Btu content of gas as a result of a subsequent sampling.

Standard conditions applicable to volume measurement. Inasmuch as most of industry and many governmental agencies have adopted 14.73 psia as the pressure base for measuring gas, the Geological Survey is hereby changing from its previous standard pressure base of 15.025 psia to 14.73 psia. Because of this change, standard conditions pertaining to gas measurement are cited in each applicable section of NTL–1. Since no change was made in the standard conditions pertaining to the measurement of crude oil or other liquid hydrocarbons, the present standards have not been repeated in the Notice.

The Geological Survey is fully aware and appreciates the magnitude of the effort required by industry in changing over to the procedures outlined in NTL–1. However, except for the additional requirement that Applications for Establishment of Royalty Values be submitted, the only basic changes from previous procedures are in the format of the monthly reporting forms, the manner of recording data on such forms, and the requirements for certain package submittals. It is believed that once (1) the Applications for Establishment of Royalty Values have been submitted and processed and (2) practical experience has been gained in the use of the revised reporting formats that the new procedures will result in substantial benefits for all concerned.

Because of the significant changes in data format and the procedures for preparing and filing the forms, it is not feasible to implement all provisions of NTL–1 on or immediately following its effective date. Therefore, provisions have been included in NTL–1 to phase in over a 9-month period the various requirements of the new procedures and the use of the revised reporting forms. During this phase-in period, lessees and operators will be furnished a supply of the new reporting forms and will be instructed in their proper use. Also, the system, as established by NTL–1, will continue to be studied with the intent that modifications will be made in the requirements of NTL–1, as warranted. The first such formal review will occur in December of 1977, and all concerned parties are invited and encouraged, prior to that time, to provide constructive comments concerning their practical experience with NTL–1 and the associated reporting forms prior to that time.

The U.S. Geological Survey has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

W. A. RADLINSKI,
Acting Director.

NOTICE TO LESSEES AND OPERATORS OF FEDERAL ONSHORE OIL AND GAS LEASES (NTL–1)

PROCEDURES FOR REPORTING AND ACCOUNTING FOR ROYALTIES

I. GENERAL

Pursuant to the regulations contained in Title 30 CFR Parts 221 and 223 and the requirements of this Notice, operators of onshore Federal oil and gas leases are required to timely file with the Area Oil and Gas Supervisor (Supervisor) the below defined sales agreements, operations reports, production and sales reports, supporting documentary evidence, remittance advices and royalty payments, and the other items required herein.

Items	Copies required by USGS [1]	Due date
Division orders	2	Within 60 d following the date of 1st sales.
Sales agreements/contracts	1	Within 60 d following the effective date of the contract or the date of 1st sales, whichever occurs 1st. Any amendment to an existing contract must be filed within 60 d following the effective date of the amendment.
Monthly report of operations (form 9–329)	2	Due monthly with the 1st report submitted for the month in which the initial well on, or for the benefit of, a lease is commenced.
Monthly report of sales and royalty (form 9–361).	1	Due monthly with the 1st report submitted for the month in which the 1st well was completed for production on, or for the benefit of, a lease, even if no sales were made.
Purchaser's and gasoline plant statements	1	Evidence to confirm the monthly sale of all lease products must be submitted monthly beginning with the month of 1st sales.
Rental and royalty remittance advice (form 9–614–A).	1	Beginning with the production month of October 1977, 1 copy of the remittance advice, form 9–614–A, must accompany all payments submitted to the supervisor.
Application for establishment of royalty value (form 9–1926).	1	Within 6 months after the effective date hereof for all leases in a producing status at that time or within 60 d following the date of 1st sales, if after June 1, 1977.

[1] Unless otherwise specified by the supervisor.

Inquiries regarding the general requirements of this Notice may be directed to any Supervisor. However, specific questions concerning a particular reporting problem should be directed to the appropriate Supervisor having jurisdiction over the area in which the involved lease, unit area, or communitized tract is situated.

This Notice shall remain in effect until modified or revoked. However, it will be subject to periodic review, the first of which will be completed not later than January 1

1978. Should any of the requirements prove to be inadequate, impractical, or unnecessary for the proper conduct of the Geological Survey's assigned responsibilities in this regard, the Notice will thereafter be revised accordingly.

II. DIVISION ORDERS, SALES AGREEMENTS, AND SALES CONTRACTS

A. *Division orders.* Where a division order is the means by which a sale is consummated of any product produced from, or for the benefit of, a Federal lease, each such division order, properly identified by Federal lease or contract number, must be furnished in duplicate to the Supervisor within sixty (60) days following the date of initial sales. A copy approved by the Supervisor will be returned to the operator. Division orders are approved as a proper means of distributing lease proceeds, and such approval is subject to the condition that nothing contained therein will be construed as affecting the relationship between the lessee (operator) and the Secretary of the Interior. Division orders submitted to the Supervisor need not be signed by working interest owners or other royalty owners under the lease or contract, since the Supervisor's approval is intended only to verify to the party making payment that the Federal Government's royalty interest is correctly stated and to authorize transportation companies and purchasers to receive products from the leased lands.

The due date for royalty payments will be enforced even though a division order is incomplete and purchasers should be advised that nothing contained in a division order may in any way alter the royalty rate specified in a lease. Federal royalties must be released even though other monies are being held in suspense by a purchaser due to an incomplete division order or other irregularities. However, if a purchaser fails to timely release Federal royalties, the operator shall be held responsible for making such payments by the due date.

B. *Sales agreements/contracts.* A copy of each agreement or contract for the disposal of leasehold products must be furnished to the Supervisor within sixty (60) days following the effective date of first sales. Any amendment to the contract must also be forwarded to the Supervisor within sixty (60) days following the effective date of the amendment. Any applicable rulings by the Federal Power Commission or the Federal Energy Administration which are incorporated in, or which affect the prices shown in a contract or amendment, must be cited. All agreements, contracts, supplemental amendments, and citations must identify, by Federal lease(s) or contract number(s), the Federal lease(s) affected or be accompanied by a transmittal letter which provides such information. If a contract, agreement, supplemental amendment, or citation does not apply to all production, wells, or zones on a given lease, that production and wells or zones to which it does apply must be specified.

Operators are advised that the price which the seller agrees to accept and the price which the buyer agrees to pay in any contract or other-arrangement made for the sale or disposal of products from the leased lands shall not be construed as establishing a value that is binding on the Supervisor for royalty computation purposes.

III. GAS AND ASSOCIATED LIQUIDS PRODUCTION, SALES, AND ROYALTY REQUIREMENTS

The value of all produced gas and associated liquid hydrocarbons will be established by the Supervisor. Such value will be based on the Supervisor's estimated reasonable value of both the natural gas and its entrained liquid hydrocarbons with due consideration being given to the highest price paid for a part or for a majority of like quality production in the same field or area, to the price(s) received by the operator, to the Btu content of the gas, and to other relevant matters. Under no circumstances will the royalty value be computed on less than the gross proceeds accruing to the operator from the sale of such leasehold production. Gross proceeds include, but are not limited to, tax reimbursements and payments to the operator for gathering, measuring, compressing, dehydrating, or performing other services necessary to market the production. Likewise, no deduction will be allowed for the cost which an operator occurs by reason of placing the gas in a marketable condition as an operator is obligated to do so at no cost to the lessor.

The weighted average Btu content of all gas produced from, or for the benefit of, each Federal lease or contract must be shown on the Monthly Report of Operations (Form 9-329). The Btu content of the gas should also be shown monthly on the purchaser's statement (includes gas settlement and gasoline plant statements).

The Supervisor may adjust royalty value to reflect the Btu content of the gas regardless of whether the gas is sold on that basis. The Supervisor may also redetermine the value of the gas for royalty purposes at any subsequent date should such action be required to reflect the reasonable value of the gas and its entrained liquid hydrocarbons.

Should the Supervisor elect to compute product value separately on the residue gas and the individual byproducts extracted therefrom, the monthly Form 9-361 must show the 100 percent volumes and values of the residue gas and the liquefiable hydrocarbons recovered, sold, lost, or utilized. Nonhydrocarbon byproducts such as sulfur and carbon dioxide which are extracted for sale must also be reported in the same manner on the monthly Form 9-361. When required by the Supervisor, an annual report must be submitted showing in detail total plant operating costs, gas processed, and the resultant volumes of residue gas and byproducts.

The Supervisor may require an operator to submit additional supporting information to show (1) the value of gas at the wellhead adjusted for its Btu content; (2) the gross proceeds accruing to the operator; or (3) the value of the separate commodities at the tailgate of a field facility and/or gasoline plant.

If an operator is receiving or is entitled to receive an escalated gas price under the provisions of an interstate gas sales contract prior to the approval of said price by the Federal Power Commission, royalty will be calculated on not less than such escalated price. If said price is subsequently disallowed or reduced by the Federal Power Commission, a refund or credit against future royalty accruals will be permitted and may be arranged by application to the Supervisor.

Payments made by a gas purchaser pursuant to a contractual "take-or-pay" clause are subject to royalty under the terms of the lease agreement. The receipt of such monies by the operator and the subsequent recovery of "take-or-pay" gas by the purchaser must be reported and properly identified as such on Form 9-361. Any problems related to computation of such royalties should be referred to the Supervisor.

IV. CRUDE OIL AND CONDENSATE PRODUCTION, SALES, AND ROYALTY REQUIREMENTS

Royalty is due on the value of all crude oil or condensate produced from, or for the benefit of, onshore Federal oil and gas leases. The Supervisor shall establish a value for royalty purposes on crude oil and condensate production for which royalty is due. The royalty value so established will be based on the estimated value of the crude oil or condensate with due consideration given to the highest price paid for a part or for a majority of production of like quality in the same field or area, to the price received by the operator, to posted prices, and to other relevant matters. Under no circumstances will the royalty value be computed on less than the gross proceeds accruing to the operator from the sale of leasehold production or on less than the highest price legally obtainable for production from the lease, unit participating area, or communitized tract. Deduction of transportation charges will not be allowed unless justified in writing and approved by the Supervisor. Generally, the deduction of transportation charges will not be allowed for a field or area in which there is a willing purchaser who would absorb such costs, and provided that the regulations of the Federal Energy Administration do not prohibit the operator from selling to said purchaser.

V. APPLICATION FOR ESTABLISHMENT OF ROYALTY VALUES

A properly completed Application for the Establishment of Royalty Values on Form 9-1926 must be submitted to the Supervisor by August 1, 1977, for those leases in a producing status as of June 1, 1977. Separate applications must be filed by each operator and working interest owner who is responsible for the payment of royalty or other compensation. An operator may file a single application for its leases in the same field or area if they are subject to identical marketing arrangements. However, where upper and lower tier oil or different vintages of gas are involved, the application must be supplemented with appropriate information identifying the production subject to each tier or vintage. For those leases which achieve production after June 1, 1977, the application must be submitted within sixty (60) days following the date of first sales. Failure to file an accurate and complete application within the time allowed will result in the Supervisor establishing a royalty value equal to the highest price paid for like quality production in the field or area, assessing liquidated damages, or taking other appropriate action to bring about compliance.

In the interim period between the filing of an application and final action by the Supervisor, operators may submit payments based on the price(s) paid by their purchasers. The Supervisor will advise the operator by letter of the value(s) which have been established for royalty purposes and the effective date thereof. The difference, if any, between the approved value(s) and the value(s) upon which payments have been made shall be reconciled by the operator within sixty (60) days thereafter. This includes the submittal of amended reports and additional payments, as necessary. Any subsequent adjustments or amendments in the sales arrangements set forth in an Application for Establishment of Royalty Values must be reported promptly to the Supervisor.

VI. MONTHLY REPORTING AND PAYMENT REQUIREMENTS

General. The production and sale or other disposition of all oil, condensate, gas, associated liquid hydrocarbons, and other byproducts produced from, or for the benefit of, onshore Federal leases, and for which the Supervisor requires a separate accounting, must be reported individually on a monthly basis to the Supervisor, unless waived by the Supervisor as hereinafter provided.

Where an operator is solely responsible for the sale or disposition of all production, said operator will be held responsible for the timely submittal of operations reports, sales and royalty reports, remittance advices, and payments as well as for the submittal of purchaser(s) and gasoline plant statements and other supporting documentary evidence to substantiate the reported volume(s) and unit price(s) or value(s) of all production from the lease, unit participation area, or communitized tract.

In those instances where there are multiple operators under a single lease, each operator will be individually responsible for the timely submittal of the foregoing reports, documentary evidence, remittance advices, and payments for that portion of the lease which they operate.

In those joint venture projects (whether conducted on a lease basis or under the terms of an approved communitization or unitization agreement) where the operator sells or otherwise disposes of all production, but each working interest owner elects to make separate payments, the operator is responsible for the timely submittal of all reports and supporting documentary evidence which reflect the disposition of the total production and the value(s) or unit price(s) established by the Supervisor for such production. Each working interest owner, including the operator, will be held accountable for the timely submittal of remittance advices and payments for their proportionate share in the total production. However, in those situations where the operator and individual working interest owners in a joint venture project conducted on a lease basis elect to separately sell or dispose of their proportionate share in that production, the operator must timely submit the operations reports for the lease. Each working interest owner, including the operator, will be held responsible for the timely submittal of sales and royalty reports, supporting documentary evidence, remittance advices, and payments which reflect the disposition of their share in the total production from the lease, and the value(s) or unit price(s) established by the Supervisor for their proportionate share in such production. Where each working interest owner in a joint venture project conducted pursuant to a communitization or unitization agreement elects to separately sell or dispose of its proportionate share in that production, the reporting requirements for each such party are, with one exception, the same as that specified above in regard to individual reporting for joint venture projects conducted on a lease basis. That exception is that the individual Monthly Reports of Sales and Royalty (Form 9-361) must reflect the disposition of the total production from the communitized tract or unit participating area.

Beginning with the production month of April 1977, operators and working interest owners, as applicable, will be required to file for each lease, unit participating area, or communitized tract, for which they have reporting responsibilities, a package submittal which includes the Monthly Report of Sales and Royalty (Form 9-361), purchaser(s) and gasoline plant statements, and other supporting documentary evidence. The initial package report must be received by the Supervisor no later than June 10, 1977. Unless otherwise authorized in writing by the Supervisor, all subsequent package submittals must be received in the office of the Supervisor by the 10th day of the second month next following the production month. However, if said 10th day of the month falls on a nonwork day, the submittal shall be due not later than the last official working day prior thereto.

Beginning with the production month of April 1977, the Monthly Report of Operations (Form 9-329) must also be received by the 10th day of the second month next following the production month unless otherwise modified as specified above but need not accompany the Form 9-361 and its attachments.

Beginning with the production month of April 1977, all royalty payments must be received without exception in the office of the Supervisor by the last day of the month next following the production mouth or the next official working day thereafter if said last day occurs on a nonwork day. Beginning with the production month of October 1977, all payment, including those for royalty must be accompanied by a remittance advice.

All reports, supporting documentary evidence, and payments must be identified by the appropriate Federal lease, unit, or communitization agreement contract number(s), and each report must be signed by an authorized person.

Beginning with the manually prepared data submitted for the production month of October 1977, the use of Forms 9-329, 9-361, and 9-614-A, as revised effective February 1976, will be mandatory.

Operators who currently furnish magnetic tape or key-punched card data to the specifications of the Conservation Division for direct input of charge and/or payment data into the Division's automated data processing system will be permitted to continue that practice; provided, however, that beginning with the production month of April 1977, all reports, including printouts of automated input, supporting documentary evidence, remittance advices, and applicable payments must be submitted to the Supervisor in accordance with the schedule set out above.

Beginning with the production month of October 1977, operators having computer capability will be permitted to submit printouts in lieu of the revised Forms 9-329, 9-361, and 9-614-A provided that such printouts are identical in all respects to said forms.

The following is a detailed explanation of the required monthly items which are to be submitted.

A. *Monthly report of operation (Form 9-329).* A report covering the operations conducted on each well on a lease, unit area, unit participating area, or communitized tract must be filed by the operator each month in duplicate on Form 9-329 or an acceptable computer printout as above defined. This report must be furnished monthly beginning with the month in which the first well is commenced. All wells must be shown on the report until approved by the Geological Survey as plugged and abandoned.

Shut-in, temporarily abandoned, and other inoperative wells must be reported each month even though there may be no operations or production. A separate monthly report is required for each lease, unit area, unit participating area, or communitized tract. The report must be fully completed and provide a detailed breakdown of all production by well and the disposition of all production from the lease, unit participating area, or communitized tract.

Gas volumes shall be reported in MCF (1,000 cubic feet) at a pressure and temperature base of 14.73 psia and 60°F., unless otherwise directed in writing by the Supervisor.

Annual reports may be submitted for shut-in leases provided that prior approval is obtained from the Supervisor. When approved, annual reports must be filed on a lease-year basis and received by the Supervisor no later than 30 days following the end of the lease year. However, monthly reports must be commenced immediately whenever operations and/or production are resumed.

B. *Monthly report of sales and royalty (Form 9-361).* A report on Form 9-361, or an acceptable computer printout as above defined, must be filed monthly, in accordance with the instructions set forth under the general requirements of this Section VI., by each responsible party beginning with the month in which the first well is completed. The initial report must also include those volumes of oil and gas produced during testing and completion operations which are subject to royalty or compensation.

These separate reports must reflect, by individual product, the disposition of the total production from the lease, unit participating area, or communitized tract which is subject to royalty or compensation and the value(s) or unit price(s) established by the Supervisor for each reporting party's proportionate share in such production.

Gas volumes shall be reported in MCF (1,000 cubic feet) at a pressure and temperature base of 14.73 psia and 60°F. unless otherwise directed in writing by the Supervisor.

Each report shall include only the disposition of products for the month being reported. Annual reports on a lease-year basis may be submitted for shut-in leases if prior approval is obtained from the Supervisor, provided that the report is received within thirty (30) days after the end of the lease year.

Leases whose royalty is based on a sliding or step scale rate are affected by the total production, well count, gravity, or number of days in the month, depending on the terms of the lease; accordingly, these items are essential for computing royalties and must be properly reported each month. Title 30 CFR 221 sets forth the criteria for determining monthly the appropriate well count. Other information related to computing royalties for these leases may be obtained from the Supervisor.

The Supervisor will consider proposals for the submittal of magnetic tape or key-punched card data in lieu of Form 9-361, and may be contacted for more information regarding the Division's requirements for this type of reporting.

C. *Purchaser's statements, run tickets, tank tables, and gas plant statements.* All sales of crude oil, condensate, gas, associated liquid hydrocarbons, and other byproducts produced from, or for the benefit of, Federal oil and gas leases, and for which the Supervisor requires a separate accounting, should be confirmed by copies of appropriate purchaser, settlement, or gasoline plant statements properly identified by Federal lease or contract number. In situations where purchaser, settlement, or gasoline plant statements are not available or it is determined that such statements are insufficient to confirm reported volume(s) and value(s), the Supervisor may require that additional documentation be furnished. When required, run tickets, related tank tables, meter proving reports, pipeline run statements issued by common carrier pipelines, gas meter charts, check counterfoils, or other documents that confirm the operator's or working interest owner's reported volumes and receipts must be submitted.

Where purchaser, settlement, pipeline run, or gasoline plant statements are submitted, the operator generally will not be requested to also submit run tickets and related tank tables, gas meter charts, or check counterfoils covering shipments shown on such statements, provided that (1) such documents properly identified by Federal lease or con-

tract number, must be submitted promptly when requested by the Supervisor and (2) all such documents are retained by the operator for a period of not less than six years. Tank tables shall be retained during the life of the tank and for six years thereafter.

D. *Payments.* The Geological Survey is responsible for maintaining the lease accounts of all producing Federal leases, all Federal leases which are subject to compensatory royalty assessments or underground storage agreements. Remittances under such leases for rental, when applicable, or for production royalty, compensatory royalty, minimum royalty, royalty or compensation for lost oil or gas, or fees pursuant to a storage agreement must be made payable to the U. S. Geological Survey.

Advance rental payments must be received in the office of the Supervisor on or before the anniversary date of the lease for those leases whose accounts are maintained by the Geological Survey and which are subject in whole, or in part, to the payment of rental. The due date is critical on many leases which do not include a well capable of production in paying quantities, as all leases requiring the payment of advance rental which are subject to Pub. L. 555 will expire by their own terms if the rental payment is not timely received.

All such separate payments which are made to the Geological Survey must be accompanied by a Rental and Royalty Remittance Advice (Form 9–614–A) that identifies each Federal lease or contract number and, as applicable, the product, month of sale, and the amount attributable to each lease or contract. Operators are encouraged to file a separate payment and remittance advice when submitting advance rentals to assure proper and timely credit to the lease account.

The Supervisor will consider proposals for the submittal of magnetic tape or keypunched card data in lieu of a Rental and Royalty Remittance Advice, Form 9–614–A, and may be contacted for more information regarding the Division's requirements for this type of reporting.

VII. LOAD OIL

Any oil or other liquid hydrocarbons produced from, or for the benefit of, a Federal lease, and which is used for the treatment of a well on or off that lease, is defined as load oil. Royalty is due on all such transfers whether the oil is used on the lease or otherwise, and must be accounted for on the monthly reports, Forms 9–329 and 9–361, as though a sale had occurred.

The value of any such load oil must be equal to the highest net price paid for any regular crude oil or other liquid hydrocarbon run of comparable gravity made from the lease, unit participating area, or communitized tract during the month of the transfer or the actual price received by the operator, whichever is greater.

Where royalty is paid at the time of transfer, a volume of crude oil or other liquid hydrocarbon equal to the volume of the load oil used in the treatment may be recovered and disposed of royalty-free, provided that such recovery is credited against the first production from the treated well after treatment. If an operator fails to request a credit against production immediately after treatment, no such royalty-free recovery will be allowed unless the operator presents evidence, acceptable to the Supervisor, that such delay is justified. The value of load oil recovered shall not exceed the average weighted price of all oil or other liquid hydrocarbons sold from the lease, unit participating area, or communitized tract during the month of recovery.

No credit on royalty will be allowed the operator for recovered load oil unless complete documentation is attached to the Monthly Report of Sales and Royalty (Form 9–361) to substantiate the use and recovery of such load oil. This documentation must include the following information:

A. For transfers between Federal leases:

The Federal lease number from which the oil was produced.

The Federal lease number to which the oil was transferred.

The number and location of the well which was treated.

The volume of oil used in the treatment.

Acceptable evidence to substantiate the recovery of load oil for which a credit is sought.

B. For transfers to a Federal lease from a non-Federal source:

The source from which the oil was obtained.

The name and address of the seller.

Date of purchase.

was transferred.

Transporter.

The Federal lease number to which the oil

The number and location of the well which was treated.

The volume of oil used in the treatment.

Acceptable evidence to substantiate the recovery of load oil for which a credit is sought.

C. Transfers of load oil from a Federal lease to a non-Federal lease are to be reported as a sale, and no subsequent credit will be allowed.

If the required information under item A or B hereof is contained in an affidavit prepared for submittal to the purchaser or to another Federal or State agency, a copy of said affidavit will normally meet the documentation requirements of the Geological Survey.

VIII. OVERPAYMENTS

An overpayment on a Federal lease can be recovered either by requesting a refund from the Supervisor or, with the prior approval of the Supervisor, by withholding an amount equal to the overpayment from subsequent royalties accruing to the lease on which the overpayment was made.

IX. LEASE ACCOUNT ADJUSTMENT

An error on a Monthly Report of Sales and Royalty (Form 9–361) and/or a Rental and Royalty Remittance Advice (Form 9–614–A) requires special attention because of the effect that an adjustment, if not accounted for properly, may have on the minimum royalty obligation of a lease, the royalty rate of a variable royalty rate lease, and because of the problems that may result in reconciling a lease account when monthly royalty charges and payments do not agree.

In order that these problems may be substantially eliminated, it is required that the disposition of each months's production and the corresponding payments be reported separately and not combined with any other month's business. A separate Monthly Report of Sales and Royalty and/or Rental and Royalty Remittance Advice, identified as an "amended" report or advice, will be required to correct any erroneous entry shown on a previous month's report or advice. Amended reports must show the total entry, as corrected, not just the difference between that previously reported and what should have been reported. In other words, where previously reported data is to be corrected, a two-line entry will be required on the amended report or advice. One entry will show the information previously reported as a credit or negative entry and the second entry will show the corrected information as a debit or positive entry.

Unless otherwise directed in writing by the Supervisor, amended reports or advices may include corrections for more than one lease, unit participating area, or communitization tract and may also include corrections covering more than one month. No method different from that prescribed above may be used in making adjustments without the prior approval of the Supervisor.

X. MEASUREMENT AND STORAGE REQUIREMENTS

All production from a lease, unit participating area, or communitized tract shall be gauged or measured according to methods approved by or acceptable to the Supervisor. However, the Supervisor. However, the Supervisor's specific written approval must be obtained prior to installing an ACT meter, commingling production between leases or formations, or the use of common storage or off-lease facilities.

XI. STATEMENT OF ACCOUNT (FORM 9–1424)

Lessees and operators will be provided a Statement of Account (Form 9–1424) recapitulating all transactions affecting each of their leases on a month-to-month basis.

Lessees and operators should review the Statement(s) of Account to ensure that royalty charges and payments are properly accounted for and that the lease account is correct. Any amount shown as owed must be promptly remitted unless there is an apparent error, in which event the discrepancy must be called immediately to the attention of the Supervisor.

XII. NONCOMPLIANCE, VIOLATIONS, AND ASSESSMENT OF LIQUIDATED DAMAGES

Failure to submit properly completed reporting forms, supporting documentary evidence, remittance advices, or payments by the due dates will be considered as incidences of noncompliance and will result in the assessment of liquidated damages or other appropriate action being taken for each violation. When liquidated damages are assessed, the amount of the assessment will be determined in accordance with Title 30 CFR 221.

GROUND CHECK CIRCUITS FOR THREE-PHASE ALTERNATING CURRENT LOW- AND MEDIUM-VOLTAGE RESISTANCE GROUNDED CIRCUITS

Technical Seminars

Section 309(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 869(c)) (§ 75.902, Part 75, 30 CFR) required that within six months of the operative date of the Act that three-phase alternating current low- and medium-voltage resistance-grounded systems shall include a fail-safe grounded check circuit to monitor continuously the grounding circuit to assure continuity of the grounding circuit. That section further recognized that such equipment might not be available and provided that an extension of time, not in excess of 12 months, might be permitted by the Secretary on a mine-by-mine basis if he determined that such equipment was not available.

Early attempts at compliance necessitated installation of a ground check conductor in trailing cables of electric face equipment. The installation of the additional conductor destroyed the electrical symmetry of the cable causing induced currents in the grounding conductor of the cable. This induced current resulted in incentive arcing when the frames of two machines came in contact. Since machine frames come in contact regularly in the face areas of coal mines where methane is most likely to be released, an extremely dangerous condition was created.

On March 23, 1971, the then Assistant Director, Coal Mine Health and Safety, Bureau of Mines, in recognition of the extremely dangerous condition resulting from incendive arcing, issued a memorandum to all coal mine operators suspending installation of ground check circuits which required a ground check conductor trailing cables serving alternating current face equipment.

The intermachine arcing problem has now been solved. Tested and proven equipment is now available that will limit the induced energy in the trailing cable grounding conductor to less than incendive levels. Reliable ground check devices have now been developed by six different manufacturers that will satisfy the requirements of section 75.902, Part 75, 30 CFR. A representative number of ground check devices produced by the six manufacturers have undergone extensive laboratory testing by MESA Technical Support and extensive field testing by industry electrical engineers. The results of these tests indicate that the devices are reliable when properly installed and maintained.

A survey of the six manufacturers of ground check devices indicates that the necessary ground check units can be supplied in sufficient numbers to allow complete industry compliance within six months after orders are received. It is estimated that an additional three months may be needed for modification of power centers and distribution lines to allow installation of the ground check circuits.

In view of the capability that now exists to suppress incentive intermachine arcing and the development of the technology and availability of reliable ground check devices, the memorandum of the Assistant Director of March 23, 1971, is therefore rescinded and revoked and coal mine operators will be required to comply with the provisions of sections 75.902 through 75.902–4, Part 75, 30 CFR on and after December 31, 1977.

Commencing April 1, 1977, MESA inspection personnel, upon observing three-phase alternating current powered face equipment which is being operated and which does not comply with sections 75.902 through 75.902–4 will issue a Safeguard Notice to the operator of the coal mine. The Safeguard Notice will advise the mine operator that the technology and equipment is now readily available for compliance with sections 75.902 through 75.902–4 and that on and after December 31, 1977, the operator shall be required to comply with those standards.

If present forecasts of availability of ground check devices prove to be accurate, failure to have such ground check circuits installed and properly maintained on and after December 31, 1977, will be considered cause for the issuance of a Notice of Violation under section 104 of the Act.

In order to acquaint coal mine operators and the coal mining industry with the availability, technology, and current state of the art of ground check monitoring, a series of technical seminars will be conducted. The date, time and locations of the seminars and seminar program are as follows:

MARCH 8, 1977—9 A.M.

National Mine Health and Safety Academy, Beckley, West Virginia.

MARCH 11, 1977—9 A.M.

Holiday Inn-Airport, 5000 Tenth Ave., North, Birmingham, Alabama.

MARCH 15, 1977—9 A.M.

Bureau of Mines Building, 4800 Forbes Ave., Pittsburgh, Pennsylvania.

MARCH 22, 1977—9 A.M.

Holiday Inn-Airport, 4040 Quebec Blvd., Denver, Colorado.

MARCH 24, 1977—9 A.M.

Holiday Inn-North, 4545 North Lindbergh, Bridgeton (St. Louis), Missouri.

SEMINAR PROGRAM

9:00 a.m.	Introduction.
9:15 a.m.	Design Parameters — U.S. Bureau of Mines and West Virginia University.
10:15 a.m.	Technical Support Evaluation and Acceptance of Ground Check Circuits.
10:45 a.m.	Break.
11:00 a.m.	Industry Test and Evaluation Program.
11:30 a.m.	Development Problems.
12:00 Noon	Lunch.
1:15 p.m.	Manufacturers' Presentations.
3:15 p.m.	Break.
3:30 p.m.	Monitor Test Procedures.
4:00 p.m.	Panel Discussion.
5:00 p.m.	Adjournment.

Interested persons who plan to attend a seminar are requested to notify the Mining Enforcement and Safety Administration, Technical Support, 2239 South Kanawha St., Beckley, West Virginia 25801, Telephone 304–255–1581 of their intention to attend, which seminar they will attend, and the number of persons attending.

Dated: January 17, 1977.

RAYMOND A. PECK, JR.,
Deputy Assistant Secretary of the Interior.

[FR Doc.77–2233 Filed 1–24–77;8:45 am]

Mining Enforcement and Safety Administration

ZIPPERTUBING CO. MINE CABLE SPLICE KIT

Action to Rescind Acceptance

Pursuant to a notice published in the FEDERAL REGISTER for November 19, 1976 (41 FR 51128), a hearing was held by the Mining Enforcement and Safety Administration (MESA) in Pittsburgh, Pa. on December 9, 1976. The purpose of the hearing was to receive relevant evidence concerning whether the acceptance issued for The Zippertubing Co. mine cable splice kit, under Acceptance Number 151–1–MESA, should be rescinded for cause on the grounds that splices prepared using Zippertubing Co. kits were not flame-resistant. The hearing record was held open until December 24, 1976.

Evidence introduced by MESA shows that 19 splices prepared using Zippertubing Co. mine cable splice kits, under Acceptance Number 151–1–MESA, were tested to determine whether the splices met the flame resistance requirements set forth in 30 CFR 18.64. Eighteen of the 19 mine cable splices tested failed to meet those requirements.

Representatives of The Zippertubing Co. did not dispute the findings of MESA regarding the failure of the 18 mine cable splice kits. They offered into the record various documents primarily relating to quality control procedures for their mine cable splice kits. In response to questions at the hearing, The Zippertubing Co. stated that they were unable to explain why the accepted splice kits tested by MESA failed to pass flame resistance tests. However, they agreed to conduct tests in an effort to determine the cause of the failure.

On December 21, 1976, a Western Union Telefax was received by MESA in which The Zippertubing Co. stated that they had "positively been able to identify the cause of the splices failing to meet the flammable requirements." They further stated that one large shipment of a component had been certified to meet Underwriters' Laboratories requirement, but that tests proved that either the fire-retardants were omitted or did not have sufficient quantity to provide satisfactory retardancy. It was noted that materials to substantiate their findings would be forwarded under separate cover for MESA verification. Other steps to be undertaken by The Zippertubing Co. were also outlined. No verification material has been received by MESA as of this date.

In view of the undisputed failure of the Zippertubing Co. mine cable splice kits, I find that under 30 CFR 18.16 cause exists on the stated grounds for rescinding Acceptance Number 151–1–MESA issued for The Zippertubing Co. mine cable splice kits. Because the scope and extent of corrective action, including quality control procedures, require complete retesting and reevaluation, this finding would not have been otherwise, even if The Zippertubing Co. had submitted data or evidence substantiating their December 21, 1976 statement as to the cause of the failures.

If in the future, the cause of the failure is verified and The Zippertubing Co. is prepared to introduce quality control measures necessary to insure the quality of the product, The Zippertubing Co. may submit a new application for acceptance. At that time, thorough review and testing would be performed by

MESA to determine whether an acceptance should be issued.

Accordingly, notice is given that Acceptance Number 151-1-MESA issued for The Zippertubing Co. mine cable splice kit is hereby rescinded, effective on January 31, 1977.

Dated: January 17, 1977.

ROBERT E. BENNETT,
Administrator, Mining Enforcement and Safety Administration.

National Park Service

NATIONAL REGISTER OF HISTORIC PLACES

Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before January 17, 1977. Pursuant to section 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, National Park Service, U.S. Department of the Interior, Washington, D.C. 20240. Written comments or a request for additional time to prepare comments should be submitted by February 4, 1977.

INTERNATIONAL TRADE COMMISSION

[Docket No. 419]

CERTAIN WELDED STAINLESS STEEL PIPE AND TUBE

Change in Procedure for Commission Action

Notice is hereby given that: (1) On January 10, 1977, the Commission issued a Notice Concerning Procedure for Commission Action in response to a complaint filed on November 15, 1976, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), concerning welded stainless steel pipe and tube. The notice was published in the FEDERAL REGISTER on January 13, 1977 (42 F.R. 2726), and set January 28, 1977, as the date for oral argument in the proceeding to show cause why an investigation under section 337 should be instituted on the basis of the complaint filed on November 15, 1976.

(2) On January 11, 1977, the Commission received a letter requesting a change in the date for oral argument, which was docketed by the Office of the Secretary as motion No. P-419-1. In response to this request, the Commission hereby orders that the date for oral argument set in paragraph (4) of the notice issued on January 10, 1977, is changed to 10 a.m., e.s.t., on January 26, 1977.

Issued: January 18, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

BUSINESS RESEARCH ADVISORY COUNCIL'S COMMITTEE ON ECONOMIC GROWTH

Meeting

The BRAC Committee on Economic Growth will meet at 1:30 p.m., February 22, 1977, at the General Accounting Office Building, 441 G Street, NW, Room 4454, Washington, D.C. Agenda for the meeting follows:

1. Status of 1990 Projections.
2. Review of work for the Federal Energy Administration.
3. Review of work for the Environmental Protection Agency.

This meeting is open to the public. It is suggested that persons planning to attend this meeting as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on Economic Growth (Area Code 202) 523-1559.

Signed at Washington, D.C., this 13th day of January 1977.

JULIUS SHISKIN,
Commissioner of Labor Statistics.

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW, Washington, D.C. 20213.

Signed at Washington, D.C. this 17th day of January, 1977.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

Applications received during the week ending January 14, 1977

Name of applicant	Location of enterprise	Principal product or activity
Kent Inc. (tenant of Fort Kent)	Fort Kent, Maine	Cut, sew and package infants sleep'n play sets.
Mountaineer Leather, Inc.	Cameron, W. Va.	Sale of leather garments.
Charles County Plant Farms, Inc.	La Plata, Md.	Greenhouse.
Vienna Improvement Corp., Inc.	Parkersburg, W. Va.	Motor hotel.
Liston Foods, Ltd.	Bruceton Mills, W. Va.	Grocery store.
Centennial Development Co.	Williamstown, W. Va.	Transient motor lodge.
Red Oaks Shopping Center, Inc.	Fairlea, W. Va. and Covington, Va.	Lease of rental property.
Brandidge Foods, Inc.	Troy, Ala.	Manufacturing of viscous, liquid salad dressings, mustard, and oil.
Smart-Tops, Inc. (tenant of city of Mount Airy).	Mount Airy, N.C.	Manufacturing of infant hosiery.
LaFayette Health Care Center Ltd. Partnership.	LaFayette, Ga.	Skilled nursing care services.
Carmack, Inc.	Phenix City, Ala.	Manufacturing of gray iron castings.
Adams United Corp.	Morrisville, Fuquay-Variana and Kinston, N.C.	Manufacturing of concrete masonry.
B&H Construction Co., Inc.	New Bern, N.C.	Electrical and mecahnical construction, ace motor rewinding and sales of ace electric equipment.
Moundville Foundry Inc.	Moundville, Ala.	Manufacturing of various classes of grey iron metal castings.
Three Rivers Oil Co., Inc.	Booneville, Miss.	Distributor of petroleum products.
Outdoor Recreation Services, Inc.	Hilton Head Island, S.C.	Recreation theme park.
Sweetwater Carpet Corp.	Ringgold, Ga.	Manufacturing of carpet.
Chaplin Aviation, Inc.	Sheboygan Falls, Wis.	Storage and servicing aircraft fuel sales, avionics, sales and service, and also clerical and management.
Clifford Manufacturing Co.	Marlette, Mich.	Manufacturing of ferrous metal.
Hardwood Specialties Co., Inc.	Bonham, Tex.	Sawmill producing rough saw hardwoods.
John W. Parker	Mexia, Tex.	Buildings for a shopping center.
Kischa Dairy Mart and Motel	Fairfield, Tex.	Restaurant and motel.
Kaiser Aluminum Highway Products (tenant of city of Eunice).	Eunice, La.	Marketing of aluminum.
Rockwall Steel Co.	Terrell, Tex.	Manufacturing of steel library shelving, steel wardrobes, and field erection.
Copper Mountain, Inc.	Copper Mountain, Colo.	Ski center and resort.
Gibson Products of Loveland, Inc.	Loveland, Colo.	Sale of merchandise through discount department store.
Arrow Motel	Montezuma, Colo.	Motel.
Pyrotronics Corp.	Anaheim, Calif.	Manufacturing and wholesale distributor of safe and sane fireworks.
K. J. Industries Inc.	Canby, Oreg.	Manufacturing of steel castings.

Occupational Safety and Health Administration

NATIONAL ADVISORY COMMITTEE ON OCCUPATIONAL SAFETY AND HEALTH, SUBGROUPS ON STANDARDS AND POLICY/BUDGET

Meeting

Notice is hereby given that the Subgroups on Standards and Policy/Budget of the National Advisory Committee on Occupational Safety and Health (NACOSH) will meet on February 17, 1977 in Room N-4437, Department of Labor Building, 3rd Street and Constitution Avenue NW., Washington, D.C. 20210.

The National Advisory Committee was established under section 7(a) of the Occupational Safety and Health Act of 1970 to advise the Secretary of Labor and the Secretary of Health, Education, and Welfare on matters relating to the administration of the Act.

The meeting will begin at 9:00 a.m. The public is invited to attend. The Subgroups will develop recommendations on the identification, classification and regulation of potential carcinogens.

For additional information contact:

J. Goodell, Chief, Committee Management Office, Occupational Safety and Health Administration, Department of Labor—OSHA, Room N-3635, Third Street and Constitution Avenue NW., Washington, D.C. 20210. Phone: (202) 523-8024.

Any written data or views concerning this agenda item or suggestions for future agenda items which are received by the Committee Management Office before the meeting, preferably with 20 copies, will be presented to the Subgroups and included in the official record of the meeting.

Anyone wishing to make an oral presentation should notify the Committee Management Office before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the Subgroup Chairmen, depending on the extent to which time permits.

Official records of the meeting will be available for public inspection at the above address.

Signed at Washington, D.C., this 21st day of January 1977.

J. Goodell,
Executive Secretary.

[FR Doc.77-2452 Filed 1-24-77;8:45 am]

WASHINGTON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act.

Sections 1952.120–124 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated October 4, 1976, John Hillier, Assistant Director, Department of Labor and Industries, to James W. Lake, Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Part 1918, as published in the FEDERAL REGISTER (39 FR 22074) dated June 19, 1974. These standards, which are contained in the Washington Safety Standard for Longshore, Stevedore, and Related Waterfront Operations, WAC 296–56, were promulgated after a public hearing held on December 18, 1973 at Olympia, Washington.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and are hereby approved.

The State standards, which are contained in WAC 296–56–401 through 560 generally are comparable to 29 CFR part 1918 as it applies to shoreside employment. In addition, the State on its own initiative has adopted many additional State original standards covering hazards not addressed by the Federal standards. The detailed standards comparison is available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administration Building, Olympia, Washington 98504; and the Technical Data Center, Room N3620, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Section 1953.2 (c) of this chapter provides that where State standards are identical to or "at least as effective" as comparable Federal standards and have been promulgated

in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standards under consideration are "at least as effective" as the Federal standards and have been promulgated in accordance with State law, including an opportunity for public comment and/or public hearings, they are approved without an opportunity for further public comment.

This decision is effective January 25, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Wash., this sixth day of December 1976.

JOHN A. GRANCHI,
Acting Regional Administrator—OSHA.

[FR Doc.77-2134 Filed 1-24-77;8:45 am]

Office of the Secretary

[TA-W-1,560]

BERMAN MANUFACTURING COMPANY, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On January 10, 1977 the Department of Labor received a petition dated December 23, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Berman Manufacturing Company, Inc., South River, New Jersey (TA-W-1,560). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with women's slacks, jackets, vests, skirts and blouses produced by Berman Manufacturing Company, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 10th day of January 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.77-2358 Filed 1-24-77;8:45 am]

[TA-W-1211]

BETHLEHEM STEEL CORP., TORRANCE, CALIFORNIA

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1211: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 21, 1976 in response to a worker petition received on October 21, 1976 which was filed on behalf of workers and former workers producing structural steel pieces at the Torrance, California Works of Bethlehem Steel Corporation.

The notice of investigation was published in the FEDERAL REGISTER (41 FR 51136) on November 19, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bethlehem Steel Corporation, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers declined 34.2 percent in 1975 compared to 1974. The plant was shut down in February 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales, in net tons, declined 3.5 percent in 1975 compared to 1974.

Production, in net tons, declined 35.8 percent in 1975 compared to 1974.

Plant sales and production ceased in February 1976.

INCREASED IMPORTS

Imports of structural steel shapes, relative to U.S. shipments, increased from 21.8 percent in the first three months of 1975 to 28.7 percent in the same period of 1976.

CONTRIBUTED IMPORTANTLY

The Torrance Works competed with other companies for subcontracts from general construction firms. A survey of construction firms accounting for over 90 percent of Torrance Works' total sales in 1975 indicated that several of these firms subcontracted to competitors which used imported structural steel pieces.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with structural steel pieces produced at the Torrance Works, Torrance, California plant of Bethlehem Steel Corporation, contributed importantly to the total or partial separation of workers engaged in the production and installation of such structural steel at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Torrance Works, of the Bethlehem Steel Corporation, Torrance California who became totally or partially separated on or after September 19, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2136 Filed 1-24-77;8:45 am]

[TA-W-1281]

BIRWIN TROUSERS, INC., NEW YORK, NEW YORK

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1281: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 15, 1976 in response to a worker petition received on November 15, 1976 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's trousers at Birwin Trousers, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER on December 3, 1976 (41 FR 53083). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Grossman Clothing and Birwin Trousers Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at Birwin Trousers, Inc. declined 21 percent in 1975 compared to 1974. The average number of production workers declined 3 percent in the first ten months of 1976 compared to the first ten months of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at Birwin Trousers, Inc. declined 9 percent in 1975 compared to 1974. Production declined 3 percent in the first ten months of 1976 compared to the first ten months of 1975.

INCREASED IMPORTS

Imports of men's and boys' tailored suits increased every year from 1971 through 1974, rose 27 percent in 1975 compared to 1974, and increased 7 percent in the first nine months of 1976 compared to the like period of 1975.

The ratio of imports to domestic production increased from 12.3 percent in 1974 to 17.4 percent in 1975 and declined from 19.9 percent in the first half of 1975 to 17.3 percent in the like period of 1976.

CONTRIBUTED IMPORTANTLY

Grossman sells all suit pants produced by Birwin. Customers have decreased purchases of men's clothing from Grossman and have increased purchases of imported men's clothing. In addition, Grossman has received numerous requests since the first quarter of 1976 from the largest importer of men's clothing for credit information on retail customers of Grossman that are placing their first orders for imported clothing.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suit pants produced by Birwin Trousers, Inc. contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All employees of Birwin Trousers, Inc., New York, New York who became totally or partially separated from employment on or after November 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 14th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2137 Filed 1-24-77;8:45 a.m.]

[TA-W-1321]

CRESCENT MACHINE AND NIPPLE CO., ALLEGAN, MICHIGAN

Negative Determination Regarding Eligibility To Apply for Workers Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1321: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 30, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing pipe nipples at Crescent Machine and Nipple Company, Allegan, Michigan.

The notice of investigation was published in the FEDERAL REGISTER on December 14, 1976 (41 FR 54555). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Crescent Machine and Nipple Company, the United Steelworkers of America, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

Crescent Machine and Nipple Company produces primarily pipe nipples at the Allegan, Michigan plant. The company also produces thermal cutting rods, fireplace equipment, and is engaged in a small amount of pipe fabrication.

During the course of the department's investigation it was established that sales, production and employment increased in 1976 compared to 1975. Sales increased nearly 20 percent in 1976 compared to 1975. Production increased 14 percent in 1976 compared to 1975.

Employment increased 12 percent in 1976 compared to 1975. Union officials verified that several workers separated from employment at Crescent Machine in 1975 and 1976 had either returned to work or had been offered the opportunity to return to work by early 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production, or both, at the Allegan, Michigan plant of Crescent Machine and Nipple Company did not decrease absolutely as required under section 222 of the Act. Therefore eligibility to apply for adjustment assistance is denied.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2138 Filed 1-24-77;8:45 am]

[TA-W-954]

GIBSON, INC., KALAMAZOO, MICHIGAN

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-954: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 29, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing acoustical and electric guitars, mandolins and banjos at the Kalamazoo, Michigan plant of Gibson, Incorporated, a subsidiary of Norlin Music, New York.

The notice of investigation was published in the FEDERAL REGISTER on July 16, 1976 (41 FR 29513). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Norlin Music, Incorporated, the parent firm of Gibson, Incorporated, the customers of Gibson, Incorporated, the Department of Commerce, the International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threats thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers employed at Gibson, Inc., Kalamazoo, Michigan, and Nashville, Tennessee, decreased 18 percent in 1975 compared to 1974, and 9 percent in the first 6 months of 1976 compared to the like period of 1975.

SALES OR PRODUCTION OR BOTH, HAVE DECREASED ABSOLUTELY

Gibson produced fretted musical instruments in the $25 and up wholesale price range. Sales at Gibson, Inc., Kalamazoo, Michigan decreased 15.5 percent in value in 1975 compared to 1974, and 16 percent in value in the first 6 months of 1976 compared to the like period in 1975.

INCREASED IMPORTS

Imports of fretted musical instruments declined both actually and relative to domestic production in every year compared to the previous year from 1972 through 1975, but increased 93 percent in the last 6 months of 1975 compared to the first 6 months of 1975, and 49 percent in the first 6 months of 1976 compared to the like period in 1975.

CONTRIBUTED IMPORTANTLY

Customers surveyed indicated that they have switched purchases from fretted musical instruments produced at Gibson Inc., Kalamazoo, Michigan to imported fretted musical instruments.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imported fretted musical instruments contributed importantly to the total or partial separation of workers at Gibson, Incorporated, Kalamazoo, Michigan. In accordance with the provisions of the Act, I make the following certification:

All workers at the Kalamazoo, Michigan plant of Gibson Incorporated, who became totally or partially separated from employment on or after June 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2139 Filed 1-24-77;8:45 am]

[TA-W-1,558]

GLASS DIMENSIONS, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On January 10, 1977 the Department of Labor received a petition dated December 16, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Glass Dimensions, Inc., Magnolia, Massachusetts (TA-W-1,558). Accordingly, the Director, Officer of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with hand blown glass plant pots produced by Glass Dimensions, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

The petition filed in this case is available or inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 10th day of January 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.77-2359 Filed 1-24-77;8:45 am]

[TA-W-1282]

GROSSMAN CLOTHING COMPANY, INC., NEW YORK, NEW YORK

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1282: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 15, 1976 in response to a worker petition received on November 15, 1976 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's suits and sportcoats at Grossman Clothing.

The notice of investigation was published in the FEDERAL REGISTER on December 3, 1976 (41 FR 53090). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Grossman Clothing Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of

eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at Grossman declined 22 percent in 1975 compared to 1974. The average number of production workers declined 3 percent in the first ten months of 1976 compared to the first ten months of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at Grossman declined 23 percent in 1975 compared to 1974. Production declined 1 percent in the first ten months of 1976 compared to the first ten months of 1975.

INCREASED IMPORTS

Imports of men's and boys tailored dress coats and sportcoats increased in each year from 1971 to 1973, declined in 1974 compared to 1973, rose 8 percent in 1975 compared to 1974 and increased 32 percent in the first nine months of 1976 compared to the like period of 1975.

The ratio of imports to domestic production increased from 21.3 percent in 1974 to 30.9 percent in 1975 and rose from 23.8 percent in the first half of 1975 to 30.7 percent in the like period of 1976.

Imports of men's and boys' tailored suits increased every year from 1971 through 1974 rose 27 percent in 1975 compared to 1974 and increased 7 percent in the first nine months of 1976 compared to the like period of 1975. The ratio of imports to domestic production increased from 12.3 percent in 1974 to 17.4 percent in 1975 and declined from 19.9 percent in the first half of 1975 to 17.3 percent in the like period of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation indicated that customers have decreased purchases of men's clothing from Grossman and have increased purchases of imported mens' clothing. In addition, Grossman has received numerous requests since the first quarter of 1976 from the largest importer of men's clothing for information on retail customers of Grossman that are placing their first orders for imported men's clothing.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits and sportcoats produced by Grossman Clothing contributed importantly to the total or partial separations of the workers of that plant. In accordance with the provision of the Act, I make the following certification:

All employees of Grossman Clothing Company, New York, New York who became totally or partially separated from employment on or after November 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 14th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2140 Filed 1-24-77;8:45 am]

[TA-W-51]

INTERNATIONAL SHOE CO., PERRYVILLE, MISSOURI

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 222 of the Trade Act of 1974 and in acordance with section 223(a) of such Act, on August 4, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of the Perryville, Missouri plant of the International Shoe Company (TA-W-51). The notice of certification was published in the FEDERAL REGISTER August 15, 1975 (40 FR 34491).

Further investigation developed evidence that revealed employment and production at the Perryville plant continues to be adversely influenced by imports of articles like or directly competitive with men's footwear produced at the Perryville plant.

Production at the Perryville, Missouri plant declined 12 percent in quantity in the first three quarters of 1976 compared to the same period of 1975. Employment declined 2 percent in the first three quarters of 1976 compared to the same period of 1975.

Imports of men's dress and casual footwear increased absolutely and relatively in the first nine months of 1976 compared to the same period of 1975. The ratio of imports to domestic production increased from 46.1 percent in the first nine months of 1975 to 52.1 percent in the same period of 1976.

Based on additional evidence, a review of the entire record and in accordance with the provision of the Act, I have determined that the termination date included in TA-W-51 Certification, issued on August 4, 1975, should be deleted. Such deletion of the termination date contained in TA-W-51 Certification is hereby made as follows:

All workers of the Perryville, Missouri plant of the International Shoe Company, St. Louis, Missouri who became totally or partially separated from employment related to the production of men's footwear on or after October 3, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

On the basis of a further showing and further investigation by the Office of Trade Adjustment Assistance, the following recommendation is made:

That the Notice of Certification applicable to workers of the Perryville, Missouri plant of International Shoe (TA-W-51) be revised as follows:

"All workers of the Perryville, Missouri plant of the International Shoe Company who became totally or partially separated from employment related to the production of men's footwear on or after October 3, 1974 be certified as eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.".

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

I concur, accept, and adopt the findings of fact and recommendation as set forth herein, except as noted below.

Exceptions:

[FR Doc.77-2141 Filed 1-24-77;8:45 am]

[TA-W-1173]

J. H. RUTTER-REX-MANUFACTURING CO., INC., NEW ORLEANS PLANTS

Negative Determination Regarding Eligibility To Apply for Workers Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1173: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 14, 1976 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing work pants and work shirts at the New Orleans plants of the J. H. Rutter-Rex-Manufacturing Company, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER (41 FR 48811) on November 5, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of J. H. Rutter-Rex-Manufacturing Company, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

The Department's investigation revealed that the New Orleans plants of the J.H. Rutter-Rex-Manufacturing Company produce work pants and work shirts principally under government contracts issued by the Defense Personnel Support Center in Philadelphia, Pennsylvania.

Production, sales, and employment at the New Orleans plants of the J.H. Rutter-Rex-Manufacturing Company, Incorporated were influenced in 1975 and 1976 by restrictions placed by the Defense Personnel Support Center on its contract bid invitations. Certain contracts issued by the Defense Personnel Support Center have been restricted solely to small business bids. The J.H. Rutter-Rex-Manufacturing Company is not categorized as a small business firm.

The Defense Personnel Support Center restricts all contract bidding on apparel and textile items to domestic suppliers. There is therefore no foreign competition involved in submitting bids and competing for such contracts.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with work pants and work shirts produced at the New Orleans plants of the J. H. Rutter-Rex-Manufacturing Company, Incorporated, have not increased as required for certification under section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2142 Filed 1-24-77;8:45 am]

[TA-W-1231]

LIBERTY TRUCKING CO., JANESVILLE, WISCONSIN

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1231: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 8, 1976 in response to a worker petition received on that date which was filed on behalf of workers and former workers at the Janesville, Wisconsin terminal of Liberty Trucking Company who were engaged in providing transportation services to automobile assembly plants.

The Notice of Investigation was published in the FEDERAL REGISTER on November 23, 1976 (41 FR 51632). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Liberty Trucking Company and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

If any of the above criteria is not satisfied a negative determination must be made.

Liberty Trucking Company does not produce an article within the meaning of section 222(3) of the Act and this Department has already determined that the performance of services are not covered by the adjustment assistance program. See Notice of Determination in "Pan American World Airways, Incorporated" (TA-W-153, 40 FR 54639). The only question in this case is whether General Motors Corporation, i.e., a firm which produces an article, namely automobiles, and for whom the service is provided, can be considered the "workers' firm". The Department has also previously determined that an independent firm for which such services are provided cannot be considered the "workers' firm." See Notice of Determination in "Nu-Car Driveaway, Incorporated" (TA-W-393, 41 FR 12749).

Liberty Trucking Company is a transport business incorporated in the State of Illinois and licensed and regulated by the State and the Interstate Commerce Commission. Liberty Trucking competed for available business with other carriers in the Janesville, Wisconsin area and each was free to haul for any business requesting their services.

Neither General Motors Corporation, on one hand, nor Liberty Trucking Company on the other, is financially or otherwise involved in the business of the other. Liberty Trucking either owns or leases the facilities necessary to the operation of its business and owns or leases all its trucks and equipment.

The workers upon whose behalf this petition was filed were hired and are paid by Liberty Trucking Company. They are supervised by and subject to the control of Liberty Trucking personnel only. All employment benefits which they enjoy are provided and maintained by Liberty Trucking.

CONCLUSION

After careful review of the issues and facts involved, I have determined that services of the kind provided by Liberty Trucking Company, Janesville, Wisconsin are not "articles" within the meaning of section 222(3) of the Trade Act of 1974, and that General Motors Corporation cannot be considered the "workers' firm." The petition for trade adjustment assistance is, therefore, denied.

Signed at Washington, D.C., this 9th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1210]

M. JANOWITCH AND SONS, MAHANOY CITY, PENNSYLVANIA

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1210: investigation regarding eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 28, 1976 in response to a worker petition received on October 28, 1976 which was filed on behalf of former workers producing ladies' dresses at the Mahanoy City, Pennsylvania plant of M. Janowitch and Sons.

The notice of investigation was published in the FEDERAL REGISTER on November 23, 1976 (41 FR 51632). No public hearing was requested and none was held.

The information upon which the determination was made was obtained prin-

cipally from officials of M. Janowitch and Sons, its customers, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the fourth criterion has not been met.

The Department's investigation revealed that M. Janowitch and Sons is a contractor producing women's and misses' dresses for one manufacturer. The plant was closed on June 5, 1976 because of problems other than competition for imports. The subject firm's only manufacturer stated that they would still do business with M. Janowitch and Sons if they were open and could meet their requirements. The manufacturer shifted Janowitch's business to other domestic contractors.

CONCLUSION

It is concluded that imports of articles like or directly competitive with women's and misses' dresses produced at the Mahanoy City, Pennsylvania plant of M. Janowitch and Sons did not contribute importantly to the total or partial separation of the works at such plant.

Signed at Washington, D.C., this 12th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2144 Filed 1-24-77;8:45 am]

[TA-W-1193]

P. J. BARASH ASSOCIATES, INC., CAMDEN, NEW JERSEY

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1193: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 19, 1976 in response to a worker petition received on October 19, 1976 which was filed on behalf of workers and former workers producing women's dresses at the Camden, New Jersey plant of P. J. Barash Associates, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on November 5, 1976 (41 FR 48816). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of P. J. Barash Associates, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first three criteria have been met, the fourth criterion has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at P. J. Barash Associates, Incorporated remained the same from 1974 to 1975 and declined 12.5 percent in the first nine months of 1976 compared to the same period in 1975. Average weekly hours declined 3.1 percent from 1974 to 1975 and decreased 5.3 percent in the first nine months of 1976 compared to the same period in 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Company sales decreased 5.4 percent from 1974 to 1975 and declined 31.7 percent in the first nine months of 1976 compared to the same period in 1975.

INCREASED IMPORTS

Imports of women's, misses' and children's dresses have declined each year since 1971 except in 1975 when imports increased over the previous year. The ratio of imports to domestic production was 9.0 percent in 1971, declined to 6.8 percent in 1973, and increased to 7.4 percent in 1975. Imports for the first nine months of 1976 were up by about 0.5 percent over the same period in 1975.

CONTRIBUTED IMPORTANTLY

The investigation revealed that P. J. Barash Associates, Inc., has two customers the larger of which does not import dresses and has reduced its purchases from P. J. Barash in 1975 compared to 1974 and in the first nine months of 1976 compared to the like period in 1975. The remaining customer increased its purchases from P. J. Barash in 1975 compared to 1974 and in the first nine months of 1976 compared to the like period in 1975. The decline in purchases by the non-importing customer was not offset, and this decline accounted for the entire sales decline experienced by P. J. Barash.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's dresses which are produced at the Camden, New Jersey plant of P. J. Barash Associates, Incorporated, did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-804]

REPUBLIC STEEL CORP. CANTON SOUTH PLANT

Revised Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a notice of negative determination regarding certification of eligibility to apply for worker adjustment assistance on August 20, 1976 (41 FR 37430) applicable to former workers producing stainless steel and alloy steel products at the Canton South plant of Republic Steel Corporation, Canton, Ohio.

At the request of an official of the United Steelworkers of America, a further investigation was instituted by the Director of the Office of Trade Adjustment Assistance. The further investigation developed additional information from company officials and a broader spectrum of the plant's customers concerning the influence of imports on the employment of workers at the plant.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that with respect to the production of stainless steel, all four of the above criteria have been met but that with respect to the production of alloy steel criterion (4) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at Canton South increased 13.1 percent in 1974 compared with 1973, decreased 34.6 percent in 1975 compared with 1974 and decreased 36.4 percent in the first quarter of 1976 compared with the first quarter of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Shipments of stainless steel sheet and plate increased 139.2 percent in 1974 compared with 1973, decreased 67.4 percent in 1975 compared with 1974 and decreased 62.8 percent in the first quarter of 1976 compared with the first quarter of 1975. Shipments of alloy steels increased 21.8 percent in 1974 compared with 1973, decreased 36.3 percent in 1975 compared with 1974 and decreased 48.4 percent in the first quarter of 1976 compared with the first quarter of 1975.

INCREASED IMPORTS

Imports of stainless steel sheet and plate decreased 36.5 percent in 1972 compared with 1971, decreased 18.0 percent in 1973 compared with 1972, increased 33.3 percent in 1974 compared with 1973 and increased 3.0 percent in 1975 compared with 1974. The ratios of imports to domestic shipments and consumption increased from 10.4 percent and 9.9 percent, respectively, in 1974 to 21.3 percent and 18.3 percent, respectively, in 1975.

Imports of alloy steel blooms, slabs, billets, ingots, castings and sheet bars decreased 0.6 percent in 1972 compared with 1971, decreased 13.5 percent in 1973 compared with 1972, decreased 37.1 percent in 1974 compared with 1973 and increased 10.0 percent in 1975 compared with 1974. The ratios of imports to domestic shipments and consumption increased from 0.28 percent for each, in 1974 to 0.34 percent for each, in 1975.

CONTRIBUTED IMPORTANTLY

The additional information developed in the investigation revealed that the Canton South plant is part of the fully integrated production operations of Republic Steel's Central Alloy District. The Canton South plant performs various operations on stainless and alloy steel products within the organizational framework of Republic's Central Alloy District. Shipments of stainless steel products are received from other plants within the Central Alloy District including the Canton Works and the Massillon Works and are further processed at the Canton South plant. In addition, stainless steel products at an earlier stage of production are shipped from the Canton South plant to other plants within the Central Alloy District. The majority of processed products and finished products are considered sales of the other plants in the Central Alloy District.

Due to the high degree of integration which exists between the Canton South plant and other plants of the Central Alloy District, the impact of imports on the sales of stainless steel products of the Central Alloy District directly affects the production operations at the Canton South plant. The Department has issued certifications for each of the plants in the Central Alloy District noting that increases of imports of stainless steel like or directly competitive with stainless steel produced at the Canton Works (TA-W-665) and the Massillon Works (TA-W-666) contributed importantly to the total or partial separations of workers at these plants.

Customers indicated that they had not shifted purchases of alloy steels from the Canton South plant to foreign sources. These customers, including commercial aircraft, defense and aerospace contractors and subcontractors, cited slowdowns in commercial aircraft production and delays in the contracting and procurement of certain weapons systems are reasons for reduced purchases of alloy steels from the Canton plant.

CONCLUSION

Based on additional evidence, a review of the entire record and in accordance with the provisions of the Trade Act of 1974, I hereby issue the following certification:

All workers engaged in employment related to the production of stainless steel in the South Jobbing Mill, South Sheet Mills 7, 8, 9 and 12 the South Finishing Department, the Forging Department and the Special Bar Finishing Department and all workers engaged in employment related to the processing of Clad and the finishing of stainless steel at the Canton South plant of Republic Steel Corporation, Canton, Ohio who became totally or partially separated from employment on or after March 20, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

It is further concluded that increases of imports of alloy steels and stainless steel did not contribute importantly to the total or partial separations of workers in the Vacuum Melt Departments, in Steel Ingot Conditioning nor of employees engaged in employment related to the production of alloy steel at the Canton South plant.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-2146 Filed 1-24-77;8:45 am]

[TA-W-1165]

SPORTSWEAR MANUFACTURING CO., INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1165: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 13, 1976 in response to a worker petition received on that date which was filed by the Amalgamated Clothing and Textile Workers Union (ACTWU) on behalf of workers formerly producing men's suits, sportcoats, pants and vests at Sportswear Manufacturing Company, Inc., Brooklyn, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on October 29, 1976 (41 FR 47630). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Sportswear Manufacturing Company, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production;

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers fell 38 percent in 1975 compared to 1974. Although employment rose 13 percent in the first ten months of 1976 compared to the like period of 1975, employment declined 22 percent in the July through October period of 1976 compared to the like period of 1975.

All production workers were separated from employment on or before October 29, 1976 when the company ceased operations.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Unit production fell 25 percent in 1975 compared to 1974 and rose 40 percent in the first ten months of 1976 compared to the like period of 1975.

The increases in employment and production shown when comparing the first ten months of 1976 to the first ten months of 1975 are misleading. Production was temporarily curtailed and employees were laid off for two months in 1975 while the company moved to a new facility.

INCREASED IMPORTS

Imports of men's and boys' tailored dress coats and sportcoats increased each year from 1971 to 1973, declined in 1974 compared to 1973, rose 8 percent in 1975 compared to 1974 and increased 32 percent in the first nine months of 1976 compared to the like period of 1975. The ratio of imports to domestic production increased from 21.3 percent in 1974 to 30.9 percent in 1975 and rose from 23.8 percent in the first half of 1975 to 30.7 percent in the like period of 1976.

Imports of men's and boys' tailored suits increased every year since 1971, rose 27 percent in 1975 compared to 1974 and increased 7 percent in the first nine months of 1976 compared to the like period of 1975. The ratio of imports to domestic production increased from 12.3 percent in 1974 to 17.4 percent in 1975 and declined from 19.9 percent in the first half of 1975 to 17.3 percent in the like period of 1976.

Imports of men's and boys' dress and sport trousers and shorts increased in 1972 compared to 1971, declined in 1973 and 1974, rose 39 percent in 1975 compared to 1974 and increased 41 percent in the first nine months of 1976 compared to the like period of 1975. The ratio of imports to domestic production increased from 18.2 percent in 1974 to 30.3 percent in 1975 and rose from 28.2 percent in the first half of 1975 to 32.0 percent in the like period of 1976.

Imports of men's and boys' tailored suit vests increased every year since 1971, rose 154 percent in 1975 compared to 1974 and increased 114 percent in the first nine months of 1976 compared to the like period of 1975. The ratio of imports to domestic production increased from 12.2 percent in 1974 to 16.3 percent in 1975.

CONTRIBUTED IMPORTANTLY

The parent corporation which received approximately 80 percent of Sportswear Manufacturing Company's production, increased purchases of imported men's suits, sportcoats and pants by more than 100 percent and reduced orders to Sportswear Manufacturing Company, Inc. in 1975 compared to 1974.

The corporation reduced purchases from all sources in 1976 due to its own declining sales. The decline in sales was attributed to competition from other retailers who purchase large quantities of low priced imported men's clothing.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits, sportcoats, pants and vests produced at Sportswear Manufacturing Company, Inc., Brooklyn, New York, a subsidiary of Robert Hall Clothes, New York, N.Y. did contribute importantly to the total or partial separation of the workers of that company. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of men's suits, sportcoats, pants and vests at Sportswear Manufacturing Company, Inc., Brooklyn, New York who became totally or partially separated from employment on or after September 29, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 13th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-918]

U-BRAND CORP., ASHLAND, OHIO

Correction of Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, on October 18, 1976 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers at the Ashland, Ohio plant (Machine Division) and Shelby, Ohio warehouse of the U-Brand Corporation (TA-W-918). The Notice of Certification was published in the FEDERAL REGISTER on October 29, 1976 (41 FR 47632).

The certification as originally issued excluded workers who were engaged in employment related to the distribution of iron pipe fittings at the Vernon, California warehouse of the U-Brand Corporation.

The certification issued October 18, 1976 is hereby amended to include all workers of the Vernon, California warehouse of the U-Brand Corporation.

Signed at Washington, D.C., this 15th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1,561]

U.S. STEEL CORP.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On January 10, 1977 the Department of Labor received a petition dated December 23, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") by the United Steelworkers of America on behalf of the workers and former workers of Duluth, Minnesota plant of U.S. Steel Corporation, Pittsburgh, Pa. (TA-W-1,561). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increase of imports of articles like or directly competitive with coke produced by U.S. Steel Corporation or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 10th day of January 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.77-2360 Filed 1-24-77;8:45 am]

[TA-W-1,562]

U.S. STEEL CORP.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On January 10, 1977 the Department of Labor received a petition dated December 23, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") by the U.S. Steelworkers of America on behalf of the workers and former workers of Rankin, Pennsylvania plant of U.S. Steel Corporation, Pittsburgh, Pa. (TA-W-1,562). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with iron products produced by U.S. Steel Corporation or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

WILLOFORM MANUFACTURING CO., INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On January 1, 1977 the Department of Labor received a petition dated December 1, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") by the International Ladies' Garment Workers Union on behalf of the workers and former workers of Willoform Manufacturing Co., Inc., New York, New York (TA-W-1,557). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with brassieres and girdles produced by Willoform Manufacturing Co., Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 4, 1977.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 1st day of January 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL PANEL ON AVIATION SAFETY AND OPERATING SYSTEMS SUBCOMMITTEE ON AVIATION SAFETY REPORTING SYSTEM

Meeting

The NASA Research and Technology Advisory Council (RTAC), Subcommittee on Aviation Safety Reporting System will meet on February 15–16, 1977, at the Ames Research Center, Moffett Field, CA 94035. The meeting will be held in the Committee Room, Administration Building. The meeting is being held at this time to review the operation of the Aviation Safety Reporting System and to plan the one-year evaluation. Members of the public will be admitted on a first come, first served basis up to the seating capacity of the room which is about 25 persons. All visitors must report to the Ames Research Center receptionist in the Administration Building.

The RTAC Subcommittee on Aviation Safety Reporting System serves in an advisory capacity only. The Chairman is Mr. John H. Winant. There are 12 members. The following list sets forth the approved agenda and schedule for the February 15–16, 1977, meeting of the Aviation Safety Reporting System Subcommittee. For further information please contact Mr. E. Gene Lyman, NASA Headquarters, Code RB, Washington, DC 20546 (202–755–2380).

FEBRUARY 15, 1977

Time	*Topic*
9 a.m.	Report of the chairman. (Purpose: To summarize activities relating to the Aviation Safety Reporting System (ASRS) since the last subcommittee meeting.)
9:30 a.m.	Report on the Aviation Safety Reporting System. (Purpose: To describe status of activities pertaining to ASRS operations. Members will comment on these activities and identify items requiring additional attention.)
10:30 a.m.	Review of Aviation Safety Reporting System Reports. (Purpose: To allow members an opportunity to comment on information received and topics requiring special analysis.)
2:30 p.m.	Report of Security Group. (Purpose: To review security aspects of ASRS and to receive members' advice and recommendations concerning ASRS security.)
3:30 p.m.	Review of Aviation Safety Research. (Purpose: To review ongoing aviation safety research studies and to receive members' advice about these studies.)

FEBRUARY 16, 1977

8:30 a.m.	Develop ASRS Evaluation Plan. (Purpose: To develop an approach, schedule, and assign responsibilities for the ASRS one-year evaluation.)
10:30 a.m.	Members' Discussion. (Purpose: To consider total aspects of ASRS and provide advice and recommendations about its operation.)
1 p.m.	Adjourn.

JOHN M. COULTER,
Acting Assistant Administrator for DOD and Interagency Affairs National Aeronautics and Space Administration.

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR PSYCHOBIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Psychobiology.
Date: February 10 and 11, 1977.
Time and place: 9:00 a.m. to 5:00 p.m. each day; National Science Foundation, 1800 G St. N.W., Washington, D.C. Room 321.
Type of meeting: Part Open (Open 9:00 a.m. to 10:00 a.m., February 11, 1977; remainder Closed).
Contact person: Fred Stollnitz, Program Director for Psychobiology Room 320, National Science Foundation, Washington, D.C. Telephone: (202) 632–4264.
Summary minutes: (open portion). May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.
Purpose of panel: To provide advice and recommendations concerning support for research in psychobiology.
Agenda: February 10, 9:00 a.m. to 5:00 p.m., February 11, 10:00 a.m. to 5:00 p.m., closed. The panel will be reviewing and evaluating research proposals and projects as part of the selection process for awards. February 11, 9:00 a.m. to 10:00 a.m., open. The Panel will be discussing methods of assessing the state and outlook of the field of Psychobiology and the role and performance of the Psychobiology Program in supporting it.
Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552 (b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBECCA WINKLER,
Acting Committee Management Officer.

ADVISORY PANEL FOR SENSORY PHYSIOLOGY AND PERCEPTION

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Sensory Physiology and Perception.
Date and time: February 7 and 8, 1977; 9:00 A.M.–5:00 P.M. each day.
Place: National Science Foundation, 1800 G Street N.W., Washington, D.C. 20550, Room 517.
Type of meeting: Closed.
Contact person: Dr. Terrence R. Dolan, Program Director, Sensory Physiology and Perception, Room 320, National Science Foundation, Washington, D.C. 20550, Telephone: (202) 634–1624.
Purpose of panel: To provide advice and recommendations concerning support for research in sensory physiology and perception.
Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.
Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of P.L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBECCA WINKLER,
Acting Committee Management Officer.

ADVISORY PANEL FOR SYSTEMATIC BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act., Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Systematic Biology.
Date and time: February 10 and 11, 1977—8:30 a.m. to 5:00 p.m. each day.
Place: Room 543, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.
Type of meeting: Closed.
Contact person: Dr. John W. Wright, Program Director, Systematic Biology Program, Room 336, National Science Foundation, Washington, D.C. 20550, telephone (202) 632–5846.
Purpose of panel: To provide advice and recommendations concerning support for research in systematic biology.
Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.
Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of P.L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBECCA WINKLER,
Acting Committee Management Officer.

FEDERAL SCIENTIFIC AND TECHNICAL INFORMATION MANAGERS

Meeting

The next meeting of the Federal Scientific and Technical Information Managers will be held on Wednesday, February 9, 1977, from 9:30 a.m.–12 noon, at the Department of Commerce, 14th and Constitution Avenue, NW, Conference Room B–841. The theme of this meeting will be the "Micrographics, Video and Other Image Transfer Developments: Substitutes or Complements for Computer-Based Communication?"

These meetings, sponsored by the National Science Foundation, provide a forum for the interchange of information concerning common problems and coordination in the areas of Federal scientific and technical information and communications.

These meetings are designed solely for the benefit of Federal employees and officers, and do not fall under the provisions of the Federal Advisory Committee Act (P.L. 92–463). However, this meeting is believed to be of sufficient importance and interest to the public to be announced in the FEDERAL REGISTER.

Any persons wishing to attend this meeting or requiring further information should notify Mr. Andrew A. Aines, Division of Science Information, National Science Foundation, 1800 G Street, NW, Washington, DC 20550, telephone: (202) 632–5836.

LEE G. BURCHINAL,
Director, Division of Science Information.

JANUARY 22, 1977.

[FR Doc. 77-2266 Filed 1-24-77;8:45 am]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS NUCLEAR REGULATORY COMMISSION

Notice of Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on February 10–12, 1977, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, FEBRUARY 10, 1977

8:00 A.M.—8:45 A.M.: Executive Session (Closed).—The Committee will discuss the qualifications of candidates nominated for appointment to the ACRS.

8:45 A.M.–9:45 A.M.: Executive Session (Open).—The Committee will hear and discuss the reports of ACRS Subcommittees and consultants who may be present regarding the evaluation of selected safety issues related to light-water reactors. Portions will be closed if necessary to discuss proprietary material or intra-agency memoranda prepared for internal use only.

9:45 A.M.–12:45 P.M. and 1:45 P.M.–4:45 P.M.: Meeting on Evaluation of Selected Safety Issues Related to Light-Water Reactors (Open).—The Committee will hear presentations and hold discussions regarding evaluation of selected safety issues related to light-water reactors.

Portions of this session will be closed if necessary to receive reports from individual NRC employees who will present their personal opinions and recommendations only in confidence. Portions will also be closed if required to review Proprietary Information related to the matters being considered and intra-agency memoranda prepared for internal use only.

4:45 P.M.–6:30 P.M.: Executive Session (Open).—The Committee will hear and discuss reports of ACRS Subcommittees regarding proposed Regulatory Guides and regulatory activities related to the practices and policies for correction of ECCS errors for operating power plants. The Committee will also discuss a proposed revision of its report on the Status of Generic Matters Related to Light-Water Reactors.

FRIDAY, FEBRUARY 11, 1977

8:30 A.M.—11:15 A.M.: Meeting with Members of the NRC Staff.—This portion of the meeting will include sessions with the Executive Director for Operations and other members of the NRC Staff related to current reactor operating experience and licensing actions; evaluation of generic matters related to light-water reactors, including performance of steam generator tubes in pressurized water reactors and evaluation of fuel handling accidents inside containment; and evaluation of safety research data and regulatory requirements of the Federal Republic of Germany. The future schedule for ACRS activities will be discussed. Reports will be made to the Committee regarding the NRC program to evaluate integrity of reactor pressure vessels designed and fabricated to the ASME Boiler and Pressure Vessel Code Sections I and VIII and the NRC program to review environmental phenomena at sites with facilities for processing and fabricating plutonium.

11:15 A.M.–12:00 Noon: Executive Session (Open).—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the analytical models formulated to evaluate use of Exxon Nuclear Company Replacement Fuel for Light-Water Reactors. Portions of this session will be closed if required to discuss Proprietary Information related to the design, fabrication, or operation of this fuel.

1:00 P.M.–3:00 P.M.: Meeting Regarding Exxon Nuclear Company, Inc. Replacement Fuel for Light-Water Reactors (Open).—The Committee will hear and discuss information with representatives of the NRC Staff and the Exxon Nuclear Company, Inc., and the Jersey Central Power & Light Company, regarding the ECCS evaluation models for replacement fuel to be used in non-jet pump boiling water reactors and pressurized water reactors with low-pressure containment.

Portions of this session will be closed if required to discuss Proprietary Information related to the design, fabrication or operation of this type fuel.

3:00 P.M.–5:00: Executive Session (Open).—The Committee will hear and discuss the reports of ACRS Subcommittee Chairmen with respect to ACRS activities regarding review of the Zion Nuclear Station, ACRS review of the Clinch River Breeder Reactor, review of sites with environmental phenomena for plutonium processing and fabrication facilities, and ACRS review of the NRC plan to reevaluate siting policy and practices.

5:00 P.M.–6:30: Executive Session (Closed).—The Committee will meet in closed Executive Session to discuss the qualifications of proposed candidates for appointment to the Committee. The Committee will discuss a proposed ACRS report on safeguards provisions at nuclear facilities.

SATURDAY, FEBRUARY 12, 1977

8:30 A.M.–4:30 P.M.: Executive Session (Open).—The Committee will discuss proposed ACRS reports and activities regarding matters considered during this meeting. Portions of this session will be closed if necessary to discuss proprietary material related to the matters being discussed. Portions will also be closed if necessary to discuss information related to safeguards provisions at nuclear facilities and to discuss proposed policy and practice regarding conduct of ACRS activities.

I have determined in accordance with Subsection 10(d) of Public Law 92–463 that it is necessary to close portions of the meeting as noted above to protect material, which has been designated national security information and is classified under E.O. No. 11652 (5 U.S.C. 552(b)(1), to protect proprietary data (5 U.S.C. 552(b)(4)), to protect the confidentiality of intra-agency memoranda prepared for internal agency use only and discussion of information which, if written, would fall within the provisions of exemption 5 of 5 U.S.C. 552(b) (5 U.S.C. 552(b)(5)), to preserve the confidentiality of information related to safeguarding of special nuclear material (5 U.S.C. 552(b)(4)), to protect information provided in confidence by individual members of the NRC Staff (5 U.S.C. 552(b)(5)), and to protect information which, if released, would represent an undue invasion of privacy (5 U.S.C. 552(b)(6)). Separation of factual information and information considered exempt from disclosure under exemption (1), exemption (4), exemption (5), and exemption (6) of 5 U.S.C. 552(b) during these portions of the meeting is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview. Persons desiring to mail written comments may do so by mailing a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than February 2, 1977, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, DC 20555 will normally be received in time to be considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC 20555 and at the following Public Document Rooms:

OYSTER CREEK NUCLEAR POWER PLANT

Ocean County Library, 15 Hooper Avenue, Toms River, NJ 08753.

D.C. COOK UNIT 1

Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, MI 49085.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety related areas within the Committee's purview at an appropri-

ate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on February 9, 1977, to the Office of the Executive Director of the Committee (Telephone: 202–634–1371) between 8:15 A.M. and 5:00 P.M., Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on February 9, 1977.

(d) Questions may be propounded only by members of the Committee and its consultants.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. on or after May 13, 1977. Copies may be obtained upon payment of appropriate charges.

Dated: January 21, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

OFFICE OF TELECOMMUNICATIONS POLICY

ELECTROMAGNETIC RADIATION MANAGEMENT ADVISORY COUNCIL

Meeting

Notice is hereby given that the Electromagnetic Radiation Management Advisory Council (ERMAC) will meet at 9:00 a.m., in room 2010, New Executive Office Building, 17th and H Streets, N.W., Washington, D.C. on Wednesday, February 9, 1977 and on Thursday, February 10, 1977.

The principal agenda items will consist of presentations on research programs being conducted to evaluate the biological effects of nonionizing electromagnetic radiation. On 9 February presentations will be made by the Departments of Air Force and Army and on 10 February by the Environmental Protection Agency.

The meetings will be open to the public; any member of the public will be permitted to file a written statement with the Committee, before or after the meeting.

Information regarding the Committee may be obtained from Lt. Cmdr. Peter S. Labyak, Office of Telecommunications Policy, Washington, D.C. 20504 (telephone: 202/395–4737)

Dated: January 19, 1977.

L. DANIEL O'NEILL,
Advisory Committee Management Officer.

OHIO RIVER BASIN COMMISSION

GREAT MIAMI RIVER BASIN COMPREHENSIVE COORDINATED JOINT PLAN REVIEW

Availability of Report

Pursuant to section 204(3) of the Water Resources Planning Act of 1965 (Pub. L. 89–80), the Ohio River Basin Commission has completed a report summarizing the current Comprehensive Coordinated Joint Plan (CCJP) for the Great Miami River Basin portion of the Ohio River Basin. The Report currently is being reviewed by the Governors and the head of each Federal agency, and each interstate agency, from which a member of the Commission has been appointed.

Views, comments and recommendations on the CCJP are requested by April 14, 1977. Copies are available on request to the Ohio River Basin Commission, 36 E. Fourth Street, Suite 208–20, Cincinnati, Ohio 45202.

FRED E. MORR,
Chairman.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500–1]

ECI INDUSTRIES

Suspension of Trading

JANUARY 18, 1977.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of ECI Industries being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 10:00 a.m., e.s.t., on January 18, 1977 through January 27, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77–2230 Filed 1–24–77;8:45 am]

[Release No. 34–13172; File No. SR–MSE–76–28]

MIDWEST STOCK EXCHANGE, INC.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on January 3, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

MSE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Article I, Rule 10:

TRANSFERS OF MEMBERSHIP

Rule 10. A membership is a privilege which cannot be transferred until the transferee shall have been elected a member or member organization. All bids for, and offerings of, memberships shall be submitted to and will be processed by the Exchange in accordance with procedures that shall from time to time be established by the Executive Committee. All contracts for the sale of memberships shall be approved by the Exchange. A sale or transfer of a membership without Exchange approval shall confer no rights on the purchaser or transferee to become a member, to exercise any rights of membership or otherwise to deal on or with the Exchange on a basis other than that of a nonmember. Transference pursuant to financing arrangements, whereby the transferor retains the right to reacquire the membership, must be in accordance with the requirements of the Exchange and the terms of all such arrangements must be approved by the Exchange.

MSE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change is to provide specific notice in the rules that it is the policy of the Exchange that these financing arrangements must be in accordance with the requirements of the Exchange.

The proposed rule change gives the Exchange the capacity to carry out the purposes of the Act and to comply, and to enforce compliance by its members and persons associated with its members, with the Act, the rules and regulations thereunder.

Comments have neither been solicited nor received.

The Midwest Stock Exchange believes that no burdens have been placed on competition.

On or before March 1, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before February 15, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JANUARY 14, 1977.

[FR Doc.77–2231 Filed 1–24–77;8:45 am]

[SR–NYSE–76–37]

NEW YORK STOCK EXCHANGE, INC.

Order Approving Rule Change

On June 25, 1976, the New York Stock Exchange, Inc., 11 Wall Street, New York, New York 10005, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b–4 thereunder, copies of a proposed rule change. The rule change reduces the capital requirements for registered traders from the current initial and maintenance requirements of, respectively, $250,000 and $175,000 over and above any other federal or exchange requirement to a constant minimum requirement of $25,000 over and above any other federal or exchange requirement; and changes the title of "registered traders" to "competitive traders."

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Release No. 34–12555 (June 18, 1976)) and by publication in the FEDERAL REGISTER (41 FR 26287 (June 25, 1976)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on June 25, 1976, be, and it hereby is, approved.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[OST File No. 49; Notice 77-2]

DESIGN, ART AND ARCHITECTURE IN TRANSPORTATION

Request for Public Comment

The purpose of this notice is to invite public comment on ways to encourage the use of art, good design, and architecture in the development of federally funded transportation projects.

On January 14, 1977, I issued "A Policy Statement on the Use of Design, Art and Architecture in Transportation System." On that same date, I established a task force within the Department of Transportation on the subject of design, art and architecture in transportation. The statement of policy and the memorandum establishing the task force are set forth below.

The Department of Transportation hereby requests comments of the interested public on (1) the policy; (2) matters which commentors believe the task force should consider; (3) the matters which I have specifically asked the task force to consider; and (4) any other suggestions as to how the Department can appropriately improve design, art and architecture in transportation systems.

Comments should be submitted in writing to:

Docket Clerk, OST File No. 49, Office of the General Counsel, Department of Transportation, Washington, D.C. 20590.

Comments received by Friday, March 25, 1977, will be considered; those received after that date will be considered only to the extent feasible. Comments will be available for public inspection and copying in the Office of the Assistant General Counsel for Operations and Legal Counsel, Room 10100 Nassif Building, 400 Seventh Street, SW., Washington, D.C., 9 a.m. to 5:30 p.m. local time, Monday through Friday, except Federal holidays.

For further information, contact:

Charles Ansbacher, White House Fellow, Department of Transportation, Washington, D.C. 20590, (202) 426-4363.

Issued in Washington, D.C. on January 18, 1977.

WILLIAM T. COLEMAN, JR.,
Secretary of Transportation.

A POLICY STATEMENT ON THE USE OF DESIGN, ART AND ARCHITECTURE IN TRANSPORTATION SYSTEMS

JANUARY 14, 1977.

The purpose of this statement is to set forth an explicit Departmental policy with respect to the use and encouragement of art and good design in our Nation's transportation systems. It is our strong conviction that a Nation's public works reflect the strength and depth of its cultural heritage. We need only look at the creations of great nations of antiquity to find examples of their civilization—Athens gives us her places of worship and trade, Rome bequeaths her aqueducts and colosseums, Paris presents her splendor in magnificent boulevards and public museums of unsurpassed beauty. The Parliament Building of London commands our regard for that Nation's splendid history of leadership and commitment to democratic principles.

These examples have been emulated in many instances by our own great country—often as our youthful cities sought to develop their own statement of character and achievement. New York was identified by the majestic height of its Empire State Building and the massively attractive Brooklyn Bridge; San Francisco is the home of the Golden Gate; Washington, like London, is a city planned for its leading governmental role and through its monuments, parks and buildings, constantly reminds us of our great leaders and strong Constitution.

Today, enormous amounts of public funds, collected from our people, flow into the development and continued improvement of our Nation's cities and countryside. Since transportation systems claim a large portion of those funds, we recognize that in the spirit of the past, and with care for the future, the Department of Transportation must make a strong commitment to a policy which will assure that all public funds allocated to transportation be spent with due consideration for their design, artistic and cultural impact.

Thus, as a matter of policy, we believe that a concern for good design is an integral part of responsible planning for safe, efficient and economical transportation systems. To accomplish this objective, the Department proposes to establish a process which will encourage the use of art and good design in the development of Federally funded transportation projects.

In the final analysis, high quality design will accomplish the broadest transportation objectives and may generate benefits which far outweigh any additional costs. Design which provides visual testimony to the Country's respect for the dignity of individuals will become another cherished portion of our Nation's heritage. Emphasis, therefore, must be placed on the choice of plans which embody the finest American architectural, design, and artistic thought.

WILLIAM T. COLEMAN, JR.

JANUARY 14, 1977.

Memorandum to: Commandant, United States Coast Guard, Federal Aviation Administrator, Federal Highway Administrator, Federal Railroad Administrator, Urban Mass Transportation Administrator, Assistant Secretary for Policy, Plans and International Affairs, Assistant Secretary for Environment, Safety and Consumer Affairs, Assistant Secretary for Administration, White House Fellow, Director of Public Affairs.

Subject: Establishment of Task Force on Design, Art and Architecture in Transportation.

I am establishing herewith an ad hoc Task Force on Design, Art and Architecture in Transportation, with the addressees of this memorandum as members. The Task Force will be chaired jointly by the Assistant Secretary for Environment, Safety and Consumer Affairs and the White House Fellow. The purpose of the Task Force is to develop and submit to the Secretary, within six months, a report setting forth proposals for the implementation of the policy which I am issuing today on Design, Art and Architecture in Transportation.

In developing its report, the Task Force should consider the following:

(1) The creation of a National Advisory Board on Design, Art and Architecture in Transportation.

(2) The understanding that the cost of incorporating aesthetic design and art work may be eligible for Department of Transportation assistance at a certain level of funding based on a formula of a project's total budget. This assistance will apply to transportation systems which will be refurbished and modernized, and for new construction.

(3) The establishment of an annual awards program to give recognition to outstanding examples of achievement in design, art and architecture in transportation systems.

(4) The promulgation of regulations regarding procedures which the Department of Transportation grantees should follow to assure that design, art and architecture factors in transportation systems are given due consideration.

(5) Grants be made available to communities for aesthetic environmental enhancement of transportation systems on a one-to-one matching basis, where federal dollars are matched by funds from individuals, neighborhood organizations, or businesses.

The Task Force should evaluate the comments received on the policy, and the foregoing items, in response to a notice in the FEDERAL REGISTER. Also, for the purpose of informing itself more completely, the Task Force is hereby authorized to hold a public hearing and to travel to the extent necessary. In developing its report, the Task Force should review all relevant programs and policies within the Department, as well as elsewhere in the Federal Government, and—on a selected basis—in State and local governments.

WILLIAM T. COLEMAN, JR.

INTERSTATE COMMERCE COMMISSION

[Notice No. 310]

ASSIGNMENT OF HEARINGS

JANUARY 19, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 142215, Duke Transportation, Inc. now being assigned March 15, 1977 (3 days) at Baton Rouge, Louisiana in a hearing room to be later designated.

MC 23441 (Sub-No. 21), Lay Trucking Company, Inc. and MC 61592 (Sub-No. 386), Jenkins Truck Line, Inc., now being assigned for continued hearing on February 10, 1977, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 142251, Ill-Mo Air Freight, Inc., application dismissed.

MC 33641 (Sub-No. 126), IML Freight, Inc., now being assigned for continued hearing on April 5, 1977 (4 days), at Boise, Idaho, Bankruptcy Courtroom, U.S. Post Office, Room 214, North 8th and Bannock Streets.

No. 36434, Petition for Declatory Order and Reconsideration (Commuter Fares-Consolidated Rail Corporation, New Jersey and New York) and No. 36474, *Benjamin A. Gilman v. Consolidated Rail Corporation, et al*, now being assigned February 14, 1977 (1 day) at New York, New York; in a hearing room to be later designated.

MC 82841 Sub 177, Hunt Transportation, Inc. now being assigned March 28, 1977 (1 week) at Denver, Colorado in a hearing room to be later designated.

MC 57697 Sub 3, Lester Smith Trucking, Inc. now being assigned March 24, 1977 (2 days) at Denver, Colorado in a hearing room to be later designated.

MC 142574 (Sub 1), Circle C Transportation Company now being assigned March 22, 1977 (2 days) at Denver, Colorado in a hearing room to be later designated.

MC 111611 (Sub-30), Noerr Motor Freight, Inc., now being assigned March 23, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 112582 (Sub-45), T. M. Zimmerman Company, now being assigned March 17, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 113666 (Sub-109), Freeport Transport, Inc., now being assigned March 24, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 118989 (Sub-146), Container Transit, Inc., now being assigned March 9, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 140829 (Sub-16), Cargo Contract Carrier Corp., now being assigned March 23, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2351 Filed 1-24-77;8:45 am]

[AB 77 (Sub-No. 1)]

BANGOR AND AROOSTOOK RAILROAD CO.

Abandonment of Lines

JANUARY 13, 1977.

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment by the Bangor and Aroostook Railroad Company of its line between South Lagrange and Packard, a distance of 27.96 miles, in Penobscot and Piscataquis Counties, Maine, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the subject action are considered insignificant because all traffic previously handled over this line has, since November 1974, been diverted to applicant's alternate main line via Brownville, Maine. Consequently, there will be no increases in energy consumption or air pollution which might otherwise occur as a result of diversion of traffic from rail to motor carriers. There are no industrial development plans in the tributary territory which would be dependent on continued rail service over this line. Finally, interest has been expressed in utilizing the abandoned right-of-way for recreational use, and the line has been found to be suitable for other public purposes upon abandonment.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before February 25, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2349 Filed 1-24-77;8:45 am]

[Docket No. AB-6 (Sub-No. 45)]

BURLINGTON NORTHERN, INC.

Abandonment of Lines

JANUARY 13, 1977.

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment by the Burlington Northern, Inc., of its branch line between Sterling and New Raymer, a distance of 34.50 miles, in Logan and Weld Counties, Colo., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts associated with the abandonment are considered insignificant because diversion of the low volume of traffic presently handled on the line will not cause measurable increases in fuel consumption or air pollution. A developing industrial park adjacent the line west of Shirley would be adversely impacted should the abandonment be approved. Several firms presently considering the park require rail service and would most likely select an alternate location should the abandonment be approved. However, abandonment is not expected to create a serious adverse impact on community and rural development because abandonment will not preclude industrial development by firms which do not require rail service. An alternative granting partial abandonment, and thereby avoiding adverse impacts to the industrial park is included.

The State of Colorado, Department of Highways and the city of Sterling have both indicated an interest in acquiring portions of the right-of-way for either the continued use as a transportation corridor or for utilization as a hike and bike trail.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission. Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington. D.C. 20423 on or before February 25, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2348 Filed 1-24-77;8:45 am]

CONDITION OF INTERCITY BUS INDUSTRY

Informal Conference

JANUARY 18, 1977.

Upon consideration of a telegraphic request, the Commission, Division 2, has determined that an informal conference should be held for the purpose of discussing the financial condition of the intercity bus industry.

The informal conference will convene at 10 a.m. on February 2, 1977, at the Office of the Interstate Commerce Commission, Washington, D.C. Parties interested in attending this conference should indicate their intention to participate by notifying the Commission no later than January 26, 1977. Letters of intent to participate should be addressed to the Interstate Commerce Commission, Room 5342, Washington, D.C. 20423.

Notice of this informal conference before Division 2 shall be given to the general public by depositing a copy of this Notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. for public inspection and by delivering a copy of the Notice to the Director, Office of the Federal Register, for publication therein as notice to interested persons.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2347 Filed 1-24-77;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

JANUARY 19, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common

carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before February 9, 1977.

FSA No. 43306—*Joint Rail-Water Container Rates—Lykes Bros. Steamship Co., Inc.* Filed by Lykes Bros. Steamship Co., Inc., (No. 6), for itself and interested rail carriers. Rates on general commodities, from ports in Continental Europe, The United Kingdom, Scandinavia and Denmark, North Spain, Portugal, the Mediterranean and Black Sea, to San Francisco, California.

Grounds for relief—Water competition.

Tariffs—Lykes Bros. Steamship Co., Inc., Eastbound Pacific Coast to Europe tariff No. 1, I.C.C. No. 1, F.M.C. No. 89, and 3 other schedules named in the application. Rates are published to become effective on February 15, 1977.

FSA No. 43307—*Barley or Wheat and Related Articles from Points in Montana.* Filed by North Pacific Coast Freight Bureau, Agent, (No. 77-1), for and on behalf of Chicago, Milwaukee, St. Paul and Pacific Railroad Company. Rates on barley, or wheat and products thereof, in carloads, as described in the application, from specified points in Montana, to specified points in Washington and Oregon.

Grounds for relief—Carrier competition.

Tariff—North Pacific Coast Freight Bureau, Agent, tariff 13-I, I.C.C. No. 1302. Rates are published to become effective on February 19, 1977.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2352 Filed 1-24-77;8:45 am]

[Docket No. AB 83 (Sub-No. 3)]

MAINE CENTRAL RAILROAD CO.

Abandonment of Lines

JANUARY 13, 1977.

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment by the Maine Central Railroad Company of its line between North Anson and Bingham, a distance of 16.00 miles, in Somerset County, Maine, if approved by the Commission, does not constitute a major Federal action, significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed abandonment are considered insignificant because traffic over this line, which consists mostly of wood products, has dropped sharply since 1974, when the major shipper ceased operations in Bingham. Local planning agencies have been attempting to attract industrial development in the Bingham area. While abandonment would create an adverse effect to the extent that firms requiring rail service will not choose to locate in the Bingham area, there will not be a serious adverse impact on rural and community development because certain types of industrial development would not be precluded. Furthermore, given the nature of wood cutting operations, abandonment may increase the initial motor carrier haul to a railhead, but the basic modal mix of the movement would not be altered. Finally, no interest has been expressed for use of the right-of-way following abandonment, and the line is not considered suitable for other public purposes.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423 on or before February 25, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2350 Filed 1-24-77;8:45 am]

[Notice No. 107]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before February 24, 1977. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

Correction: No. MC-FC-76814, filed November 3, 1976. Transferee: STROP TRANSPORTATION, INC., 1501 S. Burlington, Hastings, Nebr. 68901. Transferor: Charles R. Strop, doing business as Strop Transportation, 1501 S. Burlington, Hastings, Nebr. 68901. Applicant's representative: Arlyn L. Westergren, Attorney-at-Law, 530 Univac Building, 7100 W. Center Road, Hastings, Nebr. 68106. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates Nos. MC 134341 (Sub-No. 3) and MC 134341 (Sub-No. 5), issued February 20, 1973, and July 19, 1976, respectively, as follows: Meats, meat products, and meat by-products, and articles distributed by meat packinghouses, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the facilities of Minden Beef Company at Minden, Nebr., to points in Connecticut, Illinois, Indiana, Iowa, Kentucky, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, and Wisconsin, and the District of Columbia; and packinghouse by-products (other than hides), from the plant site of Hastings Hide, Inc., at or near Hastings, Nebr., to Denver, Colo., and Kansas City, Mo.; and hides, from the plant site of Hastings Hide, Inc., located at or near Hastings, Nebr., to Los Angeles, Long Beach, and San Francisco, Calif., Portland, Oreg., and Seattle, Wash.; and those set forth in Permit No. MC 136833, issued June 10, 1974, to Shaw Trucking, Inc., and acquire by transferor herein pursuant to No. MC-F-12387, consummated July 17, 1976, as follows: Motor vehicle and recreational equipment, supplies and accessories, from Wahoo, Nebr., to points in the United States (except Alaska, Hawaii, and Nebraska), and equipment, materials, and supplies (except commodities in bulk), used in the manufacture of the commodities described immediately above, from points

in the United States (except Alaska and Hawaii), to Wahoo, Nebr., limited to a transportation service to be performed under a continuing contract or contracts with Hellstar Corporation, of Wahoo, Nebr. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b). The purpose of this correction is to include the operating rights under Permit No. MC 136833 in the authority proposed for transfer.

No. MC-FC-76866, filed December 9, 1976. Transferee: HUGH J. RITCHIE and GEORGE J. KROCOS, a partnership, doing business as TRUCKIT, 6463 E. Canning St., Los Angeles, Calif. 90040. Transferor: Joseph Jennard and George Krocos, a partnership, 2332 S. Peck Rd., Suite 194, Whittier, Calif. 90601. Applicants' representative: Hugh J. Ritchie, Attorney at Law, 3200 Wilshire Blvd., Suite 809, Los Angeles, Calif. 90010. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 140880 (Sub-No. 1), issued July 30, 1976, as follows: *Foundry compounds and supplies* (except commodities in bulk), over irregular routes, from Georgetown and Danville, Ill., Cleveland, Columbus, Hamilton, and Ashtabula, Ohio, Milwaukee, Wis., and Muse, Pa., to Vernon and City of Commerce, Calif., with restrictions. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-76880, filed December 17, 1976. Transferee: FURLOW'S GARAGE, INC., P.O. Box 853, Cumberland, Md. 21502. Transferor: James Neil Furlow, doing business as FURLOW'S GARAGE, P.O. Box 853, Cumberland, Md. 21502. Applicants' representative: Frank B. Hand, Jr. Attorney-at-Law, P.O. Box 187, Berryville, Va. 22611. Authority sought for purchase by transferee of the operating set forth in Certificate No. MC 136969, issued August 30, 1973, to transferor, as follows: Motor vehicles, in towaway service, between points in Pennsylvania, Maryland, Virginia, and West Virginia on and bounded by a line beginning at Uniontown, Pa. and extending along U.S. Highway 40 to junction U.S. Highway 219 near Grantsville, Md., thence north along U.S. Highway 219 to junction Pennsylvania Turnpike, thence along the Pennsylvania Turnpike to junction Interstate Highway 70 near Breezewood, Pa., thence along Interstate Highway 70 to junction Interstate Highway 81 near Hagerstown, Md., thence along Interstate Highway 81 to junction U.S. Highway 50 at Winchester, Va., thence along U.S. Highway 50 to junction U.S. Highway 119 near Grafton, W. Va., thence along U.S. Highway 119 to junction U.S. Highway 40 at Uniontown, Pa. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b) of the Act.

No. MC-FC-76881, filed December 17, 1976. Transferee: SAWYER TRANSPORTATION, INC., 3535 Wolf Road Saginaw, Mich. 48601. Transferor: Jon C. Sawyer, doing business as Sawyer Transport Co., 3535 Wolf Road, Saginaw, Mich. 48601. Applicants' representative: Karl L. Gotting, Attorney-at-Law, 1200 Bank of Lansing Bldg., Lansing, Mich. 48933. Authority sought for purchase by transferee of the operating rights set forth in Certificate No. MC 138383 (Sub-No. 1), issued July 3, 1974, as follows: Scrap iron and scrap steel, in bump vehicles, between the plant sites of The Tuschman Steel Co., and Kasle Iron and Metals, Inc., at Toledo, Ohio, on the one hand, and, on the other, points in Michigan. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b) of the Act.

No. MC-FC-76882, filed December 17, 1976. Transferee: BRISTOL BUS CO., INC., 15 Tower St., Bristol, R.I. 02809. Transferor: Leo Raymond Bouffard, 88 Arlington Ave., Warren, R.I. 02885. Transferor's representative: Frank Daniels, Attorney-at-Law, 15 Court Square, Boston, Mass. 02108. Transferee's representative: Emilio D. Iannuccillo, Attorney-at-Law, 825 Hope St., Bristol, R.I. 02809. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificates Nos. MC 117215 (Sub-No. 1), MC 117215 (Sub-No. 2), and MC 117215 (Sub-No. 3), issued September 9, 1964, April 14, 1966, and June 14, 1972, respectively, as follows: Passengers, in special round-trip operations, beginning and ending at Falls River, Mass., and extending to Central Falls, Pawtucket, Providence and Warren, R.I.; beginning and ending at New Bedford, Mass., and extending to Warren, Providence, and Pawtucket, R.I.; beginning and ending at New Bedford, Mass., and extending to East Providence, R. I.; and beginning and ending at Wareham, Mass., and extending to East Providence, Cranston, and Providence, R.I.; and beginning and ending at Fall River, Mass., and extending to East Providence and Cranston, R.I., all restricted to the transportation of passengers who at the time are traveling for the purpose of participating in games commonly referred to as Beano and Bingo games. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b) of the Act.

No. MC-FC-76883, filed December 17, 1976. Transferee: GARRETT BROS., INC., 13900 S. Meridian, Oklahoma City, Okla. 73119. Transferor: Trans Western Transports of Oklahoma, Inc., 2705 S. Eastern, Oklahoma City, Okla. 73129. Applicants' representative: G. Timothy Armstrong, Attorney-at-Law, 6161 North May Ave., Oklahoma City, Okla. 73112. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate No. MC 74346, issued by the Commission May 6, 1969, to M-G Trucking Co., a corporation, doing business as M-G Trucking Company, Oklahoma City, Okla., and acquired by transferor herein pursuant to No. MC-FC-76384, approved May 17, 1976, and consummated June 25, 1976, as follows: Machinery, materials, supplies, and equipment, incidental to, or used in the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, between points in Oklahoma, Texas, and Kansas. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-76895, filed December 28, 1976. Transferee: DEAN H. PETERSEN, 2401 Park Avenue, Lincoln, Nebr. 68502. Transferor: Dean H. Petersen & Son, Inc., 367 Garden Street, Bennet, Nebr. 68317. Applicants' representative: Patrick E. Quinn, Attorney-at-Law, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought for purchase by transferee of the operating rights set forth in Certificate No. MC 134418, issued January 27, 1971, in the name of transferor, as follows: Dairy products, between points in Nebraska, on the one hand, and, on the other, points in Kansas, Missouri, Iowa, Minnesota, and Colorado, restricted against the transportation of shipments originating at the plantsite of Beatrice Foods Co. at Lincoln, Nebr. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b) of the Act.

MOTOR CARRIER TRANSFER PROCEEDINGS

JANUARY 24, 1977.

Application filed for temporary authority under section 210a(b) in connection with transfer application under section 212a(b) in connection with transfer application under section 212a(b) and Transfer Rules, 49 CFR Part 1132:

MC-FC-76925. By application filed January 13, 1977, Ashbourne Transportation, Inc., 7827 Old York Road, Elkins Park, PA., 19117, seeks temporary authority to lease the operating rights of North Penn Bus Lines, Inc., 140 North Ridge Avenue, Ambler, PA., 19002, under section 210a(b). The transfer to Ashbourne Transportation, Inc., of the operating rights of North Penn Bus Lines, Inc., is presently pending.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[42 CFR Part 101]

HOSPITAL REVIEW

Subpart G; Notice of Proposed Rulemaking

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart G, entitled "Hospital Review," to Part 101 of Title 42, Code of Federal Regulations.

I. PURPOSE OF REGULATIONS

The purpose of the present proposal is to implement sections 1155 and 1156 of the Social Security Act (42 U.S.C. 1320c–4 and 1320c–5). These sections deal with the duties and functions of Professional Standards Review Organizations (PSROs) with respect to the review of health care services and items for which payment may be made under the Social Security Act. Such review will determine if services are or were medically necessary, meet professionally recognized standards of quality, and, where proposed to be provided on an inpatient basis, could, consistent with the provision of appropriate medical care, be effectively provided on an outpatient basis or more economically in an inpatient health care facility of a different type. This propsal sets forth procedures for a review system designed to fulfill the purposes of the hospital review described above. The Secretary will consider alternative approaches to portions of this review system provided they are or have the potential to be as effective and efficient as the corresponding portions of the proposed regulations for conducting hospital review.

II. HISTORY AND STATUTORY BASIS

At present, utilization review activities are required under Titles XVIII, XIX and V of the Social Security Act. Regulations have been proposed to implement these statutory requirements (see 41 FEDERAL REGISTER 13453, March 30, 1976). Title XI, Part B of the Act provides for the establishment of new organizations, the PSROs, and a new system for the review of the medical necessity and appropriateness of services under Titles XVIII and XIX.

The proposed hospital review regulations are based on procedures and requirements which were initially published and distributed by the Secretary as interim guidelines in the PSRO Program Manual of March 1974. The system of review of the medical necessity, quality and appropriateness of health care services proposed in these regulations builds upon the experiences of hospitals, foundations for medical care and Experimental Medical Care Review Organizations (EMCROs) in designing and testing systems for similar types of review.

Under section 1155(a)(1) of the Social Security Act and these proposed PSRO hospital review regulations, the locus of responsibility for health care review determinations is shifted from individual hospitals and third-party payors to local physician organizations, the PSROs, which will assume responsibility for performance of their duties and functions on a gradually increasing basis. Responsibility for any review functions which have not been assumed by a PSRO will remain with those agencies or institutions presently having such responsibility under Titles XVIII and XIX.

III. RELATION TO TITLES XVIII AND XIX

Appropriate regulations under this Part will provide that, to the extent authority for making determinations of medical necessity is vested in the PSROs, it will not be exercised by intermediaries, carriers, State agencies, or other fiscal agents with respect to the provision of items and services subject to review by a PSRO under Part B of Title XI of the Social Security Act. Rather, such organizations will incorporate PSRO determinations of medical necessity into their determinations of coverage and reimbursement under Titles XVIII and XIX of the Social Security Act, as appropriate. On the other hand, it is not the responsibility of PSROs to set national coverage policy in terms of what services are excluded from payment under section 1862 of the Act, and for that reason the Title XVIII coverage exclusion guidelines (Medicare Part A Intermediary Manual, Chapter II Appendices) will remain in effect. In addition, fiscal intermediaries may, in their application of coverage regulations and guidelines, request PSROs to make retrospective determinations of the medical necessity of specific services delivered during both approved and non-approved hospital stays. PSROs should, therefore, be aware of national coverage policies when they make determinations of medical necessity. In brief, it is the PSRO's responsibility to use professional judgment to decide what is medically necessary, and the intermediary's responsibility to apply payment guidelines.

IV. RELATION TO HOSPITALS

In order to obtain reimbursement under Titles XVIII and XIX, hospitals will be expected to cooperate with the PSRO in fulfilling its review responsibilities. PSROs will, however, through the delegation process outlined in Subpart H of this Part, take advantage of the experience hospitals have gained in conducting utilization and other review activities. Hospitals which are found by the appropriate PSRO to be capable of efficiently and effectively conducting the review required by the regulations may continue to do so, as specified more fully in Subpart H of this Part (which is being published in proposed form concurrently with these proposed regulations), although final responsibility for all review activities is assumed by the area-wide PSRO.

V. APPLICATION TO SHORT STAY HOSPITALS

The proposed regulations set out below apply to review of inpatient health care services in short stay hospitals and, in the case of medical care evaluation (MCE) studies, to hospital based outpatient services as well where inclusion is consistent with the objectives of the study. Regulations regarding the review of health care services in long term care institutions and review of ambulatory care services will be proposed in the future.

VI. THE REVIEW SYSTEM

The proposed regulations set forth three major review components in short stay hospitals: 1) concurrent review of the medical necessity and appropriateness of admission to, and continued stay in, a hospital (admission review and continued stay review); 2) MCE studies to assure the quality and improve the nature of the utilization of health care services; and 3) analysis of health care practitioner, institutional, and patient profiles. Concurrent, as well as retrospective, review of services by PSROs is authorized under section 1155(b)(2) of the Social Security Act which expressly provides for review "either before or after, or both before and after, the provision of services." In addition, preadmission review by PSROs is authorized under section 1155(a)(2) of the Social Security Act. These components of the PSRO review system interact to form a comprehensive quality assurance mechanism. Profile analysis, for example, provides a means for judging the effectiveness of a PSRO's or hospital's review program by comparing similar data over time. In addition, by distinguishing between usual practice patterns and those that are consistently aberrant, profile analysis allows the PSRO to modify its admission and continued stay review programs to focus on defined problem situations. The concurrent review component, itself, also frequently identifies potential problems in health care administration and delivery. These can then be topics for more detailed medical care evaluation studies to further define the problem and develop means for its solution.

The accumulation of data through concurrent review, medical care evaluation studies, and profile analysis will enable PSROs to identify areas of practice (e.g., diagnoses, conditions, therapies, and procedures) that demonstrate consistently good performance. On the basis of such adequate data, PSROs are encouraged to focus concurrent review activities to concentrate on problem areas. Such focusing of concurrent review, together with monitoring of other areas, is likely to be the key to PSRO efficiency and effectiveness. Through focusing, PSROs will be able to devote their review resources to priority areas while simultaneously monitoring the effectiveness of the entire system. It should be recognized, however, that focusing of review can occur only if a PSRO has sufficient review capability and data, collected on either a concurrent or retrospective basis, to make the distinction between problem areas and areas of appropriate practice. Until such time as capability and a sufficient data base are established automatic certification of admission of patients in specific categories should not occur. When, however,

the PSRO has established review capability and sufficient data, focusing of review on problem areas and automatic certification of consistently appropriate admissions are encouraged. The Department will develop, within one year, guidelines for the focusing of review activities.

A. APPROACH TO CONCURRENT REVIEW

All Title XVIII, XIX and V patients will be identified by PSRO reviewers at the time of admission. Depending upon the stage of development of the PSRO's review system, one of two approaches will be taken. Where routine concurrent review procedures are to be used, admissions will be subject to screening review using explicit written criteria to determine those cases in which the medical necessity for hospitalization is evident without further review by peer practitioners. For those cases in which this screening process does not clearly establish the need for hospitalization, the determination of the medical necessity and appropriateness of hospital care is made by a peer of the professional ordering hospital admission. Similarly, in cases requiring continued stay review, the need for continued stay in the hospital is periodically assessed using a similar screening and peer review process.

In addition, as noted above, the PSRO will identify situations in which the medical necessity and appropriateness of admission and, in some instances, continued stay, can be automatically certified. In the former instance (automatic admission certification), a length of stay will be assigned to each admission in this category. In the latter instance (automatic certification of the hospitalization), no admission or continued stay review will be conducted. In these, as in all cases, the data necessary to fulfill PSRO reporting requirements and develop profiles will be collected. Further, it should be emphasized that in the case of automatic admission certification and in the more rare case of automatic certification of the hospitalization, the PSRO must have developed sufficient review capability and data base to justify these abbreviated procedures.

Only where it is clear that hospital care is not necessary will the PSRO make an adverse determination. Payment for further hospital care can be denied only if an adverse determination is made by a peer health professional. In any instance where there is reasonable doubt as to the necessity of care at the hospital level, the admission or continued stay should be approved. In this manner the interests of patients in receiving needed health care services are protected, and the judgment of the attending physician or nonphysician health care practitioner with attending privileges is fully considered.

When admission review is conducted, it should generally be initiated as soon as possible following admission and must be completed within three working days of such admission. The Secretary believes that review of the necessity and appropriateness of admission concurrent with admission affords reviewers the best opportunity to consider the unique characteristics of each patient. The ready availability of the medical record and the patient's attending physician will allow review decisions to be based upon the most accurate available information. In order best to judge the necessity and appropriateness of an admission, reviewers should complete their assessment as close to the point of admission as possible, in most cases within one or two days. Thus, the three day allowance should not be interpreted as a guideline for timing of review, but as an upper limit for completion.

It should be clearly understood that a reviewer's decision concerning the necessity and appropriateness of hospital care is based on the types of diagnostic and therapeutic health care services needed by a patient. A diagnosis need not have been established nor must a workup be completed within the three working day timeframe. Approval would be given unless there was no clear reason for continuing a diagnostic workup at the hospital level. This, coupled with the fact that PSROs will, with time, limit their admission review by focusing on problem areas, makes the three working day limit for the vast majority of cases an appropriate balance between the need to review the necessity of admission shortly thereafter and considerations of administrative efficiency.

These regulations also require the review, within three working days of admission, of elective surgical and other major elective diagnostic and therapeutic procedures. Where there is evidence of medically unnecessary or inappropriate utilization of such procedures, developed for example through medical care evaluation studies, profile analysis, or concurrent review, procedure review must take place prior to the performance of the procedure. Where the PSRO has a reasonable belief that utilization is medically unnecessary or inappropriate, review should take place prior to the performance of the procedure. These requirements are intended to assure that patients are afforded the benefits of PSRO screening review, and where necessary, peer review prior to undergoing elective surgical or other elective procedures with the attendant risks of anesthesia, iatrogenic illness, and post-surgical complications. By conducting review prior to the performance of the procedure in the case of known problem areas, the risks of an unnecessary procedure may be avoided and limited program resources will not be wasted.

It is recognized that in some cases (e.g., those scheduled for surgery immediately after admission or the morning after a weekend admission), review prior to the procedure might result in postponement of the provision of services and increased lengths-of-stay solely to enable the PSRO to complete the required review. Since such a result is clearly not the intent of these regulations, where length-of-stay may be increased only because of review, the PSRO should make every reasonable effort to complete review without delaying the procedure, as, for example, by performing review prior to admission.

Explicit written norms, criteria, and standards, adopted by the PSRO in accordance with requirements set forth in instructions and in Subpart I of this Part (which is being published in proposed form concurrently with these proposed regulations) will be utilized in these review activities.

B. MEDICAL CARE EVALUATION (MCE) STUDIES

MCE studies are an exceedingly important component of the PSRO review system. They afford PSROs and hospitals the opportunity to examine well defined areas of practice to identify problems in the quality or administration of health services as well as to document that high quality care is being delivered. These regulations outline a generic approach for conducting MCE studies. This approach—which is well rooted in the past experience of hospital medical audit committees—includes the steps necessary to identify problems (if any), attempt their correction and determine if the corrective action has succeeded.

Additionally, these regulations contain requirements for a minimum number of MCE studies which varies depending upon the number of admissions to the hospital. By requiring more studies in hospitals with more admissions, the benefits of MCE studies can be more uniformly distributed across patients and practitioners.

A principal characteristic of all MCE studies and a requirement of these regulations, is that those practitioners whose delivery of care is to be assessed are involved in the design of the study and in the development of the criteria and standards to be used. This approach helps to assure that the results of the study are more credible and aids in assuring smooth implementation of any necessary corrective action. Also, many groups have found that involvement in the design and conduct of MCE studies, especially the development of criteria and standards, is educational. The interaction of the discussants helps to define acceptable alternative approaches to a clinical problem, highlights the degree to which there is scientific basis for certain practices and increases the awareness of some participants of the need to modify their practice habits.

Over recent years it has also become increasingly apparent that continuing medical education should be linked more closely to the results of the review of health care quality. MCE studies constitute the important first step in this linkage by providing clear definition of the causes of problems in the quality of health care.

Finally, it is important to recognize that MCE studies do not constitute clinical research in the usual investigative sense. Their purpose is to evaluate current local clinical or administrative practices to determine if they match local expectations as defined by criteria. In an MCE study, criteria and standards are to be based on the medical literature (including the results of clinical re-

search) and on the experience of local practitioners.

C. PROFILE ANALYSES

These regulations also provide for data collection, analysis, and development in the form of profiles. Section 155(a)(4) of the Act requires that profiles for patients, physicians, and providers be maintained and reviewed by PSROs. These data sets will compare institutional and physician practice patterns and evaluate these patterns over time. The evaluations will show areas of care on which the PSROs may focus review in order most effectively and efficiently to fulfill their purpose of assuring quality. Problem areas may then be more intensively reviewed by concurrent review mechanisms or MCE studies. Profile analysis also promotes efficiency on a wider scale when PSROs use comparative data in carrying out their responsibilities of assuring appropriate review activities in delegated hospitals. In evaluation of the data from multiple PSROs, ultimately the effects of the entire review system may be analyzed. Thus profile analysis will serve to continuously define problem areas, document quality care, and serve as an overall monitoring system of PSRO review.

VII. ALTERNATIVE PLANS

The Secretary actively encourages PSROs to submit review plans which propose innovative approaches to meet the objectives of concurrent review. Such proposals will be accepted by the Secretary, if they are consistent with the provisions of Title XI, Part B of the Act and if they have been shown to be or have the potential to be equally or more efficient and effective than the concurrent review procedures described in this regulation. If the Secretary approves alternate methods of review, the PSRO directly, or a hospital performing review for the PSRO, may utilize such procedures in lieu of concurrent review. Procedures with potential, but not of proven effectiveness, will be approved in the early stages of the program by the Secretary for implementation in only a limited number of PSRO areas. Those which demonstrate effectiveness can later be more broadly implemented across the PSRO program. Profile analysis must be a part of each PSRO's review system under section 1155(a)(4) of the Social Security Act. MCE studies, because they represent a mechanism to provide an in-depth analysis of the quality and utilization of services and because there is a broad range of acceptable methods for their conduct, must also be included in each PSRO's review system.

VIII. OBJECTIVES AND IMPACT

PSROs are empowered to review the care provided to Medicare, Medicaid, and Title V patients and to determine if (1) the care provided is medically necessary, (2) the quality of care meets professionally accepted standards and (3) the care is to be or was provided in the most economical setting consistent with the health care needs of the patient. Experience from similar past efforts indicated that, at least for the first year or two, PSROs will decrease the number and possibly the length of hospital admissions. This should result in cost savings which may or may not be separately identifiable as they are mixed with the multitude of other factors which influence the level of health expenditures.

After this initial impact, the net effect of PSRO review on expenditures is less predictable. This is particularly true when it is realized that the emphasis of PSRO review will probably change with time. Currently PSROs focus considerable attention to the necessity for hospitalization, but emphasis may gradually shift as review and analysis identify new needs and problem areas.

Medical care evaluation studies, by their general educational effects as well as specific recommendations, are likely to lead to improvement in the quality of care, but effects on expenditures are less predictable.

Therefore, PSROs and all other health care review mechanisms with which we are familiar, have limited, albeit important, responsibilities and effects. In fulfilling these responsibilities, health professionals will broadly assess the quality of care provided by their peers. They will specifically assess the medical necessity of care, the degree to which the health care process and its outcomes comply with local standards, and the appropriateness of the setting. Thus, PSRO review will directly address the quality of patient care. The impact such review will have on health care expenditures is unpredictable but the overall effect of PSROs, under the proposed procedures, is expected to improve the utilization, cost and quality of health care provided under Medicare and Medicaid.

The new regulations policies of the Department issued July 25, 1976, require that this Notice of Proposed Rulemaking (NPRM) have an implementation plan prepared prior to its issuance. In compliance with these requirements, an implementation plan was forwarded to the Secretary, and he has authorized the issuance of this NPRM without the use of a Notice of Intent (NOI) which would otherwise be required by the new policies because:

1. There is an urgent requirement for these regulations.

2. Over an extended period of time there has been significant interaction between the Department and organizations and individuals in the development of this NPRM which has satisfied the spirit and intent of the NOI. Specifications for this NPRM were reviewed by the National Professional Standards Review Council at public meetings and available for public comment at least twice. Draft transmittals presenting policies incorporated in this NPRM have been presented to the National Council, and circulated to all planning and conditional PSROs, and PSRO Support Centers and professional organizations, as well as other organizations that routinely receive PSRO information. In addition, requests by outside organizations for information contained in this NPRM have been fulfilled.

Interested persons are invited to submit written comments, suggestions or objections concerning the proposed regulations to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16A55, 5600 Fishers Lane, Rockville, Maryland 20857, on or before March 28, 1977. All comments received in timely response to this Notice will be considered and will be available for public inspection in the above named office during regular business hours.

It is proposed to make this regulation effective upon republication in the FEDERAL REGISTER.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 22, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

PART 101—PROFESSIONAL STANDARDS REVIEW

It is proposed to issue a new Subpart G of Part 101 of Title 42 as set out below.

Subpart G—Hospital Review

Sec.
101.701 Applicability.
101.702 Definitions.
101.703 Concurrent review.
101.704 Preadmission review.
101.705 Modifications of review activities.
101.706 Physician certification.
101.707 Notice of adverse initial determinations.
101.708 Informing discharge planners.
101.709 Alternate review methods.
101.710 Medical care evaluation studies.
101.711 Profile analysis.
101.712 Involvement of nonphysician health care practitioners.
101.713 Reviewer qualifications.
101.714 Examination of the operation and records of hospitals.
101.715 Refusal of hospital to allow PSRO entry and performance of review.
101.716 Reports to the Secretary.

AUTHORITY: (Sec. 1155 and 1156 of the Social Security Act, sec. 249F(b) of Pub. L. 92-603, 86 Stat. 1433-143 (42 U.S.C. 1320c-4 and 1320c-5), sec. 1102 of the Social Security Act, 49 Stat. 647, as amended (42 U.S.C. 1302).)

Subpart G—Hospital Review

§ 101.701 Applicability.

The provisions of this Subpart are applicable to the exercise by PSROs of their duties and functions under sections 1155 and 1156 of the Social Security Act (42 U.S.C. 1320-c4 and 1320-c5). Unless otherwise indicated, the provisions of this Subpart relating to duties and functions of PSROs shall also apply to hospital review committees performing delegated PSRO review functions pursuant to Subpart H of this Part and section 1155(e) of the Act.

Section 1155(a)(1) of the Social Security Act (42 U.S.C.-c4), which states the general review responsibility of PSROs, provides that notwithstanding any other provisions of law, but consistent with the provisions of Part B of Title XI of the Social Security Act, it shall be the duty and function of each PSRO to assume for its geographic area, at the earliest date practicable, responsibility for the review of the professional activities in such area of physicians and other health care practitioners and institutional and noninstitutional providers of health care services in the provision of health care services and items for which payment may be made (in whole or in part) under the Social Security Act for the purpose of determining whether:

(a) such services and items are or were medically necessary;

(b) the quality of such services meets professionally recognized standards of health care; and

(c) in case such services and items are or were proposed to be provided in a hospital on an inpatient basis, such services and items could, consistent with the provision of appropriate meidcal care, be effectively provided on an outpatient basis or more economically in an inpatient health care facility of a different type.

§ 101.702 Definitions.

As used in this Subpart: (a) "Act" means the Social Security Act, as amended (42 U.S.C. Chap. 7).

(b) "Active staff privileges in a hospital" means that a physician or nonphysician health care practitioner is authorized on a regular, rather than infrequent or courtesy, basis: (1) to order the admission of patients to a hospital; (2) to perform diagnostic services in a hospital; or (3) to care for and treat patients in a hospital.

(c) "Admission review" means a review and an initial determination by a PSRO of the medical necessity and appropriateness of the patient's admission to a hospital level of care.

(d) "Assigned length-of-stay" means the number of days from admission at which the determination of the medical necessity of continued hospital stay would ordinarily be made by the PSRO.

(e) "Certified length-of-stay" means a period of time which a PSRO approves as a medically necessary and appropriate period for a patient to receive inpatient care in a hospital.

(f) "Concurrent review" means admission review and continued stay review.

(g) "Continued stay review" means a review and an initial determination by a PSRO, during a patient's hospitalization, of the medical necessity and appropriateness of continuation of the patient's stay at a hospital level of care.

(h) "Criteria" means predetermined elements of health care, developed by health professionals relying on professional expertise, prior experience and the professional literature, with which aspects of the quality, medical necessity, and appropriateness of a health care service may be compared.

(i) "Elective," when applied to a health care service, means a service that can be delayed without substantial risk to the patient and is not necessary immediately to prevent imminent death or serious impairment of the health of the individual.

(j) "Health care service" means an inpatient service or item for which payment may be made (in whole or in part) under the Act.

(k) "Hospital" means a health care institution or distinct part of a health care institution providing health care services in the PSRO area, as defined in section 1861(e)-(g) of the Act, except that the institution shall not be a Christian Science sanatorium operated, or listed and certified by the First Church of Christ, Scientist, Boston, Massachusetts.

(l) "Initial determination" means a review determination by a PSRO, or by a hospital review committee acting as a delegate of the PSRO under section 1155(e) of the Act, regarding the medical necessity or quality of health care services provided to a patient or the appropriateness of the level of care at which the services are delivered.

(m) "Length-of-stay projection" means a criterion which defines the expected point in time at which patients of similar age and diagnosis or condition would be expected to be ready for discharge. This projection is established by the PSRO based upon an analysis of regional norms and, where available, PSRO area norms for lengths-of-stay.

(n) "Major clinical area" means medicine, surgery, pediatrics, obstetrics and gynecology, or psychiatry.

(o) "Major diagnostic or therapeutic procedure" means a procedure which involves a surgical or anesthetic risk or requires highly trained personnel or requires highly trained personnel or special facilities or equipment.

(p) "Medical care evaluation study" means a process, usually performed retrospectively, in which an in-depth assessment of the quality and/or the nature of the utilization of health care services is conducted, corrective action is taken, where indicated, and a subsequent analysis is made of the impact of the corrective action.

(q) "Nonphysician health care practitioners" means those health professionals who do not hold a Doctor of Medicine or Doctor of Osteopathy degree, meet all applicable State or Federal requirements for practice of their profession, and are actively involved in the delivery of direct patient care or health care services.

(r) "Norms" mean numerical or statistical measures of usual observed performance of health care services.

(s) "Physician" means a doctor of medicine or osteopathy or another individual who is authorized under State or Federal law to practice medicine and surgery, or osteopathy.

(t) "Preadmission review" means a review and an initial determination by a PSRO, prior to a patient's admission to a hospital, of the medical necessity and appropriateness of the patient's elective admission to a hospital level of care.

(u) "Profile" means aggregated data in formats which display patterns of health care services over a defined period of time.

(v) "Profile analysis" means review and analysis of profiles to identify and consider patterns of health care services.

(w) "PSRO" means a Professional Standards Review Organization which is conditionally or unconditionally designated.

(x) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(y) "Standards" mean professionally developed expressions of the range of acceptable variation from a norm or criterion.

(z) "Working day" means any one of at least five days of each week (excluding, at the option of each PSRO, legal holidays), in which the necessary personnel are available to perform review in the hospital.

§ 101.703 Concurrent review.

(a) *Admission review.* (1) *Requirement for Review:* (i) Until the PSRO is able to modify its review activities in accordance with § 101.705, each PSRO shall assess the medical necessity and appropriateness of each admission to a hospital of a patient entitled to benefits under the Act. Such assessment shall be accomplished as prescribed in subparagraph (a)(1)(ii) below or as specified in § 104.704.

(ii) The assessment shall consist of screening review and, where necessary, peer review. Screening review shall be conducted by an appropriately trained nonphysician representative of the PSRO or by a physician or an appropriate nonphysician health care practitioner representative of the PSRO using PSRO criteria and standards developed pursuant to Subpart I of this Part to screen cases in order to select those cases requiring peer review.

(iii) Where as a result of the assessment the PSRO determines that such services are medically necessary and appropriately provided at a hospital level of care it shall so certify the admission.

(iv) Where as a result of peer review the PSRO determines that such services are not medically necessary or not appropriately provided at a hospital level of care it shall render and provide notice of an adverse initial determination regarding the patient's admission. Notice of such adverse initial determination shall be provided as prescribed in § 101.707.

(v) In the case of Medicare beneficiaries, PSRO determinations regarding the appropriateness of a particular level of care shall be made in accordance with the level of care definitions in sections 1814 and 1861 of the Act, 20 CFR 405.-116, 405.126-405.128 as amended, and related guidelines of the Secretary.

(vi) Admission review shall be completed within three working days of the admission, including certification as described in (a)(1)(iii) or the provision of adverse notice as described in (a)(1)(iv).

(vii) Where the purpose of admission is for the performance of elective sur-

gery or other elective major diagnostic or therapeutic procedure, review to determine the medical necessity of the surgery or other such procedure shall be completed within three working days of the admission. Where documentation is developed by the PSRO that indicates medically unnecessary or inappropriate utilization of a procedure, review of the medical necessity of that procedure must be completed prior to the procedure. Where a PSRO has a reasonable belief that a procedure is inappropriately utilized, review shall be completed prior to the procedure.

(2) *Initial assigned length-of-stay:* When an admission is certified in accordance with subparagraph (1) of this paragraph, the PSRO shall assign an initial length-of-stay using: (i) Relevant length-of-stay projections developed by the PSRO pursuant to Subpart I of this Part, for groups of patients with the same condition (and modified, as necessary, to reflect the clinical situation of the individual patient who is the subject of the admission review) to indicate the expected point in time that the patient will no longer require a hospital level of care, or;

(ii) Length-of-stay norms, where appropriate, for diagnoses or conditions for which the PSRO has not yet developed length-of-stay projections. In such cases, the initial assigned length-of-stay shall usually be based on the 50th percentile of lengths-of-stay for patients of a similar age and condition. The PSRO may use its own length-of-stay norms if this is justified in accord with § 101.907 of this Part after analysis of corresponding regional norms, or;

(iii) In cases where the diagnosis is unclear at the time of admission, or where length-of-stay projections and norms are unavailable, a reasonable length-of-stay assigned in accordance with the nature of the patient's medical problem and the projected time when the patient's condition will be more fully clarified, or;

(iv) In the case of a PSRO conducting concurrent quality assurance, the expected point in time that a critical procedure or outcome may be expected to occur, as determined by the PSRO.

(3) *Attending physician opportunity to discuss:* If the PSRO has reason to believe that an admission will not be certified it shall promptly notify the patient's attending physician or nonphysician health care practitioner attending the patient and afford him an opportunity, within the period prescribed in subparagraph (a)(1)(vi) of this section, to discuss the matter with the PSRO and explain the nature of the patient's needs for hospital services including all factors which, in his opinion, preclude treatment of the patient as an outpatient or at an alternative inpatient level of care.

(b) *Continued stay review.* (1) *Requirement for review:* (i) Where a patient whose admission has been certified by the PSRO remains in the hospital, the PSRO shall, except as specified in § 101.705, assess the medical necessity and appropriateness for continued hospitalization of such patient. The assessment, consisting of screening review and, where necessary, peer review shall be initiated prior to the last day assigned under the initial assigned length-of-stay and completed by the expiration of the initial assigned length-of-stay period. Screening review shall be conducted by an appropriately trained nonphysician representative or by a physician or an appropriate nonphysician health care practitioner representative of the PSRO using PSRO criteria and standards developed pursuant to Subpart I of this Part to screen cases in order to select those cases requiring peer review.

(ii) Where the PSRO determines that such services are medically necessary and appropriately provided at a hospital level of care, it shall assign a continued length-of-stay by the end of the previously assigned length-of-stay period.

(iii) Where the PSRO determines that such services are not medically necessary or not appropriately provided at a hospital level of care, it shall render and provide notice of an adverse initial determination regarding the patient's continued stay by the last day of the initial assigned length-of-stay period. Notice of such adverse initial determination shall be provided as prescribed in § 101.707.

(iv) In the case of Medicare beneficiaries, PSRO determinations regarding the appropriateness of a particular level of care shall be made in accordance with the level of care definitions in sections 1814 and 1861 of the Act, 20 CFR 405.116, 405.126–405.128 as amended, and pertinent guidelines of the Secretary.

(2) *Duration of continued length-of-stay.* Where the PSRO has determined that a continued length-of-stay shall be assigned, the PSRO shall determine the duration of the continued length-of-stay based upon the expected point in time that the individual patient will no longer require a hospital level of care.

(3) Attending physician opportunity to discuss. If the PSRO has reason to believe that it will not assign a continued length-of-stay, it shall so notify the patient's attending physician or nonphysician health care practitioner attending the patient in accordance with the procedures specified in subparagraph (a)(3) of this section and within the period prescribed in subparagraph (b)(1)(i) of this section.

(4) *Additional continued stay review.* Before the expiration of the continued length-of-stay, each case shall be reviewed again in the manner prescribed in subparagraphs (b)(1) through (b)(3) above, with such reviews being repeated as long as the continued stay is further certified by the PSRO.

(c) *Approval of services incident to hospitalization.* PSRO certification of a patient's admission or continued stay shall (in the absence of specific PSRO review and disapproval of a particular health care service rendered, or proposed to be rendered, during the length of stay certified for such patient) constitute approval of all health care services rendered, or proposed to be rendered, during such certified length of stay. Except as provided under sections 1158 and 1159 of the Act (and in the absence of specific PSRO review and approval of a particular health care service rendered, or proposed to be rendered, during the patient's hospital stay), a PSRO adverse determination of a patient's admission or continued stay shall constitute disapproval of all health care services rendered, or proposed to be rendered, during such patient's hospital stay. Nothing in this section shall be construed as precluding a Medicare fiscal agent or Medicaid State agency, in the proper exercise of its duties and functions, from reviewing claims for benefits under Titles XVIII and XIX of the Act or from determining whether they meet the pertinent coverage requirements established under Titles XVIII and XIX and of the implementing regulations for which such agent or agency has responsibility. In addition, nothing in this section shall be construed as precluding a Medicare fiscal agent or Medicaid State agency from requesting of the PSRO a retrospective determination regarding the medical necessity and appropriateness of specific health care services in the application of coverage requirements and regulations.

(d) *Review in case of delayed identification of eligibility.* In cases of patients whose eligibility for benefits is identified at some point after admission, review of the medical necessity for admission and continued stay shall be conducted as soon as practicable after identification.

§ 101.704 Preadmission review.

(a) *Routine preadmission review.* (1) Each PSRO is authorized to assess the medical necessity and appropriateness, prior to admission, of any health care service which is to be provided to a patient on an elective basis in the hospital. Such assessment shall consist of screening review and, where necessary, peer review. Screening review shall be conducted by an appropriately trained nonphysician representative of the PSRO or by a physician or an appropriate nonphysician health care practitioned representative of the PSRO using PSRO criteria and standards developed pursuant to Subpart I of this Part to screen cases in order to select those cases requiring peer review.

(2) In the case of Medicare beneficiaries, PSRO determinations regarding the appropriateness of a particular level of care shall be made in accordance with the level of care definitions in sections 1814 and 1861 of the Act, 20 CFR 405.116, 405.126–405.128 as amended, and related guidelines of the Secretary.

(b) *Voluntary preadmission review.* Any attending physician proposing to provide to a patient health care services which are subject to the review of the PSRO may, if such services are to be provided on an elective basis, request that the PSRO perform preadmission review in accordance with paragraph (a) of this section. The PSRO shall comply with such request whenever it is feasible.

(c) *Publication.* Prior to exercise of the authority provided under paragraph

(a) of this section, the PSRO shall publish a list of the types and kinds of health care services, by type of diagnosis or problem, or in terms of other relevant information relating to the provision of health care services, which will be subject to preadmission review on a routine basis. Such list shall be revised by the PSRO from time to time as appropriate. A copy of such list, and any subsequent revisions thereof, shall be published in a medical publication of general circulation in the area, and copies provided to the chief of each hospital medical staff for distribution within the hospital. A current copy of such list shall be available for inspection in the PSRO office during regular business hours.

(d) *Additional review procedures.* (1) Where a PSRO determines to certify an admission pursuant to this section, it shall follow those appropriate procedures prescribed for length-of-stay assignment under § 101.703(a)(2), for continued stay review under § 101.703(b) and for approval of services incident to hospitalization under § 101.703(c).

(2) Where a PSRO has reason to believe that the admission will not be certified, it shall follow the discussion procedures specified in § 101.703(a)(3).

(e) *Adverse initial determinations.* Where the PSRO determines that such services are not medically necessary or not appropriately provided at a hospital level of care, it shall promptly render and provide notice of an adverse initial determination. Notice of such adverse initial determination shall be provided as prescribed in § 101.707.

§ 101.705 Modifications of review activities.

(a) Each PSRO, when it has developed the review capability and data base necessary to do so, shall modify the review activities prescribed in § 101.703 and § 101.704 in order to concentrate review efforts in areas where improvement in health care services is needed. Where appropriate, such review activities shall be modified to provide for:

(1) the identification of diagnoses, conditions, elective surgical and other major elective diagnostic and therapeutic procedures, and major clinical areas which shall be automatically certified for admission to the hospital level of care. In such cases a length-of-stay shall be assigned as provided for in § 101.703(a)(2) and continued stay review performed as prescribed in § 101.703(b). The PSRO shall use normative data and prior experience in review, such as concurrent review, the results of medical care evaluation studies or profile analysis, in order to select:

(i) diagnoses and conditions where data are available to demonstrate that the criteria for the presence of the diagnosis or condition are always met;

(ii) elective surgical and other procedures where data is available to demonstrate that such procedures are consistently medically necessary and are performed on a consistently appropriate basis in a particular hospital; and

(iii) major clinical areas where data is available to demonstrate that admissions in such areas are consistently medically necessary and appropriate in a particular hospital.

(2) the identification of diagnoses, conditions, elective surgical and other major elective diagnostic and therapeutic procedures, and major clinical areas of a hospital which shall not be subject to concurrent review and for which the entire hospitalization shall be automatically certified. Such identification shall be based on:

(i) data which demonstrate that admissions and continued stays associated with such diagnoses, conditions, and major clinical areas are consistently medically necessary and appropriate at the hospital level of care; and

(ii) data which demonstrate that elective surgical or other elective procedures are appropriately performed on a consistent basis in a particular hospital, and consistently account for medically necessary and appropriate continued stays following such procedures.

(b) The PSRO shall, through the performance of medical care evaluation studies performed pursuant to §101.710 and profile analysis performed pursuant to § 101.711, assure that admissions and hospitalizations automatically certified as prescribed in paragraph (a) above continue to represent consistently appropriate utilization of health care services provided in hospitals.

(c) Hospitals performing review for the PSRO pursuant to Subpart H of this Part shall modify their review activities as prescribed in paragraphs (a) and (b) above, but only when approved by the PSRO.

§ 101.706 Physician certification.

(a) Each PSRO shall specify the points in time when the attending physician or nonphysician health care practitioner attending the patient will certify the medical necessity for the patient's continued stay in the hospital. The first such certification shall usually be no later than the 50th percentile of lengths-of-stay norms for patients in similar age groups with similar diagnoses. Subsequent certification dates should be established by the PSRO at intervals appropriate to allow the PSRO to evaluate the patient's need for further health care at the hospital level.

(b) Each PSRO shall specify the information which it requires to be included in the medical record, including progress notes and orders, in order to enable the PSRO to evaluate the patient's need for further health care at the hospital level. If a PSRO so specifies, signed and dated continuing progress notes and orders by the attending physician or nonphysician health care practitioner attending the patient which justify the medical necessity for further health care in the hospital (including inpatient diagnostic study and therapeutic services) will suffice to satisfy the physician certification requirement. Alternatively, the PSRO may require a form of physician certification separate from the medical record.

(c) Each PSRO shall develop a mechanism for informing all physicians and nonphysician health care practitioners accorded active staff privileges in hospitals and engaged in professional activities in the PSRO area of the applicable physician certification requirements and shall be responsible for assuring that the certification requirements are being followed. Each PSRO shall also inform all such physician and appropriate nonphysician practitioners of their obligation not to provide unnecessary health care services and of the sanctions under section 1160 of the Social Security Act. Each PSRO shall maintain, at its principal business office, a copy of its physician certification requirements and its procedures for informing physicians and appropriate nonphysician practitioners of their requirements. Each PSRO shall forward its physician certification requirements to the Secretary within 90 days from the effective date of these regulations.

§ 101.707 Notice of adverse initial determinations.

(a) A notice of an adverse initial determination under § 101.703(a)(1), § 101-703(b)(1), § 101.703(c), or § 101.704(e), shall:

(1) Be provided to the patient (and, where appropriate, the patient's next of kin or sponsor), the attending physician, or nonphysician health care practitioner attending the patient, and the authorized representative of the hospital;

(2) Be delivered to each such person in the hospital if the person to be notified is in the hospital where the services are being, or proposed to be, provided, or mailed if the person to be notified is not in such hospital; and

(3) Be provided in writing, although oral notice may suffice if confirmed in writing within two days of delivering the oral notice; and

(4) Contain the following information:

(i) The reason for the determination.

(ii) The date after which the patient's stay in the hospital will not be approved as being medically necessary or appropriate at an in-patient hospital level of care;

(iii) A statement informing the parties and their representatives of their rights to:

(A) A reconsideration of the determination in accord with applicable regulations of this Part if they are dissatisfied with the determination, even if the patient leaves the hospital prior to filing a request for reconsideration or prior to its completion; and

(B) Submit additional documentary information and to make an oral presentation at the reconsideration;

(iv) The various locations for filing a reconsideration request and the applicable time period within which such a request must be filed, as prescribed under applicable regulations of this Part and guidelines published by the Secretary; and

(v) A brief jurisdictional statement concerning the authority of the PSRO and its responsibility for review under the Act.

(b) Notice of an adverse initial determination under § 101.703(a)(1), § 101.703(b)(1), § 101.703(c), or § 101.704(e), shall be provided promptly to: the Medicaid State agency or its designee, in the case of a Medicaid patient; the Medicare intermediary, in the case of a Medicare patient; or the affected State Title V agency, in the case of a Title V patient.

(c) Notice of an adverse initial determination shall be given to the patient (and, where appropriate, the patient's next of kin or sponsor), the attending physician or nonphysician health care practitioner attending the patient, and the authorized representative of the hospital according to the time frame specified below:

(1) Within 3 working days of the admission, under § 101.703(a)(1), or

(2) Prior to the procedure in the case of pre-procedure review under § 101.703(a)(1)(vi), or

(3) By the last day of the approved length-of-stay period under § 101.703(b)(1), or

(4) Prior to the admission under § 101.704.

(d) In the case of a Title V claim, the notice under paragraph (a) above shall explain that the PSRO determination is not conclusive for payment purposes under section 1158 of the Act, and that Title V recipients and providers have no right to reconsideration of such a PSRO determination under section 1159 of the Act.

§ 101.708 Informing discharge planners.

Where a PSRO becomes aware, in the course of review, that a patient or patients may require extended post-hospital care or institutional placement, the PSRO shall promptly inform the attending physician or nonphysician health care practitioner attending the patient and those in the hospital responsible for assisting the attending physician in discharge planning.

§ 101.709 Alternate review methods.

(a) Alternate methods for conducting the requirements set forth in § 101.703 through § 101.705, may be utilized by PSROs if a written plan explaining such methods is approved by the Secretary. The Secretary may approve such alternate review methods which he determines to be consistent with all provisions of Title XI, Part B, of the Act, and which have been shown to be or have the potential to be equal or more efficient and effective than those provided under § 101.703 through § 101.705 of these regulations. Alternate review methods determined by the Secretary to have such potential will be approved by the Secretary for implementation by only a limited number of PSROs. When the efficiency and effectiveness of an alternate method have been demonstrated to the satisfaction of the Secretary, he may approve its use in other PSRO areas.

(b) Alternate review methods proposed by a PSRO to be utilized for its entire area, or portions of its area, or to be utilized by hospitals conducting review for the PSRO pursuant to Subpart H, shall be submitted as a written plan to the Secretary. The written plan shall specify objectives of the alternate approach to concurrent and preadmission review which are consistent with § 101.701 (a), (b) and (c), and shall describe in detail the methods to be used, including the use of norms, criteria and standards; the applicability of the plan to the PSRO area; and the PSRO's plan to utilize hospital review committees, where appropriate, to conduct review for the PSRO pursuant to Subpart H of this Part.

§ 101.710 Medical care evaluation studies.

(a) *Purpose of medical care evaluation studies.* Each PSRO shall perform medical care evaluation studies for the purpose of: (1) Assuring that health care services are appropriate to the patients' needs and are of appropriate quality;

(2) Assuring that health care organization and administration of hospitals support the timely provision of quality care;

(3) Focusing on patterns of service which may require modification in review efforts as described in § 101.703 through § 101.705;

(4) Identifying changes necessary to improve the quality of care and the effectiveness and efficiency of the utilization of services.

(b) *Requirements.* Each PSRO shall be responsible for performing, at a minimum, the following number of medical care evaluation studies in each hospital in its area: (1) In each hospital with less than 2,500 total admissions per year, the PSRO shall perform four medical care evaluation studies per year.

(2) In each hospital with 2,500 to 4,999 total admissions per year, the PSRO shall perform six medical care evaluation studies per year.

(3) In each hospital with 5,000 to 9,999 total admissions per year, the PSRO shall perform eight medical care evaluation studies per year.

(4) In each hospital with 10,000 to 19,999 total admissions per year, the PSRO shall perform ten medical care evaluation studies per year.

(5) In each hospital with 20,000 and over total admissions per year, the PSRO shall perform twelve medical care evaluation studies per year.

For purposes of this section, a year means a calendar year. For purposes of this section, performance of a medical care evaluation study shall include completion of the study through the initiation of corrective action as described in subparagraph (c)(6) of this section. The PSRO shall be responsible for assuring that, for each year, medical care evaluation studies performed shall include study of the care of patients in all major clinical areas in the PSRO area. Medical care evaluation studies which involve more than one hospital shall be counted towards the number of studies required under this section for each such hospital involved in such study.

(c) *Nature of studies.* Each medical care evaluation study shall: (1) focus upon a known or suspected problem area in organization, delivery or outcome of hospital care;

(2) to be carried out in accord with objectives explicitly stated in, and specifically developed for, the study;

(3) utilize criteria and standards as described in paragraph (d) of this section;

(4) where appropriate, include the use of a sample of patients (including patient records) selected from all patients in the hospital. Such sample may include patients other than those covered under Titles XVIII, XIX and V where such access to use of their records is authorized by the hospital;

(5) result in written recommendations, where indicated, to institutions or organizations which provide continuing professional education activities, or to appropriate individuals and organizations responsible for effecting change in the organization and administration of health care delivery in order to improve the quality of care and promote more effective and efficient utilization of facilities and services;

(6) include a plan for follow-up evaluation by the PSRO where indicated, to determine what changes have occurred as a result of action taken pursuant to subparagraph (c)(5) above; and

(7) include such a follow-up evaluation where indicated. The follow-up evaluation shall be done in a reasonable time, but usually no later than one year following the performance of the initial study. The follow-up evaluation shall be limited to relevant key indicators of performance and shall not be counted as a new medical care evaluation study for purposes of fulfilling the requirements in paragraph (b) of this section.

(d) *Use of criteria and standards.* Criteria and standards shall be adopted by the PSRO in accordance with Subpart I of this Part, which relate to the specific objectives of the medical care evaluation study. The criteria and standards shall be used to define the information necessary to identify the degree of conformance between actual performance and that specified in the criteria. A PSRO which identifies a pattern of performance which does not conform to applicable criteria shall subject those services involved in the pattern to further analysis: The identification of such a pattern shall not necessarily constitute a finding by the PSRO that such services were not medically necessary, not of appropriate quality, or not provided at the appropriate level of care.

(e) *Reports to hospitals.* Each PSRO shall provide the written results, including an analysis of such results, of each medical care evaluation study which is pertinent to the operation of a particular hospital to appropriate members of the hospital medical staff, the chief administrative official of the hospital, and the Chairman of the Board of Trustees (or other governing body) of such hospital, in conformity with procedures for confidentiality as specified in applicable regulations of this Part.

§ 101.711 Profile Analysis.

(a) *Types of profiles.* (1) Each PSRO shall be responsible for the periodic development and analysis, in conformity with procedures or confidentiality as specified in applicable regulations of this Part, of profiles of: (i) Health care services for which payment may be made under the Act provided to patients in hospitals in the PSRO area;

(ii) each health care practitioner providing health care services for which payment may be made under the Act in hospitals in the PSRO area; and

(iii) each hospital in the PSRO area providing health care services for which payment may be made under the Act.

(2) Profiles shall be developed using, at a minimum, appropriate data elements collected by the PSRO, which is required to compile PSRO Federal reports and to complete the PSRO Uniform Hospital Discharge Data Set for each patient reviewed.

(b) *Process of profile analysis.* Depending upon the nature of the profile to be analyzed, the process of analysis shall include: (1) Comparison of patterns of care by similar providers (institutions or practitioners);

(2) Comparison of current patterns with those from a previous time period; and

(3) Identification of exceptional patterns using preestablished norms, criteria and standards as points of reference.

(c) *Purposes of analyses.* The profiles shall be analyzed by the PSRO for the purposes of: (1) Focusing on patterns of service which may require modifications in review efforts as described in § 101.703 through § 101.705;

(2) Identifying possible subjects for medical care evaluation studies;

(3) Self-evaluation of the overall performance of the PSRO;

(4) Evaluation of the comparative performance of providers (institutions or practitioners) in the PSRO area;

(5) Monitoring of review activities delegated to hospitals pursuant to Subpart H of this Part; and

(6) Determining whether the care and services ordered or rendered were consistent with the purposes specified in paragraphs (a), (b), and (c) of § 101.701 and the criteria and standards developed under Subpart I of this Part.

(d) *Provision of profiles to hospitals.* Each PSRO shall provide the profiles which are pertinent to the operations of a particular hospital to appropriate members of the hospital medical staff, the chief administrative official of the hospital and the Chairman of the Board of Trustees (or other governing body) of such hospital.

§ 101.712 Involvement of nonphysician health care practitioners.

(a) Each PSRO shall make arrangements to utilize, to the extent necessary and appropriate for the proper performance of its duties and functions, the services of nonphysican health care practitioners in the various areas of health care (including dentistry), which persons shall, to the maximum extent practicable, be individuals engaged in practice within the PSRO area.

(b) Such arrangements shall provide that: (1) Nonphysician health care practitioners are involved in developing the PSRO criteria and standards, selecting norms to be used, developing review mechanisms for the review of care provided by such practitioners, and in the review of such care.

(2) Nonphysician health care practitioners will work with, and make written recommendations, where indicated, to institutions or organizations which provide continuing professional education or to appropriate individuals and organizations responsible for effecting change in the organization and administration of health care delivery in order to assure that review findings of the nonphysician health care practitioners performing PSRO review assist in improving the quality of care and promoting more effective and efficient utilization of health care facilities and services.

§ 101.713 Reviewer qualifications.

(a) *Staff privileges.* (1) Each physician or nonphysician health care practitioner assigned responsibility for making initial or reconsidered determinations concerning health care services provided in a hospital shall have active staff privileges in at least one of the participating hospitals in the PSRO area.

(2) Physicians and nonphysician health care practitioners who do not have active staff privileges in at least one of the participating hospitals in the PSRO area may participate in medical care evaluation studies, criteria development, profile analysis, concurrent review and preadmission review for hospitals in the PSRO area provided that such physicians and nonphysician health care practitioners shall not make initial or reconsidered determinations.

(3) A physician or nonphysician health care practitioner who has active staff privileges in a hospital in the PSRO area shall not have responsibility for making initial or reconsidered determinations concerning health care services provided in the hospitals in which he has staff privileges unless: (i) The hospital in which the physician or nonphysician health care practitioner has staff privileges is operating under a delegation pursuant to section 1155(e)(1) of the Act and Subpart H of this Part, or

(ii) The PSRO finds that such physicians or nonphysician health care practitioners are needed to perform PSRO review because of a lack of alternate physician or appropriate nonphysician health care practitioner reviewers available to perform review in such hospital, and such finding is approved by the Secretary after the PSRO has notified the Secretary of its intention to use such physicians or appropriate nonphysician health care practitioners, and provided its justification therefor.

(b) *Review of services provided directly or in which reviewer was involved.* A physician or nonphysician health care practitioner shall not be permitted to participate in the review of health care services which he provided directly or in the provision of which he was directly or indirectly involved. For purposes of this paragraph, a physician or nonphysician health care practitioner who was directly or indirectly involved shall be any physician who has issued treatment orders or provided consultation regarding the services under review or any nonphysician health care practitioner involved in the formulation or execution of the patient's treatment plan.

(c) *Financial interest.* A physician or nonphysician health care practitioner shall not be permitted to participate in the review of health care services provided in or by a hospital, if he or any member of his family has, directly or indirectly, a financial interest in such hospital.

(1) For purposes of this paragraph, a physician's or nonphysician health care practitioner's family includes only his spouse (other than a spouse who is legally separated from him under a decree of divorce or separate maintenance), children (including legally adopted children), grandchildren, parents and grandparents.

(2) For purposes of this paragraph, a financial interest means an ownership interest in such hospital and includes:

(i) Sole ownership of such hospital;

(ii) A partnership interest in such hospital;

(iii) Any direct stock ownership or debt interest which is convertible to stock or which is secured by stock in such hospital; or

(iv) A controlling interest in an organization which holds any ownership interest in such hospital.

(3) For purposes of this paragraph, an employment relationship does not, in itself, constitute a financial interest.

(d) *Physician review by peers.* No PSRO shall utilize the services of any individual who is not a licensed doctor of medicine or osteopathy to make final PSRO determinations with respect to the professional conduct of, or any act performed by, any other licensed doctor of medicine or osteopathy in the exercise of his professional conduct.

(e) *Physician participation.* Each PSRO shall to the maximum extent consistent with the effective and timely performance of its duties and functions: (1) Encourage all physicians practicing in the area served by the PSRO to participate as reviewers in the PSRO's review activities;

(2) Provide rotating physician participation in review activities on an extensive and continuing basis;

(3) Assure that participation in review activities has the broadest representation feasible in terms of the various types of physician practice in the area served by the PSRO; and

(4) Utilize, whenever appropriate, medical periodicals and similar publications to publicize the functions and activities of PSROs.

(f) *Nonphysician health care practitioners' review of peers.* Where nonphysicians are involved in review (see § 101.712), the PSRO shall utilize only duly

qualified nonphysician health care practitioners who meet all applicable State or Federal requirements for the practice of their profession to make determinations with respect to the professional conduct of, or any act performed by, any other duly qualified peer nonphysician health care practitioner in the exercise of his profession.

§ 101.714 Examination of the operation and records of hospitals.

(a) Each PSRO is authorized to inspect the operation and records pertinent to the health care services rendered to Title V, XVIII or XIX patients of any hospital in the PSRO area in which such services are provided and may require such hospital to provide copies of such records to the PSRO in order to:

(1) Evaluate unusual cases which pre-admission review, concurrent review, medical care evaluation studies, or profile analysis have shown to deviate significantly from the PSRO norms, criteria and standards; and

(2) Evaluate the capability of a hospital to assume delegated PSRO functions and monitor the performance of a hospital which has assumed delegated PSRO functions, pursuant to Subpart H of this Part.

(b) A PSRO may utilize the records of patients other than those covered under Titles XVIII, XIX and V, where access to their records is authorized by the hospital.

(c) In performing an examination a PSRO shall: (1) Limit the inspection to those operations and records of a hospital which are necessary in order to achieve the purposes of paragraph (a) of this section;

(2) Cooperate with agencies performing similar examination functions under Title V, XVIII or XIX of the Act in order to minimize duplication of effort;

(3) Conduct such examinations during the daytime shift of the hospital; and

(4) Maintain written records of such examination in its principal office, and provide written reports to appropriate members of the medical staff of the hospital, the chief administrative official of the hospital and the Chairman of the Board of Trustees (or other governing body) of the hospital which has been inspected, describing the results of the examination and the follow-up necessary.

§ 101.715 Refusal of hospital to allow PSRO entry and performance of review.

The refusal of a hospital in the PSRO area to allow a PSRO to enter and perform all PSRO duties and functions required under this Subpart in such hospital shall constitute grounds for a PSRO to determine that such hospital has violated the obligations imposed under section 1160(a)(1)(C) of the Act, and for the PSRO to report such matter to the Secretary under section 1157 of the Act.

§ 101.716 Reports to the Secretary.

Each PSRO shall submit reports to the Secretary, at such times and in such form as the Secretary may require pursuant to this Subpart, indicating how it has fulfilled the responsibilities specified under this Subpart.

[42 CFR Part 101]

RELATIONSHIP OF THE PSRO TO HOSPITALS AND UTILIZATION OF HOSPITAL REVIEW COMMITTEES

Subpart H; Notice of Proposed Rulemaking

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart H to Part 101 of Title 42, Code of Federal Regulations.

The purpose of the present proposal is to implement the provisions of section 1155(e) of the Social Security Act (42 U.S.C. 1320c-4(e)). This section requires Professional Standards Review Organizations (PSROs) to utilize the services and accept the findings of hospital review committees when and to the extent and for such time as such committees have demonstrated to the PSRO's satisfaction a capacity to conduct effective and timely review so as to aid the PSRO in fulfilling its review responsibilities. The purpose of the requirement is to build upon existing systems of review. Over the last two decades many hospitals have gained considerable experience and expertise in the review of health care. Rather than dismantling these efforts, the PSRO is to capitalize upon them in building its review system. Also, however, it must be recognized that the PSRO program represents a major shift in the locus of responsibility for conducting health care review. Before PSRO, this responsibility rested with individual hospitals, and Medicare and Medicaid agencies. Under PSRO, the responsibility is given to a community based organization which must establish an effective review system for the institutions in its area. Therefore, the decision of a PSRO to delegate review to a hospital must be based upon both the hospital's capability to conduct effective review and the degree to which delegation aids the PSRO in creating an efficient and effective review system.

The PSRO will use the hospital's review committee(s) in the performance of PSRO preadmission and concurrent review, or medical care evaluation (MCE) studies or both where such review committees are willing and have the capacity to effectively perform these functions. However, where the PSRO delegates the performance of either of these review functions to a hospital, the PSRO still retains responsibility to monitor and assure the effective performance of such functions and because responsibility for effective review continues to reside with the PSRO, it is expected to exercise this delegation authority and monitoring activity carefully.

The delegation process will result in the establishment of a relationship between a hospital and a PSRO which will be different for concurrent review than for medical care evaluation studies. When concurrent review is delegated, all the review will be conducted by the hospital with the PSRO using retrospective data analysis and onsite visits to assure that review is being conducted effectively. For MCE studies, however, the PSRO and the hospital will work closely together on some or all of the studies related to that hospital. Thus, while a delegated hospital will conduct some MCE studies independently, it will also work in cooperation with the PSRO when an area-wide or multi-hospital MCE involves the care provided in that hospital. In the hospital which has not been delegated MCE studies, the PSRO must, nevertheless, work closely with the hospital staff in the design of studies, implementation of corrective actions and conduct of follow-up analyses. In both the delegated and nondelegated situation, the PSRO must help to assure that the results of the study and of any necessary corrective actions are made available to the governing board of the hospital to assist the board in meeting its public responsibility to assure the provision of quality care in its institution. This need for a close relationship between a PSRO and hospital results from the fact that early and continuous involvement by those whose care is being assessed by the medical care evaluation process will allow the results of the studies to have their optimum impact.

The proposed regulation outlines the following steps in the delegation process: (1) PSRO notification to hospitals in the PSRO area of the delegation procedures and the factors the PSRO will use to evaluate the hospital's capability; (2) the hospital's expression of interest in obtaining delegation of review functions; (3) the development of a hospital review plan which meets PSRO requirements; (4) the PSRO determination of the hospital's capability to perform delegated review effectively, based on the review plan and utilizing specific evaluation factors; (5) agreement upon administrative procedures by the PSRO and the hospital; and (6) PSRO monitoring of the performance of delegated review functions and periodic reassessment of the hospital's capability to perform such review effectively. In addition, the proposed regulation provides a process for (1) the Secretary's consideration of disapproval of a delegation or investigation of complaints regarding improper rejection of a hospital's proposal for delegation; and (2) for reconsideration by the PSRO of determinations of capability with which a hospital is dissatisfied.

The proposal indicates that eligibility for delegation will not be limited to utilization review committees organized under Title V, XVII and XIX of the Act, but may include other committees of a hospital.

The proposed regulation applies solely to short stay hospitals and regulations will be issued in the future to deal with review in other operating health care facilities or organizations.

The new regulations policies of the Department issued July 25, 1976, require

that this Notice of Proposed Rulemaking (NPRM) have an implementation plan prepared prior to its issuance. In compliance with these requirements, an implementation plan was forwarded to the Secretary and he has authorized the issuance of this NPRM without the use of a Notice of Intent (NOI) which would otherwise be required by the new policies because:

1. There is an urgent requirement for these regulations.

2. Over an extended period of time there has been significant interaction between the Department and organizations and individuals in the development of this NPRM which has satisfied the spirit and intent of the NOI. Specifications for this NPRM were reviewed by the National Professional Standards Review Council at public meetings and available for public comment at least twice. Draft transmittals presenting policies incorporated in this NPRM have been presented to the National Council, and circulated to all planning and conditional PSROs, PSRO Suport Centers and professional organizations, as well as, other organizations that routinely receive PSRO information. In addition, requests by outside organizations for information contained in this NPRM have been fulfilled.

Interested persons are invited to submit written comments, suggestions or objections concerning the proposed regulations to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16A55, 5600 Fishers Lane, Rockville, Maryland 20857, March 28, 1977. All comments received in timely response to this Notice will be considered and will be available for public inspection in the above named office during regular business hours.

It is proposed to make this regulation effective upon republication in the FEDERAL REGISTER.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 22, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

PART 101—PROFESSIONAL STANDARDS REVIEW

It is therefore proposed to issue a new Subpart H of Part 101 of Title 42 as set out below.

Subpart H—The Relationship of the PSRO to Hospitals and Utilization of Hospital Review Committees

Sec.

101.801 Applicability.
101.802 Definitions.
101.803 General requirements.
101.804 Notification to hospitals.
101.805 Letter of interest.
101.806 Delegation review plan.
101.807 Determination of capability.
101.808 Initiation of PSRO review in nondelegated hospitals.
101.809 Agreement with delegated hospitals.
101.810 PSRO monitoring and reassessment of capability.
101.811 Monitoring by the Secretary and disapproval for good cause.
101.812 Time and place of filing request for reconsideration.
101.813 Reconsideration committee.
101.814 Time of reconsideration and notification to hospital.
101.815 Reconsideration proceedings.
101.816 Reconsidered determination and notification.
101.817 Renewal of interest in performing review after a PSRO determination or reconsideration.
101.818 Complaints to the Secretary.
101.819 Reports to the Secretary.
101.820 Previously approved delegations.

AUTHORITY: Sec. 1155(e) of the Social Security Act, Section 249F(b) of Public Law 92-603, 86 Stat. 1435, [42 U.S.C. 1320c-4(e)]; Section 1102 of the Social Security Act, 49 Stat. 647, as amended [42 U.S.C. 1302].

Subpart H—The Relationship of the PSRO to Hospitals and Utilization of Hospital Review Committees

§ 101.801 Applicability.

The provisions of this Subpart are applicable to the exercise by PSROs of their duties and functions under section 1155(e) of the Act [42 U.S.C. 1320c-4(e)] with regard to utilization of the review committees of hospitals.

§ 101.802 Definitions.

As used in this Subpart:

(a) "Act" means the Social Security Act, as amended (42 U.S.C. Chap. 7).

(b) "Active staff privileges in a hospital" means that a physician or nonphysician health care practitioner is authorized on a regular, rather than infrequent or courtesy basis to (1) order the admission of patients to a hospital; or (2) perform diagnostic services in a hospital; or (3) care for and treat patients in a hospital.

(c) "Concurrent review" means admission review and continued stay review.

(d) "Criteria" means predetermined elements of health care, developed by health professionals relying on professional expertise, prior experience and the professional literature with which aspects of the quality, medical necessity, and appropriateness of a health care service or item may be compared.

(e) "Delegation" means the utilization by the PSRO of the services of a hospital and acceptance of the review findings of the hospital's review committee(s) in accordance with section 1155(e) of the Act.

(f) "Health care service" means an inpatient service or item for which payment may be made (in whole or in part) under the Act.

(g) "Hospital" means a health care institution or distinct part of a health care institution providing health care services in the PSRO area as defined in section 1861(e)-(g) of the Act, except that the institution shall not be a Christian Science sanatorium operated, or listed and certified by the First Church of Christ, Scientist, Boston, Massachusetts.

(h) "Hospital review committee" means a committee established by a hospital to serve as the focus for PSRO review which consists of one or more physicians having active staff privileges in such hospital, with the participation of nonphysician health care practitioners, where appropriate.

(i) "Medical care evaluation study" means a process usually performed retrospectively, in which an in-depth assessment of the quality and/or the nature of the utilization of health care services is conducted, corrective action is taken, where indicated, and a subsequent analysis is made of the impact of the corrective action.

(j) "Nonphysician health care practitioners" means those health professionals who do not hold a Doctor of Medicine or Doctor of Osteopathy degree, meet all applicable State or Federal requirements for practice of their profession, and are actively involved in the delivery of direct patient care or health care services.

(k) "Norms" means numerical or statistical measures of usual observed performance of health care services.

(l) "Physician" means a Doctor of Medicine or Osteopathy or another individual who is authorized under State or Federal law to practice medicine and surgery, or osteopathy.

(m) "Profile" means aggregated data in formats which display patterns of health care services over a defined period of time.

(n) "Profile Analysis" means review of profiles to identify and consider patterns of health care services.

(o) "PSRO" means a Professional Standards Review Organization which is conditionally or unconditionally designated.

(p) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(q) "Standards" mean professionally developed expressions of the range of acceptable variation from a norm or criterion.

§ 101.803 General requirements.

(a) No PSRO may initiate review in a hospital unless it has notified and evaluated the capability of such hospital to obtain delegation in accord with § 101.803 through § 101.807 of this Subpart.

(b) Such PSRO shall delegate to a hospital, when it has determined that such hospital has demonstrated the willingness and capability to conduct effective and efficient review activities so as to aid the PSRO in the performance of its review responsibilities, the performance of:

(1) Preadmission review and concurrent review, or where the Secretary has approved alternative review activities pursuant to § 101.709 of this Part, such alternative review activities, or

(2) Medical care evaluation studies, or

(3) The review activities described in both subparagraphs (1) and (2) above.

(c) Where the PSRO delegates the performance of one or more of the functions, it shall:

(1) Delegate such functions to the hospital rather than to individual departments or divisions within a hospital;

(2) Perform all those functions which are not delegated to the hospital;

(3) In the delegation of concurrent review or preadmission review delegate both admission and continued stay review;

(4) In the case of delegated medical care evaluation studies delegate all activities related to performance of the study as described in Subpart G of this Part;

(5) Review profiles of all area hospitals at least for the purpose of comparative analysis of hospitals; and

(6) Periodically reassess the hospital review committee's continuing capability to perform effective and efficient review (see § 101.810).

(d) The Secretary may disapprove a delegation of review functions for good cause pursuant to § 101.811.

§ 101.804 Notification to hospitals.

Each PSRO shall notify in writing all hospitals in its area in a timely manner of the requirements of section 1155(e)(1) of the Act, the PSRO hospital review requirements which may be delegated, the factors and the process which the PSRO will utilize for evaluating the capability of a hospital review committee to perform review functions (see § 101.807), and the procedure necessary to apply for a delegation of PSRO functions. An example of the notification letter shall be submitted to the Secretary for his approval prior to use.

§ 101.805 Letter of interest.

(a) A hospital which seeks to obtain a delegation of PSRO review functions shall submit a letter of interest to the PSRO signed by an authorized representative of the hospital medical staff and the chief administrative official of the hospital containing, at a minimum, the following information:

(1) The specific functions for which delegation is sought; and

(2) An expression of the hospital's willingness to accept PSRO evaluation and monitoring of its review activities.

(b) A letter of interest may be accompanied by a delegation review plan as specified in § 101.806.

(c) If a hospital does not forward a letter of interest in response to the PSRO's written notification within thirty calendar days following the PSRO notification, the PSRO shall forward a second written notification in a form similar to the original to such hospital. If the hospital does not respond to the second notification within 10 calendar days, or provides written notification to the PSRO that it does not desire to perform PSRO review functions, the PSRO shall notify the hospital that the PSRO will begin to perform review in the hospital in accordance with applicable regulations of this Part and procedures approved by the Secretary. In such cases, administrative procedures developed by the PSRO, with the consultation of the hospital, shall be executed indicating the scope of PSRO activities in the hospital, as specified in § 101.808.

(d) A hospital review committee may forward a letter of interest to the PSRO at any time. A PSRO which receives such letter later than 10 calendar days following the second notification described in paragraph (c) will proceed to make a determination of capability in accord with the procedures set forth in this Subpart, except that it shall render such a determination within six months from the date of receipt of the delegation review plan, unless the time period specified in § 101.817 is applicable.

§ 101.806 Delegation review plan.

A hospital seeking delegation shall develop a plan describing how it will organize its resources and implement PSRO review functions for which it seeks delegation. Such plan shall be consistent with the PSRO's approved formal plan and shall be submitted to the PSRO no later than 30 days from the date the letter of interest was mailed. The delegation review plan shall include:

(a) A description of the manner in which the hospital will organize itself to conduct the delegated review activities and those activities supportive of delegated review;

(b) A description of the proposed operation of the review effort under the direction of the hospital review committee, including:

(1) The number and types of hospital personnel to be used for each type of review;

(2) The methods of providing for selection, training and reimbursement for review personnel;

(3) The methods of involving nonphysician health care practitioners in review functions;

(4) A description of the proposed use of norms, criteria and standards in review;

(5) Methods by which review findings will lead to appropriate continuing education activities and administrative change;

(6) The functions which the hospital review committee expects to be performed by PSRO personnel for those review functions not delegated;

(c) A description of the proposed relationships with Titles V, XVIII and XIX claims payment agencies, including the mechanisms to be used in notifying these agencies of those delegated review determinations that impact on claims payment;

(d) The methods of providing for data collection, data flow and information release to satisfy PSRO profile and reporting requirements, including a description of the current and proposed relationships of the hospital with hospital discharge abstract data processors;

(e) The number of physicians on the hospital's medical staff who are eligible for PSRO membership, as defined in applicable regulations of the Secretary, and the number who actually are members;

(f) Specific information about the hospital's existing review system, if any, including narrative material concerning operating procedures, results, and follow-up;

(g) Information which characterizes the hospital including number of beds; total admissions each year; Title XVIII, Title XIX, and Title V admissions each year; type of ownership; teaching affiliations; and size and specialization of medical staff.

§ 101.807 Determination of capability.

(a) Each PSRO shall, within 90 calendar days from receipt of such delegation review plan, determine the capability of each review committee of a hospital which forwards a letter of interest and a delegation review plan to such PSRO, except as provided in § 101.805 (d) and § 101.817.

(b) Each PSRO, in making such a determination of capability, shall utilize written evaluation factors which shall be submitted to the Secretary prior to use and no such factors shall be utilized by the PSRO unless approved by the Secretary.

(c) The evaluation factors shall measure the capability of the hospital review committee to effectively and efficiently perform review activities, as prescribed in Subpart G of this Part, so as to aid in accomplishing the purposes described in section 1155(a)(1) of the Act, and shall include, at a minimum the following:

(1) The degree to which the review mechanisms and the organization for review that the hospital proposes provide the hospital with the capability to meet the PSRO program objectives specified in § 101.701 of this Part and the PSRO's approved formal plan;

(2) The PSRO determination of the adequacy of the performance of the hospital in Medicare and Medicaid utilization review activities. In making such a determination, the PSRO shall consider information solicited by the PSRO and received from the Medicare State survey agency and the appropriate Medicare intermediaries and the Medicaid State agency concerning the hospital's past performance in Medicare and Medicaid utilization review and information obtained by the PSRO through site visits to such hospitals;

(3) The degree to which the delegation of one or more functions to the hospital assists the PSRO in fulfilling its objective of establishing an effective and efficient areawide review system;

(4) Membership in the PSRO of at least 25 percent of those physicians with active staff privileges in the hospital who are eligible to be PSRO members; and

(5) The capacity to provide the PSRO with the data required by the PSRO for monitoring of the hospital review activities and the generation of profiles and reports.

(d) Such determination shall be made by an evaluation committee, designated by the governing body of the PSRO, which shall consist of two or more PSRO members. No member of such evaluation committee may participate in a determination of capability of a hospital in which: (1) He has a financial interest as defined in §101.713 of this Part; or

(2) He has active staff privileges as defined in §101.702 of this Part, unless special arrangements are made with the approval of the Secretary to utilize members who have active staff privileges in the hospital due to lack of alternate physicians to conduct the determination.

(e) The PSRO shall provide written notice of the determination of capability to the hospital within 90 days of receipt of the delegation review plan, including in such notice a statement of the reasons for the determination and an explanation of the hospital's right to obtain a reconsideration by the PSRO of any determinations of capability with which the hospital is dissatisfied.

(f) Each PSRO shall maintain a record of the decision and the information which formed the basis for the determination of capability.

(g) Any hospital which is dissatisfied with a PSRO determination of the hospital review committee's capability to perform delegated review effectively, including a determination that the hospital review committee is not performing effectively a review function which has been delegated (see § 101.810), may request a PSRO reconsideration of such determination in accordance with § 101.812. A PSRO may at any time initiate a reconsideration of a determination of capability.

§ 101.808 Initiation of PSRO review in nondelegated hospitals.

(a) Where the PSRO has made a determination not to delegate the performance of review functions to a hospital, or a determination to withdraw delegation of review functions from a hospital (see § 101.810), the PSRO shall, after providing notice to the hospital as specified in § 101.807(e), initiate review functions in such hospital within a reasonable time and in accord with procedures approved by the Secretary and applicable regulations of this Part. The initiation of PSRO review shall not be postponed because of a request for reconsideration by the hospital. Any subsequent request by the hospital to perform delegated review shall be subject to the time period specified in § 101.817 regarding PSRO consideration of the request.

(b) Where the PSRO has made a determination as described in paragraph (a) of this section, or where the PSRO will begin to perform review in a hospital as provided in § 101.805(c), the PSRO shall develop administrative and review procedures, with the consultation of each hospital and the approval of the Secretary in such time and manner as prescribed under applicable regulations of this Part relating to the assumption of review responsibilities by PSROs. Such procedures shall include:

(1) The specific review functions to be performed by the PSRO in the hospital in accord with the approved formal plan of the PSRO, Title XI, Part B of the Act and the regulations of this Part;

(2) The review procedures to be followed by the PSRO in the hospital in accord with the approved formal plan of the PSRO;

(3) A schedule indicating the time for phasing-in of each function;

(4) The norms, criteria and standards to be used by the PSRO in review in accord with Subpart I of this Part;

(5) Mechanisms for notifying the Titles XVIII, XIX, and V payment agencies of review determinations;

(6) PSRO responsibilities for data collection, data flow and information release;

(7) Specifications for the selection, training, and reimbursement of review personnel by the PSRO;

(8) The PSRO's plan for handling reconsiderations and appeals of its review decisions;

(9) The methods for the PSRO to provide profiles, medical care evaluation studies and other pertinent information to the hospital;

(10) The methods of involving nonphysician health care practitioners in review functions; and

(11) A PSRO mechanism for resolving disputes with the hospital regarding PSRO procedures.

§ 101.809 Agreement with delegated hospitals.

Where the PSRO has made a determination pursuant to § 101.807 to delegate the performance of review functions to a hospital, the PSRO and the hospital shall enter into a written agreement signed by the chief administrative official of the PSRO, and an authorized representative of the hospital's medical staff, the chief administrative official of the hospital and the Chairman of the Board of Trustees (or other governing body) for a time period not to exceed one year which shall be renewable. The PSRO shall submit a model of such agreement to the Secretary prior to use. A PSRO may not enter into an agreement with a hospital until the Secretary has approved its model agreement. Each signed agreement shall be retained at the principal offices of the PSRO for public inspection during regular business hours and shall include:

(a) The specific review functions to be performed by the hospital under delegation;

(b) The specific review functions which will not be delegated and will be performed by the PSRO;

(c) Agreement by the hospital that it will perform those functions and responsibilities for which it has received delegation in accord with the requirements placed upon PSROs for such functions and responsibilities under Title XI, Part B of the Act, 42 CFR Part 101, the approved formal plan of the PSRO and the review plan submitted by the hospital under § 101.806;

(d) A schedule indicating the time for phasing-in of each function;

(e) The norms, criteria and standards to be used by the hospital in review in accord with Subpart I of this Part;

(f) Methods of involving the hospital in the PSRO plan for reconsiderations and appeals;

(g) Methods for PSRO monitoring of delegated review functions including inspection of the operation and records of the hospital (see § 101.714 of this Part);

(h) Methods for the PSRO to report profiles, medical care evaluation studies and other pertinent information to the hospital;

(i) Procedures for reassessing the hospital, in accord with § 101.810;

(j) Procedures for the resolution of disputes between the hospital and the PSRO, which shall include agreement that if the hospital and the PSRO are unable to agree upon any item in dispute, such dispute shall be submitted to the Secretary to make a determination to resolve the dispute. Where a dispute is submitted to the Secretary, he will designate an official to make an initial determination within 30 days from the submittal based upon his consideration of any written information submitted by the hospital or the PSRO and any oral presentations made at an informal meeting involving all parties to the dispute, as deemed appropriate by such official. The Secretary will review such initial determination, render a final determination within 60 days from the submittal and notify the PSRO and the hospital of his determination, with a full explanation of the reasons for such determination;

(k) Procedures for the termination of the agreement which shall include provision that the agreement may be terminated by the PSRO upon reassessment in accord with § 101.810, or by the hospital, upon 90 days notice to the PSRO, or by the Secretary, pursuant to § 101.811. Where a PSRO has been so notified it shall initiate review in such hospital as specified in § 101.808; and

(l) Provisions for modification of the agreement with the approval of both parties.

§ 101.810 PSRO monitoring and reassessment of capability.

(a) Each PSRO shall periodically monitor and reassess, by means of analysis of profiles and reports provided by the hospital and on-site inspections, the performance, effectiveness and efficiency of each hospital review committee in its area of delegated functions in order to:

(1) Assure compliance with the agreement described in § 101.809 and the provisions of this Subpart;

(2) Assess the effectiveness and efficiency of the delegated hospital review in terms of the purposes of review as specified in § 101.701 of this Part;

(3) Reassess the appropriateness of continued delegation of the performance of PSRO review functions based upon the capability of the hospital review com-

mittee to perform review in an effective and efficient manner, in accord with written evaluation factors developed by the PSRO and available to all hospitals in the PSRO area. The evaluation factors shall be submitted to the Secretary prior to use and no such factors shall be utilized by a PSRO unless approved by the Secretary. Such evaluation factors for reassessment shall include, at a minimum:

(i) The degree to which the hospital has performed delegated functions in accord with the agreement specified in § 101.809;

(ii) The effectiveness and efficiency of the performance of delegated functions;

(iii) The maintenance of membership in the PSRO of at least 25 percent of those physicians with active staff privileges in the delegated hospital who are eligible to be PSRO members;

(iv) The degree to which delegation arrangements with the hospital are demonstrated to fulfill the PSRO objective of establishing an efficient and effective areawide review system.

(b) Where the PSRO determines that a hospital which has been delegated review functions is not performing such functions effectively, the PSRO shall notify the hospital and the Secretary of such determination as specified in § 101.807(e) and shall initiate review in the hospital as specified in § 101.808.

§ 101.811 Monitoring by the Secretary and disapproval for good cause.

(a) The Secretary will periodically require the PSRO to submit reports indicating those hospitals which have been delegated the performance of review functions and the manner in which they are performing and the Secretary may disapprove for good cause such delegation determinations. The Secretary shall take into consideration any comments submitted by Medicare fiscal agents or State Medicaid or Title V agencies regarding the appropriateness of a delegation of review to a hospital or effectiveness of the performance of delegated review functions by a hospital. For purposes of this Subpart, "good cause" for disapproval of a delegation shall include:

(1) A PSRO determination of capability which does not comply substantially with the procedures of this Subpart;

(2) The hospital's substantial noncompliance with the agreement described in § 101.809 or the provisions of this Subpart; and

(3) The hospital's failure to perform delegated review functions effectively and efficiently so as to aid the PSRO in the performance of its review responsibilities.

(b) Where the Secretary disapproves a delegation of review functions pursuant to paragraph (a) of this section, he will notify the PSRO and the hospital, in writing, providing a statement explaining his disapproval and the cause for such disapproval at least 30 days prior to the effective date of the disapproval. The PSRO and the hospital shall have an opportunity, prior to such effective date, to file a written statement with the Secretary explaining the reasons why such disapproval should not become effective. If no such statement is received prior to the effective date, the disapproval shall be final on the effective date and the hospital shall no longer retain PSRO delegation to perform review. In such case, the PSRO shall initiate review in the hospital as specified in § 101.808. Any subsequent request by the hospital to perform delegated review shall be subject to the time period in § 101.817 regarding PSRO consideration of the request. If the Secretary determines that additional information indicates "good cause" for disapproval does not exist and the disapproval should not become effective, he will withdraw the notice of disapproval.

§ 101.812 Time and place of filing request for reconsideration.

(a) A request by a hospital for reconsideration of a PSRO determination of a hospital capability to perform delegated review functions effectively shall be made in writing by the authorized representative of the hospital medical staff and the chief administrative official of the hospital and filed at the principal office of the PSRO within 60 days from the date of the mailing of the notice of capability by the PSRO to the hospital, unless such time is extended by the PSRO for good cause.

(b) The reconsideration request shall include a statement specifying the particular reasons why the hospital seeks reversal of the determination, including the results of any remedial actions which may have been taken by the hospital to correct deficiencies.

§ 101.813 Reconsideration committee.

The PSRO shall designate a committee of PSRO members, in accord with § 101.807(d), to conduct the reconsideration, except that no PSRO members may serve who participated in the determination of the capability of the hospital which is being reconsidered.

§ 101.814 Time of reconsideration and notification to hospital.

(a) The reconsideration proceedings shall begin not later than 14 calendar days, excluding holidays, from the date of the receipt by the PSRO of the request for reconsideration, or at the option of the hospital, at a later time.

(b) The PSRO shall notify the hospital no less than ten calendar days prior to the reconsideration proceedings of the time and place of the reconsideration proceedings. Such notice shall offer the hospital an opportunity to make an oral presentation and offer additional written information.

§ 101.815 Reconsideration proceedings.

(a) Reconsideration proceedings shall be informal and need not be bound by formal rules of evidence or other formal procedures.

(b) The reconsideration committee shall review the determination of capability, the reasons and information upon which the determination of capability was based, and any additional information submitted to the PSRO by the hospital.

§ 101.816 Reconsidered determination and notification.

(a) The PSRO shall make a reconsidered determination, affirming, modifying or reversing the initial determination of capability, based upon the information reviewed during the reconsideration proceedings.

(b) The PSRO shall provide written notice of the reconsidered determination to the hospital, including a statement of the reasons for the reconsidered determination, within 30 days from the date of the commencement of the reconsideration proceedings.

(c) Each PSRO shall maintain a record of the decision and the information which formed the basis for the reconsidered determination of capability, including a record summarizing the reconsideration proceedings.

§ 101.817 Renewal of interest in performing review after a PSRO determination or reconsideration.

Where a hospital review committee previously has received a negative determination under § 101.807 regarding its capability to perform review effectively, such hospital may at any time formally renew its interest in obtaining a delegation of PSRO review functions by filing a letter of interest pursuant to § 101.805. Such letter of interest shall include any progress which the hospital has made since the determination in effectively performing review functions for which it is seeking delegation. In such cases, the PSRO shall within one year from the date of the filing of the letter of interest, make a new determination of the capability of the hospital to perform review effectively and efficiently.

§ 101.818 Complaints to the Secretary.

(a) A hospital may make a written complaint to the Secretary if it believes that a PSRO has not complied substantially with the requirements of this Subpart or that the PSRO determinations of capability are motivated by nonprofessional prejudice or bias. The complaint shall include a statement of the reasons for such belief.

(b) The Secretary will investigate such complaint and if the Secretary finds that a PSRO has not complied substantially with the requirements of this Subpart or that its determinations of capability are motivated by nonprofessional prejudice or bias, he may take appropriate action to correct the abuse, including termination of the PSRO agreement.

§ 101.819 Reports to the Secretary.

Each PSRO shall submit such reports to the Secretary, as the Secretary shall deem appropriate, indicating the manner in which it has fulfilled its responsibilities under this Subpart.

§ 101.820 Previously approved delegations.

Sections 101.804 through 101.809 of this Subpart shall not apply to delegations or notification and evaluation activities leading to delegation which were effected prior to the effective date of this Subpart under procedures approved by the Secretary.

[FR Doc.77-1952 Filed 1-24-77;8:45 am]

[42 CFR Part 101]

NORMS FOR PSRO HOSPITAL REVIEW

Subpart I; Notice of Proposed Rulemaking

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart I to Part 101 of Title 42, Code of Federal Regulations.

The new Subpart would implement, in part, the provisions of Section 1156 of the Social Security Act (42 U.S.C. 1320c-5) with regard to the development and application of "professionally developed norms of care, diagnosis and treatment" (i.e. norms, criteria and standards), which must be applied by PSROs as principal points of evaluation in the review of health care services provided in hospitals under Titles V, XVIII and XIX of the Social Security Act. The use of norms, criteria and standards in the PSRO hospital review process grows out of the experiences of medical care foundations, individual hospitals and Experimental Medical Care Review Organizations (EMCROs) in developing such tools for streamlining the review process. The use of explicitly stated norms, criteria and standards as tools for initial screening serves to make the review process more objective and to minimize the demands of the hospital review system on physician time. By using such screening tools, trained nonphysician health care professionals can conduct screening review and identity cases requiring peer review. Norms, criteria, and standards do not constitute absolute definitions of proper utilization and high quality. Most of the care reviewed by the PSRO will fall within the standards set by peer practitioners and will require no further review. Care falling outside that range, however, will then be subject to closer scrutiny by peers to assure that services for Medicare, Medicaid, and Maternal and Child Health/Crippled Children's Services patients are necessary, appropriate and of high quality. It should be emphasized that criteria and standards do not imply the requirement of "cookbook" medicine. The fact that an individual episode of care may fall outside the standard set by the local PSRO does not imply that such care is of inferior quality; rather, it is an indication that closer professional review should be conducted in order to assure appropriateness of the care.

These regulations require that norms and criteria be emloyed in concurrent and preadmission review or in alternate review methods approved by the Secretary, pursuant to Section 101.709 of this Part. Standards are not specifically required in these review processes, but may be employed by PSROs. For example, the screening criteria employed in concurrent or preadmission review generally define elements of medical practice which, in the judgment of local peer practitioners, should be present in either 100 percent or 0 percent of cases. Where such criteria are not met, the case will be referred for peer review. Used in this way, criteria are being employed as standards in the concurrent or preadmission review process.

Only criteria and standards are required to be employed in medical care evaluation studies. The use of norms is not a requirement because when normative data is used in a medical care evaluation study, it is used only after those designing the study have determined that the norm represents a goal to be achieved (that is, the norm is being used as a criterion or standard).

Regional norms, criteria, and standards will be distributed by the National Professional Standards Review Council and will be used as principal points of reference by each PSRO as it establishes norms, criteria (including length-of-stay projections) and standards for its area. Until such time as the National Council distributes such regional norms, criteria and standards, PSROs will be expected to utilize available, statistically valid regional data to develop length-of-stay projections, and available sets of criteria and standards as guides to developing PSRO area criteria and standards. In addition to its responsibility to distribute regional norms, criteria and standards, the National Council will be analyzing the appropriateness of variations among the norms, length-of-stay projections, criteria and standards employed by PSROs. When it distributes the regional norms, criteria and standards, the National Council will use them as principal points of reference in identifying significant variations. As specified in section 1156(a) of the Social Security Act, when the Council determines that the variation in a PSRO's norms, length-of-stay projections, or other criteria or standards is inappropriate, the PSRO may not use those norms, criteria, or standards. A PSRO may use criteria and standards which vary from its areawide criteria and standards for preadmission and concurrent review in hospitals or subareas having limited resources, unusual patient populations, or other characteristics which make the variation appropriate. Such variation would be expected to be the exception, rather than the rule, and each FSRO should consider carefully any request by a hospital to vary from the PSRO areawide criteria and standards used in the concurrent and preadmission review process.

The proposed regulations setting forth the PSRO hospital review process, under Subpart G (published in proposed form at the same time as this Subpart D) provide that length-of-stay norms will be used to assist the PSRO in developing length-of-stay projections which, in turn, assist in setting the time when the next PSRO review must be completed. Criteria will be used in concurrent and preadmission review for screening in order to select from a large number of cases those which require peer review. For example, where a PSRO review coordinator finds that certain physical symptoms or diagnostic test results of a patient are not consistent with the criteria developed by the PSRO for a certain diagnosis, the coordinator would refer the case to a PSRO physician advisor for peer review. When an admission is certified, the coordinator would then set a length-of-stay period at the end of which continued stay review must be completed.

In making this assignment, review coordinators will use length-of-stay projections developed by physicians of the PSRO. In developing such projections, these physicians will use regional and, when available, PSRO length-of-stay information as guides. These projections will assist in assigning certified lengths-of-stay which reflect the point in time that patients with a given diagnosis or undergoing a given procedure should be ready for discharge. These projections would then be available to review coordinators as they screen individual admissions. Because individual patients vary widely in their clinical presentation, it will often be appropriate in individual cases to assign a length-of-stay period shorter or longer than the projected period developed for an aggregate of patients. This may be done by the review coordinator, often with the guidance of the physician advisor. In other instances, a patient will present a problem, rather than a clear diagnosis. In such cases, the length-of-stay assignment should be based on a projection of when the nature of the patient's condition will be more fully clarified. When a patient is admitted with a diagnosis for which the PSRO has not made the projections noted above, it would need to utilize length-of-stay norms in assigning a length-of-stay period. In such cases, review organizations often assign a period based on the 50th percentile of lengths-of-stay for patients of a similar age and condition. Finally, in those instances where a PSRO is conducting concurrent quality assurance, it may wish to assign a length-of-stay period based on the point in time that a critical procedure or outcome may be expected to occur.

Under these regulations and Subpart G, criteria and standards are also established as points of reference for each medical care evaluation study, by the group or committee responsible for the study, in advance of its actual conduct. Patterns of medical care which depart from the previously established criteria and standards are then analyzed to determine the cause of such departure and to assess the need for programs of education or administrative change. In addition, norms, criteria and standards will be applied by each PSRO as points of reference in the analysis of profiles of health services, health care practitioners, and hospitals.

The new regulations policies of the Department issued July 25, 1976, require that this Notice of Proposed Rulemaking

(NPRM) have an implementation plan prepared prior to its issuance. In compliance with these requirements, an implementation plan was forwarded to the Secretary and he has authorized the issuance of this NPRM without the use of a Notice of Intent (NOI) which would otherwise be required by the new policies because:

1. There is an urgent requirement for these regulations.

2. Over an extended period of time there has been significant interaction between the Department and organizations and individuals in the development of this NPRM which has satisfied the spirit and intent of the NOI. Specifications for this NPRM were reviewed by the National Professional Standards Review Council at public meetings and available for public comment at least twice. Draft transmittals presenting policies incorporated in this NPRM have been presented to the National Council, and circulated to all planning and conditional PSROs, PSRO Support Centers and professional organizations, as well as other organizations that routinely receive PSRO information. In addition, requests by outside organizations for information contained in this NPRM have been fulfilled.

Interested persons are invited to submit written comments, suggestions or objections concerning the proposed regulations to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16A55, 5600 Fishers Lane, Rockville, Maryland 20857 on or before March 28, 1977.

All comments received in timely response to this Notice will be considered and will be available for public inspection in the above named office during regular business hours.

It is proposed to make this regulation effective upon republication in the FEDERAL REGISTER.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 22, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

PART 101—PROFESSIONAL STANDARDS REVIEW

It is proposed to issue a new Subpart I of Part 101 of Title 42 as set out below.

Subpart I—Norms for PSRO Hospital Review

Sec.
101.901 Applicability.
101.902 Definitions.
101.903 Application of norms, criteria and standards in the review of services provided in hospitals.
101.904 Regional norms, criteria and standards.
101.905 PSRO establishment of area norms, criteria and standards.
101.906 Technical assistance.
101.907 Approval of significant differences from regional norms, criteria and standards.
101.908 Availability of norms, criteria and standards for inspection.

AUTHORITY: Sec. 1156, Social Security Act, Sec. 249F(b) of Pub. L. 92-603, 86 Stat. 1435-1436, (42 U.S.C. 1320(c)(5)); sec. 1102 of the Social Security Act, 49 Stat. 647, as amended (42 U.S.C. 1302).

Subpart I—Norms for PSRO Hospital Review

§ 101.901 Applicability.

Section 1156 of the Act requires that, in carrying out its review responsibilities as prescribed under Section 1155(a)(1) and (2) of the Act, each PSRO shall apply professionally developed norms of care, diagnosis and treatment based upon typical patterns of practice in its area as principal points of evaluation and review. The regulations of this Subpart are applicable to the development and application of such norms with regard to health care services and items for which payment may be made under the Act which are provided in hospitals for which a PSRO has assumed review responsibility.

§ 101.902 Definitions.

As used in this Subpart:

(a) "Act" means the Social Security Act, as amended (42 U.S.C. Chapter 7).

(b) "Area" means the geographical area within the boundaries of a State, or within the boundaries of one or more counties or other political subdivisions in a State, designated as constituting an area with respect to which a PSRO may be designated, pursuant to Section 1152(a) of the Act.

(c) "Criteria" means predetermined elements of health care, developed by health professionals relying on professional expertise, prior experience and the professional literature, with which aspects of the quality, medical necessity, and appropriateness of health care services may be compared.

(d) "Hospital" means a health care institution or distinct part of a health care institution in the PSRO area as defined in section 1861(e)-(g) of the Act, except that such institution shall not be a Christian Science sanatorium operated, or listed and certified, by the First Church of Christ, Scientist, Boston, Massachusetts.

(e) "Length-of-stay projection" means a criterion which defines the expected point in time at which patients of similar age and diagnosis or condition would be expected to be ready for discharge. This projection is established by the PSRO based upon an analysis of regional norms and, where available, PSRO area norms for lengths-of-stay.

(f) "National Council" means the National Professional Standards Review Council established under Section 1163 of the Act.

(g) "Norms" means numerical or statistical measures of usual observed performance of health care activities.

(h) "Professionally developed norms of care, diagnosis and treatment" means norms, criteria and standards.

(i) "PSRO" means a Professional Standards Review Organization which is conditionally or unconditionally designated.

(j) "Region" means a geographical division, as determined by the Secretary with the advice of the National Council, which is larger than a PSRO area and with respect to which the National Council may distribute norms, criteria, and standards to PSROs within such division.

(k) "Standards" means professionally developed expressions of the range of acceptable variation of performance from a norm or criterion.

(l) "The Secretary" means the Secretary of Health, Education, and Welfare, or any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

§ 101.903 Application of norms, criteria and standards in the review of services provided in hospitals.

(a) *Norms and criteria applied in preadmission and concurrent review.* Each PSRO shall, in the preadmission and concurrent review process, as specified in §§ 101.703, 101.704, and 101.705 of this Part:

(1) Apply criteria specifying clinical indications for hospital admission, the appropriate nature of a preadmission work-up and/or the types of services which are most effectively and appropriately provided at a hospital level of care, in accord with §§ 101.703(a)(1)(H), 101.703(b)(1)(i), and 101.704(a)(1).

(2) Apply length-of-stay projections or norms in assigning initial and extended certified length-of-stay periods, in accord with §§ 101.703(a)(2)(i) and (ii) and (b)(2) of this Part.

(3) Identify diagnoses, conditions, clinical areas or procedures which, based upon analysis of normative data and prior experience, will be automatically certified for admission, in accord with § 101.705 of this Part.

(4) Apply length-of-stay norms to specify the time when attending physician certifications are required, in accord with § 101.706(a).

(b) *Norms and criteria applied in alternate review methods.* Where the Secretary has approved an alternate review method, pursuant to § 101.709 of this Part, norms and criteria shall be applied as specified in the approved alternate review plan.

(c) *Criteria and standards applied in medical care evaluation studies.* Each PSRO shall apply criteria and standards in medical care evaluation studies, conducted pursuant to § 101.710 of this Part. Such criteria and standards shall relate to the specific objectives of the medical care evaluation study and shall be used to define the information necessary to identify the degree of conformance between actual performance and that specified in the criteria. The identification of a pattern of performance which does not conform to applicable criteria or standards shall result in those services involved in the pattern being subjected to further analysis through peer review.

(d) *Norms, criteria and standards applied in profile analysis.* Norms, criteria and standards shall be applied by each PSRO as points of reference in the analysis of profiles under § 101.711 of this Part for the purposes stated in § 101.711(c) of this Part.

(e) *Application of PSRO norms, criteria and standards by delegated hospitals.* All hospitals which are delegated review functions under Subpart I of this Part shall apply norms, criteria and standards which are established by the PSRO in the same manner as required of the PSRO under this section, except as specified in § 101.905(e).

§ 101.904 Regional norms, criteria and standards.

(a) The National Council shall provide for the distribution to each PSRO of appropriate regional norms, criteria, and standards to be used by the PSRO as principal points of reference in its establishment of area norms, criteria, including length-of-stay projections, and standards.

(b) The Secretary will, within 30 days from the date of each such distribution, publish a notice in the FEDERAL REGISTER stating that the distribution has been made by the National Council, and that such material will be open to inspection and copying by members of the public at the Office of the Assistant Secretary for Health.

(c) The National Council shall, from time to time, review the material it has distributed, make revisions where appropriate, and distribute revisions to each PSRO. A notice of the availability of such revisions for inspection shall promptly be published by the Secretary in the FEDERAL REGISTER in accord with paragraph (b) of this section.

§ 101.905 PSRO establishment of area norms, criteria and standards.

(a) Each PSRO shall establish written area norms, criteria (including length-of-stay projections), and standards which are required in Subpart G of this Part for preadmission and concurrent review, or for alternate review methods, and for profile analysis, using as principal points of reference such regional norms, criteria and standards as have been distributed under § 101.904 and PSRO area norms which reflect typical patterns of practice in the entire PSRO area.

(b) Each PSRO shall establish written criteria and standards to be used as principal points of reference in conducting medical care evaluation studies as described in § 101.710 of this Part.

(c) Each PSRO shall specify, in the written formal plan to be approved by the Secretary prior to designation of the PSRO, the organizational structure and procedures which the PSRO will employ to establish, disseminate, validate and modify norms, criteria, and standards.

(d) Each PSRO shall periodically reassess, revise and update the norms, criteria and standards currently applied in preadmission and concurrent review, or in an alternate review method established pursuant to § 101.709 of this Part.

(e) Where patterns of practice in certain locations or hospitals are substantially different from patterns in the remainder of the PSRO area, and the PSRO determines that there is a reasonable basis for such difference, such as limited resources, unusual patient populations or other characteristics which make the variation appropriate, the PSRO may establish different criteria (including length-of-stay projections), and standards for use in preadmission and concurrent review to be applicable only to such locations or hospitals in the PSRO area.

§ 101.906 Technical assistance.

The National Council and the Secretary will, upon request, subject to the availability of funds and personnel, provide technical assistance to aid each PSRO in utilizing applicable regional norms, criteria and standards, as principal points of reference in establishing PSRO area norms, criteria and standards.

§ 101.907 Approval of significant differences from regional norms, criteria and standards.

(a) All norms, criteria (including length-of-stay projections), and standards to be employed by each PSRO in the preadmission and concurrent review process, or in an alternate review method established pursuant to § 101.709 of this Part, shall be forwarded by the PSRO to the Secretary upon their establishment and revisions, if they have been made, at least annually thereafter.

(b) Criteria and standards established by the PSRO for use in medical care evaluation studies and norms, criteria and standards for use in profile analysis shall be forwarded by each PSRO to the Secretary on a sample basis in accordance with applicable procedures specified by the Secretary.

(c) The Secretary will review the norms, criteria and standards established and submitted by the PSRO pursuant to paragraph (a) above and identify significant differences from the regional norms, criteria and standards distributed by the National Council. The Secretary will so notify the National Council and the PSRO. Such notice will explain that the PSRO may consult and discuss with the National Council as to whether a reasonable basis exists for usage of such norms, criteria and standards which differ from regional norms, criteria and standards if the PSRO forwards a written request to the National Council within 30 days of the notice.

(d) The National Council shall, after appropriate consultation and discussion with the PSRO, if such consultation and discussion is requested within the time specified, approve or disapprove the PSRO norms, criteria and standards in question based upon its determination as to whether a reasonable basis exists for the usage of such norms, criteria and standards.

(e) Norms, criteria, and standards established and submitted by the PSRO in accordance with § 101.905 and § 101.907(a) may be used by each PSRO in the concurrent and preadmission review process, or in an alternate review method established pursuant to § 101.709 of this Part, unless such norms, criteria and standards have been disapproved by the National Council.

(f) If the National Council disapproves certain PSRO norms, criteria or standards, the PSRO shall make appropriate modifications for review by the Secretary pursuant to paragraphs (a) and (c) of this section.

§ 101.908 Availability of norms, criteria and standards for inspection.

(a) Each PSRO shall disseminate to each hospital in the PSRO area a copy of the norms, criteria (including length-of-stay projections), and standards to be employed by the PSRO and by delegated hospitals in the preadmission and concurrent review process, or in an alternate review method established pursuant to § 101.709 of this Part.

(b) Each PSRO shall publish in local medical periodicals and in one newspaper of general circulation in the area a notice stating that the norms, criteria and standards currently employed by the PSRO in concurrent and preadmission review (or an alternate review method established pursuant to § 101.709 of this Part), in medical care evaluation studies, and in profile analysis are available at the principal office of the PSRO for public inspection.

PART III

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Determinations for Various Communities

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-2544]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the Borough of East Newark, New Jersey

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4 (a)), hereby gives notice of his proposed determinations of flood elevations for the Borough of East Newark, New Jersey.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Borough of East Newark must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Borough Hall, 34 Sherman Avenue, East Newark, New Jersey 07029.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Raymond Graham, Borough Hall, 34 Sherman Avenue, East Newark, New Jersey 07029. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Passaic River (tidal).	I-280 (downstream side of road).	10
	Central Ave.	10
Passaic River (tidal).	370 ft north along Passaic Ave. from intersection of Central and Passaic Aves.	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: November 22, 1976.

J. ROBERT HUNTER,
Federal Insurance Administrator.

[FR Doc.77-1865 Filed 1-24-77;8:45 am]

[24 CFR Part 1917]

[Docket No. FI-2568]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Aberdeen, Mississippi

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4 (a)), hereby gives notice of his proposed determinations of flood elevations for the City of Aberdeen, Mississippi.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Aberdeen must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, Box 31, Aberdeen, Mississippi 39730.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor H. A. Miller, City Hall, Box 31, Aberdeen, Mississippi 39730. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Tombigbee River.	U.S. Highway 45	20[1]
	St. Louis-San Francisco RR.	20[1]
Mattubby Creek	Meridian St.	202
City Ditch	Illinois Central Gulf RR.[1]	203
	do.[2]	204
	Polar St.	206
	Chestnut St.	209
	Locust St.	210

[24 CFR Part 1917]

[Docket No. FI-2557]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Cabool, Missouri

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Cabool, Missouri.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Cabool

must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 618 Main Street, Cabool, Missouri 65689.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor David Rusc, City Hall, 618 Main Street, Cabool, Missouri 65689. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Big Pine River	Airport Rd.	1,224
	U.S. Route 60 and 63	1,234

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Carrollton, Georgia

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4 (a)), hereby gives notice of his proposed determinations of flood elevations for the City of Carrollton, Georgia.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Carrollton must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, City Hall Avenue, Carrollton, Georgia 30117.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor C. L. Cashan, City Hall, City Hall Avenue, Carrollton, Georgia 30117. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Derby, Connecticut

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Derby, Connecticut.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Derby, Connecticut must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 35 Fifth Street, Derby, Connecticut 06418.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Edward Ceccarelli, City Hall, 35 Fifth Street, Derby, Con-

necticut 06418. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Housatonic River.	Route 8	21
	PC RR	22
	Bridge St	22
Naugatuck River.	PC RR	26
	Route 34	28
	Division St	30

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Riverdale, Georgia.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Riverdale must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 6690 Church Street, Riverdale, Georgia 30274.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Lamar Hutcheson, City Hall, 6690 Church Street, Riverdale, Georgia 30274. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Stream A	Bixley Dr.	911
	Pineview Ter.	909
Stream B	Voyles Dr.	889
	Riverdale Rd.	847
Stream C	Springdale Dr.	893
	Sherwood-Maye Dr.	879
Stream CT	Roundtree Rd.	903
	Roberts Dr.	901
Stream D	Taylor Rd.	880

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: November 29, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Sauk Rapids, Minnesota

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Sauk Rapids, Minnesota.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Sauk Rapids must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 104 North Benton Drive, Sauk Rapids, Minnesota 56379.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Bernard Gratzek, City Hall, 104 North Benton Drive, Sauk Rapids, Minnesota 56379. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Mississippi	Highway 152 bridge	993
	10th St. North	998
County Ditch No. 3	River Ave.	999
	2d Ave. South	1,019
	3d Ave. South	1,020
	7th St. South	1,021

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: November 15, 1976.

RAILROAD REVITALIZATION AND REGULATORY REFORM

Procedures for Computing the Internal Rate of Return on Projects

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 76–01]

PART 258—REGULATIONS GOVERNING SECTION 505 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Procedures for Computing the Internal Rate of Return on Projects

Section 505(b)(2)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended ("Act"), requires that the rate of return be considered in evaluating projects under section 505. The purpose of this document is to amend the regulations under section 505 of the Act to provide applicants for Federal financial assistance under that section with uniform guidance regarding: (1) The procedures to be followed in computing the internal rate of return ("IRR") on a project for which assistance is being requested; and (2) the format to be utilized in presenting the steps of that computation.

Part 260 of this chapter is being amended concurrently to provide applicants for Federal financial assistance under section 511 of the Act with the same uniform guidance regarding the computation of IRR on a project for which assistance under that section is being requested. The preamble to those amendments is equally applicable to this document, and is incorporated herein by reference.

The impact of section 505 assistance, including the inflationary impact of the regulations, was fully considered prior to publication of the initial regulations on October 8, 1976. The procedures proposed herein will not affect the overall costs or benefits of the program as it was set forth in the initial regulations. Accordingly, an evaluation of the expected impact of the regulations pursuant to the Department of Transportation Policies to Improve Analysis and Review of Regulations (41 FR 16200) is not required.

In consideration of the foregoing, Part 258 of Chapter II of Title 49 of the Code of Federal Regulations is amended as follows:

1. Paragraph (a)(4)(v) of § 258.7 is revised to read:

§ 258.7 Form and content of application.

(a) • • •
(4) • • •

(v) A detailed statement setting forth the estimated internal rate of return on the project, computed in accordance with the provisions of subpart C of part 260 of this chapter which is hereby incorporated herein by reference. This statement shall follow the procedures and utilize the format required by Subpart C of Part 260 of this chapter. Relevant material presented elsewhere in the application need not be repeated in this statement, but must be explicitly referenced.

• • • • •

Effective date: These amendments to 49 CFR Part 258 become effective January 25, 1977.

Dated: January 19, 1977.

ASAPH H. HALL,
Administrator, Federal Railroad Administration.

[FR Doc.77-2342 Filed 1-24-77;8:45 am]

[Docket No. 76–02]

PART 260—REGULATIONS GOVERNING SECTION 511 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Procedures for Computing the Internal Rate of Return on Projects

On October 8, 1976, the Federal Railroad Administrator ("Administrator") published in the FEDERAL REGISTER final regulations under section 505 (41 FR 44570) and section 511 (41 FR 44577) of the Railroad Revitalization and Regulatory Reform Act of 1976, later amended ("Act"), concerning applications for Federal financial assistance. On December 10, 1976, the Administrator published in the FEDERAL REGISTER (41 FR 53996) miscellaneous amendments to the section 511 regulations. The purpose of this document is to amend the regulations under section 511 to provide applicants with uniform guidance regarding: (1) The procedures to be followed in computing the internal rate of return ("IRR") on a project for which assistance is being requested; and (2) the format to be utilized in presenting the steps of that computation.

For approximately a year and a half, the Department of Transportation ("Department") has been examining the manner in which railroads calculate the rate of return on railroad investment projects in order to develop standard procedures for use by the railroad industry. During this period project evaluation in general and IRR in particular were discussed in detail with both senior officials and technical staff at thirteen railroads. Dozens of project analyses done by railroads were examined in great detail. This study, which is continuing, revealed that IRR is widely used by railroads to support their investment decisions, but that the procedures followed and the assumptions used varied considerably among railroads. Such diversity would greatly complicate the task of the Federal Railroad Administration ("FRA") in assessing the projects submitted for financial assistance under section 511 of the Act. Furthermore, not all the procedures followed by railroads in their IRR computations are appropriate for the FRA's purposes. Therefore, these regulations have been developed to promote uniformity in the procedures to be followed and the format to be used by applicants seeking financial assistance under section 511.

Use of the IRR. With respect to projects under section 511, rate of return is useful in determining: (1) Whether the facilities or equipment to be acquired, rehabilitated, improved, constructed, developed or established with the proceeds of the obligation guaranteed will be economically and efficiently utilized (section 511(g)(4)); and (2) whether there is reasonable security and protection for the United States (section 511(g)(5)).

Revisions to these regulations. As previously noted, the Department's study on IRR in the railroad industry is not completed. FRA therefore welcomes comments from railroads and other interested parties regarding these regulations. Changes to these regulations may be made as a result of those comments, the continuing research of the Department, and FRA's experiences in administering the programs under sections 505 and 511.

The impact of section 511 assistance, including the inflationary impact of the regulations, was fully considered prior to publication of the initial regulations on October 8, 1976. The procedures proposed herein will not affect the overall costs or benefits of the program as it was set forth in the initial regulations. Accordingly, an evaluation of the expected impact of the regulations pursuant to the Department of Transportation Policies to Improve Analysis and Review of Regulations (41 FR 16200) is not required.

Since these amendments relate to public benefits and contracts, public notice and an opportunity to comment are not required. These amendments will, therefore, become effective upon publication.

In consideration of the foregoing, Part 260 of Chapter II of Title 49 of the Code of Federal Regulations is amended as follows:

1. Paragraph (a)(7)(i) of § 260.7 is revised and Subpart C is added as follows:

§ 260.7 [Amended].

(a) • • •
(7) • • •

(i) A detailed statement setting forth the estimated internal rate of return on the project, computed in accordance with the provisions of subpart C of this part. This statement shall follow the procedures and utilize the format required by Subpart C. Relevant material presented elsewhere in the application need not be repeated in this statement, but must be explicitly referenced.

Subpart C—Procedures for Computing the Internal Rate of Return on Projects

Sec.
260.31 Applicability.
260.33 Definitions.
260.35 Procedures to be followed and format to be utilized.
Appendix A—Selected cash flow impacts.
Appendix B—Forms to be used in computing IRR
Form I—Analysis of capitalized investment.
Form II—Analysis of sale or retirement of assets.
Form III—Analysis of expenses and contribution to profit.
Form IV—Consolidation of cash flows.
Form V—Computation of IRR.

§ 260.31 Applicability.

This subpart prescribes the procedures to be followed and the format to be utilized in computing the IRR under paragraph (a)(7)(i) of § 260.7 of subpart A of this part.

§ 260.33 Definitions.

As used in this subpart—

(a) Investment means any substantial non-recurring expenditure even if expensed for accounting purposes.

(b) IRR means the estimated internal rate of return on a project for which an application for financial assistance is filed pursuant to this part.

(c) IRS means the Internal Revenue Service.

(d) Project has the meaning set forth in subpart A of this part and for purposes of this subpart shall include as separate projects each part or subpart into which the total project for which the applicant seeks funding may reasonably be divided and for which the cost is considered independent of the remainder of the total project cost. The cost of a part or subpart is independent of the remainder of the total project cost if the cash flow impact upon the applicant resulting from the part or subpart would be approximately the same regardless of whether or not the remainder of the total project were undertaken. The cost of each part or subpart shall comprise all expenditures (including those for which no Federal assistance is requested) necessary to carry out the objectives of that part or subpart.

§ 260.35 Procedures to be followed and format to be utilized.

(a) A narrative discussion of the IRR computation for the project consisting of the following five parts shall be prepared and provided:

(1) *A detailed description of the project.* This description must present the following: the objectives of the project; what assets will be improved, rehabilitated, acquired or constructed; where they will be located; and how they will be used. It must also describe any other work to be done as a part of the project, and any operating changes, including retirement of assets, which will accompany the investment.

(2) *A detailed description of the base case.* The base case is the most favorable alternative action the applicant could take with little or no investment. The description must be comparable in scope to the description of the project. In some cases, the most favorable alternative action may be to do nothing, i.e., making no change in the current situation. In other cases, the applicant may have other alternative actions such as rerouting traffic, changing operating practices (perhaps with an increase in operating costs), or relying more heavily on facilities or equipment belonging to others. If the applicant has considered more than one alternative action (not requiring major investment) to the project, the applicant must describe each of the actions considered and give the rationale for the selection of the base case from among those other actions.

(3) *A discussion of key assumptions.* All general assumptions and those relating only to a particular cash flow impact which substantially affect the IRR should be explained. Assumptions regarding traffic volumes deserve particular attention. The applicant must specify how much traffic is expected if the project and base case are undertaken, and where the difference, if any, between the project and base case is expected to come from (e.g., diverted from truck, diverted from other railroads, generated by the project, etc.). Other key assumptions may relate to actions by third parties, such as regulatory agencies and other railroads.

(4) *A discussion of each of the project's and base case's cash flow impacts.* The applicant must identify all the benefits and costs of the project and base case which will affect its cash flow. For each cost and benefit used in the IRR computations, the applicant must explain why the particular cash flow will result from the project or base case, and how the size of the cash flow and the corresponding measure in physical units were estimated. In addition, the applicant should identify and discuss important costs and benefits which it has not been able to quantify. Since the project will be audited to provide a continuing assessment of the IRR computation, applicant must indicate how an audit trail could best be facilitated. Appendix A of this subpart lists the most common cash flow impacts of railroad investment projects and base case alternatives, indicates the kinds of actions likely to involve each type of cash flow, suggests how each might be measured (both in physical and monetary units), and discusses special problems associated with each. Appendix A is not exhaustive: other cash flow items should be included in the analysis as appropriate.

(5) *A discussion of the principal areas of uncertainty.* This discussion must indicate why particular values might be different from those used in the computation, and the range into which each uncertain value could be expected to fall. It must also indicate the applicant's subjective level of confidence that the computed IRR is a reasonably close prediction of the project's and base case's financial performance. Such a level of confidence may, for example, indicate that a prospective labor saving, although quantifiable, has little likelihood of realization. In some circumstances, the applicant must point out where the IRR fails to incorporate certain important features of the project or the base case, or both. Applicant may enhance its discussion by presenting examples of its own prior experiences with IRR, stating, perhaps, that an audit of past computations has shown marked deviations from actual results regardless of the detail of those computations.

(b) For the project (as it relates to its base case alternative), a thorough presentation of all the computations underlying the IRR using the Forms I–V of Appendix B to this subpart shall be prepared and provided. The computation of the IRR must follow the four steps described below. (This procedure cannot be used if the project consists of replacing an asset, usually equipment, which would otherwise remain in service (at high cost) for only a few more years. In that situation, the lifetime of the project (the new asset) is substantially longer than the lifetime of the base case (the old asset), so that it is not possible to get a differential cash flow in every year of the project's life. A possible approach for handling such cases is to determine the discount rate which gives the same average annual cost per unit of output for both the project and the base case. Because it is expected that very few of the applications will involve such replacements, the procedure for handling them will not be detailed here but will be provided upon request.)

(1) *Step 1: Determination of before-tax cash flows.* The applicant must determine, for each year of the project's expected useful life, up to a maximum of 15 years (unless the cash flow impacts of later years would substantially affect the IRR), both the project's and base case's before-tax cash flow impacts (receipts and disbursements). The cash flow estimates must not include the effects of inflation, but rather must be done in constant dollars. The effects of financing must also be excluded; that is the cash flows must be estimated as if the financing were consummated at no cost.

The various cash flow impacts for this step 1 must be shown on Forms I through V of Appendix B as explained below. On Forms I through V cash flow impacts occurring in the first year of the project and base case are assigned to and recorded in the time period year 1. Cash flows in subsequent years are all assigned to and recorded in the year in which they occur regardless of whether they occur at the beginning or end of the year. For purposes of assigning and recording cash flow impacts of the project and base case, it will be assumed that the project's starting date and thus the commencement of year 1 begins as of the first of the January following the year in which an application for financial assistance is filed.

(i) Capitalized investments which would occur as a part of the project or the base case must be entered in Column 1 of Form I. The capitalized investment includes capitalized engineering work, installation expenditures and other start-up costs allowable in reporting to the IRS. The total investment for the project or base case must be divided into portions which are homogeneous with respect to depreciation method (if depreciable), depreciation period (if depreciable), year in which the assets enter service, and whether the assets qualify for investment tax credit. (If applicant has a considerable tax credit carryforward, the tax credit must be shown only in the year or years it will result in a reduction of tax payments.) A separate form should be completed for each such portion.

(ii) Sales of released assets (as a useful assets or as scrap), which would occur

as a part of the project or the base case, must be entered in Column 1 of Form II. As was the case for capitalized investments, there must be a separate Form II for each portion of the assets sold, such that each portion is homogeneous with respect to tax treatment and year of sale. Form II must also be completed for retirements of assets, even though the sale price is zero, if the retirement will affect the applicant's income taxes and thereby the applicant's cash flow. The sale or retirement of an asset at the end of the project's life, if the cash flow impact is substantial enough to merit inclusion in the computation, must also appear on one or more Forms II. (If a project would continue an asset already owned in its prior use but the base case would put the asset to an alternative use, and if the cash flow from that alternative use is difficult to determine, the applicant may do the analysis as if the asset were to be sold in the base case at its fair market value when put to the alternative use. Similarly, if the base case would continue an asset in its present use but the project would result in the asset being employed in an alternative use, the anticipated cash flow of which would be difficult to determine, the asset in the project may be treated as a sale at fair market value in the IRR computations. In either event, the market value of the asset otherwise put to an alternative use would be entered in Column 1 of a Form II and the asset in its current use (in either the project or base case, as the case may be) would be recorded, as to continuing depreciation and income tax credit, if any, on Form I and, as to expenses and contribution to profit, on Form III. However, whenever possible, the anticipated cash flow of the alternative use, whether in the project or base case, should be entered on Form III rather than treated as a theoretical sale at fair market value.)

(iii) Expense items or contributions to profit which arise by reason of the project or the base case must be documented on Form III for the respective case, with a separate form being used for each item.

Columns 1 and 2 of Form III must be completed unless the difference of column 3 can be ascertained only through a direct computation (as, e.g., car-day savings by reason of track rehabilitation time sensitivity). When practical, expenses and traffic are to be expressed first in physical units (Columns 1, 2 and 3) and then converted to dollars (Column 4). In instances where this is not practical, the applicant may estimate expenses and contribution directly in dollars using only Columns 1, 2, and 4. In Columns 1 and 2, expense items should always be enclosed in parentheses because they represent cash outflows. Thus, positive numbers in Columns 3 and 4 will indicate that the project produces a larger cash inflow (or smaller cash outflow) than the base case.

(2) *Step 2: Determination of after-tax cash flows relating to capital assets.* The applicant must compute the annual after-tax cash flows corresponding to each of the before-tax flows recorded on each Form I and Form II in the previous step. If the applicant expects to pay taxes in some years but not others, the applicant will undoubtedly carry forward (or back) the tax losses and credits from years in which no tax was paid, so as to take full advantage of them. In that case, the applicant must estimate when such tax benefits will actually be received, and include them in the cash flow stream at the appropriate time. State and local taxes should be included unless applicant is unable to estimate a project's or base case's impact on those taxes. The appropriate tax rate for such computations is the applicant's marginal tax rate. This is the rate which would apply to one additional dollar of income earned by the applicant. Normally, the marginal rate will be 48% for Federal taxes except in years in which the applicant does not expect to pay taxes. The average or effective tax rate (found by dividing a firm's actual tax payments by its net income before taxes) is not appropriate for this purpose. If the tax rate assumed is different from 48%, or if the computations assume the applicant will not pay taxes in certain years, then those assumptions must be explained in the discussion of key assumptions. The tax-related computations must be shown on the same forms as were used to record the pre-tax cash flows. Additional working papers should be submitted as necessary to clarify the computations. The computations to be done on the two forms are as follows:

(i) On each Form I, the applicant must indicate in Column 2 the depreciation schedule which it expects to use in reporting to the IRS. In Column 3, the applicant must indicate how much its tax bill will be reduced as a result of the depreciation shown in Column 2. (If the applicant expects to pay taxes every year, Column 3 is simply 48% of Column 2.) In Column 4, the applicant must indicate the tax reduction, if any, it expects from investment tax credit. (The effect of the tax credit must be computed using the flow through method.) Column 5 is the net after-tax cash inflow associated with the investment.

(ii) On each Form II, the applicant must indicate in Column 2 the increase (or decrease) in its Federal income tax payments resulting from the difference between the sale price and the book value of assets to be sold by reason of the project or base case. If an asset is released without a sale or a corresponding write down of book value, Form II is not used, but Form I is used to reflect continuing depreciation as before the release. In Column 3, the applicant must record any recapture of investment tax credit by the IRS. (Such recapture can only occur when an asset is disposed of before it has been in service for seven years.) Finally, Column 4 records the net cash flow in or out.

(3) *Step 3: Determination of aggregate after-tax cash flow.* The applicant must determine the project's aggregate after-tax cash flow using Form IV. This shall be done as follows:

(i) For each year, the corresponding after-tax cash flow (Column 5) on the various Forms I on which the "project" box was checked are summed, and the total entered into Column 1 of Form IV. Then the net after-tax cash flows on the base case Forms I are summed and entered into Column 2 of Form IV.

(ii) Similarly, the project and base case Forms II (Column 4) are consolidated and entered into columns 3 and 4, respectively, of Form IV.

(iii) The Forms III (Column 4) are consolidated into Column 5 of Form IV. The corresponding after-tax cash flow is recorded in Column 6. If the applicant expects to pay taxes every year, Column 6 is simply 52% of Column 5. If applicant expects to pay no taxes, the two columns are identical. If applicant expects to pay taxes in some years but not others, the applicant must incorporate the effects of carrying losses forward (or back) into the estimated after-tax cash flow.

(iv) The aggregate net cash flow for the project relative to the base case is then found and entered in Column 7 of Form IV.

(4) *Step 4: Computation of the IRR.* The applicant must determine the discount rate for which the present value of the differential cash flow stream is zero. That is, the applicant must find the value of r which makes the expression

$$\sum_{i=1}^{n} \frac{c_i}{(1+r)^i}$$

equal to zero. In the above expression, r is the discount rate applied to future cash flows; i is an index denoting a particular year of a project's life; n is the number of years in the project's life; and c_i is the differential cash flow in year i. Computer programs for calculating the rate of return are widely available. If a program is utilized, copies of the printout showing input and output data, and a brief explanation of the program function must be included in the application. If the applicant chooses not to use such a computer program to find the IRR, the applicant may use Form V. If the IRR lies off the graph, it is sufficient to report that the IRR is negative or above 50%. If the nature of the cash flow stream is such that a unique IRR cannot be found, the work done to develop the cash flow stream must be submitted with a note that no IRR could be computed.

(c) Copies of all financial analyses which the applicant did on rejected alternatives to the project, including changes in scale or scope. The applicant need not do any such analyses beyond those already done, nor need the format, assumptions, or procedures used in those analyses be changed to conform to the requirements of these regulations.

(d) A reconciliation between the cash flows used in the IRR computations and all forecasted data presented in the application, both before (for the base case) and after (for the project) giving effect to Federal assistance. This reconciliation must indicate what inflation factor or factors were used in developing the forecasted financial statements as compared to the constant dollar figures used in the IRR computations. The reconciliation must also show how each of the individual parts and subparts of the project relates to the applicant's forecasted financial statements.

APPENDIX A—SELECTED CASH FLOW IMPACTS

Railroad investments usually affect the investor's cash flow by changing some of the following things:

Use of assets.
Contribution from traffic.
Labor requirements.
Locomotive requirements.
Requirements for cars, trailers, and containers.
Maintenance material consumption.
Energy consumption.
Accident rates and severity.
Expenditures needed to meet legal requirements.
Salvage value.
Installation and start up expenses.

While this list is not exhaustive it does identify the most common cash flow impacts.

Some of the items listed, such as start up expenses, are almost always costs of projects or base cases, rather than benefits. Others, such as salvage value, are usually benefits. Most of the items, however, may be either project or base case benefits or costs, depending on the particular situation.

This appendix briefly discusses each of the eleven factors listed above. The discussions include four parts: a list of the kinds of actions which often involve the particular cash flow impact in question: the physical units in which the impact is generally measured; suggestions for converting the physical units to their monetary equivalent; and notes on special characteristics or problems associated with the particular cash flow impact.

USE OF ASSETS

Characteristic Actions: Assets are often released for sale or alternative uses when they are replaced or made unnecessary by new assets. Examples are pole line materials released when microwave is installed; shop equipment released when similar new equipment is acquired; rail replaced by rail in better condition; and land and track materials released when yards, shops, and terminals are made unnecessary by new facilities elsewhere. Some other types of actions, such as line changes and the installation of centralized traffic control, often permits some tract segments to be abandoned, thereby releasing track material for sale or other uses.

On the other hand, some actions involve the use of assets already owned, thereby prohibiting their sale or use of assets already for other purposes. Examples are car modifications and projects involving land and buildings already owned.

Physical Units: Feet (or miles) of rail, number of ties, acres of land, etc.

Monetary Value: The value of an asset released by an action depends on what will be done with it. The value of an asset occupied by an action, on the other hand, depends on what would have been done with it in the absence of the action. Regardless of whether it is the action or its alternative which makes the material available, one must first carefully specify what is assumed to happen to the asset both with and without the action, and identify the factors which change the cash flow stream. Depending on the particular circumstances, any of the following might be involved: payment received from selling the asset; a multi-year stream of income produced by the asset in some use; tax paid on the sale of the asset; expenditure for dismantling and or moving the asset; recapture by the IRS of investment tax credit taken when the asset was purchased (if it had been in use for less than seven years). It is the use of the released asset which values it. Thus, a released asset such as rail which, by cascading, results in the subsequent release of less valuable rail, must be valued in its use and not as the value of subsequently released assets.

In cases in which the asset is transferred to another use which produces income over several years, the effect of releasing the asset extends over several years, and must be expressed as a series of annual cash flows, rather than a lump sum.

Special Features: A common error in project evaluations is to value a used asset at its book value (i.e., purchase price less accumulated depreciation). The book value may be far from the value of the asset on the open market, especially in the case of rail released by track abandonments and land released by the abandonment of facilities in urban areas. The only way the book value of retired assets enters into the cash flow stream is in determining the tax paid on the sale of the asset (or the tax saving if the asset is discarded or sold for less than its book value).

In calculating the tax paid on the sale of a released asset, the ordinary tax rate (48%) should be used, except when the capital gains rate applies.

It is sometimes difficult or impossible to estimate the contribution to profit which a particular asset, such as second hand rail, will produce in an alternative use. In such cases, it is better to do the financial analysis on the assumption that the asset in question would be sold at its fair market value (even though it would in fact be put to an alternative use), rather than leaving the asset out of the computations entirely.

CONTRIBUTION FROM TRAFFIC

Characteristic Actions: Actions which affect the availability and attractiveness of the railroad to shippers. The action may involve giving the shipper better access to the railroad (track extensions and terminal improvements) or better service. Line consolidations, on the other hand, may involve abandonments which deprive some shippers of service, or may result in such degradations in service quality that some shippers switch to other carriers. Faster service can result from more power or improvements in track, yards, terminals, signals, and communication. Another component of service quality, reduced loss and damage to lading, can be occasionally improved by eliminating accidents (wayside warning devices), using specialized cars, and making improvements to yard and terminal facilities. Service quality can also be enhanced by purchases of additional freight cars and trailers, so as to reduce the likelihood of car shortages. Another aspect of service quality is reliability, which may be affected by improvements in yards, terminals, and communications, as well as the elimination of accidents. Still another component of service quality is the cost to the shipper of packing and loading, which may be affected by investments in specialized cars and terminal facilities.

Physical Units: Car-loads.

Monetary Value: The contribution to profit is found by subtracting the variable cost of moving the traffic from the associated revenue. The variable cost is best estimated by a careful study of the operations and costs of the particular movements involved.

Such a study is not practical for certain traffic. In these cases the best alternative may be to estimate the variable cost using system averages, as is done in the Interstate Commerce Commission's Rail Form A Carload Cost Scales, and Rail Revenue Contribution studies. Where appropriate, such system average costs should be adjusted to exclude costs not involved in the particular movement, and to reflect the current, not the historical, costs of assets to be purchased in the future.

Special Features: The contribution from new traffic resulting from an improvement is extremely important, but it is also one of the most difficult of all project benefits to estimate. One major problem is estimating the volume of traffic likely to result from a particular improvment, especially if the improvement affects service quality. A second serious problem is estimating the variable cost of particular movements. (These estimates may be facilitated by a six-part FRA cost study currently in progress.)

LABOR REQUIREMENTS

Characteristic Actions: Labor requirements are often reduced by automation, facility consolidation, faster train running times, reductions in switch engine requirements, and better communications for operations, and reductions in maintenance needs. On the other hand, actions involving new or expanded yards, terminals, or shop facilities may increase manpower requirements.

Physical Units: Man-hours, number of employees.

Monetary Value: The value of labor depends on the particular situation. If the action results in a change in the number of employees or in overtime, hours, the wages and fringe benefits associated with that change directly affects the railroad's cash flow. If an action changes or eliminates work for employees without changing jobs or overtime, the change will affect the railroad's cash flow if either:

The man-hours released or occupied by the change can be used on other profitable tasks which would otherwise not be done, or which would be accomplished by paying overtime or hiring more people; or

The action can be combined with one or more other actions, each of which saves or requires a fraction of an employee, so that the set of actions results in a change in the size of the work force.

In either case, the value of the man-hours released or consumed is the cost of the associated wages and fringe benefits. On the other hand, if the result of the action is simply to give existing employees more (or less) free time on the job, no cash impacts should be attributed to the change in the amount of work.

Special Features: There are several different kinds of labor which a project might affect: road crews, yard crews, maintenance-of-way, shop, inspection, clerical, and other.

Determining the wages and fringe benefits associated with a particular man-hour is often not straightforward because of rules governing employee compensation. The payment of some train crews on a mileage rather than a time basis is an example.

Wage and fringe benefits savings resulting from the elimination of jobs may be at least partially offset by costs incurred as a result of labor protection agreements. Depending on the situation, these costs may be lump-sum or recurring. Determination of employee protection costs is complicated by the fact that the individual who holds a position which is to be eliminated may not be the person who is actually laid off as a result of the elimination. Rather, the person whose job is eliminated may displace a person with less seniority holding a similar job. That person may, in turn, displace another employee and so on.

LOCOMOTIVE REQUIREMENTS

Characteristic Actions: Actions reducing train running time (track upgrading, line changes, signal system improvements, etc.), or which permit moving the same traffic with fewer trains (yard consolidations) or with fewer terminal delays (yard and terminal improvements) can all reduce the number of road engines needed. The number of switch engines needed can be reduced by some types of yard and terminal improvements, such as yard consolidations, track changes, and the installation of weigh-in-motion scales. Actions which lead to increased traffic, such as track extensions, may increase the need for both types of locomotives.

Physical Units: Locomotive-years (or locomotive-hours or locomotive-days). Note that one does not have to save 365 locomotive-days to save a locomotive-year, since locomotives are not available for service 365 days per year because of maintenance work. If a railroad's locomotives were available for service 78% of the time, it would only have to save 285 locomotive-days to save a locomotive-year.

Monetary Value: One way to estimate the value of a locomotive-year is the following four-step process:

1. Estimate the after-tax cash flow stream resulting from owning a locomotive. The components of this stream would be: the investment expenditure; investment tax credit; tax savings from depreciation; normal maintenance; overhauls; and salvage value. The cash flow stream must be in constant dollars of the same base year as would be used in the rest of the IRR computation.

2. Calculating the net present value of the cash flow stream, using the yield on 180-day United States treasury bills as the discount rate.

3. Find a stream of equal annual outlays which produces the same net present value as was found in Step 2. The annual outlay may be found by multiplying the net present value by

$$\frac{r(1+r)^n}{(1+r)^n-1}$$

where r is the yield in Sept 2, and n is the number of equal annual outlays.

4. Find the pre-tax equivalent of the after-tax annual payment found in Step 3, by dividing the after-tax figure by one minus the railroad's marginal tax rate. This is the pre-tax value of a locomotive year, expressed in dollars of the base year chosen in Step 1.

Increased locomotive productivity is somewhat analogous to increased labor productivity (see Labor Requirements) in that it may not always lead to significant cash savings. This is especially true with switch engines, since a decrease in car movements may not reduce the number of engines required if the number of locations which the switch fleet must serve does not also change. On the other hand, reducing the number of locations covered (by consolidating yards, for example) may decrease switch engine requirements. As in the case of increased labor productivity, increased locomotive productivity affects a railroad's cash flow only if a locomotive can be sold (or a purchase avoided) or if the locomotive is able to do other profitable work which would not be done otherwise.

Special Features: The locomotive values computed using the procedure above include maintenance and overhaul expense, but not fuel or other labor expense. Therefore any concomitant change in fuel or labor (except maintenance) should be estimated separately. Care should be taken to exclude changes in locomotive maintenance costs from any other estimates of changes in maintenance costs resulting from the investment project.

REQUIREMENTS FOR CARS, TRAILERS, AND CONTAINERS

Characteristic Actions: Actions which change train running time (such as track upgrading, purchase of additional power, line changes and signal improvements); actions which change the time cars spend in yards, or permit bypassing yards altogether (yard improvements and improved communication systems); actions which change the time cars are out of service for maintenance (shop facilities, car modifications, track upgrading); and actions which affect the turnaround time for cars in terminals.

Physical Units: Car-days.

Monetary Value: The procedure for finding the value of a locomotive-year or day is equally applicable to cars. (See Locomotive Requirements).

Another acceptable approach is to use per diem costs (including incentive per diem) since those charges approximate the cost of ownership. Although incentive per diem is in addition to car ownership costs, its inclusion in the car-day value is justified because it reflects, to some degree, the fact that a railroad sometimes loses business during short peaks in demand, because it is not immediately able to buy or hire the cars necessary to take advantage of a particular business opportunity.

Over the long run, however, a railroad need not continually lose traffic, so long as it is willing to incur the cost of owning a sufficient number of cars. Therefore, it is not appropriate to use the investing railroad's average contribution per car-day to value improved car utilization in IRR calculations. Given that per diem is a satisfactory approximation to the cost of car ownership, there is no need to distinguish between foreign car-days saved and investor car-days saved by an action.

Special Features: The valuation of improved car utilization is complicated by the fact that some projects, such as improvements in classification yards, may affect the entire car fleet, while other projects may affect only certain kinds of cars. For example, it may be that all the cars affected by a particular terminal improvement are refrigerator cars. The car-day value to be used is therefore not necessarily the same in all projects. Rather, it depends on the type of cars involved.

MAINTENANCE MATERIAL CONSUMPTION

Characteristic Actions: Since nearly all assets require maintenance, almost any action involving the acquisition of new assets will lead to expenditures for maintenance materials. On the other hand, actions which involve taking assets out of service, such as replacements, eliminate the need to maintain the retired assets. Improving track conditions may decrease equipment maintenance, while decreasing traffic volumes may decrease track maintenance needs.

Primary Units: List of materials involved (and quantities).

Monetary Value: The value of maintenance materials is the price of those materials (plus freight in and labor added, if any). Where a direct relationship exists between maintenance labor and materials, it may be more convenient to first estimate man-hours and then compute material costs in proportion to the man hours.

Special Features: The material costs (or savings) associated with changes in maintenance may include work equipment, as well as the materials consumed during maintenance.

Usually the best basis for predicting maintenance costs is the maintenance history of similar assets in similar service. Manufacturers can also sometimes provide projections of maintenance expense. To the extent practical, care should be taken to specifically reflect cyclical maintenance (overhauls) by assigning the maintenance costs (or savings) to the years in which they will actually occur, rather than normalizing, or smoothing out, the cash flow stream.

Assets which permit maintenance savings often involve maintenance costs which partially offset those savings.

ENERGY CONSUMPTION

Characteristic Actions: Actions changing locomotive activity or locomotive efficiency. Line changes and locomotive replacements may reduce fuel consumption by road engines. Improvements in yards and terminals, as well as locomotive replacements, may reduce the fuel consumed by switch engines. Improvements in buildings and structures can cut heating costs.

Physical Units: Gallons, kilowatt-hours, etc.

Monetry Value: Found by multiplying the fuel or electricity by the current price per unit.

Special Features: Road engine energy consumption generally varies with gross tonmiles and speed. Yard engines are frequently idling, consuming energy, even when not in use. Thus, energy consumption may vary with the number of switch engine crew shifts rather than the amount of work done. Care should be taken not to count changes in locomotive energy consumption twice, once as a change in locomotive requirements and once as a change in energy consumption.

ACCIDENT RATES AND SEVERITY

Characteristic Actions: Accidents may be reduced by wayside warning detectors (hot box detectors, grade crossing protection, dragging equipment detectors, etc.), lading protection devices, some specially equipped cars, some yard and terminal improvements, and track upgrading.

Physical Units: Accidents (of several different types) per year.

Monetary Value: Only the monetary cost likely to be borne by the railroad would be relevant to the IRR computation. This would include damage to equipment, roadway and lading, and the cost of wreckage removal as well as injury to people. The expected cost of an accident varies drastically, depending on the particular situation.

Special Features: Accidents delay trains and yard and terminal operations. Thus, actions which reduce accidents may also improve car and locomotive productivity. Care should be exercised that such benefits are counted only once.

EXPENDITURES NEEDED TO MEET LEGAL REQUIREMENTS

Characteristic Actions: Actions permitting abandonment of old facilities or equipment may reduce the need for such expenditures. New facilities may make some such expenditures necessary.

Physical Units: List of actions, such as grade crossing protection, water treatment facilities, or the installation of retention toilets, which would be required to bring the facilities or equipment in question up to legal standards.

Monetary Value: The total cost of the improvements including engineering (except engineering work already done), capital expenditure, maintenance, and operation. These expenditures should be offset by the appropriate tax reductions (resulting from depreciation and investment tax credit) which would result from those improvements.

SALVAGE VALUE

Characteristic Actions: Acquisition of new assets or disposal or existing assets.

Physical Units: List of the particular assets involved (such as tamping machine, 500' of 112# rail, etc.)

Monetary Value: The cash flow resulting from disposing of the assets or using them elsewhere. (See Use of Assets).

Special Features: The salvage value of most assets declines as the asset ages. The value of land often remains roughly constant, as does the value of materials in well maintained track. The salvage value of assets which cannot be used for other purposes, such as a culvert, is zero.

When salvage values are small relative to other benefits and costs, and when they are heavily discounted (because they occur far in the future), their impact on the IRR is likely to be negligible. In such cases, the salvage value can be safely ignored.

INSTALLATION AND START-UP EXPENSES

Characteristic Actions: Most fixed facilities.

Physical Units: Man-hours, list of materials required.

Monetary Value: As noted in the discussion of labor requirements the value of the labor depends on the particular situation. The value of the materials would normally be their market price.

Special Features: Often all or part of the expenditures needed to get a new asset in place and operating is capitalized. In such a case, the capitalized portion of the expenditure should be included as part of the investment cost, but not counted again as a start-up expense.

APPENDIX B—FORMS TO BE USED IN COMPUTING IRR

FORM I.—*Analysis of capitalized investment (constant dollars)*

Applicant .....
Project .....
Date .....
Sheet No. ..... of .....

Portion of investment covered by this sheet .....
Depreciation method used ..... Depreciation period .....
This investment would occur in the ☐ Project ☐ Base case (check one)

Federal Railroad Administration

[49 CFR Part 258]

[Docket No. 76-01]

RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Proposed Standards for Evaluation and Other Miscellaneous Amendments

On October 8, 1976, the Federal Railroad Administrator ("Administrator") published in the FEDERAL REGISTER (41 FR 44577) final regulations governing applications under section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act"), concerning the purchase of redeemable preference shares. On October 19, 1976, the President signed into law the Rail Transportation Improvement Act ("RTIA"), Pub. L. 94-555, which, among other things, amends sections 505 and 506 of the Act. The purpose of this document is to correct certain technical errors that were contained in the regulations, clarify or revise certain provisions, and amend this part to reflect changes to the Act contained in the RTIA. Major changes in sections 505 and 506 are discussed below.

AMENDMENTS TO SECTIONS 505 AND 506 CONTAINED IN THE RTIA

1. *Distinction between Facilities Rehabilitation and Improvement and Other Projects.* Prior to enactment of the RTIA, section 505(a) of the Act prohibited the Administrator from acting finally on an application for facilities rehabilitation and improvement financing until the date of publication of the Final Standards, Classification and Designation of Lines of Class I Railroads in the United States under section 503 (e) of the Act ("final section 503 report"). Section 212 of the RTIA eliminates this prohibition.

2. *Determination of the Public Interest.* Section 505(b)(2) of the Act sets forth factors which the Administrator must consider in determining the public interest. One of these factors is—

> The availability of funds from other sources at a cost which is reasonable under principles of prudent railroad financial management in light of the railroad's projected rate of return for the project to be financed • • •

Section 216(a)(2) of the RTIA adds as a factor which must be evaluated in determining whether the cost of funds from other sources is reasonable—

> The railroad's rate of return on total capital (represented by the ratio which such carrier's net income, including interest on long-term debt, bore to the sum of average shareholder's equity, long-term debt, and accumulated deferred income tax for fiscal year 1975) as determined in accordance with the uniform system of accounts promulgated by the [Interstate Commerce] Commission • • •

As the information required for this evaluation is available in reports filed with the Interstate Commerce Commission, no changes in the regulations with respect to this additional factor are required.

In determining the public interest under section 505(b)(2) of the Act, the Administrator must also evaluate and consider—

> The public benefits to be realized from the project to be financed in relation to the public costs of such financing and whether the proposed project will return public benefits sufficient to justify the public costs.

Section 216(a)(3) of the RTIA amends section 505(b)(2) of the Act to provide in addition that (except as between applications that would return equal public benefits, where funding priority is to be given to the application that provides safety improvements) in determining the extent to which a project will provide public benefits, the Administrator shall "give the highest priority to projects which will enhance the ability of the applicant carrier or other carriers to provide essential freight services". This requirement has been taken into consideration in the standards for evaluations and determinations under section 505(b)(2) of the Act, which are discussed below.

3. *Standards for Evaluations and Determinations under Section 505(b)(2) of the Act.* Section 212 of the RTIA provides that any regulations published under section 505 of the Act "• • • shall include specific and detailed standards in accordance with which the [Administrator] shall conduct the evaluations and make the determinations required in subsection (b)(2) of [section 505]." The conference report on the RTIA indicates that such standards should "• • • fully explain the rationale for, and method of, defining and determining the elements of the public interest." H.R. Rep. No. 94-1743, 94th Cong., 2d Sess. 47 (1976). These standards are published herein as a new subpart B of this part.

Section 505(b)(2) of the Act, as amended, requires the Administrator to consider the following three factors in determining if the requested financial assistance is in the public interest:

(A) The availability of funds from other sources at a cost which is reasonable under principles of prudent railroad financial management in light of the railroad's projected rate of return for the project to be financed and the railroad's rate of return on total capital for fiscal year 1975;

(B) The interest of the public in supplementing such other funds as may be available for railroad financing; and

(C) The public benefits to be realized from the project to be financed in relation to the public costs of such financing and whether the proposed project will return public benefits sufficient to justify the public costs.

In accordance with section 505(a) of the Act, as amended, these regulations set forth standards by which the Administrator will evaluate each of these factors to determine whether the requested financial assistance is in the public interest. An applicant will receive Federal assistance only if all of the standards have been satisfied. The Administrator will determine the appropriate level of funding for all projects that qualify for assistance. For example, where an applicant applies for funds sufficient to rehabilitate a section of mainline trackage to a physical level adequate to carry high volume of overhead traffic at high speeds, the Administrator may determine that the public interest justifies rehabilitation only to a level adequate to serve traffic originating or terminating on the line. A discussion of the standards proposed under each of the three factors follows below.

A. THE COST OF FUNDS AVAILABLE FROM OTHER SOURCES

Section 258.23 of these regulations proposes evaluation tests by which the Administrator can determine whether the cost of alternative funding from any of three different types of sources is unreasonable under principles of prudent railroad financial management, thus satisfying the first part of the evaluation process. The Administrator will carefully review the statement submitted under § 258.7(a)(7) of this part to determine whether applicant has thoroughly explored all alternative sources of funds, including funds available from affiliated companies or pursuant to arrangements under section 15(19) of the Interstate Commerce Act, 49 U.S.C. 15(19).

The first of the three standards, set forth in § 258.23(b)(1) of the proposed regulations, applies to "borrowed money" and establishes three tests of when the cost of such borrowing is unreasonable. If any of these tests is met, this standard is satisfied. Subparagraph (i)(A) of this standard recognizes that no railroad can remain viable by investing borrowed money at returns which are, on average, less than the concomitant costs. Because the after-tax, internal rate of return on a project (without giving effect to debt service) provides a measure of the maximum cost of capital which may be prudently incurred to finance that project, it would generally be financially imprudent for a railroad to employ borrowed money with an after-tax effective cost higher than a project's internal rate of return. If the interest cost of the money is not higher than the current market yield on debt securities of like tenor of the applicant (or, if none, of debt securities of like tenor of other companies having a Moody's bond rating similar to that of the applicant), however, that cost will not be deemed unreasonable.

Subparagraphs (i)(B) and (C) of this standard recognize that even where the rate of return on a project exceeds the cost of the financing, the cost of borrowing may nonetheless be unreasonable. Thus, under subparagraph (i)(B), if the financial condition and operating results of the applicant (after giving effect to a project's net cash stream) appear inadequate to enable the applicant to service its total debt, the cost of the borrowed money will be deemed unreasonable under principles of prudent railroad financial management. Under subparagraph (i)(C), if the applicant's fiscal 1975 rate of return on total capital, as defined in section 505(b)(2) of the Act, as amended, would be reduced by more than 10 percent as a result of a project whose size is reasonable in comparison to the applicant's total capitalization, the cost will be deemed to be unreasonable. This test may be applicable whether or not the return on the project exceeds the cost of financing. The test is made applicable only to projects whose total cost does not exceed 25 percent of the applicant's total capitalization so that increases in debt load remain at a reasonable level and the standard cannot be satisfied solely because of the magnitude of the project's cost.

The second of the three standards applies to "excess working capital". Working capital is deemed to be "excess" to the extent that (1) it represents an excess of the sum of cash, cash equivalents, and accounts and notes receivable over current liabilities including long-term debt due within one year net of any special funds to be used to pay that debt, and (2) its conversion into less liquid assets is not likely to impair the continuing operations of the railroad. The standard recognizes that every railroad manages its internally available funds to maximize the rate of return on those funds. Such management, whether through short or long range cash planning, establishes for the railroad an opportunity cost theoretically incurred when using such funds to foster internal business growth. The standard defines this opportunity cost as the effective after-tax annual percentage rate of return available on short term securities in which the applicant customarily invests. The cost of excess working capital will be deemed to be unreasonable if (i) the opportunity cost is equal to or greater than the rate of return on the project to be funded and (ii) the use of such excess working capital to finance the project would reduce the applicant's fiscal 1975 rate of return on total capital, as defined in section 505(b)(2) of the Act, as amended, by more than 10 percent.

The third of the three standards applies to "new equity capital" and sets forth different standards for common stock and preferred stock. The cost of new common stock equity is deemed to be unreasonable if the issuance and sale of such common stock would result in dilution of the book value of common stock held by the current shareholders or would reduce the applicant's rate of return on total capital, as defined in section 505(b)(2) of the Act, as amended, by more than 10 percent. The cost of new preferred stock equity is deemed to be unreasonable if the annualized percentage cost of the new issue, including dividends and placement charges, is equal to or greater than the rate of return on the project to be financed or the issuance would reduce the applicant's rate of return on total capital, as defined in section 505(b)(2) of the Act, as amended, by more than 10 percent. However, as provided in § 258.23(b)(3)(iii) of the proposed regulations, the issuance by the applicant of new private equity capital will not be deemed to be unreasonable if the applicant's long-term debt exceeds 67 percent of its total capitalization, regardless of dilutive effects and effects on the applicant's rate of return on total capital.

This standard may require the use of parent company figures if a railroad is a wholly-owned subsidiary. Because a parent company will benefit from improvements in subsidiary operating results, the Administrator will consider the possibility of parent company equity funding, regardless of how it is passed through to its railroad subsidiary, to be a viable source of "new equity capital".

B. THE PUBLIC INTEREST IN SUPPLEMENTING TOTAL RAILROAD FUNDING

Section 505(b)(2)(B) requires the Administrator to consider "the interest of the public in supplementing such other funds as may be available in order to increase the total amount of funds available for railroad financing." In determining whether a specific application is consistent with this overall objective of the Act, it is appropriate that the Administrator be able to evaluate the applicant's long-term role in a viable, efficient, competitive national rail system. Because the nation's railroads are separate, for-profit corporations providing important rail services, the viability of individual carriers is crucial to the overall viability of the system. It is therefore, appropriate that applicants be required to set forth a long-term program to achieve and maintain, without the need for continuing Federal assistance, essential rail services either as a viable business enterprise or through merger or consolidation. The information requirements of the regulations have been revised to require submission of such a program.

By the purchase of redeemable preference shares, the Federal government will be assuming equity ownership in individual corporations, not in the system as a whole. Fiduciary responsibilities, therefore, dictate that care be taken to assure that the applicant be able to redeem the preference shares according to their terms, and the second part of this standard so provides. Finally, because it would clearly not be in the public interest for railroads to undertake financial investments whose burden would undermine the overall financial condition of the corporation, section 258.25(b)(iii) of the proposed regulations provides that the rate of return on the proposed project must equal or exceed the yield applicable on the preference shares.

C. PUBLIC BENEFITS AND COSTS

The third area which the standards address is determination of public benefits and costs associated with each proposed project. Because of the multiplicity of project types and variations between applicants and their markets, the standards establish specific thresholds above which the public benefits associated with proposed projects are substantial and will exceed whatever monetary or social costs are involved, subject to an assessment of its environmental impact.

Consistent with the major thrust of the Act, as amended, the public benefit standards are based on the identification of project categories that will contribute to the establishment and continued maintenance of a high capacity, highly efficient, competitive interstate rail system, in order to provide for essential rail services to meet the current and future needs of the nation for rail transportation. Under section 505(b)(2)(B) of the Act, as amended, discussed above, the Administrator evaluates the applicant carrier and his ability to be a viable element of the national rail system. This section relates the specific project of the applicant to the public interest in strengthening the most significant segments of the national rail network. In this regard, the following four standards, or categories, have been established. If an applicant satisfies any one of these standards, the public benefits of the proposed project will be deemed to justify the public costs.

(1) *Essential Freight Services.* Section 505(b)(2) of the Act provides that (except as between applications that would return equal public benefits, where priority is to be given to the application that provides safety improvements) in determining the extent to which a project will provide public benefits, the Administrator shall "give the highest priority to projects which will enhance the ability of the applicant carrier or other carriers to provide essential freight services". While it could be argued that any service which is economic to the railroad or in demand by shippers is "essential", such an interpretation, by its very breadth, would render the statutory language meaningless as a guide to administrative action.

The proposed standard establishes seven categories of lines that provide essential freight services. Whenever the demand for funds to finance all qualified projects exceeds the availability of appropriated funds, projects which meet this standard will be financed first and in the order in which the category of lines to be rehabilitated or improved is set forth within the standard. The categories are primarily based on the density of traffic that is currently moving on the line or can be demonstrated with specificity to be reasonably likely to move on the line in the immediate future. These categories are set forth in § 258.27(b)(1) of the proposed regulations.

The proposed density standards do not identify an interstate rail system. Rather, the density standards when combined with the other elements of these regulations identify facilities which provide for substantial movements of freight traffic and are likely to survive any future restructuring of the existing system. It must be remembered that section 505 funding is interim in nature, and that subsequent studies will define the rail network essential to the national interest.

Within corridors of consolidation potential, as identified in the final section 503 report, and with regard to certain lower density mainlines, an additional threshold of two million net tons of revenue freight per mile originating or terminating on the line is used to identify lines that warrant investment to meet long-term service needs. Projects which involve a consolidation of lines or coordination of traffic flows are given priority over projects on lines of similar densities which do not involve a consolidation or coordination. Thus, under the proposed standard, the Administrator would not fund a project within a corridor of consolidation potential unless the facility on which funds are to be expended can be supported as a consolidated facility or as a line that will continue to be necessary to carry substantial traffic which originates or terminates on the line.

(2) *Competitive Freight Services.* The presence and viability of rail competition serving major markets is an integral element of a high capacity, highly efficient interstate rail network. On the other hand, rail competition now exists in many economic centers whose traffic base is too small to sustain the ability of even two railroads in the market to compete. The proposed standards, therefore, establish criteria for strengthening competition through two distinct types of assistance.

First, assistance may be given to rehabilitate or improve rail lines in markets where there is a sufficient level of traffic to support competition between two rail carriers. The proposed standard will assure that only those projects which are justified by current traffic levels and the presence of few rail carriers in the market will be funded. The information provided under § 258.7(a)(10) of the proposed regulations will be expected to confirm the strategic role of a carrier in a multi-road market as justification for assistance.

Second, assistance may be given to fund costs associated with the withdrawal of the applicant from a market when the applicant demonstrates his service is uneconomic at current levels of competition. Assistance under this provision may include extraordinary labor costs that result from the withdrawal.

(3) *Special Projects.* Projects which eliminate identifiable and severe public safety hazards will be deemed to have public benefits which justify the public costs.

(4) *Equipment Rebuilding.* Most railroads are able to finance acquisition of new equipment without recourse to Federal assistance programs. For those railroads which cannot obtain private financing of new equipment, the loan guarantee program under section 511 of the Act, as amended, is an available Federal assistance source.

However, because financing of equipment rebuilding, unlike equipment acquisition, may not be available from private sources or appropriate under section 511 of the Act, the fourth standard with respect to public benefits would allow for funding of equipment rebuilding if that equipment is necessary for the applicant to serve adequately current and reasonably prospective traffic which originates or terminates on the lines of the applicant. Rebuilding of locomotives would be allowed where necessary to provide local service and switching.

4. *Order of Funding.* Section 505(b)(2) of the Act requires the Administrator to "* * * act upon each * * * application within 6 months after the date on which all required information is received." Applicants will be notified promptly whether their application is complete and, if not, of the deficiencies. Within 6 months after the date on which the application is complete, the Administrator will determine whether funding of the proposed project is in the public interest.

A determination by the Administrator that the proposed assistance is in the public interest, however, does not automatically mean that the proposed project will be funded. A project will only be funded if there are sufficient appropriated funds available after funding all other projects that have been found to have greater public benefits and thus a higher priority for funding. The order of funding is set forth in § 258.29 of the proposed regulations. It is anticipated that demand for preference share financing will be such that funds will be available only for projects in the higher priority groups.

Fiscal year 1977 appropriated funds become available for commitment on the date of publication of the final standards for evaluations and determinations under section 505 of the Act, as amended, and each application received by that time will be assigned a funding priority based on its relative public benefits. Potential applicants for fiscal year 1977 funds should, therefore, file their applications as soon as possible. Fiscal year 1978 appropriations become available for commitment on October 1, 1977. Projects which have been approved prior to that date will be weighed against each other on that date for available fiscal year 1978 funds.

5. *Priority and Dividend Rate of Redeemable Preference Shares.* The RTIA makes two changes in the characteristics of redeemable preference shares as prescribed in section 506 of the Act. First, section 213 of the RTIA provides that the Administrator may make redeemable preference shares subordinate to any common stock that was issued pursuant to a court-approved reorganization plan under section 77 of the Bankruptcy Act (11 U.S.C. 205) and in exchange for securities that were senior in right to common stock, if the railroad was in reorganization under section 77 prior to February 5, 1976. Second, section 214 of the RTIA modifies the dividend rate payable on preference shares by requiring a minimum of fifteen annual redemption payments (except in the event of prepayment) and providing a maximum yield with respect to those shares which are used solely to reduce the deferred maintenance on facilities. With respect to this latter change, section 214 of the RTIA provides that the yield on such shares shall not be less than the minimum yield that could be calculated under sections 506(a)(3) and (4) of the Act or more than—

Such railroad's rate of return on total capital (represented by the ratio which such carrier's net income, including interest on long-term debt, bore to the sum of the average shareholder's equity, long-term debt, and accumulated deferred income tax credits for the 3 fiscal years preceding the date of submission of the application) as determined in accordance with the uniform system of accounts promulgated by the [Interstate Commerce] Commission in those cases in which such rate of return exceeded such minimum permissible yield.

For the purpose of this section, deferred maintenance is defined as the accumulated physical deterioration in the component parts of a railroad facility, as defined in section 501(3) of the Act, as amended, which causes that facility to fail to meet the standard reasonably necessary to provide adequate freight services. The amount of deferred maintenance that exists on a line is therefore related to the type and density of traffic and the desired quality of service, as well as the previous condition of the facility.

The assessment of the physical condition or remaining useful life of the component parts of a facility and the amount of deferred maintenance in a facility must be based on engineering and maintenance practices customary in the industry. The determination must be made by professionally qualified railroad engineers and managers, projecting the quantities and types of work necessary to restore the facility to a condition adequate to meet current service requirements. The Administrator will review the applicant's submittal in this regard and carefully examine the methodology and assumptions used to calculate the amount and type deferred maintenance associated with a project.

Where it is determined that the proposed Federal assistance is to be "* * * expended solely to reduce deferred maintenance on facilities * * *", a schedule of dividend and redemption payments for the preference shares will be established which produces the maximum yield permissible under section 506(a)(5) of the Act, as amended. In the case of shares whose proceeds result in no reduction in the level of deferred maintenance on facilities, a schedule of dividend and redemption payments will be established which results in a yield that equals the cost of money to the government, except where the public benefits associated with the proposed project clearly warrant a lower yield. In all other cases, the yield will be a weighted average that reflects the portion of total project cost which is expended to reduce deferred maintenance.

REVISIONS NOT REQUIRED BY THE RTIA

Revisions not required by the RTIA are proposed in five areas. First, the requirements of §§258.9 (a) and (b), 258.13, and 258.15 of the regulations will be deleted because they set forth statutorily

prescribed duties or powers of the Administrator or Comptroller General of the United States or deal with matters that are more properly addressed in the financing documents. If an application is approved, purchase of redeemable preference shares will occur in accordance with a financing agreement which will include such terms and conditions as the Administrator deems appropriate, consistent with the purposes of the Act. The terms and conditions that will be imposed as a minimum in the financing documents will be discussed with applicants at an appropriate time during the application process.

Second, it is proposed that renumbered § 258.9 (c), (d) and (e) be revised to require the submission of additional balance sheet or income statement data needed to assess accurately the applicant's financial condition both before and after giving effect to the assistance requested in the application. There has been added to the provisions of § 258.9(c) a requirement that applicants submit the most recent year-end general balance sheet certified by applicant's independent public accountants, if available. Section 258.9(d) has been revised to add the requirements of (1) a submission of applicant's most recent annual income statement certified by applicant's independent public accountants, if available, (2) a spread sheet showing unaudited monthly and year-to-date income statement data for the calendar year in which the application is filed, (3) estimated month-end balance sheets for the months between the date of the unaudited balance sheet presented in Exhibit C and the filing of the application, and (4) a forecasted balance sheet as at the year end for the year in which the application was filed. Section 258.9(e) is amended to add the requirement of forecasted year-end balance sheets for each of the four years subsequent to the year in which the application is filed, both before and after giving effect to the proceeds of the assistance requested in the application. An applicant which does not submit a balance sheet and income statement that have been certified by independent public accountants, as requested in § 258.9 (c) and (d), will be required to supply such statements prior to closing in the event its application for financial assistance is approved, and execution of the financing documents will be contingent upon such certification being satisfactory to the Administrator.

Third, in response to comments by several applicants that more guidance is desired with respect to environmental assessments, § 258.7(a)(8) of the regulations has been revised and an appendix to the regulations has been added which sets forth required environmental information.

Since publication of the initial regulations on October 8, 1976, FRA has published procedures for computing the internal rate of return on proposed projects. Accordingly, § 258.7(a)(4)(v) has been revised to require applicants to follow that methodology.

Finally, a new § 258.7(a)(11) has been added which permits an applicant to supplement his application with any additional information that the applicant feels will assist the Administrator in making the evaluations or determinations required by the Act or otherwise supports the application.

The impact of section 505 assistance, including the inflationary impact of the regulations, was fully considered prior to publication of the initial regulations on October 8, 1976. The standards proposed herein will not affect the overall costs or benefits of the program as it was set forth in the initial regulations. Accordingly, an evaluation of the expected impact of the regulations pursuant to the Department of Transportation Policies to Improve Analysis and Review of Regulations (41 FR 16200) is not required.

Any person or organization may submit written data, views, or comments on these proposed amendments to the Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. All material received on or before February 24, 1977, will be considered by the Administrator before taking final action on the proposed amendments. To the extent practicable, comments received after that date will also be considered. All comments received will be available for examination during regular business hours in Room 5101, Nassif Building, 400 Seventh Street, SW., Washington, D.C. The proposals contained in this notice may be changed in light of comments received.

In consideration of the foregoing, it is proposed that 49 CFR Part 258 be amended as follows:

1. The heading to the regulations is amended to read:

PART 258—REGULATIONS GOVERNING SECTION 505 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Subpart A—Procedures for Applications for Preference Share Financing

Sec.
258.1 Applicability.
258.3 Definitions.
258.5 Eligibility.
258.7 Form and content of application..
258.9 Required exhibits.
258.11 Preapplication and application procedure.
258.13 Information requests.
258.15 Waivers and modifications.

Subpart B—Standards for Evaluations and Determinations Under Section 505(b)(2) of the Act

258.17 Purpose.
258.19 Definitions.
258.21 Evaluation process.
258.23 Cost of funds available from other sources.
258.25 Public interest in supplementing total railroad funding.
258.27 Public benefits and costs.
258.29 Order of funding.
Appendix—Environmental Assessments.

AUTHORITY: Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210, as amended; the Department of Transportation Act, 49 U.S.C. 1651 et seq., Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

§ 258.1 [Amended]

2. In the first sentence of § 258.1, the phrase ", as amended" is inserted after "1976."

3. Section 258.3(a) is revised to read:

§ 258.3 Definitions.

(a) "Act" means the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210, February 5, 1976), as amended.

4. Section 258.3(g) is deleted, and § 258.3 (h) and (i) are redesignated as § 258.3 (g) and (h), respectively.

5. Section 258.3(j) is deleted, and § 258.3 (k) through (p) are redesignated as § 258.3 (i) through (n), respectively.

6. Section 258.7(a)(4)(v), and (8) are revised to read:

§ 258.7 Form and content of application.

(a) * * *
(4) * * *

(v) Estimated rate of return on the project, calculated in accordance with the methodology set forth in subpart C of part 260 of Title 49 of the Code of Federal Regulations (42 FR _____, January 25, 1977).

* * * * *

(8) Detailed assessment of the impact of the project on the environment, in the general format and including the information set forth in the appendix to this part.

7. The word "and" following the semicolon in § 258.7(a)(9) is deleted, § 258.7 (a)(10) is renumbered as § 258.7(a)(12), and two new sections numbered 258.7(a)(10) and (11) are inserted which read:

(a) * * *

(10) A narrative statement detailing management's long-term program to achieve or maintain applicant's ability to provide essential rail freight services as a viable business enterprise. The statement shall include as a minimum a discussion of each of the elements listed as (i) through (viii) in this section including how each relates to the four year financial forecasts provided in Exhibits E and G of the application. The statement should not be limited, however, to the next four years, but should cover a period sufficient in management's judgment to demonstrate applicant's ability to maintain adequately on a continuing basis plant and equipment and meet all present and future financial obligations.

(i) Applicant's current and prospective traffic base, including by commodity and geographic region major markets served, major interchange points, and market development plans.

(ii) Applicant's current operating patterns, and plans, if any, to enhance its ability to serve the prospective traffic base identified in (a)(i) of this section.

(iii) System-wide plans to maintain (A) equipment and (B) right-of-way by major segments at levels adequate to serve markets and maintain operating patterns discussed in (i) and (ii) above.

(iv) Active or proposed plans, if any, including any application currently pending before the Commission, to seek a corporate merger with another carrier.

(v) Specific plans for rationalization of marginal or uneconomic services including coordination with other carriers in jointly served markets, withdrawal from markets served by two railroads other than the applicant and in which the applicant's services produce marginal or no earnings, and the abandonment of uneconomic facilities.

(vi) Facilities and services not discussed in (v) above that are physically or operationally susceptible to consolidation or coordination with other carriers or internally, and summary of plans or discussions with other carriers regarding same.

(vii) Relationship of current requests for Federal financial assistance to the program discussed in this section, including a specific explanation of the impact of the assistance as stated in the financial forecasts of applicant in Exhibits E and G.

(viii) Any plans to seek further financial assistance from the FRA or assistance from any other public source.

(ix) A full explanation of the methodology and reasoning used in making the analyses specified in this section together with supporting documentation as appropriate.

(11) Any information that the applicant deems appropriate to convey a full and complete understanding of the project and its impact or to assist the Administrator in making the statutorily prescribed determinations; and

§ 258.9 [Amended]

8. Section 258.9(a) and (b) are deleted, and § 258.9 (c) through (l) are redesignated as § 258.9 (a) through (j), respectively, with concomitant changes in the lettering of the exhibits required therein.

9. The portion of renumbered § 258.9 (c) through the colon is revised to read:

* * * * *

(c) *Exhibit* C. A copy of applicant's most recent year-end general balance sheet certified by applicant's independent public accountants, if available, and a copy of applicant's most recent unaudited general balance sheet as of a date no less recent than the end of the third month preceding the date of filing of the application. The unaudited balance sheet shall be presented in account form and detail as required in schedule 200 of the Commission's annual report R–1 or R–2, as appropriate, together with the following schedules (where changes in accounts from the end of the prior year to date of the application have not been significant, copies of the appropriate schedules in the prior year's R–1 or R–2 with marginal notations listing the changes may be submitted).

10. Renumbered § 258.9 (d) and (e) are revised to read:

* * * * *

(d) *Exhibit D.* Applicant's most recent annual income statement certified by applicant's independent public accountants, if available, and a spread sheet showing unaudited monthly and year-to-date income statement data for the calendar year in which the application is filed in account form similar to that required in column (a) of schedule 300 of annual report R–1 or R–2, as appropriate. For those months preceding and ending upon the date of the unaudited balance sheet presented in Exhibit C, the income statement data shall be reported on an actual basis and so noted. For those months between the dates of the unaudited balance sheet and the filing of the application, the income statement data shall be reported on an estimated basis and so noted and shall be submitted in conjunction with corresponding estimated month-end balance sheets. For those months between the dates of the application and the end of the year, the income statement data shall be presented on a forecasted basis and so noted and shall be submitted in conjunction with a forecasted balance sheet as at the year end.

(e) *Exhibit E.* Spread sheets showing for each of the four years subsequent to the year in which the application is filed, both before and after giving effect to the proceeds of the assistance requested in the application:

(1) Forecasted annual income statement data in account form and detail similar to that required in column (a) of schedule 300 of annual report R–1 or R–2 as appropriate; and

(2) Forecasted year-end balance sheets in account form and detail similar to that required in schedule 200 of annual report R–1 and R–2, as appropriate.

These spread sheets shall be accompanied by a statement setting forth the bases for such forecasts.

11. Renumbered § 258.9(f) (1) is amended by inserting the word "unaudited" immediately prior to the words "balance sheets" and by striking "Exhibit E" and inserting in lieu thereof "Exhibit C".

12. Sections 258.13 and 258.15 are deleted, and §§ 258-17 and 259.19 are renumbered as §§ 258.13 and 258.15, respectively.

13. A new Subpart B is added which shall read:

Subpart B—Standards for Evaluation and Determinations Under Section 505(b)(2) of the Act

Sec.
258.17 Purpose.
258.19 Definitions.
258.21 Evaluation process.
258.23 Cost of funds available from other sources.
258.25 Public interest in supplementing total railroad funding.
258.27 Public benefits and costs.
258.29 Order of funding.

(Sec. 505, Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94–210, as amended).)

Subpart B—Standards for Evaluations and Determinations Under Section 505(b) (2) of the Act

§ 258.17 Purpose.

This subpart prescribes standards in accordance with which the Administrator will make the evaluations and determinations required under section 505(b) (2) of the Act.

§ 258.19 Definitions.

As used in this subpart—

(a) "Consolidation" means the combination of separate rail facilities into fewer facilities and the abandonment of the excess facilities.

(b) "Coordination" means the combination of rail freight traffic flows through the use of joint facilities arrangements or internally that result in a partial or complete discontinuance of service on the less essential facility.

(c) "Corridor of consolidation potential" means a corridor of consolidation potential as identified in the Final Standards, Classification and Designation of Lines of Class I Railroads in the United States, published by the United States Department of Transportation pursuant to section 503(e) of the Act.

(d) "Excess Working Capital" means the amount, if any, by which the current assets of an applicant (consisting of cash, cash equivalents, and accounts and notes receivable) exceeds the sum of (i) current liabilities of the applicant and (ii) long-term debt due within one year, deducting special funds, if any, to be used to pay that debt, and the deployment of which working capital is not likely to impair the continuing operations of the railroad.

(e) "Mainline" means a line that has an overall annual traffic density of at least five million gross ton-miles per mile.

(f) "Ratio" means the applicant's fiscal 1975 rate of return on total capital, represented by the ratio which such applicant's net income, including interest on long-term debt, bore to the sum of average shareholders' equity, long-term debt, and accumulated deferred income tax credits in fiscal year 1975.

(g) "Return" means the anticipated after-tax, internal rate of return on a proposed project, computed in accordance with the methodology set forth in Subpart C of Part 260 of Title 49 of the Code of Federal Regulations (42 FR 4652, January 25, 1977).

§ 258.21 Evaluation process.

(a) Section 505(b) (2) of the Act requires the Administrator to consider the following three factors in determining if financial assistance applied for under this part is in the public interest:

(1) The availability of funds from other sources at a cost which is reasonable under principles of prudent railroad financial management in light of the railroad's projected rate of return for the project to be financed and the applicant's Ratio.

(2) The interest of the public in supplementing such other funds as may be available for railroad financing; and

(3) The public benefits to be realized from the project to be financed in relation to the public costs of such financing and whether the proposed project will return public benefits sufficient to justify such public costs.

(b) In accordance with section 505(a) of the Act, this subpart sets forth standards for each of the three factors listed above, by which the Administrator will

make his determination of whether the requested financial assistance is in the public interest. Except where otherwise stated in this subpart, all of the standards must be satisfied in order for the applicant to qualify for the requested financial assistance. The Administrator retains discretion to determine the appropriate level of funding for all projects that qualify for assistance.

§ 258.23 Cost of funds available from other sources.

(a) *General.* Funds available from other sources may take the form of borrowed money, excess working capital, or new equity capital. Where the form of alternative financing combines one or more of these forms, an analysis of each affected form will be made independently. For example, if convertible debt is available, the cost of such debt will be evaluated against the standards below as if the convertible debt were borrowed money, and as if conversion to new equity capital would occur immediately on issuance. The Administrator will review the statement submitted under § 258.7(a) (7) of this part to determine whether applicant has thoroughly explored all alternative sources of funds, including funds available from affiliated companies or pursuant to transactions under section 15(19) of the Interstate Commerce Act, 49 U.S.C. 15(19).

(b) *Standards.* (1) *Borrowed Money.* The cost of borrowed money will be deemed to be unreasonable under principles of prudent railroad financial management if any of the following is true.

(i) The after-tax, effective, annualized cost (expressed as a percentage and including interest, placement, trustee's and other related charges) of borrowed money (hereafter in this § 258.23(b) (1) referred to as "Cost") is equal to or greater than the Return, and the Cost is higher than the current market yield on debt securities of like tenor of the applicant or, if none, then the market yield on debt securities of like tenor of other companies having a similar Moody's bond rating;

(ii) The financial condition and operating results of the applicant (after giving effect to a project's net cash stream) appear inadequate to enable the applicant to service its total debt; or

(iii) The amount of borrowed money is less than 25% of the denominator of the applicant's Ratio and the borrowing would result in a reduction of more than 10% in the applicant's Ratio, computed by adding an amount equal to the product of the Return and the borrowed money to the numerator of the Ratio, and an amount equal to the product of (I) the borrowed money and (II) the sum of 100% and the spread between the Return and the Cost (computed by subtracting the Cost from the Return) to the denominator of the Ratio.

(2) *Excess Working Capital.* The cost of Excess Working Capital will be deemed to be unreasonable under principles of prudent railroad financial management if (i) the after-tax opportunity cost, expressed as an annual percentage rate representing the return available on short term securities customarily invested in by the applicant (hereafter in this § 258.23(b) (2) referred to as "Cost"), of applicant's Excess Working Capital is equal to or greater than the Return; and (ii) the railroad's Ratio is reduced by more than 10% when an amount equal to the product of the Excess Working Capital to be used for the project and the negative spread between the Return and the Cost (computed by subtracting the Cost from the Return), is added to both the numerator and the denominator of the Ratio.

(3) *New Equity Capital.* (i) *Common Stock.* The cost of new common stock equity will be deemed to be unreasonable under principles of prudent railroad financial management if either of the following is true.

(A) An amount equal to the product of the consideration to be received by the applicant or its holding company upon the issuance and sale of new common stock equity (hereafter in this § 258.23 (b) (3) referred to as "Consideration") and the sum of 100% and the Return is less than an amount equal to the product of the tangible book value per common share immediately prior to the issuance and sale of new common stock equity and the number of shares of common stock to be issued and sold; or

(B) The amount of Consideration is less than 25% of the denominator of the applicant's Ratio and the issuance and sale would result in a reduction of more than 10% in the applicant's Ratio, computed by adding an amount equal to the product of the Return and the Consideration to the numerator of the Ratio, and an amount equal to the product of the Consideration and the sum of 100% and the Return to the denominator of the Ratio.

(ii) *Preferred Stock.* The cost of new preferred stock equity will be deemed to be unreasonable under principles of prudent railroad financial management if either of the following is true.

(A) The effective annualized cost (expressed as a percentage and including dividends and placement charges) of the preferred stock (hereafter in this subparagraph 258.23(b) (3) referred to as "Cost") is equal to or greater than the Return; or

(B) The amount of Consideration is less than 25 percent of the denominator of the applicant's Ratio and the issuance and sale would result in a reduction of more than 10 percent in the applicant's Ratio, computed by adding an amount equal to the product of the Return and the new preferred stock equity to the numerator of the Ratio, and an amount equal to the product of the new preferred stock equity and the sum of 100 percent and the spread between the Return and the Cost (computed by subtracting the Cost from the Return) to the denominator of the Ratio.

(iii) Notwithstanding subdivisions (b) (3) (i) and (ii) of this section, the standard will not be deemed to be satisfied if the applicant's long-term debt prior to the issuance and sale of new equity capital exceeds 67 percent of its total capitalization.

§ 258.25 Public interest in supplementing total railroad funding.

(a) *General.* The standards set forth in paragraph (b) of this section will enable the Administrator to evaluate an applicant's long-term role in a viable national rail system in order to determine that the application is consistent with "the interest of the public in supplementing such other funds as may be available for railroad financing," as stated in section 505(b) (2) (b) of the Act.

(b) *Standards.* (i) Management's long-term program submitted under § 258.7 (a) (10) of this part is reasonably likely to assure that essential rail freight services currently provided by the applicant will continue to be provided by the applicant as a viable business enterprise or by another carrier as the result of a merger of companies or consolidation of lines, and the financing applied for will contribute to that program.

(ii) The applicant is reasonably likely to be able to redeem any preference shares issued to finance the project according to a dividend and redemption schedule which results in a yield as set forth in paragraph (b) (iii) of this section.

(iii) The Return on the proposed project is not less than the yield on the redeemable preference shares, expressed as the effective annual percentage rate applicable from the date of issuance of the shares, which shall be:

(A) in the case of shares whose proceeds are to be expended solely to reduce the level of deferred maintenance on facilities, equal to the applicant's average rate of return on total capital, as defined in section 506(a) (5) of the Act, for the three fiscal years preceding the date of submission of the application;

(B) in the case of shares whose proceeds result in no reduction in the level of deferred maintenance on facilities, equal to the cost of money to the government, except where the public benefits associated with the project clearly warrant a lower yield; and

(C) in all other cases, equal to a weighted average yield determined by applying the yields obtained in paragraphs (b) (iii) (A) and (B) of this section to the appropriate portion of the total project cost. In no event shall the yield under this subparagraph (iii) be lower than the minimum permissible yield determinable under sections 506(a) (3) and (4) of the Act.

§ 258.27 Public benefits and costs.

(a) *General.* Each project for which assistance is sought must satisfy a set of public benefit standards based on national goals and objectives in order to qualify for funding. Public benefits and costs related to rail facility improvements encompass a wide range of values and are not easily quantified. Because of the multiplicity of project types, variations between applicants and their markets, and the difficulty of measuring cer-

tain benefits and costs, consideration of public benefits and costs is accomplished through identification of broad categories of projects for which the public benefits associated with proposed projects are substantial and will equal or exceed whatever monetary and social costs are involved, subject to an assessment of its environmental impact.

(b) *Standards.* The public benefits associated with a proposed project will be deemed to justify the public costs associated with the project if the project satisfies any of the following standards.

(1) *Essential Freight Services.* The proposed project enhances the ability of the applicant or other carriers to provide essential freight services by acquiring by lease, purchase or merger, constructing, rehabilitating, or significantly improving mainlines, including yards or other facilities used primarily to serve traffic moving on such lines, which are:

(i) Located in a corridor of consolidation potential and as a result of a consolidation of mainlines or coordination of traffic of the applicant and at least one other carrier will have a current or reasonably prospective annual traffic density of not less than 20 million gross ton-miles per mile;

(ii) Not located in a corridor of consolidation potential and as a result of a consolidation of mainlines or coordination of traffic by the applicant or between the applicant and at least one other carrier will have a current or reasonably prospective annual traffic density of not less than 20 million gross ton-miles per mile;

(iii) Not located in a corridor of consolidation potential and have a current or reasonably prospective annual traffic density of not less than 20 million gross ton-miles per mile;

(iv) Located in a corridor of consolidation potential and as a result of a consolidation of facilities or coordination of traffic of the applicant and at least one other carrier will have an annual traffic density of not less than two million net tons of revenue freight per mile originating or terminating on the line but have an overall annual traffic density of less than 20 million gross ton-miles per mile;

(v) Not located in a corridor of consolidation potential and have a current or reasonably prospective annual traffic density of not less than two million net tons of revenue freight per mile originating or terminating on the line but have an overall current or reasonably prospective annual traffic density of not less than 20 million gross ton-miles per mile;

(vi) Located in a corridor of consolidation potential and have a current or reasonably prospective annual traffic density of not less than two million net tons of revenue freight per mile originating or terminating on the line; or

(vii) Not located in a corridor of consolidation potential and have a current or reasonably prospective annual traffic density of less than two million net tons of revenue freight per mile originating or terminating on the line, but have an overall current or reasonably prospective annual traffic density of less than 20 million gross ton-miles per mile.

The current annual traffic density of a line under this standard in net tons of revenue freight per mile originating or terminating on the line or gross ton-miles per mile will be deemed to be the average annual traffic density for the three calendar years preceding the filing of the application. In segmenting lines for the purpose of determining traffic density in (iv), (v), (vi) and (vii) above, originating and terminating traffic is measured from its originating or terminating point to the next operationally feasible interchange point consistent with traffic flows. A forecasted level of traffic will be deemed to be "reasonably prospective" under this standard if the increment of traffic above the average annual traffic density for the three calendar years preceding the filing of the application is accounted for by newly generated traffic which applicant demonstrates is the result of an increase in the capacity of shippers or receivers currently located on the line to produce or consume commodities that are traditionally shipped by rail or is the result of new shippers or receivers locating on the line and cannot be shipped by an alternate rail carrier.

(2) *Competitive Freight Services.* The application provides for:

(i) Rehabilitation or improvement of a line of an applicant who is competitive with no more than one rail carrier in the market served by the line and is shown by applicant to be economic in light of the current or reasonably prospective levels of traffic in the market and the number of alternative rail carriers in the market; or

(ii) Financial assistance to enable an applicant to withdraw from a market which has more than two competing rail carriers, where the applicant demonstrates that the reasonably prospective levels of traffic in the markekt are insufficient to enable all of the railroads competing in that market to earn a reasonable rate of return.

(3) *Special Projects.* The proposed project will eliminate identifiable and severe public safety hazards.

(4) *Equipment Rebuilding.* The proposed project provides for rebuilding equipment which the applicant requires in order to serve adequately traffic which originates or terminates on applicant's lines at levels which are consistent with the applicant's average market share in the commodity hauled for the three calendar years preceding the filing of the application or are reasonably prospective as defined in subparagraph (b)(1) of this section, and, in the case of locomotives, are necessary to the performance of local service and switching.

§ 258.29 Order of funding.

(a) Where appropriated funds are inadequate to finance all projects which qualify for Federal assistance, projects will be funded in the order in which the categories in which they fall are set forth in section 258.27 of this subpart; that is, in descending order of priority from § 258.27(b)(1) to § 258.27(b)(4) and within § 258.27(b)(1), from paragraph (i) to paragraph (vii).

(b) Where appropriated funds are adequate to finance some but not all projects which qualify for Federal assistance within any one of the categories described in paragraph (a) of this section, priority for funding will be given to projects that provide safety improvements and signals, including underpasses or overpasses at railroad crossings at which injury or loss of life has frequently occurred or is likely to occur.

(c) As between two projects within the same category, as described in paragraph (a) above, which both either provide or do not provide safety improvements and signals, priority for funding will be given to the project which was first proposed in a complete application.

14. An Appendix is added to Part 258 as follows:

APPENDIX—ENVIRONMENTAL ASSESSMENTS

Part I: Description of the environment in the area of the project before commencement of such project, together with statement of other Federal activities in the area which are known, or should be known, to the applicant. This description shall include, without limitation, the following information:

(A) *Demographic data.* Statement of population and growth characteristics of area and of any population and growth assumptions made by applicant in planning the project. Such statement should use the rates of growth in the projection compiled for the Water Resources Council by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture, commonly referred to as the OBERS projection of regional economic activity in the United States. Applicants should refer to 1972 OBERS projections for economic areas, and provide 1969 data and 1980 projections for the following: population; manufacturing earnings; transportation, communications and public utilities earnings; agriculture, forestry and fisheries earnings; and mining earnings. Information should be provided for economic areas which the applicant's proposal would affect.

(B) *Current land use patterns.* Statement of the project's relationship to proposed land use plans, policies, and controls of affected communities, including, where appropriate, maps or diagrams. Where the project is inconsistent with any such plans, policies, or controls, the statement should describe and explain in detail the reasons for such inconsistency.

(C) *Characteristics of current operations.* The Applicant should indicate the maximum allowable speed and frequency of current rail traffic on any affected line, the number and location of grade crossings, and the length of time such grade crossings are blocked during a typical day. The Applicant should indicate derailments and fatalities or injuries resulting from accidents involving trains and motor vehicles or pedestrians on such lines. The Applicant should also indicate the hours of operation on such lines and noise levels of rail operations at 100' from the right of way. Applicants should refer to the United States Environmental Protection Agency document titled "Information on Levels of Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety", which provides a system of measuring day and night noises on a weighted average.

(D) *Air quality.* The Applicant should indicate the air quality in the region, as found in the state Air Quality Implementation Plans to meet ambient air quality standards. Each state is required to prepare such a plan under the Clean Air Act (42 U.S.C. 1857). Some states are required to have Transportation Control Plans to meet ambient air quality standards where transportation sources pose major air quality problems. Applicants should refer to state air quality agencies or to the Regional Offices of the U.S. Environmental Protection Agency for guidance.

(E) *Wetland or coastal zones.* Location, types, and extent of wetland areas or coastal zones that might be affected by the project.

(F) *Properties and sites of historical or cultural significance.* Identification of districts, sites, buildings and other structures, and objects of historical, architectural, archeological, or cultural significance that may be affected by the project. This should be accomplished by consulting the National Register and applying the National Register Criteria (36 CFR Part 800) to determine which properties that may be affected by the project are included in or eligible for inclusion in the National Register of Historic Places. The National Register is published in its entirety each February in the FEDERAL REGISTER. Monthly additions and listings of eligible properties are published in the FEDERAL REGISTER the first Tuesday of each month. The Secretary of the Interior will advise, upon request, whether properties are eligible for the National Register. Officials designated by their Governors to act as State Historic Preservation Officers responsible for state activities under the National Historic Preservation Act may also be consulted. A listing of these state officials may be found at 36 CFR 60.5(d), or may be obtained from the Director, National Parks Service, U.S Department of the Interior. Washington, D.C 20240.

(G) *Publicly-owned parklands, recreational areas, and waterfowl refuges, and historic sites (45 U.S.C. 1653(f)).* (i) Protected land proposed to be used. Describe any publicly-owned land from a public park, recreation area or wildlife and waterfowl refuge or any land from an historic site or wildlife and waterfowl refuge or any land from an historic site which would be affected or taken by the proposed program or project, including the size of the land proposed to be affected or taken, available activities on the land, use, patronage, unique or irreplaceable qualities, relationship to other similarly used land in the vicinity of the proposed project, and maps, plans, slides, photographs, and drawings in sufficient scale and detail to clearly show proposed project. Include a description of impacts of the proposed project on the land and changes in vehicular or pedestrian access.

(ii) Significant area. Include a statement of the national, State, or local significance of the entire park, recreation area, wildlife or waterfowl refuge, or historic site as determined by the Federal, State or local officials having jurisdiction thereof. In the absence of such a statement, protected land is presumed to be located in an area of national, State or local significance.

Part II: The probable impact of the project on the environment and measures which can be taken to mitigate adverse impacts. The applicant shall (1) assess the positive and negative environmental effects, including primary, secondary, and other foreseeable effects, on each of the areas specified in Part I above, including long-term impacts associated with the increased intensity, if any, of rail operations, and (2) list measures which can be taken to mitigate adverse impacts. Mitigation measures include control of hours of operation, coordination of street blockages with adjacent communities, dust and erosion control measures, and proposed methods of tie disposal. In addition, the applicant shall provide the following.

(A) Statement of the extent to which any of the impacts of the project represent irreversible or irretrievable commitments of resources. This requires identification of the extent to which implementation of the project irreversibly curtails the range of potential uses of the environment. "Resources" include the natural and cultural resources lost or destroyed as a result of the project.

(B) Statement of the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity. This shall include a brief discussion of the extent to which the proposed action involves trade-offs between short-term environmental gains at the expense of long-term losses, or vice versa, and a discussion of the extent to which the proposed action forecloses future options.

(C) Statement of any probable adverse environmental effect which cannot be avoided, such as changes in exposure to noise and changes in level of noise or vibration; water or air pollution; undesirable land use patterns; impacts on public parks and recreation areas, wildlife and waterfowl refuges, or historic sites; damage to life systems; congestion of street traffic in adjacent communities; delays in the provision of essential services (police, fire, ambulance), anticipated changes in accident patterns and other threats to health; and other consequences adverse to the environmental goals set out in section 101(b) of the National Environmental Protection Act, 42 U.S.C. 4331(b). In considering noise levels, applicants should note any conflicts between projected noise levels from rail operations and HUD standards for noise at sensitive sites, such as schools, hospitals, parks and residential locations. (U.S. Department of Housing and Urban Development, "Noise Abatement and Control: Department Policy Implementing Responsibilities and Standards," Departmental Circular 1390.2, Chart: External Noise Exposure Standards for New Construction, April 4, 197.)

(D) Statement of construction impacts, identifying any special problem areas and including: (i) Noise impacts from construction and any specifications setting maximum noise levels;

(ii) Disposal of spoil and effect on borrow areas and disposal sites (include any specifications).

(iii) Measures to minimize effects on traffic and pedestrians.

(iv) Consideration of non-point source pollution such as might result from water runoff.

(E) Statement of any positive or negative impacts on energy supply and natural resource development, including, where applicable, any effect on either the production or consumption of energy or other natural resources. Discuss such effects if they are significant.

(F) Discussion of problems and objections raised by other Federal, State or local agencies, and citizens with respect to impact of the project on the environment.

Part III. Discussion of any alternatives to the project that have been considered with respect to impact on the environment. If cost-benefit analyses have been performed, the extent to which environmental costs have been reflected in the analysis should be stated. Underlying studies, reports, and other information obtained and considered in preparing each section of the statement should be identified. For energy comparisons, a possible source is Oak Ridge National Laboratory Report, "Energy Intensiveness of Passenger and Freight Transport Modes" by Dr. Eric Hirst, April, 1973. For analyzing community impacts, the following report may be useful: "The Impacts on Communities of Abandonment of Railroad Service," July, 1975, prepared for the U.S. Railway Association by the Public Interest Economics Center, Washington, D.C. In examining the environmental effects of highway transport as an alternative to rail service, applicants may wish to use the following publication: "A Study of the Environmental Impact of Projected Increases in Intercity Freight Traffic, August, 1971, prepared for the Association of American Railroads by Battelle, Columbus, Ohio."

(Sec. 505, Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210), as amended.)

Dated: January 19, 1977.

ASAPH H. HALL,
Administrator,
Federal Railroad Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

■

TEMPORARY EMPLOYMENT OF ALIENS

Labor Certification Process

DEPARTMENT OF LABOR

Employment and Training Administration

[20 CFR Part 655]

TEMPORARY EMPLOYMENT OF ALIENS

Labor Certification Process for Temporary Agricultural and Logging Employment

Notice is hereby given that the Employment and Training Administration of the Department of Labor is proposing to amend its regulations governing the labor certification process for the temporary employment of aliens in the United States in agricultural (including sheepherding) and logging occupations. The regulations proposed in this document, when finalized, are intended to replace the current regulations at 20 CFR 602.10, 10a and 10b.

Interested persons are invited to submit comments on the proposed regulations to the Assistant Secretary for Employment and Training, Attention: William B. Lewis, Administrator, United States Employment Service, Room 8000, Patrick Henry Bldg., 601 D St., N.W., Washington, D.C. 20213, until February 24, 1977.

Among the proposed changes from the present regulations, are the following substantive changes: 1. The requirements governing sheepherding have been integrated with the requirements for other agricultural occupations.

2. The relationship between employers and their agents, such as associations of employers, have been set forth with greater clarity.

3. The period of recruitment of U.S. workers through the Federal-State employment service system has been lengthened from 60 to 90 days, or longer under certain conditions.

4. Provisions have been added governing fraud and willful misrepresentation with respect to temporary labor certifications and applications therefor.

5. A provision has been added that, if an employer has used foreign workers for each of the previous two years, the labor certification application must include a recruitment plan designed to reduce the employer's dependence on foreign workers.

6. The requirements involving deductions from workers' pay have been simplified.

7. The amount which an employer may charge a worker for providing the worker with three meals per day has been increased.

8. The provisions governing workers' disability insurance have been made clearer and more flexible.

9. The amount of work which an employer must guarantee to offer a worker has been increased from three-fourths of the workdays to at least 5 eight-hour days of work per week.

10. Provision is made for the publication of adverse effect piece rates at a later date.

11. The procedure, which was previously set forth in the Employment Security Manual, whereby, under certain conditions, an employer was permitted to pay less than the adverse effect rate to physically handicapped U.S. workers over 60 and under 18 years of age who could not produce normally, has been set forth in the regulations.

Accordingly, it is proposed to amend Title 20 of the Code of Federal Regulations, by adding a new Part 655 to read as follows:

PART 655—LABOR CERTIFICATION PROCESS FOR THE TEMPORARY EMPLOYMENT OF ALIENS IN THE UNITED STATES

Subpart A—Labor Certification Process for Temporary Agricultutral and Logging Employment

Sec.

655.1 Scope and purpose; definitions.
655.2 Temporary labor certification applications (general).
655.3 Contents of job offers.
655.4 Assurances.
655.5 Recruitment plan.
655.6 Recruitment efforts.
655.7 Action on temporary labor certification applications by the local office.
655.8 Temporary labor certification determinations.
655.9 Adverse effect rates.
655.10 Temporary Labor certification applications involving fraud or willful misrepresentation.
655.11 Invalidation of temporary labor certifications.
655.12 Failure of employers to comply with the regulations under this subpart.
655.13 Petitions for higher meal charges.

AUTHORITY: 8 CFR 214.2(h)(3)(i); Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.

§ 655.1 Scope and purpose; definitions.

(a) Section 214.2(h)(3)(i) of the Immigration and Naturalization Service Regulations (8 CFR 214.2(h)(3)(i)), issued under the Immigration and Nationality Act, requires, in support of a petition for the admission of an alien into the United States to perform certain temporary labor:

Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect the wages and working conditions of workers in the United States similarly employed, or a notice that such a certification cannot be made shall be attached to every non-immigrant visa petition to accord an alien a classification under Section 101(a)(15)(H)(ii) of the Act.

(b) The temporary labor certification procedure is designed to prevent the use of foreign labor at the expense of the wages and working conditions of United States workers similarly employed. Thus, temporary foreign workers may only be used to meet shortages which occur in a particular occupation or industry. In the long run, normal adjustments in wages and working conditions should bring sufficient United States workers to an occupation.

(c) The regulations in this subpart set forth the process by which temporary labor certifications may be applied for, and by which they may be granted or denied.

(d) *Definitions of terms used in this subpart.* For purposes of this subpart:

"Administrator" means the chief official of the United States Employment Service or the Adminstrator's designee.

"Adverse effect rate" means the wage rate which the Administrator has determined must be offered and paid to foreign and U.S. workers for a particular occupation and/or area so that the wages of similarly employed U.S. workers will not be adversely affected. The Administrator may determine that the prevailing wage rate in the area and/or occupation is the adverse effect rate, or that a wage rate other than the prevailing wage rate is the adverse effect rate.

"Area of intended employment" means the area within normal commuting distance of the place (address) of intended employment. If the place of intended employment is within a Standard Metropolitan Statistical Area (SMSA), any place within the SMSA is deemed to be within normal commuting distance of the place of intended employment.

"Employment and Training Administration (ETA)" means the agency within the Department of Labor (DOL) which includes the United States Employment Service (USES).

"Employer" means a person, firm, corporation or other organization which currently has a location within the United States to which U.S. workers may be referred for employment, and which proposes to employ a full-time worker at a place within the United States or the authorized repersentative of such a person, firm, or corporation. For purposes of this definition an "authorized representative" means an employee of the employer whose position or legal status authorized the employee to act as the agent for the employer in labor certification matters. Neither the term "employer" nor "authorized representative" shall mean an association of employers which acts as the agent of a group of employers for temporary labor certification purposes.

"Job opportunity" means a job opening for employment at a place in the United States to which U.S. workers can be referred.

"Local employment service office" means an office of a State employment service agency which serves a particular geographic area within a State.

"Notice of Findings" means a notice which sets forth the bases upon which a Regional Administrator intends to deny a temporary labor certification unless the bases are satisfactorily rebutted.

"Regional Administrator, Employment and Training Administration (RA)" means the chief official of the Employment and Training Administration (ETA) in a Department of Labor (DOL) regional office.

"Secretary" means the Secretary of Labor, the chief official of the U.S. Department of Labor, or the Secretary's designee.

"Temporary labor certification" means the determination by the Secretary of Labor, pursuant to 8 CFR 214.2(h)(3)(i), that (1) there are not sufficient U.S. workers who are qualified and available to perform the work and (2) the employment of the alien will not adversely affect

the wages and working conditions of similarly employed U.S. workers.

"United States Employment Service (USES)" means the agency of the U.S. Department of Labor, established under the Wagner-Peyser Act of 1933, which is charged with administering the national system of public employment offices and carrying out the functions of the Secretary under the Immigration and Nationality Act.

"United States worker" means any worker who, whether U.S. citizen or alien, is legally permitted to work permanently within the United States.

§ 655.2 Temporary labor certification applications (general).

(a) An agricultural or logging employer anticipates a labor shortage may request a temporary labor certification for temporary foreign workers by filing, or by having an agent file, a temporary labor certification application, signed by the employer, with a local office of a State employment service in the area of intended employment. However, if the temporary labor certification application is filed by an agent, such as an association of employers, the agent may sign the application. If an agent is used, the application must be accompanied by a letter from each employer, signed by the employer, which authorizes the agent to act on the employer's behalf and which states that the employer assumes full responsibility for the accuracy of the application, for all representations made by the agent on the employer's behalf, and for the fulfillment of all legal requirements arising from the temporary labor certification.

(b) Every temporary labor certification application shall include: (1) A copy of the job offer used by the employer (or each employer in the recruitment efforts for both U.S. and foreign workers. The job offer for each employer shall state the number of workers needed by the employer, and shall be signed by the employer. The job offer shall comply with the requirements of § 655.3. If the State agency informs the employer that workers, who are fluent and/or literate in Spanish and who are not substantially fluent and/or literate in English, will be recruited for the job opportunities, a copy of the job offer written in Spanish shall be submitted;

(2) The assurances required by § 655.4 of this subpart;

(3) If applicable, the recruitment plan required by § 655.5; and

(4) Documentation showing the employer's efforts to recruit U.S. workers as required by § 655.6.

(c) A temporary labor certification application shall be filed in sufficient time to allow the local office to attempt to recruit U.S. workers through the Employment Service intrastate and interstate clearance systems for 90 calendar days, unless the RA has notified the employer in writing at least 30 days prior to the filing of the application that more than 90 days will be needed; the RA, however, shall never specify a period in excess of six months, and shall offer the employer assistance in recruiting U.S. workers. This 90-day period (or longer period if applicable) shall be in addition to the time necessary for the employer to secure foreign workers by the date of need if the temporary labor certification is granted. The Department of Labor, however, may grant or deny the temporary labor certification prior to the ending of the 90 calendar days (or longer period if applicable).

§ 6655.3 Contents of job offers.

(a) Each employer's job offer shall state that: (1) The employer will provide housing without charge which will meet either the full set of Department of Labor, Employment and Training Administration standards set forth at 20 CFR Part 620 or the full set of Department of Labor, Occupational Safety and Health Administration standards set forth at 20 CFR 1910.142;

(2) The employer, either on its own or in combination with other employers will provide housing to U.S. workers who are women and to those who need family housing;

(3) (i) If applicable, the worker will be eligible for workers' compensation for injury and disease arising out of and in the course of the worker's employment; or

(ii) If the worker will not be covered by the State workers' compensation law, the employer will provide, at no cost to the worker, insurance covering injury and disease arising out of and in the course of the worker's employment, and that the insurance will provide benefits at least equal to those provided under the State workers' compensation law;

(4) The employer will furnish, without cost to the worker, all tools, supplies and equipment required to perform the work including all necessary protective clothing and special footwear and that, if any of these items are provided by the worker, the employer will reimburse the worker for the cost;

(5) The employer will provide the worker with three meals a day, and shall state the cost to the worker for such meals. The cost shall not be more than $3.25 per day unless the RA has approved a higher cost pursuant to § 655.13.

(6) (i) The employer will provide or pay for the worker's transportation and daily subsistence from the worker's home or place of last employment, whichever is applicable, to the place of employment provided the worker works for 50 percent or more of the contract period, and that the amount of the daily subsistence payment will be at least as much as the amount the employer will charge the worker for three meals a day at the place of employment;

(ii) Whether the employer will advance payment to the worker for the costs of transportation and subsistence en route;

(7) If the worker completes the contract period, the employer will provide or pay for the worker's transportation and daily subsistence from the place of employment to the place from which the employer recruited the worker (home or last place of employment, whichever is applicable) unless the worker has immediately subsequent employment with an employer who has contracted with the worker to pay for the worker's transportation and daily subsistence expenses to that employer's worksite.

(8) The employer will provide transportation between the worker's on-the-job site living quarters and the place where the work is to be performed without cost to the worker, and that all such transportation will be in accordance with all applicable laws and regulations.

(9) The employer, unless the prevailing practice in the area of intended employment is for the employer to pay for all travel time as work-time, will pay the worker the adverse effect rate (or the adverse effect rate's piece rate equivalent) for all travel time to work in excess of one-half hour and for all travel time from work in excess of one-half hour.

(10) (i) The employer guarantees the worker the opportunity to work for 5 eight-hour workdays out of each week, and that, if, under the guarantee or otherwise, the employer affords the worker employment on a day on which the worker refuses to work because of the worker's religious convictions, the employer will not dismiss the worker for not working on that day;

(ii) If the worker is afforded less employment than guaranteed, the worker will be paid an amount equal to the amount which the worker would have earned if the worker had worked for the guaranteed periods;

(iii) If the worker will be paid on a piece rate basis, the employer will use the worker's average hourly earnings to calculate the amount due under the guarantee; and

(iv) That any hours which the worker fails to work when the worker has been afforded the opportunity to do, and all hours of work performed, will be counted in calculating the period of guaranteed employment;

(11) (i) The employer will keep accurate and adequate records of all the worker's earnings and hours of employment, including records showing the nature of the work performed, the number of hours of work offered each day by the employer and worked each day by the worker, the time the worker began and ended each workday, the rate of pay, the amount of work performed, the worker's earnings, and the amount of and reasons for any and all deductions made from the worker's wages;

(ii) If the number of hours worked by the worker is less than the number offered, the records will state the reason therefor;

(iii) The records, including field tally records and supporting summary payroll records, will be made available for inspection and copying by representatives of the Secretary of Labor, and by the worker or the worker's representatives; and

(iv) The employer will retain the records for not less than three years after the completion of the contract;

(12) The employer will furnish to the worker at or before each pay-day, in one or more written statements:

(i) The worker's total earnings for the pay period, broken out by straight-time and overtime;

(ii) The worker's hourly rate or piece rate of pay;

(iii) The hours of employment which have been offered to the worker;

(iv) The hours worked by the worker;

(v) An intemization of all deductions made from the worker's wages; and

(vi) If piece rates are used, the units produced daily;

(13) The employer will comply with all applicable Federal, State and local laws, including employment-related safety and health laws;

(14) (i) If the worker will be paid by the hour, the employer will pay the worker the adverse effect rate; or

(ii) If the worker will be paid on a piece rate basis, the piece rate will be based on the normal efforts of average U.S. workers and will be designed to produce average hourly earnings at least equal to the adverse effect rate, and that, if the piece rate does not result in average hourly earnings at least equal to the adverse effect rate, the worker's pay at each pay period will be supplemented so that the worker's earnings are at least as much as the worker would have earned if the worker had been paid the adverse effect rate;

(15) The frequency with which the worker will be paid (in accordance with the prevailing practice in the area of intended employment, or at least biweekly whichever is more frequent);

(16) If the worker abandons employment before the end of the contract period, or is terminated for cause, the employer will not be responsible for providing or paying for the subsequent transportation of the worker;

(17) (i) If, before the expiration date specified in the work contract, the services of the worker are no longer required for reasons beyond the control of the employer due to a fire or other Act of God which makes the fulfillment of the contract impossible, the employer may terminate the work contract;

(ii) The employer will make efforts to transfer the worker to other comparable employment. If such transfer is not effected, the worker will be returned home or to the worker's last place of employment, whichever is applicable, at the employer's expense; and that

(iii) Any deductions made from the worker's pay by the employer for transportation and subsistence to the place of employment will be refunded to the worker.

(18) The employer will make those deductions from the worker's paycheck which are required by law:

(b) The job offer shall specify all deductions, not required by law, which the employer will make from the worker's paycheck. All deductions shall be reasonable. If the employer intends to deduct the cost of the worker's transportation and daily subsistence to the place of employment, the job offer shall state that the worker will be fully reimbursed for such deductions upon the worker's completion of 50 percent of the worker's contract period.

(c) The job offer shall also contain all the provisions contained in any contract which the employer agreed to in the previous year which conferred benefit upon foreign workers additional to those set forth in paragraphs (a)(1) through (a)(18) and (b) of this section.

(d)(1) The job offer may also contain a provision that physically handicapped U.S. workers over 60 years of age and/or under 18 years of age who are unable to produce normally may be requested or required by the employer to sign written waivers indicating their inability to work with normal speed or effectiveness, that such workers will not receive the piece rate earnings guarantee and that, if they are employed at hourly rates, they will be paid rates as low as 75 percent of the required adverse effect rate, but not less than the applicable Federal or State minimum wage.

(2) If the provision in paragraph (d)(1) of this section is included:

(i) The job offer must also contain provisions that the employer may request a U.S. worker to sign a waiver only after the worker has had average hourly earnings below the hourly standard for no less than 40 hours of work experience at piece rates designed to produce the hourly guarantee; that the 40 hour trial work experience period may begin only after the worker has had 24 hours of training in the activity in question; that the employer will maintain records to demonstrate the worker's earning ability during the 24 hours of training and during the 40 hour trial work experience period; and that, during this 64 hour period, the worker will receive the full hourly adverse effect rate;

(ii) The waiver shall be worded as follows:

I _____ having been given 3 eight
(Employee)
hour days of training and 40 hours work experience as a _____ and being unable to maintain production standards of _____ here-
(Occupation)
(Minimum) (Acceptable per hour or day)
by waive my right to the minimum required rate of $_____ and authorize my employer to reduce my minimum wage to $_____.
(List rate)
(No less than 75 percent of adverse effect rate. (In no case less than the applicable minimum Federal or State wage).)

§ 655.4 Assurances.

As part of the labor certification application the employer shall include assurances signed by the employer, that:

(a) The employer has not within the past year been found by a Court or by a Federal or State enforcement agency to have failed without good cause to comply with an employment contract with a United States or foreign agricultural or logging worker, or to have failed without good cause to comply with applicable Federal, State and local employment-related laws, including health and housing laws and temporary labor certification related requirements, or that, if the employer was so found, the employer has produced conclusive, documented evidence that the violation has been remedied, and assures that it will not violate the law or laws in the future;

(b) The job opportunity is not:

(1) Vacant because the former occupant is on strike or is being locked out in the course of a labor dispute, or

(2) At issue in a labor dispute;

(c) During the period in which foreign workers are scheduled to be employed under the terms of the temporary labor certification:

(1) The wages and working conditions which will be offered and afforded by the employer to any foreign worker will not be higher or more favorable than those offered and afforded to U.S. workers;

(2) The employer will offer and provide employment to any U.S. worker who is qualified and willing to work in the job opportunity (including women) and will offer and provide housing to such a worker and to the worker's family until the time the foreign worker who holds the job opportunity has completed 50 percent of the foreign worker's contract period; and

(3) The employer will provide each U.S. worker with a copy of the worker's employment contract. The employment contract which is provided to the worker shall be written in Spanish if the worker is fluent and/or literate in Spanish but is not substantially literate in English.

§ 655.5 Recruitment plan.

If the employer has made requests for temporary foreign labor for each of the preceding two years, the employer shall submit as part of the temporary labor certification application, a written plan for recruiting and retaining U.S. workers which is designed to reduce the use of temporary foreign workers. If such a recruitment plan was submitted in the previous year, the employer shall submit documents showing the employer's efforts to implement the plan and the results of the implementation.

§ 655.6 Recruitment efforts.

As part of the temporary labor certification application the employer shall include documents clearly showing the employer's efforts to recruit U. S. workers. The documents must show that:

(a) Reasonable efforts have been and will continue to be made by the employer to obtain U.S. workers at wage rates and working conditions no less favorable than those offered to aliens; and

(b) Such efforts included reasonable attempts to use workers who commute on a daily basis between their residences and the place of employment, the use of the Employment Service intrastate and interstate clearance system, and the employer's participation in special youth recruitment programs.

§ 655.7 Action on temporary labor certification applications by the local office.

(a) When a temporary labor certification application is filed with a local employment service office, the local office shall make sure that the application is complete. If the application is not complete, the local office shall return it to the employer and shall advise the employer to re-file it when it is completed.

(b) If the application is complete, the local office, using the information on the application, shall prepare and process an employment service job order. If this job order is discriminatory or otherwise unacceptable as a job order under employment service regulations, the local office shall, as appropriate, either contact the employer to try to remedy the defect or return the application to the employer with instuctions as to how the defect can be remedied.

(c)(1) If the job order is complete, and if it complies with employment service regulations, the State agency shall use the job order to recruit U. S. workers from the local area and through the Employment Service intrastate and interstate clearance systems.

(2) In view of the statutorily established basic function of the employment service as a no-fee labor exchange, that is, as a forum for bringing together employers and job seekers, neither the Department of Labor nor the State employment service agencies are guarantors of the accuracy or truthfulness of information contained on job orders submitted by employers. Nor do such job orders represent an "offer to contract" to which the Employment Service is in any way a party. Nevertheless, if the Department of Labor or a State employment service agency finds probable cause to believe that an employer's job order contains a material representation, the procedures at Subpart F of Part 658 of this Chapter shall be followed (as proposed in the FEDERAL REGISTER on October 5, 1976, at 41 FR 44023).

(d) The State agency shall send the labor certification application to the appropriate Regional Administrator (RA), Employment and Training Administration, together with a statement indicating whether the local office believes the employer has met requirements of this subpart, a report of U.S. worker availability in the area, a description of the recruitment efforts undertaken by the local office on behalf of the employer, and any other information requested by the ETA.

§ 655.8 Temporary labor certification determinations.

(a) The RA shall determine whether the employer has met the requirements of §§ 655.2–655.6. If the RA finds that the employer has complied with those requirements, the RA shall recommend to the Administrator in writing that the temporary labor certification be granted, giving the reasons therefor. If the Administrator objects to the granting of the temporary labor certification based on relevant considerations, the RA shall not grant the temporary labor certification until and unless the objections are resolved.

(b) If the RA believes that the employer's efforts to recruit U.S. workers has not been sufficient or that the temporary labor certification should not be granted for other reasons, the RA shall issue a Notice of Findings, as defined in § 655.1, and shall afford the employer a reasonable time to submit evidence to rebut the bases of the Notice of Findings.

(c) No labor certification shall be granted to any employer if the Immigration and Naturalization Service has notified the Department of Labor that the employer has knowingly had in his employ during the previous 12 months any foreign worker who was not lawfully in the United States, or if the employer, in the previous 12 months, has been found to have violated the Farm Labor Contractor Registration Act or the Federal regulations issued under that Act.

(d) After the labor certification determination has been made the RA shall notify the employer in writing of the decision. If the labor certification is denied, the notice shall state the reasons therefor and the appeal rights of the employer under the Immigration and Naturalization Service regulations.

§ 655.9 Adverse effect rates.

(a) *Schedule of Rates for 1976.*

State:	Rate
Connecticut	2.61
Florida (sugarcane only)	3.04
Maine	2.69
Maryland	2.27
Massachusetts	2.56
New Hampshire	2.82
New York	2.48
Vermont	2.78
Virginia	2.44
West Virginia	2.74

(b) The adverse effect rate for all areas not listed in paragraph (a) of this section, for logging and sheepherding, and for Florida crops other than sugarcane, shall be the prevailing wage rate for the occupation in the area of intended employment.

(c) The Administrator shall review the adverse effect rates annually in the light of changed agricultural and/or similarly skilled non-agricultural wage rates in each State. The Administrator shall periodically publish a schedule containing: (1) The adverse effect rate; and (2) The normal piece-rate production of an average U.S. worker; (3) The adverse effect piece rate, that is, the piece rate by which an average U.S. worker will earn the adverse effect rate.

§ 655.10 Temporary labor certification applications involving fraud or willful misrepresentation.

(a) If possible fraud or willful misrepresentation involving a temporary labor certification application is discovered prior to a final temporary labor certification determination, or if it is learned that an application is the subject of a criminal indictment or information filed in a Court, the RA shall refer the matter to the INS for investigation and shall notify the applicant in writing of this referral. The RA shall continue to process the application and may issue a qualified temporary labor certification.

(b) If a Court finds an applicant innocent of fraud or willful misrepresentation, or if the Department of Justice decides not to prosecute an applicant, the RA shall not deny the temporary labor certification application on the grounds of fraud or willful misrepresentation. The application, of course, may be denied for other reasons pursuant to this subpart.

(c) If a Court or the INS determines that there was fraud or willful misrepresentation involving a temporary labor certification application, the application shall be deemed invalidated, processing shall be terminated, and the application shall be returned to the applicant with with the reason therefore stated in writing.

§ 655.11 Invalidation of temporary labor certifications.

After issuance, temporary labor certifications are subject to invalidation by the INS upon a determination, made in accordance with that agency's procedures or by a Court, of fraud or willful misrepresentation of a material fact involving the temporary labor certification application. If evidence of such fraud or willful misrepresentation becomes known to a Regional Administrator, Employment and Training Administration or to the Administrator, the Regional Administrator or Administrator, as appropriate, shall notify the INS in writing.

§ 655.12 Failure of employers to comply with the regulations under this subpart.

If the Department of Labor or a State employment service agency has probable cause to believe that an employer's job order contains a material misrepresentation, or that an employer has not complied with the terms of a temporary labor certification application or of a certification, the procedures at subpart F of Part 658 of this Chapter shall be followed (as proposed in the FEDERAL REGISTER on October 5, 1976 at 41 FR 44023).

§ 655.13 Petitions for higher meal charges.

(a) An RA may permit an employer to charge workers up to $4.00 for providing them with 3 meals per day if the employer justifies the charge by submitting documentary evidence to the RA.

(b) Evidence submitted shall include the cost of goods and services directly related to the preparation and serving of meals, the number of workers fed, the number of meals served and the number of days meals were provided. The cost of the following items may be included: food; kitchen supplies other than food, such as lunch bags and soap; labor costs which have a direct relation to food service operations, such as wages of cooks and restaurant supervisors; fuel, water, electricity, and other utilities used for the food service operations; other costs directly related to the food service operation. Charges for transportation, depreciation, overhead, and similar charges may not be included. Receipts and other cost records for the representative pay period shall be available for inspection by the Secretary's representatives for a period of 1 year.

Signed at Washington, D.C., this 14th day of January 1977.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

PROFESSIONAL STANDARDS REVIEW ORGANIZATION DETERMINATIONS

Interim Hearings and Appeals

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER I—MEDICAL CARE QUALITY AND COST CONTROL

PART 101—PROFESSIONAL STANDARDS REVIEW

Interim Hearings and Appeals of Professional Standard Review Organization Determinations

On February 20, 1976, interim regulations were adopted and published in the FEDERAL REGISTER (41 FR 7878), to provide for hearings and appeals of Professional Standards Review Organizations (PSROs) as required under section 1159(b) of the Social Security Act (42 U.S.C. 1320–8). While the regulations became effective immediately on publication, it was anticipated that appropriate revisions might be suggested by the public and interested persons were invited to submit written comments, suggestions or objections, not later than March 22, 1976, concerning these interim regulations. All comments received with respect to the interim regulations were given consideration.

1. A number of comments objected to the requirement, in § 101.1402(a), that the Statewide Council automatically review every adverse PSRO reconsideration. This comment was adopted and the regulation now requires a dissatisfied party to file a request for Statewide Council Review. It is not reasonable to require the Statewide Council to automatically review cases where no party has expressed an interest in obtaining such review. Moreover, a heavy workload and great expense for the Statewide Council would result from automatic review of every adverse PSRO reconsideration. On the other hand, the burden upon a party of filing a request for a Statewide Council review is minimal. Section 101.1402(a) has been amended accordingly.

2. Comments were received which requested that providers and practitioners be afforded hearings by the Secretary under section 1159(b) of the Social Security Act on adverse PSRO determinations. Section 101.1402(b) makes such hearings available to beneficiaries or recipients only. This language substantially parallels the language in section 1159(b) of the Act. Hence, the statute makes no express provisions for providers and practitioners to obtain Secretarial hearings. At the same time, section 1159(a) expressly affords rights to reconsideration of PSRO determinations to providers and practitioners. The limitation of the rights of such parties to reconsideration under section 1159(a) indicates a deliberate legislative design to omit provider and practitioner appeals under section 1159(b). Finally, under section 1159(c) of the Act, hearings in the PSRO program "shall be in lieu of any review, hearing, or appeal under this Act with respect to the same issue." Therefore, providers and practitioners are entitled neither to hearings under section 1159 of the Social Security Act, nor to hearings "on the same issue" (i.e., medical necessity, quality, and appropriateness of health care) under Title XVIII or XIX of the Act. However, on other issues, such as coverage and reasonable charges, providers and practitioners continue to retain rights to Departmental hearings provided under law. Section 101.1402(b) has not been changed, therefore, to provide appeals to such parties.

3. Comments were received questioning whether there is an appropriate method utilized by the Secretary for selecting impartial medical advisors to the Administrative Law Judges, as required under § 101.1404(b), which assures that the advisors are "impartial." It was suggested that advisors be chosen from a permanent panel created by State and local medical societies and that particular doctors be identified by the societies to be consulted in particular cases. It is not clear how this proposed system would insure impartiality. In contrast, under the regulations adopted, the system to be used is expected to operate to reasonably assure the objective of obtaining impartial advice. Under § 101.1404(b)(3), a professional advisor cannot be consulted if he was directly involved in providing services, he or his family have a financial interest in the institution in which care is provided, he participated in the PSRO or Statewide Council decisions, he has staff privileges at the institution where services are provided, or he is on the governing board of the PSRO or Statewide Council. The enumerated cases were considered to indicate the various factors which would prejudice an advisor to an improper degree. However, in order to insure that other cases of bias may be considered, the regulations have been amended to provide that where a reasonable showing is made to the Administrative Law Judge that an advisor may be biased in a case, the advisor's opinion will not be utilized and the Administrative Law Judge must obtain the advice of another professional advisor. Moreover, the selection process described in Comment 4 assures input from local medical societies and is expected to further insure impartiality.

4. It was suggested that language be added to the regulation to assure that the medical advisor is recognized as a peer of the professional whose services are being reviewed. Since the regulation calls for "*appropriate* professional consultation" (emphasis added), the language is considered sufficient. In fact, the system which is used by the Bureau of Hearings and Appeals to assure the competence and qualifications of advisors will also assure that appropriate peers are utilized to review the work of other physicians. The Bureau has entered into contracts with physicians throughout the country to provide appropriate medical consultation for Administrative Law Judges conducting hearings under various titles of the Social Security Act, including Title XI. These physicians are recommended by medical societies and other physicians. Before the physicians are selected, their background and credentials are closely scrutinized in such publications as the American Medical Association's Directorate of Doctors and in other medical literature relating to specialists prepared by the specialty boards and the American Medical Association. An advisor must be a member, in good standing, of his local medical society. After the physicians credentials are verified, interviews are held with members of the staff at the hospital at which he practices. Most of the advisors are board certified and they represent every medical specialty and geographic locale. The broad expertise and the heterogenous nature of this panel of medical advisors will enable the Administrative Law Judge to obtain a consultant in a hearing involving a PSRO determination who has the appropriate qualifications to be considered a peer of the physician who provided the services in question. At the same time, it is the general practice to utilize an advisor residing and practicing in the same area as the practitioner who rendered the services, assuring that, to that extent, a geographic peer will be consulting in the case. However, since advisors who have precisely the same qualifications as the professional under review, or who reside in the same locality as the professional involved, are not always available to consult, it was not considered appropriate to require specific peer qualifications under the regulations.

5. A suggestion was received that the medical advisors be subject to oral cross examination at the hearings or subjected to questions through a deposition form of proceeding prior to the hearing. Past experience in Title XVIII hearings and the procedures adopted for use in Title XI hearings, indicates that cross examination procedures or similar protections, will be provided. In the majority of Title XVIII cases, the medical advisor has, in fact, appeared and testified before the Administrative Law Judge at the hearing. At such time, the advisor may be examined by the claimant and/or his representative (20 CFR 404.939). Where an advisor's opinion is obtained in writing, the claimant will be afforded an opportunity to examine the opinion and rebut it through additional evidence, oral testimony or a written statement (20 CFR 404.927).

6. Comment was received questioning whether PSRO medical necessity decisions must be accepted by a Medicaid State agency. Under sections 1154(b), 1155(a) and 1158 of the Social Security Act, PSROs, whether conditionally or unconditionally designated, will have final authority for purposes of payment under the Act on issues of medical necessity, quality, and appropriateness of health care services. Medicaid State agencies have been notified of this by the Department, and regulations are under development within the Department to implement these provisions. However, even in the absence of regulations, section 1164 of the Act provides that the provisions of Title XI, Part B of the Act shall apply automatically to Medicaid State plans.

7. Comment was received that rules regarding confidentiality of appeals data should be made a specific requirement

of these regulations. Data acquired or generated by a PSRO in the exercise of its functions is currently prohibited from public disclosure by section 1166 of the Act except where disclosure is necessary to carry out the purposes of Title XI or where disclosure is otherwise authorized by regulations. Regulations to further implement this provision relating to confidentiality of PSRO data are currently under development within the Department. However, disclosure of PSRO data and information which is necessary to carry out PSRO reconsiderations and Secretarial hearings is clearly authorized under section 1166(a)(1) of the Act, without the necessity for regulations.

8. Comment was received recommending that simplified administrative procedures should be included in the final regulations. Although the requirements for conduct of the hearing itself are lengthy and specified in some detail, this is in order to ensure that full due process is accorded the appellant. However, the procedures for requesting a hearing are very simple and should pose no burden or obstacle to the claimant.

9. It was proposed that a controversy involving a claim of $100 would more appropriately be handled at the local level rather than by the Statewide PSRO Council, and that the required amount in controversy for Statewide Council review should be $1000. The right of providers, practitioners, and beneficiaries and recipients to a review by a Statewide Council from an adverse PSRO reconsideration, where a Statewide Council exists and the claim is at least $100, is statutorily mandated by section 1159(b) of the Act and may not be waived or modified by regulation.

10. Comments recommended that the interim regulations should have been published as proposed rulemaking allowing prior public comment rather than as final rules effective upon publication. As explained in the preamble to the interim regulations, since conditional PSROs are currently making determinations which are conclusive for purposes of payment under the Social Security Act, and since rights to reconsideration, hearing and appeal under section 1159 are statutorily required, the Department believes that good cause existed in accord with the Administrative Procedure Act (5 U.S.C. 553) to make these interim regulations effective upon publication. However, public comment on the interim regulations was invited and considered and revisions set out in this Notice are the result of such public input. Moreover, regulations in proposed form setting out more detailed procedures for PSRO reconsiderations, hearings and appeals will be published in proposed form in the future, providing additional opportunity for public comment.

11. Comment was received suggesting that the regulations should require the hearing body to conduct and decide the hearing within a specified limited time from the date of the request. Since the time needed to conduct the hearing will vary depending in part upon the type and extent of evidence the claimant wishes to present at the hearing, this would not be an appropriate rule and could be disadvantageous to claimants. Administrative efforts to increase the number of hearing officials and other actions are expected to reduce unnecessary delays in the hearing process. Hence, no change in the regulation has been made.

12. It was proposed that language regarding continuance of the States' authority to conduct hearings on issues of scope of Medicaid benefits and eligibility should be incorporated not only in the Preamble but also in the body of the regulations. The language of § 101.1401 of the regulations, which provides that these regulations are applicable only to hearings provided by the Secretary with regard to determinations made by a PSRO under section 1155(a) of the Act, clearly delineates the PSRO's authority since section 1155(a) relates only to PSRO determinations of medical necessity, quality, and appropriateness of health care services. Hence, such additional language regarding coverage determinations and hearings would be redundant.

13. Comment was received that there should be two levels of appeal from a PSRO adverse initial determination prior to Statewide Council review; i.e., a reconsideration by a hospital delegated review functions under section 1155(e) of the Act, and another reconsideration by the PSRO. Section 1159(a) of the Act clearly provides for only one reconsideration of an adverse claims decision. To require another reconsideration, where the statute already requires numerous levels of review, including Statewide Council review, a hearing by the Department, and judicial review would be administratively burdensome, time-consuming and confusing to beneficiaries and recipients.

Accordingly, 42 CFR Part 101, Subpart N is revised as set forth below.

Effective Date. This regulation shall become effective January 25, 1977.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: December 15, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 18, 1977.

MARJORIE LYNCH,
Acting Secretary.

Subpart N—Hearings and Appeals of Professional Standards Review Organization Determinations Interim Regulations

Sec.

101.1401 Applicability of section 1159(b) hearing procedures.
101.1402 Right to reconsideration, review and hearing.
101.1403 Utilization of procedures under Title XVIII, Part A of the Social Security Act.
101.1404 Professional consultation.
101.1405 Determining amount in controversy in case of proposed services.
101.1406 Right to judicial review.

AUTHORITY: Sec. 1159, Social Security Act; sec. 249F, Pub. L. 92–603; 86 Stat. 1429–1445 (42 U.S.C. 1320c–8); sec. 1102 of Social Security Act, 49 Stat. 647 as amended (42 U.S.C. 1302).

§ 101.1401 Applicability.

The regulations of this subpart are applicable to hearings provided by the Secretary pursuant to section 1159(b) of the Social Security Act (hereinafter "the Act") with regard to determinations under section 1155(a) of the Act by a PSRO, including a conditional PSRO, which has assumed full review responsibility in specified health care institutions.

§ 101.1402 Right to reconsideration, review and hearing.

(a) Any beneficiary or recipient who is entitled to benefits under the Act (other than Title V), or a provider or practitioner who is dissatisfied with a determination, with respect to a claim, made by a Professional Standards Review Organization in carrying out its responsibilities for the review of professional activities in accordance with paragraphs (1) and (2) of section 1155(a) of the Act shall, after being notified of such determination, be entitled to a reconsideration thereof by the Professional Standards Review Organization, and, where the Professional Standards Review Organization reaffirms such determination in a State which has established a Statewide Professional Standards Review Council, and where the matter in controversy is $100 or more, such determination shall, upon the written request of the dissatisfied party, be reviewed by professional members of such Council and, if the Council so determines, revised.

(b) Where the determination of a Statewide Professional Standards Review Council is adverse to the beneficiary or recipient (or where there is no such Council in a State and where the matter in controversy is $100 or more), such beneficiary or recipient shall be entitled to a hearing thereon by the Secretary to the same extent as provided in section 205(b) of the Act.

(c) Any review or appeal provided under this section shall be in lieu of any review, hearing or appeal under the Act with respect to the same issue.

§ 101.1403 Utilization of Title XVIII, Part A, hearing procedures.

The procedures specified in § 405.722 (time and place of filing request for hearing), §§ 405.740 through 405.747 (determining amount in controversy), §§ 404.919 through 404.952 and 404.954 through 404.956 (procedures for conduct of hearings and Appeals Council review); §§ 405.750, 404.958, 404.961 through 404.963, and 404.966 (reopening initial or reconsidered determinations and hearings or Appeals Council decisions); and §§ 404.971 through 404.973 (representation of parties) of Title 20 Code of Federal Regulations, except to the extent inconsistent with specific provisions of this Subpart N, shall govern hearings under section 1159(b) of the Act.

§ 101.1404 Professional consultation.

(a) Any decision made by an Administrative Law Judge with regard to a PSRO determination shall be made only after receiving and considering appropriate professional consultation on the matter.

(b) Professional consultation shall be obtained by the Administrative Law Judge, in the form of either testimony or written opinion, from an impartial medical advisor selected by the Social Security Administration in each matter which he is to decide under section 1159(b). Such consultation shall be part of the record, and shall be considered by the Administrative Law Judge along with other evidence of record in deciding the issues before him.

(1) Each party shall have the right to examine all evidence of record, including that obtained from the medical advisor, and to present rebuttal evidence. Such rebuttal evidence shall be made part of the record for consideration.

(2) Such consultation shall be rendered by a licensed doctor of medicine or osteopathy whenever the health care services or items in question were provided or proposed to be provided by another licensed doctor of medicine or osteopathy.

(3) No professional advisor shall be utilized to provide such consultation if: (i) he was directly or indirectly involved in providing the services which are the subject of the hearing; (ii) he or any member of his family has, directly or indirectly, any financial interest in the institution in which such services were provided or were proposed to be provided; (iii) he participated in the PSRO initial or reconsidered determinations or the Statewide Council determination which is the subject of the hearing; (iv) he has staff privileges in the institution in which such services were provided or proposed to be provided; (v) he is a member of the governing body of the PSRO or a member of the Statewide Council which rendered a determination in the matter; or (vi) a reasonable showing is made to the Administrative Law Judge that an advisor may be biased with regard to the case under review. Where a professional advisor is rejected, the Administrative Law Judge shall obtain appropriate professional consultation from another professional advisor who meets the requirements of this Subpart.

§ 101.1405 Determining amount in controversy in case of proposed services.

Where services or items proposed to be provided have been disapproved by the PSRO, the amount in controversy shall be determined upon the basis of reasonable estimates of the amounts which would be charged the individual if such services or items were provided, and shall be computed in accordance with the priciples set forth in section 405.740 of 20 CFR.

§ 101.1406 Right to judicial review.

To the extent authorized by section 1159(b) of the Act, a party to a decision of the Appeals Council (see section 404.960 of 20 CFR), or the decision of an Administrative Law Judge where the request for review by the Appeals Council was denied, may obtain a court review where the amount in controversy after Appeals Council review is $1,000 or more, by filing a civil action in a district court of the United States in accordance with the provisions of section 205(g) of the Act (see § 422.210 of 20 CFR for filing procedure).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

ADMINISTRATIVE FUNCTIONS, PRACTICES, AND PROCEDURES

General Provisions

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Docket No. 75N-0001]

ADMINISTRATIVE FUNCTIONS, PRACTICES, AND PROCEDURES

General Provisions

The Food and Drug Administration (FDA) is issuing in final form the general provisions for its administrative functions, practices and procedures. The regulations shall be effective February 24, 1977.

Included within this subpart (21 CFR Part 2, Subpart A) are regulations establishing procedural requirements for public requests for agency action or challenges to agency action, for the issuance of regulations by the agency, for the compilation and maintenance of the administrative record of agency decisions and actions, and, generally, for the conduct of agency business with the public. The regulations include provisions that specify the terms on which FDA officials will meet with members of the public and provisions that govern providing advice and information to the public on agency business. The provisions of Subpart A will apply to all aspects of FDA business unless superseded by other requirements specifically applicable to a particular class of actions or decisions.

The notice of proposed rule making on which these regulations are based was published in the FEDERAL REGISTER of September 3, 1975 (40 FR 40682). In the preamble to that proposal, the Commissioner of Food and Drugs discussed the initial issuance of these and related regulations, published in the FEDERAL REGISTER of May 27, 1975 (40 FR 22950), and subsequent litigation (*American College of Neuropsychopharmacology* v. *Weinberger, et al.*, Civil Action No. 75-1187) that resulted in their withdrawal as a final regulation and republication as a notice of proposed rule making. Other subparts of Part 2 proposed on September 3, 1975, have since been published separately in the FEDERAL REGISTER as final regulations as follows: Subpart C—Public Hearing Before a Public Board of Inquiry, June 28, 1976 (41 FR 26636); Subparts E, F, and G—Procedures for Public and Regulatory Hearings and Regulations Governing Standards of Conduct and Conflict of Interest, November 2, 1976 (41 FR 48258); Subpart B—Formal Evidentiary Public Hearings, November 23, 1976 (41 FR 51706); and Subpart D—Public Hearing Before a Public Advisory Committee, November 26, 1976 (41 FR 52148).

Most of the comments received on the provisions of Subpart A were from manufacturers of regulated products, including industry trade associations, professional associations, consumer groups, and individuals. Approximately 160 comments were received, including several comments on the May 27, 1975 final regulation, which, while subsequently withdrawn, was virtually identical in substance to the September 3, 1975 proposal. A section-by-section discussion of the substantive provisions of the regulations appeared in the preamble to that proposal. A summary of the issues raised by the comments, and the Commissioner's resolution of those issues, are set forth below.

No comments were received regarding § 2.1 Scope (21 CFR 2.1), and it is adopted as proposed.

1. Two comments were received regarding § 2.3 Definitions (21 CFR 2.3), both of which addressed the definition in § 2.3(a)(12) of "interested person." As explained in the preamble to the proposed rule, "interested person" and "any person who will be adversely affected" have been defined broadly to include any person who wishes to participate in any proceeding of FDA. No particular interest, specific economic or other harm, or other indicia of "standing" is required before a person may participate in or challenge any agency action.

One of the comments supported eliminating from the definition of "interested person" the requirement of a specific showing of interest. The other comment objected to the proposed definition as too broad. The comment argued that, by not limiting participation in agency matters to those who can show a definite interest that can be adversely affected, FDA proceedings may become protracted and burdened by numerous parties seeking to participate merely on the grounds that they represent some broad public interest. This, the comment argued, will prevent FDA proceedings from being expeditiously concluded in an orderly manner.

The Commissioner disagrees with this comment and has retained the proposed definition of "interested person" in the final regulation. Contrary to the comment, he maintains that persons espousing only broad interests shared generally by the public are entitled to participate fully in agency proceedings. As noted in the preamble to the proposal, FDA activities cover a broad range and affect every citizen generally, and thus all persons are entitled to participate in, and question, actions of the agency. The Commissioner is not persuaded that many agency actions will be seriously delayed as a result of the broad definition of "interested person," but he concludes that any delay that is likely to occur will be outweighed by the advantages of permitting unimpeded access by all persons to agency proceedings.

2. One comment on § 2.4 Summaries of administrative practices and procedures (21 CFR 2.4) urged that the distribution of the summaries by the Commissioner be wide and systematic so that public awareness would not be left to chance.

While the Commissioner agrees fully with the objective expressed by the comment, he believes it undesirable to modify the provision to impose on the agency what could be viewed as a requirement to establish a special distribution procedure. Every reasonable effort will be made by the agency to distribute the material so that it reaches as many segments of the public as possible.

3. Many comments were received in response to several aspects of § 2.5 Submission of documents to hearing clerk; computation of time; availability for public disclosure (21 CFR 2.5). Several comments objected to the requirement in proposed § 2.5(b) that submissions signed by attorneys or other authorized representatives be accompanied by signed statements of authorization, unless documentation of authorization has previously been submitted as part of the administrative file in the same proceeding. The comments argued, generally, that the requirement was excessive; that it was unwarranted to assume that an attorney would undertake to represent a party before the agency when he was not authorized to do so. Many comments argued that such a requirement was obviously superfluous when the attorney is in-house counsel to a corporation or organization. One comment inquired whether such an attorney, if an officer of the company, would be required to have his authority verified by another officer, and whether the corporate seal must also be affixed. Several comments noted that the Federal courts do not require the verification contemplated by the proposed rule, and thus questioned whether there could be a valid basis for imposition of the requirement by FDA.

After consideration of the comments, the Commissioner has concluded that the requirement should be deleted. He is persuaded by those comments questioning whether unauthorized submissions have been a problem for the agency, and he concedes that they have not. In any event, he believes that sanctions already available, notably 18 U.S.C. 1001 (the "False Reports to the Government Act"), as well as the Canons of Professional Ethics, will adequately ensure that attorneys or others representing parties or interested persons before the agency are authorized to do so.

A conforming change in § 2.130 (21 CFR 2.130), which in part establishes a similar verification requirement for any person representing another in a formal evidentiary public hearing under Subpart B, will be made in a subsequent publication.

4. Several comments objected to the requirement in proposed § 2.5(c) that all data and information referred to or in any way relied upon shall be included in each submission in full and may not be incorporated by reference, and to the requirement in paragraph (c)(1) that a copy of any article or other reference or source be included in each submission.

The comments contended that these companion requirements were unduly burdensome for various reasons. Several urged that submission be considered unnecessary if the material (1) is already available in another agency file, (2) consists of rules, regulations, court decisions, or agency memoranda, or (3) includes general reference materials such as standard medical texts. A comment suggested that incorporation of published sources be permitted unless FDA later notifies the party that the source is not available to the agency. It was pointed out that in a given matter several comments may logically wish to rely on or refer to the same material, and inquired whether the receipt of five copies of the same material with each of numerous submissions was necessary or consistent with agency purposes. Another comment similarly questioned whether requiring receipt of duplicative material was consistent with the avowed limited agency resources, as represented in the preamble to the proposal, and suggested that some discretion be left to the submitting party. One comment urged that the rule be amended to require the submission of only the relevant portions of recognized texts.

The Commissioner advises that, insofar as submissions rely on legal documents, such as FDA documents that are routinely made publicly available (e.g., staff manual guides, hearing transcripts), Federal court cases, or Federal laws or regulations, he has determined that copies of the original material need not be submitted. He considers it appropriate to adopt a similar position for submissions that rely on an established, readily available medical or scientific textbook. Section 2.5(c) of this final regulation reflects these changes. Moreover, in accordance with § 2.1(a), § 2.5 would not change other agency regulations that permit referencing of materials in other types of administrative submissions (e.g., § 310.9 Designated journals (21 CFR 310.9), waiving with respect to the agency's new drug regulations the submission of reprints and summaries appearing in the journals listed).

However, the Commissioner does not agree with other suggestions made in the comments. He advises that the agency cannot, with its limited resources, be left to ferret from its voluminous files documents to which reference is made in submissions. The filing systems used by the Hearing Clerk and most other agency offices require manual searches to locate most materials. The Commissioner advises that § 2.5(c) permits referencing of material in the administrative file of the same proceeding. He finds unworkable, however, the suggestion to allow submissions to be made without referenced documents, if the information (other than those types expressly excepted) is believed to exist in a different agency file. In such cases, the Commissioner concludes that the burden of filing duplicative material is less than the burden on the agency of manually locating identical material in other files, and, if it is not found, of notifying a party at that time to submit it.

In response to the comment urging that the rule be amended to require only the submission of relevant portions of recognized texts (and, presumably, other documents), § 2.5(c)(3) as promulgated provides specifically for the deletion of irrelevant material from references of any type. The Commissioner cautions, however, that material that is relevant but not necessarily supportive of a submission may not be omitted.

5. Several comments objected to the requirement in paragraph (c)(6) of proposed § 2.5, which provides for the rejection of submitted documents that fail to comply with any requirement of the regulations. The Commissioner advised in the preamble to the proposal that strict adherence to the requirements for submissions would be required, and that failure to comply could result in rejection of a submission by the Hearing Clerk, or its exclusion from consideration.

One comment considered the rule too inflexible, and contended that it is unjustified where the flaw is procedural and can be corrected easily. The comment further protested that no time limit was imposed on the Hearing Clerk to reject a document, and that the proposed rule did not provide for deferral of the agency decision in connection with which the document had been submitted until any defect in the submission had been corrected. Similarly, another comment inquired whether the resubmission of a rejected comment must be within the original time specified, referring to proposed § 2.112(c) in Subpart B (21 CFR 2.112(c)), which provides for resubmission of objections or requests for a hearing within the original 30-day time period. One comment suggested that 15 days be allowed from the day of rejection to allow a person to resubmit any rejected comment or other document. Still another comment urged that rejection of a comment be permitted only in the case of a serious failure to comply with reasonable requirements that are authorized by statute. Another comment suggested that the test for rejection should be that the document patently fails to comply substantially with the requirements, and complained that the case cited in the preamble to the proposal, *Municipal Light Boards* v. *Federal Power Commission*, 450 F. 2d 1341 (D.C. Cir. 1971), cert. denied, 405 U.S. 989 (1972), does not authorize rejection of a submission for failure to adhere exactly to formal submission requirements. One comment urged that a right of appeal be provided to permit challenges to the rejection of submissions. A final comment suggested that proposed § 2.5(c)(6) be revised to permit amendment of a submission as a matter of right when the submission is found to be procedurally deficient.

The Commissioner concludes that the provision be promulgated as proposed. He finds insubstantial the comments objecting to the authority of the Hearing Clerk to reject submissions for failure to adhere to the requirements of Part 2. These requirements have been imposed to facilitate agency business by avoiding the submission of requests or comments that are specious, insubstantial, or that fail to contain justification adequate to permit the Commissioner to evaluate properly the request or submission.

The Commissioner advises that the agency is not obliged to provide additional time for resubmission when a submission has been properly rejected. He believes the requirements for submission are precise enough to be met in the first instance—and that persons failing to meet them, rather than the agency, should bear the responsibility for the failure. Moreover, to provide an extended time for filing would clearly promote the filing of insubstantial submissions as a device to obtain additional time. Consequently, he disagrees as well with those comments demanding that an administrative right of appeal or right of resubmission be accorded when a submission is rejected.

The Commissioner also rejects the suggestion that he amend the requirements to permit rejection only when a submission "substantially" departs from the requirements; to do so would also invite the submission of incomplete and inadequate documents. He has essentially in this section reserved the right to reject submissions that are inadequate for the purposes for which they are submitted. At the same time, he advises that submissions will not be rejected frivolously or casually. Nor will rejection automatically preclude consideration when a corrected submission is not filed in a timely fashion. Comment closing dates in informal rule making, for example, indicate only when the Commissioner is no longer legally obligated to consider a comment; they do not prohibit him from considering comments filed late, and he frequently does so. The Commissioner advises that in implementing these requirements he intends to continue to observe a basic policy of fairness in determining whether a submission is acceptable.

6. Several comments objected to the various substantive requirements in § 2.5 for submissions to the Hearing Clerk. Some comments objected to the requirement of proposed § 2.5(a) that submissions be filed in quintuplicate. One urged that a comment or submission should not be rejected for the failure to submit the required number of copies. The comment also noted that the regulations fail to define "submission." Another comment suggested retaining the present practice of specifying the number of copies in each FEDERAL REGISTER notice.

The Commissioner advises that "submission" is intended to have its common dictionary meaning. Those documents that must be "submitted" to the Hearing Clerk for each type of contemplated agency action, moreover, are adequately described in the final regulation, and therefore no special definition of "submission" is necessary.

The Commissioner concludes that the final regulation will retain the specification of the number of copies of a submission, although as a matter of practice the number of copies will, as one of the comments suggested, also be specified in the relevant FEDERAL REGISTER notice. Based on a reassessment of agency needs, the Commissioner has reduced to four the number of copies required to be submitted, except where otherwise specified. A conforming change has been made in § 2.10(b)(4) (21 CFR 2.10(b)(4)) dealing with the submission of comments in response to a proposed regulation.

The question of the number of copies is one with which each Federal agency

must deal. Although agencies do possess duplicating facilities, most are fully utilized in duplicating agency-originated records. That FDA needs several copies of submissions is obvious—copies must not only be on display for public examination but must be forwarded to agency employees and, frequently, to agency counsel for evaluation and action. Many submissions number scores of pages and FDA lacks the resources to duplicate every one received. Because duplicating facilities are widely available, the Commissioner deems it reasonable to expect the public to undertake the task of duplication. Nonetheless, the Commissioner advises that the regulations do provide some exceptions to the general requirement that four copies be submitted. With respect to comments filed in response to proposed rule making, § 2.10 permits individuals to file one copy, on the basis of the Commissioner's experience that submissions by individuals (1) are less frequently received, (2) are submitted by persons often lacking access to duplicating facilities, and (3) are generally shorter than submissions from manufacturers, industry groups, and public interest organizations. Section 2.19(i) (21 CFR 2.19(i)) permits lesser numbers of copies to be submitted; namely, three copies of comments responding to advisory opinions. In this final regulation, that section permits individuals to submit one copy. The Commissioner believes that adequate justification has not been presented to reduce further the numbers of copies required. Rather, he views the requirements as necessary for the efficient conduct of agency business and not significantly burdensome.

In response to a comment inquiring whether comments will be rejected for failure to provide the requisite copies, the Commissioner advises that he will not normally reject these comments, although he has expressly reserved the right to do so. In most situations, where the failure to provide the required copies is not habitual, the Hearing Clerk will merely file the copy received and, depending on its length either request the person making the submission to provide additional copies, or make copies using agency facilities. The rule must permit some flexibility, and the Hearing Clerk will exercise appropriate judgment consistent with maintaining efficiency in the filing of documents.

7. One comment protested the requirement in proposed § 2.5(e) that certain submissions shall be considered filed on the date of receipt. The comment complains that this provides an advantage to persons located in Washington, DC.

The Commissioner advises that the receipt date is considered the filing date for only a small number of actions, e.g., petitions for reconsideration under § 2.8 and requests for administrative stays of action under § 2.9, where a strict filing time is specified to facilitate a prompt administrative decision. Establishing a date other than the receipt date as the day of filing in these limited circumstances would not be workable. The Commissioner views any disadvantage to persons outside the Washington area to be minimal, and to be clearly outweighed by the agency need to act expeditiously in certain limited types of matters.

The Commissioner advises that in most proceedings, except when another date is specified, § 2.5(e), as proposed and finalized, provides that the postmark shall be considered to be the date of filing. This rule applies equally to all persons regardless of their geographic location and the Commissioner finds this rule reasonable.

8. One comment asked implicitly whether proposed § 2.112(c), specifying steps the Hearing Clerk will take in filing objections or requests for hearing, should logically be incorporated into § 2.5. The Commissioner deems the comment to be valid, but advises that, as a matter of drafting preference, the references to "Subpart B of this part" in § 2.5(j) adequately incorporate the appropriate provision of § 2.112 into § 2.5.

9. Some comments objected to certain of the bases for rejecting comments stated in proposed § 2.5(c) (3) and (5). One comment characterized the reference to intemperate matter in § 2.5(c) (5) as vague and suggested deleting the requirement. Another contended that it is impracticable to remove all irrelevant matter as specified in § 2.5(c)(3), arguing that to do so would make many documents unintelligible and put undue emphasis on the matter retained. One comment suggested that what is irrelevant, defamatory, scurrilous or intemperate could vary widely, and argued that the provisions for resubmission were therefore inadequate.

The Commissioner views the issue raised by the comments as having some merit. He believes, however, that although the meaning of these words may vary, the standards can be fairly administered. The Commissioner must retain the ability to reject submissions whose content is clearly inappropriate for a public government file. He believes that proposed § 2.5(c) (3) and (5) contains a reasonably objective statement of criteria to be used, and thus has retained them in the final regulation.

The Commissioner advises that the comment regarding deleting irrelevant material has read the requirement too narrowly. The requirement does not intend that submissions must contain only carefully screened material that eliminates every irrelevancy. He advises, rather, that submissions should not include wholly irrelevant material that can easily be excised before submission, e.g., chapters of a book that are unrelated to the matter at hand. When thus viewed, he believes the requirement to be both necessary and desirable.

10. Comments expressed most concern about the requirement in proposed § 2.5(j) (2) (i) that material consisting of safety and effectiveness data and information or a protocol for a test or study be filed with the Hearing Clerk and be made available for public examination, but not for copying, if such material is submitted: (1) With an objection or request for a hearing filed pursuant to Subpart B of Part 2; (2) at a formal evidentiary public hearing pursuant to Subpart B of Part 2; (3) at a public hearing before a Public Board of Inquiry pursuant to Subpart C of Part 2; (4) at an alternative form of public hearing before a public advisory committee; or (5) at a public hearing before the Commissioner pursuant to § 2.117(a) (2) or (3) (21 CFR 2.117(a) (2) or (3)). Section 2.5(j)(2)(iii) proposed further that such material would be on public display and available for examination only for such time as is necessary to permit public participation in the public hearing, and any related judicial review. Proposed § 2.5(j) (2) (iv) would specify, in addition, that this limited availability would not constitute prior disclosure to the public as defined in § 4.81 (21 CFR 4.81) of the FDA public information regulations under Part 4 (21 CFR Part 4), and would prohibit any such information, if improperly copied, from being resubmitted to the agency in support of a petition or other request.

The many comments on the proposed requirement expressed essentially similar objections. Several comments argued that allowing examination but not copying of confidential safety and effectiveness information would be violative of the relevant statutory provisions prohibiting disclosure of trade secret information, i.e., 18 U.S.C. 1905 and section 301 (j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331(j)) and would be inconsistent with prior agency positions, primarily reflected in its public information regulations, and the new drug regulations under § 314.13 (21 CFR 314.13). The comments insisted that these regulations clearly provide that previously undisclosed safety and effectiveness data, at least insofar as they relate to a product subject to a new drug application (NDA) (or new animal drug application (NADA)), are trade secrets and not subject to public disclosure, citing *Morgan v. FDA*, 495 F. 2d 1075 (D.C. Cir. 1974). The comments insisted, further, that if such information is entitled to confidential treatment, it is entitled to full and not partial confidentiality; that the law does not provide for degrees of nondisclosure; and that making such material available simply for examination cannot fairly be characterized as anything other than disclosure.

One comment suggested that permitting public examination of safety and effectiveness data may result in a court finding that the data no longer retain their trade secret status. Still another comment maintained that submission of trade secret material to a third person destroys trade secret status under common law and may thus influence parties not to submit information because of the likelihood of disclosure.

One comment claimed that the position ignores the competitive value of the information and that even limited exposure to such data can greatly facilitate a competitor's filing an NDA for an identical or similar drug. The comment urged that mere exposure to the results of a competitor's research points to approaches found most effective and eliminates much of the trial and error experienced by the originator of the data. A related comment noted that protocols and test data may often have a commercial value beyond the single product or product class for which they were submitted. Several comments indicated that a mere viewing of such documents, particularly by trained scientists, can yield much information.

Another comment questioned the view stated in the proposal that the only value of the information would be in its resubmission to FDA. The comment contended, as did others, that such data had other commercial value. The comment suggested that the data would be valuable in obtaining product approvals in foreign countries, in designing clinical studies on similar compounds, and in verifying the results of independent research.

Several comments also disputed the representation in proposed § 2.5(j) (2) (iii) that the agency would not accept such material if improperly copied and submitted, pointing out that FDA has already taken the position in the preamble to its public information regulations published in the FEDERAL REGISTER of December 24, 1974 (39 FR 44602) that it could not under present law refuse to approve an identical, similar, or related drug on the basis of information that has been disclosed. Moreover, the comments questioned whether, even if FDA could lawfully refuse to accept such data, it could effectively enforce the ban on copying, or readily determine when wrongfully copied data, effectively disguised, were being resubmitted.

One comment asked whether the agency would, for example, require a second submitter to provide evidence that the information was not obtained by unauthorized copying. One comment pointed out that the rule forced a party to face the penalty of foregoing a hearing, guaranteed him by statute, if he did not wish to disclose his data. A related comment suggested that no need existed for public display of safety and effectiveness data when a hearing involved an NDA. It contended that the principal participants in an NDA hearing are the manufacturer and the agency, and that if the data were available to these parties, there would be no need to make it otherwise available, except through the already established use of summaries. Another comment suggested that the regulations not be finalized unless the FDA public information requirements were upheld in a suit against the regulations brought by the Pharmaceutical Manufacturers Association.

Several comments opposing the adoption of proposed § 2.5(j) (2) suggested alternatives in lieu of the proposed manner of disclosure of the material. One comment suggested maintaining confidentiality by limiting any disclosure to properly concerned parties under appropriate protective orders granted by the administrative law judge or authorized presiding officer. It suggested that such an arrangement has been held valid in a freedom of information context, citing *Porter County, etc., League* v. *U.S. Atomic Energy Commission*, 380 F. Supp. 360 (N.D. Ind. 1974). The comment suggested that where parties were represented by outside counsel, the documents could be disclosed to the counsel with a prohibition against disclosure to the client. The comment insisted that this procedure would both protect confidentiality and permit full participation in the hearing process.

Another comment contended that any need to disseminate safety and effectiveness data could be satisfied through the use of summaries under § 314.14(d) (21 CFR 314.14(d)), dealing with the treatment of such information when part of an NDA, and the agency's public information regulations under Part 4. It concluded that the material in question should thus be treated under proposed § 2.5(j)(3), namely, to permit neither examination nor copying.

One comment suggested that the requirements of proposed § 2.5(j)(3), which would prohibit disclosure except as permitted by the public information regulations, should apply to disclosure where participants are concerned. The comment would, by implication, permit disclosing the material to parties, although it did not specify whether the parties would be able to do more than review the material. The comment would require any party permitted to view the material to sign a statement that all trade secrets and confidential information would be used for the hearing only, and otherwise kept in confidence.

One comment expressed views contrary to the foregoing criticisms of the proposal. The comment protested the ban on copying imposed by proposed § 2.5(j) (2), claiming it to be unwise, unnecessary, and unenforceable. The comment noted anomalies in the requirement: that it would limit access to those who regularly meet or work in Washington or regional headquarters, and would put a premium on an observer's memory. It urged the agency to "go all the way" for convenience and accuracy.

While the Commissioner does not consider each of the objections to the requirements of proposed § 2.5(j) (2) to be valid, he has, upon reconsideration of the issue, determined to withdraw the provision.

The Commissioner agrees that proposed § 2.5(j) (2) is not readily reconcilable with the agency's position under Part 4. The public information regulations assert the traditional position that previously undisclosed full reports of safety and effectiveness data and certain protocols for studies are trade secrets and are thus prohibited from disclosure under both 18 U.S.C. 1905, the basic Federal criminal statute prohibiting the disclosure of trade secrets, and section 301(j) of the act, prohibiting the revealing of any information obtained under sections 404, 406, 505, 506, 507, 510, 512, 513, 514, 515, 516, 519, 520, 704, 706, or 708 of the act (21 U.S.C. 344, 346, 355, 356, 357, 360, 360b, 360c, 360d, 360e, 360f, 360i, 360j, 374, 376, 379) concerning any method or process which as a trade secret is entitled to protection.

Because of the large number of comments addressed to this issue, the Commissioner believes a full discussion of his reasons for modifying the proposal is appropriate. His position in the proposal was not that these materials were no longer trade secrets and were thus subject to disclosure, but rather that by limiting access to them to viewing only, and by precluding their resubmission to the agency by any other party, the agency would protect those interests that gave these materials their trade secret status. The Commissioner believed that this interpretation of the Federal nondisclosure statutes was appropriate, and that making the material so available would enhance the various hearing processes by allowing all participants access to information germane to the hearing.

The Commissioner continues to believe that the public availability of the information in question could enhance the utility and fairness of the public hearings provided for in Part 2. He has changed his position on the basis of three factors: (1) Upon reconsideration, he concludes that Congress has determined that such information may not be disclosed to the general public and that he must abide by that determination even in the context of public hearings, where access to the information may have a demonstrable public benefit; (2) the "look-but-don't-copy-rule," and the concomitant prohibition against resubmission of the material, would invite circumvention through both surreptitious efforts at copying and disguised resubmission, and could not be effectively enforced; (3) the benefit to the hearing process would be problematical. The Commissioner cannot say with assurance that mere access to the data, without copying, would permit the meaningful participation in the hearing process that was the objective of the proposal.

The provision has been modified, as suggested by a comment, to subject previously undisclosed safety and effectiveness data and information, including protocols, in a hearing setting to the restrictions against disclosure in proposed § 2.5(j)(3) (redesignated as paragraph (j)(2) in this final regulation), which will make the information available to all persons in accordance with Part 4, the agency public information regulations. As a practical matter, this will provide for the display of agency-prepared or -approved summaries for unlimited viewing and copying in the office of the Hearing Clerk, or dissemination of such summaries on request.

The Commissioner has also added a new paragraph (j)(3) to § 2.5, to permit disclosure of safety and effectiveness data and information, and otherwise undisclosed protocols for tests and studies, pursuant to a protective order issued by the administrative law judge at a formal evidentiary public hearing pursuant to Subpart B, or by the presiding officer at

a public hearing before a Public Board of Inquiry pursuant to Subpart C, or an alternative form of public hearing before a public advisory committee or a public hearing before the Commissioner pursuant to § 2.117(a) (2) or (3) (21 CFR 2.117(a) (2) or (3)). Any protective order must prohibit the disclosure of such confidential data except insofar as the administrative law judge or other presiding officer determines necessary for the proper conduct of the hearing. Paragraph (j)(3) accordingly permits disclosure only in in camera proceedings from which persons not specifically permitted access to the data would be excluded. The order must specify to whom the information is to be made available, e.g., to parties or participants, or only their counsel. The regulation thus permits the administrative law judge or other presiding officer to fashion a protective order to meet the circumstances of individual proceedings so long as the stated requirements are met. The requirements of proposed § 2.5(j)(2)(iv), prohibiting the resubmission of any material so disclosed, are incorporated into new paragraph (j)(3).

The Commissioner believes the use of protective orders and in camera proceedings meets most of the objections in the comments to the disclosure of this information. He notes that the use of in camera administrative proceedings to protect the confidentiality of information is recognized in the regulations of other agencies, e.g., 16 CFR 3.45, providing for in camera orders in proceedings before the Federal Trade Commission, and he is confident that, consistent with applicable statutes, such orders can be properly used in FDA hearings. For all interested persons not permitted to participate in in camera proceedings held as part of an administrative hearing where confidential safety and effectiveness data are discussed, summaries of such material will be available for inspection and copying in the office of the Hearing Clerk.

The Commissioner has not accepted other recommendations in the comments, e.g., the suggestion that disclosure be limited only to parties to the hearings; such a step would increase the number of persons seeking to become parties to a hearing simply to obtain access to confidential information. He rejects the obvious regulatory response to such a problem—to severely limit who may become a party to individuals, organizations, etc., having a recognizable specified interest in the proceedings—because it is inconsistent with the requirements' overall intent to improve access to FDA proceedings.

Nor does the Commissioner believe that he could lawfully adopt the last suggested alternative: permit copying as well as inspection of the material in question. This would be unauthorized under 18 U.S.C. 1905 and section 301(j) of the act.

11. The final order promulgating the public information regulations under Part 4 advised that confidentiality of documents submitted voluntarily to the Hearing Clerk cannot be established by submitting documents marked "confidential" or bearing some other analogous legend, but rather can be established only through presubmission review of voluntarily submitted documents under § 4.44 (21 CFR 4.44). The Commissioner advises that the personnel of the office of the Hearing Clerk cannot make decisions regarding confidentiality. Again, the Commissioner advises that the presubmission review procedure of § 4.44 must be followed by any member of the public who wishes information submitted voluntarily to the agency in a public proceeding to be held confidential. He has incorporated language to that effect in § 2.5(c)(6). In the absence of an affirmative determination of confidentiality under § 4.44, FDA will continue to make publicly available all materials submitted to the Hearing Clerk, notwithstanding any claims of confidentiality made on the face of a document.

12. Concern was expressed within the agency during the rule making process regarding the need for submissions from standard-setting organizations in which an FDA employee is participating under § 2.21 (21 CFR 2.21). The Commissioner advises that such organizations cannot properly rely on the FDA employee to convey their views regarding an anticipated agency action. Rather, any such group should, regardless of the number or identity of agency employees participating in its activities, offer submissions in its own name in accordance with this subpart whenever the organization wishes to make its views known to the agency.

Section 2.6 Initiation of administrative procedures (21 CFR 2.6) which specifies generally how agency action may be initiated is adopted substantially as proposed. Such action may be initiated (1) by any interested person who petitions the Commissioner in accordance with the requirements of this part or other agency regulations, (2) by the Commissioner, on his own initiative, or (3) when a court refers any such matter to the Commissioner after holding the matter in abeyance, dismissing an action regarding the matter in question, or making other appropriate judicial disposition of the matter.

13. A clarifying change has been made in § 2.6(c). As proposed, the section required the Commissioner to institute a proceeding "* * * whenever any court holds in abeyance or refers any such matter to him for * * * determination and the Commissioner concludes that the making of such a determination is feasible in light of agency priorities and resources." The phrase "holds in abeyance" might be understood to refer to a matter then before the agency and not, as was intended, simply to a matter then before the court. The referral by a court in § 2.6(c) means only those referrals not sought by the Commissioner, which are to be distinguished from referrals discussed in paragraph (b) of § 2.6. The latter result from initiatives by the Commissioner to have a matter within the agency's primary jurisdiction and pending before a court referred to the agency for decision or reconsideration. The language of § 2.6(c) has been clarified to reflect this distinction.

14. The only comment received on proposed § 2.6 urged that § 2.6(a), relating to administrative matters subject to citizen petitions, exclude food additive petitions under § 121.51 (21 CFR 121.51), NDA's under § 314.1 (21 CFR 314.1), and NADA's under § 514.1 (21 CFR 514.1). The comment argued that allowing any person to petition the Commissioner to revoke an NDA could create outside pressures inconsistent with the exercise of sound judgment, and could require that the holder of the NADA spend substantial time answering such a petition, even when the petition was without basis.

The Commissioner disagrees with the comment's contention that any interested person should not be entitled to petition to modify or reverse any agency action, including one that may have initially been taken ex parte, such as the approval of an NDA or NADA. The effects of such actions clearly extend to the public generally, and the public thus is entitled to initiate agency review of such decisions.

The Commissioner also notes that the comment appears to misunderstand the nature of the requirement. The mere submission of a petition under the section does not obligate the Commissioner to undertake agency action apart from reviewing the petition (e.g., § 2.7(e) (21 CFR 2.7(e))). Thus, the mere filing of a petition to revoke an approved NDA would not, as the comment postulates, automatically oblige the holder of the NDA to reply. Such reply would be necessary only if the Commissioner proposes to take an action on the petition adverse to the NDA holder; such action would be proposed only after his decision that the petition was meritorious. The comment is accordingly rejected.

Section 2.7 Citizen petition (21 CFR 2.7) codifies the requirements for citizen petitions, the mechanism by which any member of the public may seek agency action on any matter, except for the referral of matters to a United States attorney for the initiation of court enforcement action and related regulatory activities that are within the exclusive discretion of the Commissioner. As noted in the preamble to the proposed rule, in the past FDA has had no requirements governing the manner in which citizens might petition the agency to undertake agency action. This has resulted in confusion and uncertainty on the part of those who wish to petition the agency, as well as on the part of agency employees, on how to handle particular requests from the public.

15. The final regulation contains a new requirement, not proposed, that a citizen petitioner supply, when specifically requested by the Commissioner following review of the petition, information on the economic consequences of the action requested. Pursuant to Executive Order 11821, OMB Circular No. A-107, and HEW Guidelines, FDA is required

to consider the inflationary impact of legislative proposals and major rules and regulations that it initiates. The Commissioner has therefore added a new paragraph D, to the citizen petition form set forth in § 2.7(b) that requires citizen petitioners, when requested, to submit the type of information required under E.O. 11821 to be considered by executive agencies in assessing the inflationary impact of proposed actions. The submission of information relating to inflationary impact would not be required of every citizen petition. While evaluation of the inflationary impact of agency action is important, the one court that has addressed the issue has held that agency action is not subject to reversal because of alleged deficiencies in an inflation impact statement (*Independent Meat Packers Association v. Butz*, 526 F.2d 228 (8th Cir. 1975)). The Commissioner believes it justifiable, therefore, to elicit such information from petitioners only when he believes that additional information is necessary to evaluate the consequences of acting on a petition. In addition, the Commissioner will take into consideration the ability of the petitioner to provide relevant information and he recognizes that it is incumbent on the agency also to obtain such information from sources other than the petitioner.

16. Proposed § 2.7 does not obligate the Commissioner to respond definitively to citizen petitions within a given time frame, except where time limits are prescribed by statute. Several comments objected to this provision. The comments identified what they considered a lack of fairness, pointing out that other provisions of the proposed regulations (e.g., § 2.11 (21 CFR 2.11)) specify that administrative remedies be exhausted before court review can be obtained. One comment complained that a lack of a definite response period operated to the disadvantage of consumer groups as compared to industry petitioners, contending that in the past, consumer petitions filed with FDA have been forgotten.

The preamble to the proposal identified several reasons why no time period for response by the agency to petitions had been specified and explained that limited agency resources make it impractical for the agency to deal promptly with petitions concerning subjects of low priority. Moreover, the preamble noted that specifying a time period for reply might force the agency to decline requested action simply because it could not act within the time allowed.

After reviewing the various arguments, the Commissioner has determined that the agency should obligate itself to respond to a petitioner, at least preliminarily, within a specified time period. He has determined that such a requirement will on balance enhance agency efficiency in conducting its business. Moreover, the Commissioner believes that the obligation to respond to a citizen petition, when that response is overdue, must be regarded as a priority matter regardless of the petition's content, if the agency is to maintain the public confidence in its ability to deal with the issues within its jurisdiction.

Accordingly, as suggested by some comments, § 2.7(e) has been revised to require that the agency respond within 180 days to any petition submitted under that section. The response shall be either (1) approval, accompanied by some form of implementing action, e.g., the publication of a notice of proposed rule making, (2) denial, constituting final agency action, or (3) a tentative response, indicating why the agency has been unable to reach a decision on the merits of the petition, e.g., because of other agency priorities, a need for additional information, or other stated reason. The tentative response may indicate the likely agency response, and may specify when a definitive response may be given.

The Commissioner believes this modification will eliminate the uncertainty on the part of petitioners that the comments attribute to past agency handling of petitions, and thus responds to what appears to be the major objection raised by the comments.

17. Section 2.7(g), as proposed and as promulgated, permits any petitioner to supplement, amend, or withdraw his petition at any time before referral of the petition for hearing. After such a ruling or referral, however, the petition may be withdrawn only with the approval of the Commissioner. An editorial modification has been made to the section to clarify its meaning.

18. One comment suggested that § 2.7 be modified to state expressly that voluntary withdrawal of a petition shall be without prejudice to its resubmission. The Commissioner concurs that this is consistent with the intent of the section, and has revised § 2.7(g) accordingly. The Commissioner also advises, however, and has modified § 2.7(g) to provide, that when a petition may only be withdrawn with the agency's approval, the petitioner may resubmit it only with the agency's approval.

19. Section 2.7(l) requires the Hearing Clerk to maintain a chronological list of all petitions filed under that section, and under § 2.19, but excludes from the list petitions submitted to other parts of the agency pursuant to § 2.6(a)(1). The list, as proposed, would include for each petition the docket number established by the Hearing Clerk, the date the petition was filed by the Hearing Clerk, the name of the petitioner, and the subject matter involved. One comment suggested that a new item concerning the disposition of the petition be added so that interested persons might more easily determine what action FDA has taken on the petition. The Commissioner concurs with the suggestion and, as promulgated, paragraph (l) has been modified accordingly.

20. One comment urged that if petitions are permitted to be filed elsewhere in the agency and not listed by the Hearing Clerk, the regulation should provide for publication of notice in the FEDERAL REGISTER and direct communication with the holder of any NDA or NADA that is the subject of the petition.

The Commissioner advises that the procedures for revocation of an NDA or NADA are codified in both the Federal Food, Drug, and Cosmetic Act and agency regulations (section 505(e) of the act and § 314.121 (21 CFR 314.121); section 512(e) of the act and § 514.121 (21 CFR 514.121)) and already provide for notification of the holder of an approved NDA or NADA as part of any proceeding for revocation. Accordingly, no amendment to the regulations is necessary.

21. Many comments objected to the requirements in paragraph B of the proposed form for a citizen petition in § 2.7(b) that each petition include "* * * representative data and information known to the petitioner that are unfavorable to the petitioner's position." Some of the comments suggested that this requirement might violate the constitutional protection against self-incrimination, pointing out that a penal sanction may arise from the failure to comply. One comment questioned whether a violation of the False Reports to the Government Act would arise from a failure to provide required adverse information. Another comment maintained that to require a lawyer to include such information might conflict with his professional obligations. Another comment suggested that the adverse information might be misrepresented wittingly or unwittingly. That comment urged that the requirement was inappropriate; that truth in such matters should arise ultimately from the clash of opposing viewpoints. At least one comment attempted to characterize the conflict as one setting industry against consumer, and suggested that while the requirement might be fitting for an industry petition, it would have a "chilling" effect on citizen petitions. Another comment suggested the provision would give the agency an unfair advantage in court, should its decision on the petition be later subject to judicial review. Still other comments argued that the requirement was superfluous, contending that FDA would be obligated in any event to seek out adverse information on its own. A final comment suggested that the requirement, if adopted, should be revised to apply only to scientifically backed data and information, and that it not encompass unsupported lay opinion.

The Commissioner does not accept these arguments, and has promulgated the requirement as proposed. He finds that those comments that attempt to characterize administrative rule making resulting from citizen petitions as a type of litigation, and those that equate requiring inclusion of "unfavorable information" with self-incrimination, misunderstand the nature of administrative rule making. In rule making, the agency is attempting to make judgments about regulatory policy on the basis of all the scientific information that is available on a subject. There is thus no valid analogy between the interests of partici-

pants in a rule making proceeding and the interests of those involved in a criminal trial.

Equally important is the failure of the comments to recognize that divulging adverse information may advance rather than detract from a participant's position. The administrative record of a particular matter may contain information adverse to the Commissioner's decision and still be legally sufficient to support the decision. Indeed, in making many administrative decisions, the Commissioner will often choose between competing versions of the "facts." What the comments overlook is that a decision favorable to a petition that reflects a review of information and arguments both supportive of and adverse to the petition is likely to be credible, and thus ultimately more supportable, than a decision reached on the basis only of supportive information.

The Commissioner also rejects the suggestion that only scientifically backed adverse information should be required to be included. Issues that come before the Commissioner rarely turn on definitive or uncontradicated evidence, and adverse educated opinion, even if lay opinion, should be included if for no other reason than to permit the agency to explore the matter further if it so desires.

22. The Commissioner also rejects comments that protested the proposed requirement that citizen petitions, to be acceptable for requirements were demanding and that their inflexibility would discourage citizens from filing petitions. The comment contended that a document should be accepted as a petition if it includes (1) the word "petition," (2) a statement of the petitioner's request and reasons, and (3) a signature, address, and telephone number. Another comment suggested that a simple letter be accepted when the request cannot be answered simply by letter. A third comment suggested that a petition not be rejected for deficiencies of form until FDA had assisted the petitioner in bringing the petition into conformity.

The requirement that citizen petitions take a particular form and contain specifically prescribed information is not intended to create obstacles to persons who would petition for particular agency action. Given the heavy workload of the agency, the Commissioner believes it necessary to give formal petitions a status different from mere inquiries or suggestions so that he may properly respond. The agency may expend significant resources in responding to citizen petitions and the Commissioner believes it proper for any person requesting agency action to set forth with some completeness the basis for the request. The Commissioner does not find the substantive requirements of § 2.7 onerous, and believes that laymen can readily comply.

Moreover, the regulations are responsive to the comment requesting the agency to assist a petitioner in bringing a petition into compliance. Section 2.5 (c)(6), which applies to citizen petitions filed pursuant to § 2.7, provides, as proposed, that if the Hearing Clerk discerns that a petition or other submission fails to meet formal requirements, the submission will be returned to the petitioner with a copy of the applicable regulations indicating how the document fails to comply, without prejudice to the petitioner's right to resubmit the document in proper form.

23. Many comments also objected to the requirement in proposed § 2.7(b) that each petition contain an environmental impact analysis report in the form specified in § 6.1(g) (21 CFR 6.1 (g)). Some of these comments apparently misunderstood the requirement as relating to an environmental impact statement, for this reference is contained in several of the comments. The Commissioner advises that a full environmental impact statement is not required as part of a citizen petition. The report specified in § 6.1 requires general and nontechnical information on the environmental aspects of contemplated action, some of which will have been provided in other parts of a citizen petition.

Comments from some consumer groups argued that nonindustry petitioners did not have the resources to prepare environmental impact analyses, or urged that the requirement be that such a report be submitted only if the agency should later advise a petitioner of the need for an environmental impact statement. One comment suggested that in such as case the agency should prepare the environmental impact analysis report.

The Commissioner rejects the view that petitions from nonindustry sources should be exempt from the need for environmental evaluation, or that public interest or consumer groups should not conduct the review required in an environmental impact analysis report. The Commissioner regards the information provided in such a report as important in his evaluation of a petition, for the information will help determine whether the agency will be required to prepare, should it decide to undertake the requested action, an environmental impact statement. In cases where the environmental effects of an action will be minimal, the burden of preparing the required report will be correspondingly reduced.

24. A few comments objected to the requirement of proposed § 2.7(b) that a petitioner certify the truthfulness of the information contained in the petition. One comment argued that the requirement creates confusion, because it appears to limit the vigor with which a petitioner may argue against denial of his petition without violating the False Reports to the Government Act. Another comment argued that the proposed certification is unnecessary because § 2.5(1) already provides that all submissions constitute a representation that all statements therein are true and accurate.

The Commissioner has decided to retain the certification requirement in a citizen petition. He views as spurious the argument that the requirement makes impossible the obligation of a petitioner to include information unfavorable to the petition; all that is required is that a petitioner include such information as is known to him. Finally, while the requirement may be technically redundant, its inclusion will remind petitioners to verify the accuracy of their submissions.

Section 2.8 Administrative reconsideration of action (21 CFR 2.8) provides for reconsideration by the Commissioner of any administrative matter on his own initiative, and with respect to a matter initiated under § 2.6(a), on the basis of a petition submitted by any interested person. The section is adopted essentially as proposed.

25. Comments on § 2.8 objected to what they urged were unnecessarily rigid requirements of form for a petition for reconsideration. The Commissioner does not accept the objection. He has specified the form such petitions must take, not out of any preoccupation with form, but because he believes that petitions for reconsideration, given their importance and the need for prompt resolution of the issues they raise, must contain certain requisite information. The minimum requirements are set forth in the section, and the Commissioner finds them to be simple and straightforward. They are not intended to be, nor does the Commissioner find them to be, onerous in any respect.

26. Comments also objected to the requirement in proposed § 2.8(b) that a petition for reconsideration be filed within 30 days of the action that is to be reconsidered. One comment urged that the 30-day provision be extendable for good cause on the basis of new evidence; the comment argued that to require the proceeding to be reopened by the filing of a new petition would be wasteful of the resources of the petitioner and the agency. One comment also urged the addition of language to the section to require that specific notice of the Commissioner's original decision be provided to all parties to an action so that they would be assured of knowing when the 30-day period begins.

The Commissioner believes that the requirement that a petition for reconsideration be filed within 30 days of the action is reasonable. Such a petition seeks immediate review of agency action by the Commissioner on the basis of the same information as was before him at the time of his original decision. The Commissioner regards the need for prompt submission to be self-apparent. The Commissioner also does not accept the suggestion that the 30-day period be made extendable on the basis of new evidence. He advises that reconsideration is limited to the data and information on which the original action was taken. Moreover, to adopt the suggestion would undermine the finality of agency actions.

The Commissioner also rejects the suggestion that all parties to a proceeding be specifically, i.e., personally, notified so that they will know that the 30-day period has begun. The Commissioner advises that he believes publication of a decision in the FEDERAL REGISTER provides adequate notice of when a decision has been made. A conforming change has been made in § 2.8(b) to indicate that, for purposes of computing the 30-day period, the date of publication shall be considered the date of the decision. Where the decision of the agency is not announced by FEDERAL REGISTER publication, the parties involved would be personally notified of the decision, e.g., a denial of a citizen petition under § 2.7 (e). The Commissioner's decision would also be placed in the public file of the matter. The Commissioner does not believe that further notice to the public of agency decisions is legally required, practicable, or necessary.

Section 2.9 Administrative stay of action (21 CFR 2.9) provides a mechanism by which the Commissioner may stay the effective date of any administrative action (but not including court enforcement action) on his own initiative, or on the petition of any interested person. The section is adopted without significant change.

27. One comment objected to what it considered to be unnecessary requirements for the form of these petitions. As stated in his response to similar objections regarding § 2.7 and § 2.8, the Commissioner's insistence on prescribing the form of such petitions arises from the need to assure that they contain adequate information on which to base a judgment. The requirements are not so complicated or rigid that the Commissioner feels obliged to relax them.

28. One comment urged that the proposed 30-day period for response was too short. The comment pointed to the 60-day period generally provided for seeking judicial review, and the 90-day period specified in section 701(f) of the act (21 U.S.C. 701(f)) for seeking judicial review of agency action resulting from proceedings governed by section 701(e) of the act (21 U.S.C. 701(e)).

The Commissioner believes that a 30-day period is adequate for interested persons to seek an administrative stay of agency action. It is important that such requests be reviewed expeditiously so that court review, if desired, will not be unduly delayed. The comment, moreover, fails to distinguish review of administrative action, which normally relates to the merits of the action, from a stay, which only delays implementation of the action. A petition for stay raises issues that ordinarily are far less complex than a challenge to the merits, and the references to the longer statutory periods in the comment are thus not relevant.

29. The Commissioner disagrees with comments urging that the filing of a petition for a stay should automatically stay the action for a period of time after the Commissioner's decision on the petition. These comments also urged that the regulation provide that no final order shall become effective in less than a specified time period. The result of accepting these comments would be that no action of the Commissioner could become effective until affected parties have had time to petition the agency for a stay, and if denied, to seek a stay in the courts. The comments argued, however, that the failure to so provide, given the Commissioner's stated intention to oppose any judicial stay until he has had an opportunity to review such a request administratively, would allow parties to be irreparably harmed by agency decisions without being able to seek judicial review of them.

As stated in the preamble to the proposed rule, the Commissioner's enforcement duties under the regulatory statutes for which he is responsible require that he have discretion to determine when enforcement or other regulatory action is appropriate, subject to judicial review. The requirements of § 2.9 as promulgated do not, in the Commissioner's judgment, deprive any individual of due process, and are fully consistent with applicable law.

30. One comment objected that parties are not apprised quickly when the Commissioner has made a decision, as when publication in the FEDERAL REGISTER is delayed for several days following a decision. Direct mail notice to all parties was requested.

The preamble to the proposed regulation indicates that the day of publication in the FEDERAL REGISTER will be the day of decision for purposes of petitions to stay an administrative action. The Commissioner believes this provision will minimize to the extent practicable the delay inherent in advising an entire nation of an agency decision. Some delay is unavoidable. A conforming change has been made in § 2.9(b).

31. One comment urged that the Commissioner obligate himself to respond to a petition for stay within a specified time period. The Commissioner has obligated himself to respond "promptly," and he believes further specificity is neither practicable nor necessary.

Section 2.10 Promulgation of regulations for the efficient enforcement of the law (21 CFR 2.10) specifies the procedures the Commissioner will utilize in the promulgation of regulations under the basic grant of rule making authority contained in section 701(a) of the Federal Food, Drug, and Cosmetic Act, and the rule making provisions of the Administrative Procedure Act (5 U.S.C. 553). Procedures for the promulgation of regulations pursuant to the more formal requirements of section 701(e) of the act and 5 U.S.C. 556 and 557 are contained in § 2.12 (21 CFR 2.12) and in Subpart B of Part 2, except insofar as those sections incorporate by reference some of these requirements.

32. Section 2.10(g) specifically prescribes what constitutes the record of an administrative proceeding under § 2.10. The proposal incorrectly established as the closing date of the record the day of publication of the final regulation in the FEDERAL REGISTER. This would technically have permitted new information to be submitted after the Commissioner's adoption of a regulation, but before its publication. Any such information, however, must be submitted under a new petition filed in accordance with other sections of these requirements, e.g., § 2.7. Consequently, § 2.10(h) has been revised to provide that the record shall be closed on the date the Commissioner signs a regulation.

33. Section 2.10(e) requires that, when notice and public procedure are not utilized in issuing a regulation, the notice promulgating the regulation shall provide an opportunity for comment to determine whether the regulation should subsequently be modified. In addition, the Commissioner may, in his discretion, similarly permit comment on any final regulation. However, it was the Commissioner's intention that subsequent final regulations based on such comments need not in either case, though, they may, provide additional opportunity for comment or other form of public participation. Section 2.10(e)(1) has been modified to make this clear and a conforming change has been made in § 2.10(f)(10).

34. One comment objected to the predisposition against extensions of the comment period that the Commissioner acknowledged in the preamble to the proposed regulation.

The Commissioner's reasons for limiting extensions of the comment period were explained in the preamble to the proposal. Principal among them is the failure of many people to take the stated time for comment seriously. Nonetheless, the rule specifically allows for extension of the comment period in appropriate, though limited, circumstances.

35. The same comment urged also that the Commissioner not be confined to comments in establishing final rules.

The Commissioner points out that the section does not require him to rely only on comments submitted on the proposal when formulating a final regulation. Section 2.10(f) permits the Commissioner to use a wide range of administrative mechanisms to obtain information on any matter that is the subject of rule making. Moreover, that § 2.10 does not specifically provide for the generation of new information by the agency following the publication of a proposal does not preclude the agency from doing so. The authority to generate this information is implicit in the Commissioner's authority to issue regulations under section 701(a) of the act, and, indeed, is recognized in § 2.10(g)(5), which provides for filing with the Hearing Clerk "all data and information identified or filed by the Commissioner * * * as part of the administrative record supporting the final regulation."

36. Another comment suggested substituting "may" for "shall" in § 2.10(a)(2). The comment argued that not doing so would make the Commissioner's failure to publish a proposal subject to judicial review, and would then invite a court to require publication, a function that should be reserved exclusively for the legislative and executive branches.

The Commissioner does not believe that the language of the section deprives him of the discretion afforded by the law. Rather, the regulation merely specifies in general terms when the Commissioner will view a request for agency action to be sufficiently meritorious (if

consistent with law) to warrant public and agency consideration. The provision does not, as the comment mistakenly assumes, require the Commissioner to finalize such action; § 2.10(c) specifically provides for termination of a rule making proceeding as one possible outcome of review of the entire administrative record based on a proposal.

37. A comment urged that § 2.10 be amended to provide for time limits after the close of the comment period by which the Commissioner must issue a decision. The comment suggested 90 days, with provision for an additional 90 days upon a showing of good cause.

The Commissioner rejects this comment. The timetable for completion of a rule making action must remain subject to his discretion. Apart from judgments about agency priorities, which themselves may result in delays of varying length in concluding some rule making actions (but may frequently result in the expeditious handling of others), it is often not possible to predict how quickly a rule making proceeding can be concluded until after the comments on the proposal have been evaluated. The comments may reveal a need for additional proceedings, which if undertaken may prevent conclusion of the proceeding within any time period previously specified. The Commissioner thus concludes that it would be impracticable to specify such a time period.

38. The same comment also suggested that the regulation should more specifically state those narrow circumstances, e.g., where required by the public health and safety, when opportunity for notice and comment might be waived, and limit use of this procedure to situations in which alternatives such as a shorter comment period will not suffice.

The Commissioner finds the broad language in § 2.10(e)(1), "impracticable, unnecessary, or contrary to the public interest," which mirrors the standard of 5 U.S.C. 553, to be more satisfactory. Whether to dispense with notice and comment, including the use of alternative procedures, is a decision that must largely remain subject to the Commissioner's discretion. The provision would clearly permit such a decision in the situation suggested by the comment, namely, when necessary for the public health and safety.

39. One comment suggested that proposed § 2.10(l), which requires that the Hearing Clerk compile a list of regulations proposed and promulgated, include within the list the disposition of each matter. The Commissioner advises that the intent to include the disposition of each proposal is apparent in the proposed inclusion in the list of regulations "promulgated," for that would be the ordinary disposition of any prior proposed rule. In response to the comment, however, the Commissioner has determined that the list should specifically include the disposition of the petition. This change conforms to a similar change in § 2.7(l).

40. One comment objected to the statement in the preamble that the Commissioner will not take into account the number of comments but will consider, rather, repetitive comments as one. The comment states that this position demonstrates a preconceived agency bias and implies that such comments are not made in good faith.

The Commissioner intends no such implication. His statement means that it is the substance and not merely the number of comments that will be persuasive in formulating final regulations. Many similar conclusory comments will thus be less persuasive in the Commissioner's determinations than smaller numbers of thoughtful and well documented ones. However, § 2.10(c)(1) of the final regulations recognizes that the number of comments may be influential where the degree of public interest in a matter is a legitimate factor to be considered.

41. To conform with existing agency practice, § 2.10(f)(9) has been revised to provide for the publication in the FEDERAL REGISTER, when considered desirable by the Commissioner, of tentative final regulations. The proposal provided only for publication of a notice of availability of the documents.

42. Several comments objected on various grounds to the Commissioner's efforts in § 2.11 Court review of final administrative action; exhaustion of administrative remedies (21 CFR 2.11) to define for agency purposes the doctrine of exhaustion of administrative remedies. They argued that the policies set forth in § 2.11 are determined by statute, case law, and the Federal Rules of Civil Procedure, or by the court hearing a matter, and in any event are not for the Commissioner to determine by regulation. Several comments also contended that the proposal's criteria misstated applicable law.

One comment, addressing the announcement that the Commissioner will oppose requests for a judicial stay when a request for an administrative stay has not been timely filed, suggested that the exhaustion requirement is inapplicable when the administrative remedy is no longer available because it was not invoked in a timely fashion. One comment argued that no new burden would be imposed on the Commissioner if a stay were sought directly from a court, as the administrative record is the same; thus the comment requested that the requirement that a stay be sought first from the Commissioner be made optional.

Still another comment argued that proposed § 2.11(c) is without authority; that section 10(d) of the Administrative Procedure Act (5 U.S.C. 705) plainly authorizes a court to postpone the effectiveness of agency action; and that a court would not likely refuse to grant a stay simply because an administrative stay had not first been requested. Other comments argued that the provision was of no legal effect and suggested that it be revised to make clear its advisory character.

The Commissioner is aware that it is ultimately for a court to determine whether a particular agency action is "final" within the meaning of section 10(c) of the Administrative Procedure Act (5 U.S.C. 704), or whether a plaintiff has properly exhausted his administrative remedies. Nonetheless, the Commissioner believes it entirely proper to attempt, through these procedural regulations, to set forth his view of the most appropriate method of proceeding, to the end of inducing persons wishing to challenge an FDA action to do so at the agency level before seeking court review. This regulation will promote conservation of judicial resources, not only by eliminating the need for review in some cases, but also, when the Commissioner does not change his initial decision, by providing a more complete record for review of agency action. For example, when a party has petitioned for reconsideration or for a stay of agency action, the record before the reviewing court would include, under § 2.11(f), the record of such further proceeding, as well as the record of the initial decision.

The Commissioner considers the described scheme for judicial review to be a fair method of proceeding for all persons. It will encourage persons to participate at the administrative level and to advance all information and arguments at that point, and it will require the agency to identify the information on which it relies and to explain the basis for its reliance. At the same time, the scheme should preclude interposition of technical procedural objections and guarantee to a court a fixed and complete record on which to base review. In this regard, some comments specifically commended the Commissioner's decision not to raise a lack of "standing" as a basis for opposing review of agency decisions.

43. One comment identified three situations in which, it contended, judicial review may be appropriate in the absence of a final decision by the Commissioner. The comment listed: (1) the giving of an advisory opinion pursuant to § 2.19, citing *National Automatic Laundry and Cleaning Council* v. *Schultz*, 443 F.2d 689 (D.C. Cir. 1971); (2) delay of action by FDA so substantial as to constitute denial of the relief requested; and (3) initiation by FDA of a proceeding that it has no statutory authority to conduct.

After considering the comment, the Commissioner has decided to consider advisory opinions issued pursuant to § 2.19 and guidelines issued pursuant to § 2.20 (21 CFR 2.20) to be final agency action. He acknowledges that such opinions and guidelines are binding on the agency until amended or revoked. Although, under §§ 2.19(j) and 2.20(b)(8), they are not legal requirements, the Commissioner maintains that preenforcement review of such actions may be proper in appropriate cases where further administrative proceedings are not likely to clarify the scope or impact of a decision. Advisory opinions and guidelines have accordingly been included within the scope of § 2.11(d).

The other situations cited by the comment, i.e., agency delay and action taken without authority, though potentially subject to judicial review before final action in limited circumstances, are obviously not appropriate to include within § 2.11 for they do not describe types of agency action contemplated by these procedural regulations, e.g., proposed or final regulations, or advisory opinions, but simply state legal reasons why particular agency actions may be held invalid. Accordingly, no change in the regulation has been made to reflect this part of the comment.

44. Two comments stated that § 2.11(d) should include a reference to final regulations promulgated pursuant to § 2.10 within the list of actions considered by the Commissioner to constitute final agency action; and the final regulations have been amended accordingly.

The Commissioner advises that § 2.11(d) should have included final regulations promulgated pursuant to § 2.10, as such regulations are ordinarily subject to immediate judicial review (*Abbott Laboratories* v. *Gardner*, 387 U.S. 136 (1967)). The preamble to the proposal, as one comment points out, refers to final regulations subject to § 2.10, and its omission from § 2.11(d) was thus in error.

45. One comment, reiterating an objection to § 2.9 argued that no final order should become effective for 30 days and that a request for stay within that period should automatically stay such order until 10 days after the Commissioner's decision. As indicated in his response to the comments on § 2.9, the Commissioner concludes that he must retain discretion to determine when an agency action is to become effective. The comment is accordingly rejected.

46. Comments reiterated an additional objection regarding § 2.9, namely that, by failing to require the Commissioner to respond to a petition for a stay within a specified time period, § 2.11 permitted him effectively to delay access to the courts by persons seeking to challenge agency action. One comment added, in an apparent reference to § 2.11(d), that access to the courts could also be limited if the Commissioner decided to reconsider a matter on his own initiative.

As stated in his response to the comments on § 2.9, the Commissioner cannot obligate himself to respond to petitions for a stay within a specified period. He believes it essential to retain discretion to be able to respond to changing demands on the agency in the manner most consistent with the public health and safety. However, the Commissioner advises that his failure to act on a petition for a stay does not limit access to court review of the merits of the original decision. Section 2.11(e) clearly contemplates that a person who desires to challenge any decision by the Commissioner can initiate a suit for review without first petitioning the Commissioner. It is only with respect to an attempt to obtain a stay of FDA action that the regulations require that a request for stay be first submitted to the Commissioner.

Nor would court review on the merits necessarily be delayed if the Commissioner determined on his own initiative to reconsider the matter, as the comment suggested. The reference in § 2.11(d) to petitions for reconsideration (§ 2.9) is intended to indicate only that the Commissioner's action on such a petition is final agency action and independently subject to judicial review.

47. One comment stated that proposed § 2.11(d)(2)(i) is unnecessary in light of the clear statement in the Administrative Procedure Act that actions committed to agency discretion by law are not subject to judicial review. The comment expressed concern that the provision may be interpreted as unduly broadening existing rules in this regard.

The Commissioner believes that the restatement of the statutory standard in these regulations is proper, and that the example of unreviewable decisions cited in § 2.11(d)(2)(i), i.e., whether or not to recommend initiation of civil or criminal enforcement proceedings under sections 302, 303 and 304 of the act (21 U.S.C. 332, 333, 334), falls clearly within his unreviewable discretion.

48. One comment urged that the reference in proposed § 2.11(d)(1)(ii) to "any interested person" should be changed to "any person."

The Commissioner finds the requested change unnecessary. "Interested person" is defined in § 2.3(a)(12) to mean, essentially, "any person."

49. One comment identified two asserted exceptions to the general rule stated in § 2.11(f), which, as promulgated, limits judicial review of agency action to the administrative record made before the agency. The comment argued that review could properly go beyond the administrative record (1) when a court decision subsequent to the initiation of judicial review plainly decides a legal issue that was not raised at the administrative level, and (2) when an issue is purely a matter of statutory construction, does not require the exercise of administrative expertise, and goes to the heart of the agency's statutory authority.

The comment misunderstands the Commissioner's purpose in defining the scope of the administrative record. The record is not intended to embrace all materials relevant to all of the legal objections to an agency action, including the type of legal issues which comprise the examples in the comment. Rather, the record of an administrative proceeding is intended to contain all of the factual information and data that were considered by the Commissioner in reaching his decision. While questions of legal authority may, from time to time, be raised in an administrative proceeding, the Commissioner advises that the regulations do not prohibit new issues of law including, obviously, questions of authority, from being raised in subsequent judicial proceedings.

50. One comment insisted that the procedure contemplated by proposed § 2.11(b), under which the Commissioner may request a court to accept a further explanation of his action without further administrative proceedings, is not generally allowed by courts.

The Commissioner notes that the provision is advisory only. The provision can thus assist the public in obtaining judicial review of agency action. The Commissioner believes that the procedure described is not prohibited by any statute; however, if the procedure were not permitted by a particular court it would not, obviously, be available to the Commissioner in that instance.

51. Two comments on proposed § 2.12 Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing (21 CFR 2.12) objected to its failure to distinguish between the right to an "opportunity for a hearing," and an unqualified right to a hearing. By treating all requests for formal evidentiary public hearings uniformly, the comments argued, proposed § 2.12 overlooked important differences between the several statutory provisions in the Federal Food, Drug, and Cosmetic Act that require a hearing. The comments objected that, as proposed, § 2.12 would improperly permit use of the summary judgment mechanism upheld in *Weinberger* v. *Hynson, Westcott and Dunning, Inc.*, 412 U.S. 609 (1973), in cases in which it was not legitimately available.

One comment pointed out that certain provisions of the act require "an opportunity for a hearing," e.g., section 505; that others require that "reasonable grounds" must be stated to justify a hearing, e.g., section 507(f); and that still others purport to require a hearing without any qualification, e.g., section 701(e). The comment argued that only in two situations could the Commissioner refuse to hold a required section 701(e) hearing: (1) when objections to the Commissioner's order are a legal nullity, on the basis of *Dyestuffs and Chemicals, Inc.* v. *Fleming*, 271 F.2d 281 (8th Cir. 1959), cert. denied, 302 U.S. 911 (1960), and (2) when the objections relate exclusively to the agency's authority to take an action so that the factual basis for the action is wholly irrelevant. The comment urged that §§ 2.12 and 2.113(b) (21 CFR 2.113(b)) be revised accordingly.

The Commissioner has issued the section as proposed. He concludes that there is no basis for the comment's contention that section 701(e) absolutely guarantees a formal evidentiary public hearing whenever one is requested in a rule making proceeding conducted pursuant to that section. The Commissioner believes the act empowers him in each case to establish reasonable threshold requirements for the holding of a formal evidentiary public hearing, including a hearing on a regulation governed by section 701(e). The basis for this position has been set forth in the preamble to the publication in final form of § 2.113 in Subpart B, and interested persons are referred to the final regulation published in the FEDERAL REGISTER of November 23, 1976 (41 FR 51706) for a full statement of the Commissioner's views on the matter.

Section 2.13 Separation of functions: ex parte communications (21 CFR 2.13)

prescribes the degree to which separation of functions shall be observed between and within agency components in any matter that is subject by statute to an opportunity for a formal evidentiary public hearing and in any matter subject to a public hearing before a Public Board of Inquiry.

52. One comment suggested that proposed § 2.13(d)(3), specifying remedial measures to be taken when oral and written communications are made in contravention of the separation requirements of the section, be revised to require that copies be immediately provided to all parties to the hearing. As proposed, the requirement would have required only the filing of such communications with the Hearing Clerk.

The Commissioner accedes to the request and has modified the final regulation to provide that at the same time such a communication is filed with the Hearing Clerk, it shall also be served on all other participants in the proceeding. This change meets the objective of the comment that all participants be advised of the current status of the proceeding. Because the conduct described in the section is not likely to occur, the Commissioner believes it reasonable to provide for personal service on participants, rather than to force them to periodically examine the administrative file in the office of the Hearing Clerk. Moreover, required service of documents on other participants is already provided for by § 2.13(d)(2), which requires such service for proposals for settlement. The change can therefore be viewed as extending an existing obligation of participants to a hearing rather than as imposing a completely new obligation.

53. A comment suggested that § 2.13(b)(2)(i) and (ii) were inconsistent because the requirements bar, for example, the entire Bureau of Drugs from communicating with the office of the Commissioner after the bureau becomes a party to a hearing, while permitting all members of the Chief Counsel's office to be available to advise the Commissioner except those specifically engaged in the proceeding on behalf of the bureau. A related comment urged that the section be modified to permit a member of an involved bureau who is not personally involved in representing the bureau at the hearing to be free to discuss the matter with the office of the Commissioner. The comment suggested that this would benefit the agency in those situations where all of the agency expertise in a given field is located in a single bureau.

The Commissioner believes that the suggested inconsistency does not actually exist. A direct comparison of the treatment in the provision of the individual bureaus and of the office of the Chief Counsel is not meaningful, for each is organized to perform different functions. A bureau will normally be a party to such a hearing and thus be in the position to advocate a particular position. The Chief Counsel's office, in contrast, is not organized, except for the informal designation of attorneys to advise individual bureaus, into discrete divisions. Perhaps more important, the only attorneys available to represent a bureau and advise the Commissioner are employed in the office of the Chief Counsel. Establishment of ad hoc divisions within the office is the only practicable mechanism for assuring observance of separations of functions and at the same time making legal advice available to the bureau whose decision is the subject of the hearing, and to the Commissioner. Thus, as a general rule, the Commissioner has determined that it is both more convenient and defensible to treat, for purposes of separation of functions, each bureau as a single entity. However, in response to the comment, he is modifying § 2.13 to permit the designation, when he determines that it is necessary to ensure the best use of agency resources in deciding a particular matter, of employees of a bureau to advise him, or members of his office to advise a bureau. Any such designation will be in writing and must be filed with the Hearing Clerk no later than the time the limitations of separation of functions apply in the particular matter. An example of a situation where the procedure might be used is that cited in the comment, i.e., where all agency employees having expertise in a given field work in one bureau, leaving the Commissioner without expert assistance to assist him in deciding the matter.

54. In response to the comment, the Commissioner has modified § 2.13(b)(2)(ii) to provide for the appointment by the Chief Counsel of a "team" of attorneys to advise the Commissioner, rather than to permit that function, as proposed, to pass residually to all attorneys who have not been appointed to represent the bureau in a proceeding.

As a matter of practice the Chief Counsel has been specifically designating attorneys to advise the Commissioner in many matters for which a notice of opportunity for a hearing has been published. This approach has permitted the Chief Counsel to assess the workload of the office and avoid the appointment of an attorney to advise the Commissioner who may have assisted a bureau before the publication of the notice of hearing.

The section as issued in final form also provides that the Chief Counsel will ordinarily advise the Commissioner in a hearing proceeding. The proposal would have required the Chief Counsel to always advise the Commissioner. However, it is possible that the Chief Counsel may become involved in a matter before a notice of opportunity for hearing has been published, such as when he is called upon to advise a bureau on the initiation of a proceeding. In such cases, his subsequent service as an advisor to the Commissioner in the same matter would not be consistent with separation of functions.

The provision has also been modified, consistent with existing practice, to prevent contact on any matter that is the subject of a formal hearing between members of the office of the Chief Counsel who are advising the Commissioner and other members of the office, or any employee of the bureau involved (except one specially designated to assist the Commissioner). Although the proposed rule would have imposed this limitation only on the attorneys assigned to assist the bureau, it is clear that comparable restrictions should be imposed on counsel to the Commissioner, for the requirement is intended to maintain the independence of the Commissioner and his advisors.

55. To make the regulation comprehensive, § 2.13(b)(2)(ii) has been revised to acknowledge the Chief Counsel's specific authority to designate additional attorneys to represent a bureau or to advise the Commissioner. Such designation may be necessary where, for example, an attorney previously designated to advise one or the other is no longer able to serve in that capacity.

56. On September 13, 1976, Pub. L. 90-409, the "Government in the Sunshine Act," (5 U.S.C. 552b note) was signed into law, to become effective on March 12, 1977. The Sunshine Act imposes certain new requirements applicable to the FDA, as well as to other agencies, regarding ex parte communications between Federal officials and persons outside the Federal Government in connection with any administrative hearing subject to 5 U.S.C. 557(a). "Ex parte communication" is defined in new 5 U.S.C. 551(14) as "an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given, but it shall not include requests for status reports on any matter or proceeding covered by this subchapter."

In sum, the Sunshine Act prohibits the making of ex parte communications by either Federal employees or outside persons within the context of a hearing subject to 5 U.S.C. 557, and requires that any ex parte communications that are made be placed in the public record, either by filing written communications or reducing to writing the substance of any oral communications, as well as any responses, either written or oral, to either of these types of communications. The Sunshine Act further requires each Federal agency to designate a particular time during the administrative process after which the prohibitions shall apply. That time may not be later, however, than the time at which a proceeding is first noticed for a hearing, and must with respect to any person with knowledge that such notice is forthcoming, be no later than the time such knowledge was acquired. The new law specifically provides that an agency may consider, consistent with the interests of justice, a violation of the section as sufficient grounds for a decision adverse to the party committing the violation or causing it to occur. The Commissioner advises, in this regard, that he will consider as a violation of this section, as a "causing to occur" of an ex parte communication, a communication by any government official outside the agency, including members or representatives of members of Congress, made at the knowing behest of any person who would be precluded under the statute from personally making the communication.

The Sunshine Act affects the provisions of proposed § 2.13 that address ex parte communications, with respect to any matter subject to an opportunity for a formal evidentiary public hearing, as listed in § 2.12(c), and any matter subject to a public hearing before a Public Board of Inquiry pursuant to Subpart C of Part 2, and necessitates some revision of them.

Accordingly, the Commissioner has determined to modify § 2.13 (and § 2.3) in the final order as follows:

a. The Sunshine Act's definition of "ex parte communication" has been incorporated into § 2.3.

b. The times at which the prohibition against ex parte communications are to come into play are those proposed in § 2.13 (b) and (c) for the matters referred to in those sections. However a new paragraph (e) has been added, in accordance with the statute, applying the restriction to any person having knowledge that a notice of hearing is to be issued to the time such knowledge is acquired.

c. Paragraph (d) of § 2.13 has been revised to indicate that the prohibitions against making ex parte communications apply to employees of the agency involved in any manner in the decisional process as well as to persons outside the agency.

d. A new paragraph (f) has been added to reflect the statutory provision that the making of a prohibited ex parte communication may, consistent with the interests of justice and the policy of the underlying statute, justify a decision adverse to the person knowingly making or causing the making of such a communication.

No comments were received on proposed § 2.14 Referral by court (21 CFR 2.14) and it is adopted as proposed.

Section 2.15 Meetings and correspondence (21 CFR 2.15) contains requirements for meetings and correspondence between employees of the Food and Drug Administration and any person outside the Department of Health, Education, and Welfare.

57. Several comments were received regarding § 2.15(f)(1), which as proposed would have permitted any meeting initiated by FDA involving only a small number of persons, such as 1 or 2 manufacturers, to be a private meeting, but would have required a meeting involving a large number of persons, e.g., 10 manufacturers of an ingredient, to discuss appropriate testing or labeling, to be a public meeting. The comments criticized the use of the number of persons as the criterion for determining whether a meeting should be public or private, urging in general that the nature or subject matter of the meeting should determine whether it should be private or open. One comment specifically suggested that the number of different interests represented, rather than the number of persons, should determine whether the meeting is to be public or private, but urged also that meetings should be open when closing them might give particular firms a competitive advantage.

Another comment insisted that the 10-person standard was arbitrary, and that whether a meeting should be open or closed should depend on a variety of factors, e.g., the meeting site, the various interests represented, and the subject discussed. The comment stated that where a single industry or group of persons is the focus of the meeting, the willingness of that group to meet in a public forum should weigh heavily in the decision. In general the comments from manufacturers and industry associations argued that private meetings encourage input, but a comment from a consumer group contended that it is important that consumers be present at meetings with industry because proposed § 2.15 failed to require taking transcripts or recordings. One comment asked the reason for subjecting to regulation the issue of whether meetings should be public or private and urged that the decision be left to the discretion of the Commissioner.

The Commissioner has considered the objections to the section, and finds them unpersuasive. Most of the comments appear to have assumed that the requirements of § 2.15(f)(1) apply to all meetings between the FDA and persons outside the Federal government. This is not the case. In contrast with other provisions of § 2.15, paragraph (f)(1) applies only to meetings initiated by FDA. It does not apply to private meetings between the agency and outside persons or groups at the behest of the lattter. Such meetings are subject principally to the requirements of § 2.15(d). The justification for the distinction is reasonable: The agency's initiation of a meeting is generally for the purpose of seeking information on or attempting to resolve an issue regarding a regulatory matter. It would be inappropriate for FDA to seek advice from only one group on a regulatory matter that affects many manufacturers or broad segments of the public.

The "number of persons" criterion in § 2.15(f) should be viewed as an attempt to establish a readily usable "rule of thumb" for determining when an agency-initiated meeting should be open to all. It should be noted that the specific reference in § 2.15(f)(1) to numbers of participants as the criterion is neither absolute nor arbitrary. The language of the paragraph refers to examples of the subject matter of such meetings as well as to the number of persons, and the Commissioner intends that the number of persons shall be merely one guide, rather than a firm rule, for deciding when a meeting should be public. The Commissioner retains discretion to decide whether such a meeting should be open or closed.

The Commissioner also advises that he may follow § 2.15(f)(1) in determining whether to insist that other meetings should be open to the public when opening them will avoid the implication of undue influence in an agency decision or will otherwise further the purposes of the act.

58. One comment urged that proposed § 2.15(f), requiring a written summary to be made of any meeting with a representative of Congress relating to any one of several enumerated matters, be clarified to state that it applies only to FDA employees. The Commissioner believes it obvious that the requirement is applicable only to employees of the agency, and so advises. No change in the language of the provision is necessary.

59. One comment suggested that the language of proposed § 2.15(c), which requires the summarization in writing of any meeting between agency representatives and any person outside the Department relating to a "pending court case," as well as other enumerated subjects, be amended to include specifically an "immediately anticipated court case." The Commissioner advises that an anticipated court case would be included within the reference to "pending court case," and that agency employees have been observing this interpretation in maintaining records of telephone calls and meetings. Therefore, no formal modification of the paragraph is necessary.

60. One comment urged that telephone conversations be subject to the requirements of § 2.15(c) and (d). The Commissioner advises that the definition of "meeting" in § 2.3(a)(24) includes telephone conversations, and that no amendment to paragraph (c) or (d) is called for.

61. One comment directly, and another by implication, questioned the wisdom of requiring the written documentation of all contacts with the agency. Both commented that the requirement discourages such contacts. One comment argued additionally that such memoranda contain only one side of a conversation, and suggested that the section require only the logging of contacts without the description of their substance.

The Commissioner disagrees. Even conceding that some communications to the agency may not be made because of the fear of public disclosure, the Commissioner believes it is essential for the integrity of the regulatory process that records be kept of contacts between agency employees and outside parties. The keeping of such records should increase the reliability of the information that is submitted. Moreover, written documentation is necessary for the preparation of an administrative record should any decision of the Commissioner be subsequently challenged. Most important, the Commissioner believes that public confidence in government can only be maintained if government dealings with the public are, to the extent possible, open and subject to scrutiny. There is no basis for the suggestion that memoranda of these communications prepared by government employees will reflect only one side of such contacts: § 2.15(g) provides that any participant in any meeting under any participant in

any meeting under § 2.15 may submit his own summary of the meeting and that the summary will be made part of the administrative record along with any memoranda prepared by the agency.

62. One comment suggested the deletion of the statement in proposed § 2.15 (a) that meetings and correspondence are not final agency action on the ground that it is overbroad.

The Commissioner disagrees. The statement is not overbroad, for it is difficult to visualize a circumstance in which a meeting or informal correspondence would constitute final agency action, and its inclusion is consistent with the practice of the Commissioner in these regulations of specifying those agency actions that do and do not constitute final agency action for purposes of court review.

Section 2.16 Documentation of significant decisions in administrative files (21 CFR 2.16) provides for the documentation of agency decisions by the employees involved in making them. The section as proposed represented an attempt to protect the rights of agency employees working on a matter by permitting, under paragraph (b)(2)(ii), any employee to record his views in written memoranda that would be included in the file. Proposed § 2.16(e) also guaranteed such employees access to the file as appropriate for the performance of their work, subject to reasonable restrictions to assure the proper cataloging and storage of documents.

63. One comment, submitted by the Review Panel on New Drug Evaluation of the Secretary of Health, Education, and Welfare, suggested that both of these requirements be extended to employees that have been, but may not currently be, working on a particular matter. The panel recommended that an employee's exercise of the right to record his views and to have access to the administrative file on a matter should be consistent with attention to his other assignments.

The Commissioner considers it proper that agency employees who have previously worked on a particular matter not be precluded from further participation in that matter, or denied access to the file. This, indeed, was the intent of the proposal. Not only will such access avoid charges that employees may have been transferred to prevent their continued work on a matter, but it will also make the administrative record of the resolution of controversial issues more complete. As advocated by the comment, § 2.16 (b)(2)(ii) and (e) of the final regulation have been revised to reflect the original intent of the proposal.

64. The Commissioner has clarified the effect of §§ 2.15 and 2.16 regarding the filing of the administrative record in a formal evidentiary public hearing pursuant to § 2.153 of Subpart B (21 CFR 2.153). The clarification is prompted by questions that have arisen in agency preparation for hearings of this type during recent months.

Section 2.16(b) requires that the administrative file of any matter contain the complete documentation of the agency decision (including opinions of consultants and recommendations of individual employees) and reveal any internal differences of opinion. Section 2.15 (c) requires an agency employee to prepare a written summary of any meeting with any person outside the Department which shall be included in the administrative file. Section 2.153 requires the relevant portions of the "administrative record" to be filed with the Hearing Clerk, including all documents in bureau files containing factual data and information, whether favorable or unfavorable to the bureau position.

These provisions do not require the administrative file docketed with the Hearing Clerk to contain memoranda summarizing meetings of bureau counsel with witnesses, or to contain internal agency memoranda setting forth recommendations of agency employees. While such meetings and recommendations clearly are required to be summarized in written form for the administrative file, the regulations are not intended to require all such memoranda to be made public if the matter becomes subject to a formal evidentiary public hearing. The work-product of bureau counsel are obviously protected under the attorney-client privilege and, along with recommendations of employees (as distinguished from scientific or medical data) found in internal agency documents, are not required to be disclosed under Part 4, the agency's public information regulations. Such materials will, however, continue to be prepared and to be placed in the agency administrative file for purposes of judicial or congressional inquiry, or for historical purposes.

The definition of "administrative file" in § 2.3(a)(27) of the final regulation conforms to this position. The proposal has been revised to remove the implication that the administrative record of a matter filed with the Hearing Clerk is necessarily the same as the official administrative file of the matter. The documents comprising the former are, rather, listed variously in other sections of the regulation, e.g., in § 2.8(k), for administrative reconsideration of an action; in § 2.9(h), for an administrative stay of an action, and in § 2.10(f), for regulations promulgated pursuant to that section.

65. No comments were received on proposed § 2.17 Internal agency review of decisions (21 CFR 2.17) which is adopted without change. However, some concern was expressed within the agency that § 2.17(a)(3) imposed the obligation to formally review at a supervisory level the decision of any agency employee at the request of an interested person. The Commissioner advises that no such result is intended. Review of the work of subordinates by agency supervisors is currently a matter of a supervisor's discretion and § 2.17(a)(3) is intended to reflect present agency practice. The provision recognizes that supervisory agency employees will entertain requests from interested persons to review any decision of a subordinate, but that the extent of any review will continue to be determined by the supervisor.

Section 2.18 Dissemination of draft FEDERAL REGISTER notices and regulations (21 CFR 2.18) provides for the discussion, both orally and in writing, of draft, proposed, and final rules and regulations, by representatives of FDA with interested persons, including persons outside the agency.

66. Two comments were received regarding the proposal. One comment criticized the limitations imposed by § 2.18(d) on the discussion of the details of draft notices and regulations and on the dissemination of such drafts before publication in the FEDERAL REGISTER. The comment argued that the prohibition could prevent meaningful participation in drafting complex regulations, where agency knowledge may be inadequate to draft an appropriate proposal. The comment acknowledged that proper information may be supplied by comments after publication, but suggested that there often is reluctance to make major changes in a proposed regulation. The comment contended that allowing informal contacts could often improve a published proposal and thus speed promulgation of a final regulation with a minimum of delay and modification.

The Commissioner points out that § 2.18(d) does not prohibit either the discussion or distribution of draft FEDERAL REGISTER notices. Rather, it imposes restrictions on such discussion and distribution only as necessary to ensure that all interested parties will be treated fairly and afforded uniform access to internal working documents. In situations where expert advice from outside the agency may be needed to develop a proposal, the regulation permits such information to be obtained.

67. The second comment noted that proposed § 2.18(b), although permitting the distribution of draft documents and proposed regulations following FEDERAL REGISTER publication of a notice of availability, did not explicitly permit agency employees to discuss the details of such a draft even after it became publicly available, except with the specific permission of the Commissioner.

The Commissioner acknowledges that the comment has interpreted the proposal correctly. He agrees with the comment that such a restriction on the discussion of details of a draft already publicly available is unnecessary, and believes the public interest will be safeguarded adequately if such discussions are subject only to the other provisions of the section, e.g., § 2.18(i), which applies the requirements of § 2.15 *Meetings and correspondence*, to meetings and correspondence relating to draft FEDERAL REGISTER notices and regulations. While § 2.18 will thus allow for discussion of draft proposed and final regulations and notices that have been made publicly available, it requires that summary memoranda be made of any such discussions for inclusion in the administrative file. The Commissioner regards the preparation of such memoranda in the context of discussions of draft FEDERAL REGISTER notices and regulations as essential; the requirement will assure compilation of

the full administrative record and dispel suspicions of improper influence in the development of agency regulations. The Commissioner has amended § 2.18(b) in the final regulation to allow agency employees and interested persons to discuss without his prior permission draft documents that have been properly made available to the public.

68. A primary concern expressed by many comments on § 2.19 Advisory opinions (21 CFR 2.19) was that opinions by FDA employees that are not advisory opinions do not bind the agency to the interpretation expressed in the opinion. One comment argued that this position is not supported by case law. It rejected the cases cited in the preamble to the proposal regarding the doctrine of estoppel, and cited the following several cases in which various courts have held the government estopped on the basis of advice of an employee: *United States* v. *Wharton*, 514 F. 2d 406 (9th Cir. 1975), *United States* v. *Lazy FC Ranch*, 481 F. 2d 985 (9th Cir. 1973), *United States* v. *Burton*, 472 F. 2d 757 (8th Cir. 1973), and *Moser* v. *United States*, 341 U.S. 41 (1951). The comment contended that, based on these cases, the current rule is that the government will be prevented by estoppel from taking a position inconsistent with advice provided by an employee when the damage to the private party outweighs the loss to the government or any harm to the public interest. The comment concluded by urging that the regulations be recast to state that FDA is not bound by estoppel in any case where the public health or safety would be jeopardized, but that it will take reasonable steps to protect justifiable reliance on advice provided by an agency employee when the public health or safety will not be jeopardized.

Other comments addressed the same issue, through from different perspectives. One comment found proposed § 2.19(k) patently unfair, claiming that the regulation placed agency employees in positions of apparent authority but penalized those who relied on their advice. The same comment and one other argued that the public cannot conduct day-to-day operations by constantly requesting advisory opinions, and suggested that the agency could "grind to a halt" if responding to advisory opinions became a common practice. Both comments noted that much agency business is handled on the basis of "informal advice."

Finally, these comments requested that, should reliance on an agency employee's "informal" opinion result in regulatory action, in no event should a person so relying be subject to criminal prosecution. They urged the adoption of this position as a minimum, if the action ultimately complained of is undertaken in good faith reliance on the information provided by a representative of the agency.

The Commissioner acknowledges that these comments express a legitimate concern, but he believes that the regulation as proposed is proper. The Food and Drug Administration must be able to provide informal advice to interested persons on a staff level. Considerations of the public health and safety, as well as considerations of efficiency, however, prevent the agency from being legally bound by such representations.

The expectation that informal advice would bind the agency is unrealistic in light of the way such advice is generally requested and provided. Even when coordinated within the agency, opinions on the regulatory consequences of particular conduct may not be based on exhaustive inquiry into past agency practice or legislative intent. Moreover, many inquiries request a reply within a short period of time. In addition, circumstances are often described hypothetically, and may omit facts that the agency, in contrast to the person making the inquiry, may consider crucial. Finally, the Commissioner recognizes that some persons will "forum shop" within the agency until they obtain a desired answer. For these several reasons, the Commissioner declines to be bound by the informal responses of agency employees. Section 2.19 provides one broad exception: where a particular inquiry is of broad applicability or importance, the agency will commit its resources to providing its best institutional judgment on a matter through an advisory opinion.

The Commissioner considers the procedure established for obtaining an advisory opinion to be both realistic and fair. The procedure recognizes that, in fact, most actions taken by private firms under the statute are based on expert advice, both technical and legal, obtained outside the agency. Opinions by agency employees as to the legality of such actions are not necessarily accepted at face value, particularly if they conflict with those of the inquirer.

As a practical matter, advice provided informally by FDA employees will generally be correct, and when it is not, action in reliance will not result in the imposition of sanctions without good reason. But the risk that such advice is incorrect cannot readily be shifted to the government, and to the public. Particularly in matters involving individual compliance with the statutes administered by FDA, the ultimate burden must remain on manufacturers and distributors of regulated products. The alternative, which the Commissioner rejects, would be to preclude agency employees from furnishing advice, i.e., to require all inquiries to be subject to the procedures for advisory opinions outlined in § 2.19. This course would not work to the advantage of either the agency or affected persons.

The Commissioner will not rule out the possibility of recommending institution of criminal proceedings when an informal opinion has previously been furnished to a violator. At the same time he advises that recommendation for criminal prosecution is based on all the circumstances surrounding a violation, and it is unlikely that such prosecution would be recommended when the activity giving rise to the violation was the product of good faith reliance on advice given informally by an agency employee. Responsible exercise of the Commissioner's discretion will afford adequate protection in such circumstances.

The Commissioner does not discount the possibility, however remote, that FDA might be held by a court to be estopped by the informal advice of an employee in a given matter. However, he considers the cases cited by the comments regarding application of the doctrine of estoppel to the government to be not relevant to informal advice rendered by FDA employees pursuant to these regulations, for in none of the cases had the agency publicly indicated that informal opinions of employees were not binding, and provided an alternative procedure for obtaining formal binding opinions. More importantly, none of the cases cited involved a government agency that is entrusted to protect health and safety.

69. One comment objected that the form specified in the proposal for requesting advisory opinions is too rigid. The Commissioner disagrees that the form requirements are rigid. They require only that a request indicate that it is seeking an advisory opinion, that it clearly state the question and issue on which the opinion is requested, and that it include a statement of the facts and law relevant to the request. Moreover, the section permits the Commissioner to treat other requests, in his discretion, as requests for advisory opinions.

70. Several comments objected to the Commissioner's proposed decision not to publish advisory opinions in the FEDERAL REGISTER. They argued that it is inconsistent to urge reliance on such opinions and then not publish them. One comment urged that at least a notice of availability should be published, as well as a notice indicating the withdrawal or revocation of any advisory opinion. Another comment pointed out that reporting such opinions in the trade press is of no help to the general public. The comment also argued that the right under § 2.19(d) to comment on advisory opinions becomes illusory when the public is not aware of them.

The Commissioner believes the preamble to the proposal adequately explains the reasons for not publishing each advisory opinion in the FEDERAL REGISTER. The number of opinions makes publication of each one infeasible. Those that are contained in preambles to proposed or final regulations under § 2.19 (d)(1) will be published. Nonetheless, each advisory opinion that is not published will be publicly available and will probably receive wide publicity in the trade press. To further increase public awareness of advisory opinions, moreover, the Commissioner has modified § 2.19(g) in the final regulation to provide that a chronological index of all advisory opinions will be maintained by the Hearing Clerk. The index will include the date of the request for the advisory opinion, the date of the opinion, and identification of the appropriate file.

The Commissioner thus disagrees with the contention that the right to comment on advisory opinions is illusory. Suffi-

ciently wide publicity will be given to FDA advisory opinions so that any person with even a casual interest in the agency will be likely to learn of them. Advisory opinions that are also guidelines will be further disseminated through publication in the FEDERAL REGISTER of a notice of availability under § 2.20(b)(4) and whenever incorporated into the text of a regulation under § 2.20(a).

71. Another comment argued that the failure of the regulation to provide for the publication and indexing of informal opinions might violate paragraph (a)(2)(B) of 5 U.S.C. 552, the Freedom of Information Act. The comment contended that even informal interpretations are likely to be considered "interpretations adopted by the agency," as they are subject to internal review, and can thus fairly be considered to have been adopted by the agency. It cited as support *Tax Analysts and Advocates* v. *IRS*, 362 F. Supp. 1298 (D. D.C. 1973), aff'd, 505 F.2d 350 (D.C. Cir. 1974).

The Commissioner disagrees that informal opinions given by agency employees are subject to 5 U.S.C. 552(a)(2)(B), insofar as that section requires the publicizing and indexing of agency interpretations. Such opinions are not considered interpretations of the agency; they do not bind FDA even for the matters that they address. The Commissioner accordingly concludes that they are subject to the requirements of 5 U.S.C. 552 to the same extent as routine agency correspondence, and are therefore not required to be indexed or publicized. They will, however, be subject to disclosure under 5 U.S.C. 552. Because informal opinions have no binding effect, they will not be used by the agency as precedent for persons other than those to whom they are issued. In this context, the sanctions imposed by 5 U.S.C. 552 for failure to index and publicize documents, namely, that the agency may not rely upon them in other cases, are inapplicable.

The Commissioner advises that he will continue to evaluate whether informal opinions receive sufficient distribution, and may decide, in the future, that some additional mechanism to assure their dissemination is desirable.

72. One comment suggested that proposed § 2.19 should be amended to provide that whenever published, an advisory opinion should reveal the identity of the person requesting the opinion and should set forth a clear statement of the facts on which the opinion is based. It urged also that any opinion state that it is based on the assumption that the facts are as represented.

The Commissioner currently contemplates that these opinions will be unpublished. However, the information requested in the comment will be contained in the request for an opinion filed with the Hearing Clerk, where the responsive opinion would also be filed, and both will be publicly available.

73. One comment suggested that the Commissioner should be authorized to decline to issue an advisory opinion when the request relates to conduct in which the requester is already engaged. The comment argued that issuing an opinion in such circumstances may interfere with enforcement efforts with respect to the practice.

The Commissioner advises that § 2.19(a)(2)(v) authorizes him to refuse to issue an advisory opinion when it would not be in the public interest, and thus provides the authority that the comment advocates. However, the Commissioner reiterates that he may conclude that it is not improper to issue an advisory opinion in such circumstances. The fact that conduct has already commenced is not by itself reason not to issue an advisory opinion; the conduct may be entirely lawful and appropriate.

74. One comment urged that proposed § 2.20 Food and Drug Administration regulations, guidelines, recommendations, and agreements (21 CFR 2.20) provide for full notice and comment proceedings prior to the issuance of a guideline. This comment and one other urged particularly that guidelines for product labels be subject to notice and comment rule making. The comment argued that such guidelines have considerable economic impact because of the significant expense associated with printing and design work. A related comment noted that the Supreme Court has relied heavily on agency guidelines in deciding controversies before it, referring to "*Moody* v. *Albermarle Paper Company*," 422 U.S. 405 (1975), and urged that this too dictated observance of notice and comment rule making procedures in the development of guidelines.

The Commissioner does not agree with these comments. Guidelines ordinarily represent agency interpretations of formal legal requirements, not binding legislative rules. The Commissioner's decision not to commit the agency to provide opportunity for notice and comment in the development of guidelines is consistent with their legal status under these procedural regulations. Section 2.20(b)(8) provides that although guidelines may be relied on by both FDA and persons outside the agency in administrative or court proceedings to illustrate acceptable and unacceptable procedures, they do not establish binding legal requirements. The Commissioner therefore believes it appropriate that the agency retain authority to develop them without prior public participation. The Commissioner disagrees with the reliance on "*Moody* v. *Albermarle Paper Company*," supra. In that case, the Court, while relying on agency guidelines of the Equal Employment Opportunity Commission, explicitly recognized, without criticism, that the guidelines were not administrative regulations promulgated pursuant to formal procedures established by Congress. Thus, the case can be read as support for administrative agencies interpreting statutory provisions under their jurisdiction through guidelines developed without formal public participation.

Moreover, these regulations do not preclude all public participation in the preparation of FDA guidelines. Section 2.20(b)(11) recognizes explicitly that draft guidelines may be disseminated in the same manner as draft FEDERAL REGISTER notices and regulations pursuant to § 2.18. In such cases, the regulations contemplate at least informal public participation through discussion of the substance of the guideline. In addition, § 2.20(b)(7) provides for the submission of comments on a guideline or amended guideline, which are to be specifically considered in determining whether further amendments to the guideline are appropriate. The Commissioner believes that these two provisions allow a degree of public participation in the formulation of guidelines commensurate with their legal status.

75. One comment raised the objection, also directed at § 2.19, that it is unfair to consider as informal the personal opinions of agency employees.

The Commissioner refers to the explanation provided in his discussion of the same comment regarding § 2.19. He there indicated his conclusion that although agency employees ought to be permitted to share their opinions with the public, such opinions cannot formally bind the agency. He believes it is clearly reasonable to limit statements of position that can bind the agency to regulations, advisory opinions, and guidelines.

76. An issue raised within the agency concerns the reliance by FDA on a government procurement standard or other standard as the criterion for determining the legality of a product. The issue is whether the agency may properly so rely if it has not previously complied with the requirements for the issuance of guidelines contained in this section.

The Commissioner advises that he will consider agency reliance on government procurement standards, or other standards, to be subject to prior compliance with the requirements of this section for guidelines, including inclusion in the public file and publication of a notice of availability in the FEDERAL REGISTER.

77. A minor correction has been made in § 2.20(b)(10) in the final regulation. The reference to "this paragraph" is changed to "paragraph (b)(4) of this section." Paragraph (b)(4), requiring the placing of guidelines in a public file in the Hearing Clerk's office and the publication of notice of their availability in the FEDERAL REGISTER, is not intended to apply to analytical methods. While considered to be guidelines under the section, analytical methods are too numerous and complex, and are amended too frequently, to subject them generally to these provisions. The Commissioner may, however, in his discretion, decide that a particular analytical method should be included in the public file.

78. A question has been raised concerning the availability under § 2.20 of draft internal guidelines contained in the FDA Staff Manual. The issue arose as a result of a freedom of information request to the agency for these guidelines.

The Commissioner advises that guidelines in staff manuals are not formal "guidelines" unless there has been compliance with the requirements of § 2.20.

They rarely involve matters of "general applicability," as that term is used in § 2.20, but generally apply to internal agency business. Accordingly, neither § 2.20 nor § 2.18 is applicable to the public availability of draft guidelines of this type. Their availability is subject only to the Freedom of Information Act and FDA public information regulations. Final staff manual guidelines are publicly available under 5 U.S.C. 552(a)(2)(C).

No comments were received regarding § 2.21 Participation in outside standard-setting activities (21 CFR 2.21), and it is issued as proposed.

79. Many comments addressed the requirement in proposed paragraph (b) of § 2.22 Public calendars (21 CFR 2.22) to exempt meetings with the working press from listing on the retrospective public calendar. The preamble to the proposal had requested specifically that comments be submitted on this issue. Most of the comments urged that meetings with the working press be listed on the calendar. Several comments concluded that there was no basis for according special treatment to meetings with the press, particularly where, as in this instance, the press consisted largely of "expensive 'insider' services" that assertedly are oriented toward industry customers and capable of exerting influence on the regulatory process. The failure to list meetings retrospectively, it was argued, would therefore not benefit the public generally, but only the press. One comment stated the exemption would revive the supposedly discredited practice of basing news on "undisclosed sources," and that responsible journalists should not need the anonymity that the proposed rule offered them. Another comment urged that a policy of nondisclosure of press meetings might lead to abuse and encourage damaging leaks.

Several contrary arguments were offered. One comment described the function of the press as seeking out information and reporting it, and contended that the press should be impeded as little as possible in this function. The comment argued that conscientious reporting would be frustrated if reporters had to disclose their sources. The comment argued, further, that agency employees who previously have been willing to discuss matters with reporters would be reluctant to continue doing so if they were required at the same time to disclose publicly that they had met with the press. The comment argued also that the idea of an open calendar is to disclose contacts with government officials by persons seeking to influence actions, a category that does not include members of the press, who do not espouse a particular viewpoint. It was also argued that the listing would not necessarily provide greater protection for trade secrets, whose disclosure would be prohibited. Rather, the information whose distribution would be restricted would likely be of a type that would cause embarrassment or annoyance. Finally, the comment maintained that listing press contacts would hamper press competition, which fosters investigative journalism.

The Commissioner has decided to retain the exception for the listing of press contacts in the retrospective calendar. He concludes that listing such contacts is not necessary to serve the purpose of listing generally, and would be unnecessarily burdensome. He views that purpose as publicizing agency contacts with persons having a direct personal or economic interest in agency decisions. He does not believe that representatives of the press, including representatives of publications that can be characterized as "trade press," fall within this category. Moreover, the Commissioner notes that representatives of the trade press as a matter of practice visit the agency on virtually a daily basis to make routine inquiries. Consequently, their contacts with the various agency officials listed in § 2.22(b)(3) are so numerous as to make recording each contact for the public calendar impractical.

The Commissioner concludes, therefore, that it is appropriate to exclude from listing on the public calendar contacts with various segments of the working press. Consistent with the purposes stated above, however, he is limiting this exclusion to those segments of the working press not considered to be "house organs," i.e., publications published by a company that manufactures or distributes a regulated product or products, or by an industry association. Contacts with representatives of such publications will be listed on the retrospective calendar.

80. One comment urged that proposed § 2.22(b), prescribing requirements for the retrospective public calendar, list meetings with persons outside the executive branch, rather than only those meetings with persons outside the entire Federal government. The Commissioner agrees. He believes there is valid reason to report retrospectively meetings between FDA officials and persons from the legislative or judicial branches of government that are held to discuss positions on regulatory issues pending before the agency. The final regulation has been modified accordingly.

81. Another comment urged that the prospective calendar described in § 2.22(a) be required to list "all meetings with persons outside Government." It argued that without advance notice of such meetings, consumer views would inevitably be presented primarily at separate meetings held subsequently, which would have only limited utility. Moreover, because such meetings are not transcribed or recorded, the comment argued, consumers should have the opportunity to be present at all meetings between the agency and industry representatives to represent consumer interests.

The Commissioner disagrees; the comment misunderstands the purpose of the prospective calendar, which is to list public meetings, conferences, etc., not private meetings. Section 2.15(d) of the regulations acknowledges the right of any person, whether a representative of industry or any other group, to meet privately with representatives of the agency. The Commissioner believes the listing on the retrospective calendar of such meetings that occur with certain agency officials, and the filing of appropriate memoranda summarizing all such meetings in the administrative file, adequately protect the interests of persons not in attendance. Such memoranda, would, except where exempt from disclosure, be publicly available through either the Hearing Clerk or the Public Records and Documents Center. The Commissioner believes these procedures fairly balance consumer interests with the rights of any citizen to meet privately with agency officials.

82. One comment contended that it should be mandatory instead of optional to list telephone calls in the retrospective calendar. It argued that the substance of a meeting or call should determine whether it should be included on the calendar, not whether it was held in person or by telephone. The comment insisted that all telephone calls that could influence agency decisions should be recorded on the calendar.

The Commissioner agrees that it is the substance of a meeting that should determine whether it is included on the calendar. However, he believes the proposed regulation is responsive to the comment. He advises that recording of calls is made optional with agency employees to eliminate the need to list calls that do not bear upon the decisionmaking process of the agency, e.g., calls to establish a time for a meeting. The expectation is that any call affecting a matter of policy will be noted. All such calls must in any event be summarized in written memoranda for inclusion in the administrative file under § 2.15, and such memoranda would be subject to disclosure under the Freedom of Information Act. Listing of telephone calls on the public calendar may, therefore, properly remain optional with individual agency employees.

83. One comment urged that the prospective public calendar be published in the FEDERAL REGISTER. The comment stated that the locations presently specified in § 2.22(a)(2) for public display of the calendar will not assure sufficiently wide dissemination of the information.

The Commissioner does not agree. Publication in the FEDERAL REGISTER is not appropriate for routine matters such as a weekly calendar. The Commissioner believes the provisions made for public display of both the prospective and retrospective public calendars are adequate. Moreover, the Commissioner assures that topical items appearing in the calendar will be noted regularly in the trade press.

84. Section 2.22(b)(3)(ix) in the final regulation has been modified to include, among the agency representatives required to list their attendance at meetings on the public calendar, any representative of the Chief Counsel's office who attends or plans to attend a public meeting on behalf of the Chief Counsel. The organization of the Chief Counsel's office is such that representatives other than the Chief Counsel or Deputy Chief Counsel frequently attend meetings with

members of the public as the designated representative of the office. The effect of the requirement will be to bring to public attention meetings that might otherwise not be reported.

85. Numerous comments on proposed § 2.23 Representation by an organization (21 CFR 2.23) objected to the distinction between "organization" in paragraphs (a) and (c), and "trade association" in paragraph (b). Several comments questioned whether these terms included professional associations, consumer groups, large food cooperatives, etc.

The Commissioner advises that the divergent references to "organization" and "trade association" were inadvertent. As proposed, the section was intended to apply to any organization, including a trade association that represents a "membership," or other clearly defined group appearing before the agency. Thus, professional and trade associations as well as consumer groups having an identifiable membership would be included.

86. A large number of comments objected to the statement in proposed § 2.23(b) that any representation by a trade association in a petition, comment, objection, or otherwise would be treated by FDA as binding on all members except those that had excluded themselves by name. Numerous reasons were offered to support this objection. Many comments urged that the requirement was impracticable; associations, operating within existing resources and prescribed time frames, could not, it was said, determine members' individual views prior to submitting comments. The comments pointed out that associations ordinarily attempt to reflect consensus views, and that if adopted, the rule would dramatically reduce the effectiveness of associations and primarily penalize small companies that rely heavily on associations to express their views. Legal objections were also raised as well. Many comments noted that trade associations have an identity apart from their membership and do not purport to act as agents for each of their members. The comments argued that FDA could not impose an "agency" relationship by regulation.

The Commissioner is persuaded that the proposed regulation should be modified to eliminate the provision that representations, petitions, comments, or objections by trade associations are binding on all members who have not expressly excluded themselves. He is persuaded by the practical difficulties of eliciting the views of an association member within the customary comment period. He also agrees with those comments that contended that organizations, including trade associations, should be entitled to participate in agency proceedings in their own right. Consequently, the final provision does not assert that association views will be binding on association members and does not require exclusion by name of members who do not subscribe to the views of the organization.

87. An equally large number of comments objected to the requirement of proposed § 2.23(b)(1) that any submission by a trade association (or other organization representing the views of its members) be accompanied by a current membership list or that the association have such a list on file in the Hearing Clerk's office. Several associations argued that their membership was simply too large and fluid; others contended that the requirement unlawfully infringed on the constitutional right of persons to petition their government or the right to participate in agency activities under the Administrative Procedure Act and the Federal Food, Drug, and Cosmetic Act. Several comments pointed to cases that have recognized a constitutional right against disclosure of association membership, citing *NAACP* v. *Alabama*, 357 U.S. 449 (1958), *Bates* v. *Little Rock*, 361 U.S. 516 (1960), and later cases, a right that can only be overcome by a compelling governmental interest in disclosure, citing *Gibson* v. *Florida Legislative Investigation Committee*, 372 U.S. 539 (1963). Some associations stated, however, that they had no objection to filing membership lists with the Hearing Clerk.

The Commissioner does not accept the argument that the cited cases, dealing principally with potential restrictions on freedom of expression, preclude requiring disclosure of association membership in the context of administrative proceedings to establish regulations based on information submitted by parties having obvious interests in the outcome. However, because the Commissioner has elected not to consider the positions taken by associations as binding on all members, there is no compelling reason to insist on the submission of membership lists by such organizations, and the proposed requirement is not adopted. Section 2.23(c) of the final regulation requests that such lists be provided on an annual basis to the Hearing Clerk for placement in a special file that will be available for public examination. The Commissioner hopes that organizations participating regularly in agency proceedings will file membership lists for he believes that information concerning the number and identity of members of associations will facilitate his evalution of association comments.

88. Many comments also questioned the requirement in proposed § 2.23(b)(2) that would prohibit a member of a trade association from deriving any rights individually from the filing by its association of an objection or request for hearing pursuant to §§ 2.110 through 2.112. The comments claimed it was inequitable to require members to be bound by association positions and not to provide rights commensurate with the obligation imposed. The Commissioner has retained the proposed provision (§ 2.23(d) in the final regulation), because he no longer intends to consider association members bound by positions taken by their association. However, he has amplified the provision to make clear that association members who wish to file objections or requests for hearing must do so in their own name if they wish to derive any rights therefrom.

89. Many comments challenged the validity of proposed § 2.23(c), in which the Commissioner announced his intention to treat any court proceeding in which an organization participates as a class action, and to assert in any related court case the doctrines of res judicata and collateral estoppel against all organization members except those excluded by name. The comments insisted that class actions must meet specific judicial requirements whose applicability can only be determined in specific proceedings. Other comments questioned the wisdom of including such statements of litigation strategy in these regulations.

The Commissioner acknowledges that whether an organization challenge to FDA regulations or other agency action should be adjudicated as a class action, just as the application of the doctrines of res judicata or collateral estoppel, will ultimately be determined judicially. Nonetheless, he has retained the provision (§ 2.23(e) in the final regulation) to emphasize that the positions stated reflect the agency's posture in court.

No comments were received regarding § 2.24 Settlement proposals (21 CFR 2.24), and it is issued as proposed.

No comments were received regarding § 2.25 Waiver, suspension, or modification of procedural requirements (21 CFR 2.25) and it is issued as proposed.

The proposed regulations on administrative practices and procedures contained proposed conforming changes in numerous existing regulations of the agency. The Commissioner has promulgated some of the proposed conforming regulations at the time of finalizing Subparts B and F of Part 2. In this document, the Commissioner is issuing the remainder of the conforming regulations substantially as proposed, inasmuch as no comments were received on them.

The changes in § 330.10(a)(12) (21 CFR 330.10(a)(12)) set forth in the September 3, 1975 proposal have been incorporated in a final regulation to be published in the FEDERAL REGISTER in the near future.

Section 328.30 Procedure for establishing, amending or repealing standards has been recodified as § 829.30 (recodification published in the FEDERAL REGISTER of February 13, 1976 (41 FR 6907)) and the proposed conforming amendment to the section is finalized in this document under Part 829.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 201 et seq., 52 Stat. 1040 (21 U.S.C. 321 et seq.)), the Public Health Service Act (sec. 1 et seq., 58 Stat. 682. as amended (42 U.S.C. 201 et seq.)), the Comprehensive Drug Abuse Prevention and Control Act of 1970 (sec. 4, 84 Stat. 1241 (42 U.S.C. 257a)), the Controlled Substances Act (sec. 301 et seq., 84 Stat. 1253 (21 U.S.C. 821 et seq.)), the Federal Meat Inspection Act (sec. 409(b), 81 Stat. 600 (21 U.S.C. 679(b)), the Poultry Products Inspection Act (sec. 24(b), 82 Stat. 807 (21 U.S.C. 467f(b)), the Egg Products Inspection Act (sec. 2 et seq., 84 Stat. 1620 (21 U.S.C. 1031 et seq.)), the Federal Import Milk Act (44 Stat. 1101 (21 U.S.C. 141 et seq.)), the Tea Importation Act (21 U.S.C. 41 et seq.), the Federal Caustic Poison Act (44 Stat. 1406 (15 U.S.C. 401–411 notes)), the Fair Packaging and Labeling Act (80 Stat. 1296 (15 U.S.C. 1451 et seq.)), and all other statutory authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (24262)), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

1. By revising § 1.1a to read as follows:

§ 1.1a **Foods, drugs, devices, and cosmetics; labeling; procedure for requesting variations and exemptions from required label statements.**

Section 403(e) of the act (in this Part 1, the term "act" means the Federal Food, Drug, and Cosmetic Act) provides for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 403(i) of the act provides for the establishment by regulation of exemptions from the required declaration of ingredients where such declaration is impracticable, or results in deception or unfair competition. Section 502(b) of the act provides for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 602(b) of the act provides for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 5(b) of the Fair Packaging and Labeling Act provides for the establishment by regulation of exemptions from certain required declarations of net quantity of contents, identity of commodity, identity and location of manufacturer, packer, or distributor, and from declaration of net quantity of servings represented, based on a finding that full compliance with such required declarations is impracticable or not necessary for the adequate protection of consumers, and a further finding that the nature, form, or quantity of the packaged consumer commodity or other good and sufficient reasons justify such exemptions. The Commissioner, on his own initiative or on petition of an interested person, may propose a variation or exemption based upon any of the foregoing statutory provisions, including proposed findings if section 5(b) of the Fair Packaging and Labeling Act applies, pursuant to Part 2 of this chapter.

2. By revising § 1.8d(f) to read as follows:

§ 1.8d **Food labeling; information panel.**

• • • • •

(f) If the label of any package of food is too small to accommodate all of the information required by §§ 1.8a, 1.8c, 1.10, 1.13, 1.17, and 1.18, and Parts 80 and 125 of this chapter, the Commissioner may establish by regulation an acceptable alternative method of disseminating such information to the public, e.g., a type size smaller than one-sixteenth inch in height, or labeling attached to or inserted in the package or available at the point of purchase. A petition requesting such a regulation, as an amendment to this paragraph shall be submitted pursuant to Part 2 of this chapter.

PART 2—ADMINISTRATIVE PRACTICES AND PROCEDURES

3. By revising Subpart A of Part 2 to read as follows:

Subpart A—General

Sec.

2.1 Scope.
2.3 Definitions.
2.4 Summaries of administrative practices and procedures.
2.5 Submission of documents to Hearing Clerk; computation of time; availability for public disclosure.
2.6 Initiation of administrative proceedings.
2.7 Citizen petition.
2.8 Administrative reconsideration of action.
2.9 Administrative stay of action.
2.10 Promulgation of regulations for the efficient enforcement of the law.
2.11 Court review of final administrative action; exhaustion of administrative remedies.
2.12 Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing.
2.13 Separation of functions; ex parte communications.
2.14 Referral by court.
2.15 Meetings and correspondence.
2.16 Documentation of significant decisions in administrative file.
2.17 Internal agency review of decisions.
2.18 Dissemination of draft FEDERAL REGISTER notices and regulations.
2.19 Advisory opinions.
2.20 Food and Drug Administration regulations, guidelines, recommendations, and agreements.
2.21 Participation in outside standard-setting activities.
2.22 Public calendars.
2.23 Representation by an organization.
2.24 Settlement proposals.
2.25 Waiver, suspension, or modification of procedural requirements.

AUTHORITY: Sec. 201 et seq., Pub. L. 717, 52 Stat. 1040 as amended (21 U.S.C. 321 et seq.); sec. 1 et seq., Pub. L. 410, 58 Stat. 682 as amended (42 U.S.C. 201 et seq.); sec. 4, Pub. L. 91–513, 84 Stat. 1241 (42 U.S.C. 257a); sec. 301 et seq., Pub. L. 91–513, 84 Stat. 1253 (21 U.S.C. 821 et seq.); sec. 409(b), Pub. L. 242, 81 Stat. 600 (21 U.S.C. 679(b)); sec. 24(b), Pub. L. 85–172, 82 Stat. 807 (21 U.S.C. 467f (b)); sec. 2 et seq., Pub. L. 91–597, 84 Stat. 1620 (21 U.S.C. 1031 et seq.); secs. 1 through 9, Pub. L. 625, 44 Stat. 1101–1103 as amended (21 U.S.C. 141–149); secs. 1 through 10, Chapter 358, 29 Stat. 604–609 as amended (21 U.S.C. 41–50); sec. 1 et seq., Pub. L. 783, 44 Stat. 1406 as amended (15 U.S.C. 401 et seq.); sec. 1 et seq., Pub. L. 89–775, 80 Stat. 1296 as amended (15 U.S.C. 1451 et seq.).

Subpart A—General

§ 2.1 **Scope.**

(a) Part 2 governs practices and procedures applicable to all petitions, hearings, and other administrative proceedings and activities conducted by the Food and Drug Administration pursuant to the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and other laws with respect to which authority has been delegated to the Commissioner of Food and Drugs pursuant to § 5.1 of this chapter, except to the extent that specific provisions in other sections of this chapter state different requirements with respect to a particular matter.

(b) Where a specific provision in another section of this chapter states a different requirement with respect to a particular matter (e.g., the use of a form different from the one specified in § 2.7(b)), the sections in this part shall apply to the extent that they do not conflict with such other provisions (e.g., the requirements for inclusion of all data and information and for translations of foreign language in § 2.5(b) shall apply regardless of which form is used).

§ 2.3 **Definitions.**

(a) As used in this part, the following terms shall have the meanings specified:

(1) "Act" means the Federal Food, Drug, and Cosmetic Act unless otherwise indicated.

(2) "Department" means the United States Department of Health, Education, and Welfare.

(3) "Secretary" means the Secretary of Health, Education, and Welfare.

(4) "Commissioner" means the Commissioner of Food and Drugs, Food and Drug Administration, United States Department of Health, Education, and Welfare, or his designee.

(5) "Agency" means the Food and Drug Administration.

(6) "Person" includes an individual, partnership, corporation, association, or other legal entity.

(7) "Presiding officer" means the Commissioner or his designee or an Administrative Law Judge appointed as provided in 5 U.S.C. 3105.

(8) "Hearing Clerk" means the Hearing Clerk of the Food and Drug Administration, United States Department of Health, Education, and Welfare, Rm. 4–85, 5600 Fishers Lane, Rockville, MD 20857.

(9) "Proceeding" and "administrative proceeding" mean any undertaking to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action.

(10) "Party" means the bureau of the Food and Drug Administration responsible for the matter involved and every person who either has exercised a right to request or has been granted the right by the Commissioner to have a formal evidentiary public hearing pursuant to Subpart B of this part or a regulatory hearing before the Commissioner pursuant to Subpart F of this part, or who has waived any such right in order to obtain the establishment of a Public Board of Inquiry pursuant to Subpart C of this part, and as a result of whose action a formal evidentiary hearing or a regula-

tory hearing before the Commissioner has been granted or a Public Board of Inquiry has been established.

(11) "Participant" means any person participating in any proceeding, including each party and any other interested person.

(12) "Interested person" or "any person who will be adversely affected" means any person who submits a petition or comment or objection or otherwise requests an opportunity to participate in any informal or formal administrative proceeding or court action.

(13) "Public Board of Inquiry" or "Board" means an administrative law tribunal constituted pursuant to the provisions of Subpart C of this part.

(14) "Public advisory committee" or "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof, that is not composed wholly of full-time officers or employees of the Federal government and is established or utilized by the Food and Drug Administration to obtain advice or recommendations.

(15) "Formal evidentiary public hearing" means any hearing conducted pursuant to the provisions of Subpart B of this part.

(16) "Public hearing before a Public Board of Inquiry" means any hearing conducted by a Board pursuant to the provisions of Subpart C of this part.

(17) "Public hearing before a public advisory committee" means any hearing conducted by an advisory committee pursuant to the provisions of Subpart D of this part.

(18) "Public hearing before the Commissioner" means any hearing conducted by the Commissioner or his designee pursuant to the provisions of Subpart E of this part.

(19) "Regulatory hearing before the Food and Drug Administration" means any hearing conducted by an authorized employee of the Food and Drug Administration pursuant to the provisions of Subpart F of this part.

(20) "The laws administered by the Commissioner" means all the statutory provisions with respect to which authority has been delegated to the Commissioner pursuant to § 5.1 of this chapter.

(21) "Petition" means any petition, application, or other document requesting the Commissioner to establish, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him.

(22) "Regulation" means any agency rule of general or particular applicability and future effect implementing or applying any law administered by the Commissioner or relating to administrative practices and procedures. Pursuant to § 2.20(a), all agency regulations shall be promulgated in the FEDERAL REGISTER and codified in the Code of Federal Regulations.

(23) "Order" means any final agency disposition, other than the issuance of a regulation, in a proceeding concerning any matter and includes action on any new drug application, new animal drug application, or biological license.

(24) "Meeting" means any oral discussion, whether by telephone or in person.

(25) "Office of the Commissioner" includes the offices of the associate and assistant commissioners and excludes the bureaus, the office of the Executive Director for Regional Operations, and all regional and district offices.

(26) "Administrative action" includes every form and kind of act, including the refusal or failure to act, involved in the implementations of the laws administered by the Commissioner, except that it does not include the referral of apparent violations to United States attorneys for the institution of civil and criminal proceedings and acts preparatory or incidental thereto.

(27) "Administrative file" means the file maintained by the Food and Drug Administration, in which all documents pertaining to an administrative proceeding, including internal working memoranda and recommendations, are retained.

(28) "Food and Drug Administration employee" or "Food and Drug Administration representative" shall be deemed to include members of the Food and Drug Division of the office of the General Counsel of the Department of Health, Education, and Welfare.

(29) "Ex parte communication" means an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given, but it shall not include requests for status reports on any matter or proceeding.

(b) Any term which is defined in section 201 of the Federal Food, Drug, and Cosmetic Act or Part 1 of this chapter shall have that definition.

(c) Words in the singular form shall be deemed to include the plural, words in the masculine form shall be deemed to include the feminine form, and vice versa, as the case may require.

(d) Whenever any reference is made to this part to any person in the Food and Drug Administration, e.g., the director of a bureau, such reference shall also be deemed to include all persons to whom that person has delegated the specific function involved.

§ 2.4 Summaries of administrative practices and procedures.

The Commissioner shall prepare for public distribution summaries of Food and Drug Administration administrative practices and procedures in terms that are readily understood in order to encourage and facilitate participation in all agency activities.

§ 2.5 Submission of documents to Hearing Clerk; computation of time; availability for public disclosure.

(a) All submissions to the Hearing Clerk of petitions, comments, objections, notices, compilations of data and information, and any other documents pursuant to this part or other sections in this chapter shall be filed in four copies except as otherwise specifically provided in any relevant FEDERAL REGISTER notice or in other sections of this chapter. The Hearing Clerk shall be the agency custodian of such documents.

(b) All such submissions shall be signed by the person making the submission, or by an attorney or other authorized representative on his behalf. Submissions by trade associations shall also be subject to the requirements of § 2.23(b).

(c) All data and information referred to or in any way relied upon in any such submissions shall be included in full and may not be incorporated by reference, unless previously submitted as part of the administrative file in the same proceeding.

(1) A copy of any article or other reference or source cited shall be included, except where the reference or source is:

(i) A reported Federal court case,

(ii) A Federal law or regulation,

(iii) A Food and Drug Administration document that is routinely publicly available, or

(iv) A recognized medical or scientific textbook that is readily available to the agency.

(2) If any part of the material submitted is in a foreign language, it shall be accompanied by an English translation verified under oath to be complete and accurate, together with the name, address, and a brief statement of the qualifications of the person making the translation. Translations of literature or other material in a foreign language shall be accompanied by copies of the original publication.

(3) Where relevant data or information are contained in a document also containing irrelevant matter, the irrelevant matter shall be deleted and only the relevant data or information shall be submitted.

(4) Pursuant to § 4.63 (a) and (b) of this chapter, the names and other information which would identify patients or research subjects shall be deleted from any record before it is submitted to the Hearing Clerk in order to preclude a clearly unwarranted invasion of personal privacy.

(5) Defamatory, scurrilous, or intemperate matter shall be deleted from any record before it is submitted to the Hearing Clerk.

(6) The failure to comply with the requirements of this paragraph or any other requirement in this part shall result in rejection of the submission for filing or, if it is filed, in exclusion from consideration of any portion of the submission which fails to comply. If a submission fails to meet any requirement of this section and such deficiency becomes known to the Hearing Clerk, the Hearing Clerk shall return the submission with a copy of the applicable regulations indicating those provisions not complied with in the submission. A deficient submission may be corrected or supplemented and subsequently filed. The office of the Hearing Clerk is not equipped to make decisions regarding the confidentiality of submitted documents. Persons wishing to voluntarily submit information considered confidential shall do so in accordance with the presubmission review requirements of § 4.44 of this chapter.

(d) The filing of a submission shall mean only that the Hearing Clerk has not determined that it fails to meet the technical requirements for filing established in this section and in any other applicable sections in this chapter, e.g., § 2.7 relating to a citizen petition. The filing of a petition shall not mean or imply that it in fact meets all applicable requirements or that it contains reasonable grounds for the action requested or that the action requested is in accordance with law.

(e) All submissions to the Hearing Clerk shall be considered as submitted on the date on which they are postmarked or, if delivered in person during regular business hours, on the date on which they are so delivered, unless a provision in this part, an applicable FEDERAL REGISTER notice, or an order issued by an administrative law judge specifically states that such documents must be received by a specified date, e.g., § 2.8(g) relating to a petition for reconsideration, in which case they shall be considered submitted on the date actually received.

(f) All such submissions shall be mailed or delivered in person to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, except that a submission which is required to be received by the Hearing Clerk by a specified date may be delivered in person to the Food and Drug Administration building in downtown Washington (Rm. 6819, 200 C St., SW., Washington, DC 20201) and shall be considered as received by the Hearing Clerk on the date on which it is logged in at Rm. 6819.

(g) The Food and Drug Administration ordinarily will not acknowledge or give receipt for such documents, except:

(1) Documents delivered in person or submitted by certified or registered mail with a return receipt requested.

(2) Petitions for which acknowledgement of receipt of filing is provided by regulations in this chapter or by customary practice, e.g., § 2.7(c) relating to a citizen petition.

(h) Saturdays, Sundays, and Federal legal holidays shall be included in computing the time allowed for the submission of any document, except that when such time expires on a Saturday, Sunday, or Federal legal holiday, such period shall be extended to include the next following business day.

(i) All submissions to the Hearing Clerk constitute a representation that, to the best of the knowledge, information, and belief of the person making the submission, all statements made in the submission are true and accurate. All such submissions are subject to the False Reports to the Government Act, 18 U.S.C. 1001, under which a willfully false statement is a criminal offense.

(j) The availability for public examination and copying of submissions to the Hearing Clerk shall be governed by the following rules:

(1) Except to the extent provided in paragraphs (j) (2) and (3) of this section, the following submissions, including all supporting material, shall be on public display and shall be available for public examination between the hours of 9 a.m. to 4 p.m., Monday through Friday. Requests for copies of such submissions shall be filed and handled pursuant to the provisions of Subpart C of Part 4 of this chapter.

(i) Petitions.

(ii) Comments on petitions, on documents published in the FEDERAL REGISTER, and on similar public documents.

(iii) Objections and requests for hearings filed pursuant to Subpart B of this part.

(iv) Material submitted at a formal evidentiary public hearing pursuant to Subpart B of this part, a public hearing before a Public Board of Inquiry pursuant to Subpart C of this part, a public hearing before the Commissioner pursuant to Subpart E of this part, or an alternative form of hearing before a public advisory committee pursuant to § 2.117(a) (2).

(v) Material placed on public display pursuant to regulations in this chapter, e.g., agency guidelines filed pursuant to § 2.20(b).

(2) (i) Material prohibited from public disclosure pursuant to § 4.63 of this chapter (clearly unwarranted invasion of personal privacy) as interpreted and applied in Part 4 of this chapter and the regulations referenced therein, and, except as provided in paragraph (j) (3) of this section, material submitted with objections and requests for hearings filed pursuant to Subpart B of this part, or at a formal evidentiary public hearing pursuant to Subpart B of this part, a public hearing before a Public Board of Inquiry pursuant to Subpart C of this part, or an alternative form of public hearing before a public advisory committee or a public hearing before the Commissioner pursuant to § 2.117(a) (2) or (3), of the following types shall not be on public display, shall not be available for public examination, and shall not be available for copying or any other form of verbatim transcription unless they are otherwise available for public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein:

(*a*) Safety and effectiveness data and information, which include all studies and tests of an ingredient or product on animals and humans and all studies and tests on the ingredient or product for identity, stability, purity, potency, bioavailability, performance, and usefulness.

(*b*) A protocol for a test or study.

(c) Manufacturing methods or processes, including quality control procedures.

(*d*) Production, sales, distribution, and similar data and information, except any compilation of such data and information aggregated and prepared in a way that does not reveal confidential data and information.

(*e*) Quantitative or semiquantitative formulas.

(*f*) Data and information on design or construction of products.

(ii) Material submitted pursuant to the provisions of paragraph (j) (2) of this section shall be segregated from all other submitted material and clearly so marked. Any person who does not agree that such a submission is properly subject to the provisions of paragraph (j) (2) of this section may request a ruling thereon from the Assistant Commissioner for Public Affairs whose decision on the matter shall be final, subject to judicial review pursuant to § 4.46 of this chapter.

(3) Material listed in paragraph (j) (2) (i) (*a*) and (*b*) of this section may be disclosed pursuant to a protective order issued by the administrative law judge or other presiding officer at any hearing referenced in paragraph (j) (2) (i). The order shall only permit disclosure of the data in camera and only to the extent necessary for the proper conduct of the hearing. The order shall state to whom the information is to be made available (e.g., to parties or participants, or only to counsel for parties or participants), and persons not specifically permitted access to the data shall be excluded from the in camera part of the proceeding. The administrative law judge or other presiding officer may impose other conditions or safeguards with the requirements of this section. The limited availability of material pursuant to this paragraph shall be deemed not to constitute prior disclosure to the public as defined in § 4.81 of this chapter, and no such data and information shall be submitted to or received or considered by the Food and Drug Administration in support of a petition or other request from any other person.

§ 2.6 Initiation of administrative proceedings.

An administrative proceeding under the laws administered by the Commissioner may be initiated in any of the following three ways:

(a) Any interested person may petition the Commissioner to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him. Any such petition shall be either (1) in the form specified in other applicable sections in this chapter, e.g., the form for a food additive petition in § 121.51 of this chapter or for a new drug application in § 314.1 of this chapter or for a new animal drug application in § 514.1 of this chapter, or (2) in the form for a citizen petition in § 2.7.

(b) The Commissioner may on his own initiative institute a proceeding to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him. The Food and Drug Administration has primary jurisdiction to make the initial determination on issues within its statutory mandate, and will request a court to dismiss, or to hold in abeyance its determination of or refer to the agency for administrative determination, any such issue which has not previously been determined by the agency or which, if

it has previously been so determined, the agency concludes should be reconsidered and subject to a new administrative determination. The Commissioner may, in his discretion, utilize any of the procedures established in this part in reviewing and making a determination on any matter on his own initiative.

(c) The Commissioner shall institute a proceeding to determine whether he should issue, amend, or revoke a regulation or order, or take or refrain from taking any other form of administrative action under the laws administered by him, whenever any court, without his initiative, holds in abeyance or refers any such matter to him for an administrative determination and he concludes that such an administrative determination is feasible in light of agency priorities and resources.

§ 2.7 Citizen petition.

(a) The provisions of this section shall apply to any petition submitted by any person, except to the extent that specific provisions in other sections of this chapter state different requirements with respect to a particular matter.

(b) Any petition (including any attachments) shall be submitted in accordance with § 2.5 and in the following form:

(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4–65, 5600 Fishers Lane, Rockville MD 20857.

CITIZEN PETITION

The undersigned submits this petition pursuant to ---------- (relevant statutory sections, if know) of the ---------- (Federal Food, Drug, and Cosmetic Act and/or the Public Health Service Act and/or any other statutory provision with respect to which authority has been delegated to the Commissioner of Food and Drugs pursuant to 21 CFR 5.1) to request the Commissioner of Food and Drugs to ---------- (issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action).

A. Action Requested.

((1) If the petition requests the Commissioner to issue, amend, or revoke a regulation, the exact wording of the existing regulation (if any) and the proposed regulation or amendment requested.)

((2) If the petition requests the Commissioner to issue, amend, or revoke an order, a copy or the exact wording of and citation to the existing order (if any) and the exact wording requested for the proposed order.)

((3) If the petition requests the Commissioner to take or refrain from taking any other form of administrative action, the specific action or relief requested.)

B. Statement of Grounds.

(A full statement of the factual and legal grounds upon which the petitioner relies. Such grounds shall include all relevant data, information, and views on which the petitioner relies, as well as representative data and information known to the petitioner which are unfavorable to the petitioner's position, and shall be submitted in a well-organized format.)

C. Environmental Impact.

(An environmental impact analysis report in the form specified in 21 CFR 6.1(g), except for the types of actions specified in 21 CFR 6.1(e).)

D. Economic Impact.

(The following information is to be submitted only when requested by the Commissioner following review of the petition: A statement of the effect of requested action on (1) cost (and price) increases to industry, government, and consumers; (2) productivity of wage-earners, businesses, or government; (3) competition; (4) supplies of important materials, products, or services; (5) employment; and (6) energy supply or demand.)

The undersigned certifies, that, to the best of his knowledge and belief this petition includes all data, information, and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition.

Very truly yours,

(Signature)

(Name of petitioner)

(Mailing address)

(Telephone number)

(c) Any petition which appears to meet the requirements of paragraph (b) of this section and §2.5 shall be filed by the Hearing Clerk, stamped with the date of filing, and assigned a docket number. The docket number shall be used to identify the administrative file established by the Hearing Clerk for all submissions relating to the petition, as provided in this part. All subsequent submissions relating to the matter shall refer to such docket number and shall be filed in such administrative file. Identical, similar, or related petitions may be filed together and given the same docket number. The Hearing Clerk shall promptly notify the petitioner in writing of the filing and docket number of a petition.

(d) Any interested person may submit written comments to the Hearing Clerk on any filed petition, which shall become part of the Administrative file. Such comments shall specify the docket number of the petition and may support or oppose the petition in whole or in part. Any request for alternative or different administrative action shall be in the form of a separate petition.

(e) (1) The Commissioner shall, in accordance with paragraph (e) (2) of the section, review and rule upon every petition filed pursuant to paragraph (c) of this section, taking into consideration (i) the agency resources available to handle the category of subject matter involved, (ii) the priority assigned to the petition in relation both to the category of subject matter involved and the overall work of the agency, and (iii) time requirements established by statute.

(2) A response shall be furnished to each petitioner under this section within 180 days of the receipt of the petition. Such response shall either:

(i) Approve the petition, in which case the Commissioner shall concurrently take appropriate agency action (e.g., the publication of a FEDERAL REGISTER notice) implementing the approval; or

(ii) Deny the petition; or

(iii) Provide a tentative response, indicating why the agency has been unable to reach a decision on the merits of the petition, e.g., because of the existence of other agency priorities, a need for additional information, or other stated reason. The tentative response may also indicate the likely ultimate agency response, and may specify when a final response may be furnished.

(3) The Commissioner may grant or deny such a petition, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted by the petition. The petitioner shall be notified in writing of the Comimssioner's decision on a petition. Such decision shall be placed in the public docket file in the office of the Hearing Clerk and may also be in the form of a notice published in the FEDERAL REGISTER.

(f) If a petition filed pursuant to paragraph (c) of this section requests the Commissioner to issue, amend, or revoke a regulation, the provisions of § 2.10 or § 2.12 shall also apply.

(g) A petitioner may supplement, amend, or withdraw his petition in writing without agency approval and without prejudice to its resubmission at anytime until the Commissioner rules on the petition, unless the petition has been referred for a hearing under Subparts B, C, D, or E of this part. After a ruling or referral, a petition may be supplemented amended, or withdrawn only with the approval of the Commissioner. The Commissioner may in his discretion approve withdrawal, but with prejudice against resubmission of the petition.

(h) In reviewing any matter which is the subject of a petition filed pursuant to paragraph (c) of this section, the Commissioner may, in his discretion, utilize any of the following procedures.

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this part.

(3) A public hearing before a Public Board of Inquiry pursuant to Subpart C of this part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this part.

(6) A regulatory hearing before the Food and Drug Administration pursuant to Subpart F of this part.

(7) A notice published in the FEDERAL REGISTER requesting data, information, and views.

(8) A proposal to issue, amend, or revoke a regulation, in accordance with the provisions of § 2.10 or § 2.110.

(9) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by those provisions.

(i) The record of the administrative proceeding shall consist of the following:

(1) The petition, including all data and information on which it relies, filed by the Hearing Clerk.

(2) All comments received on the petition, including all data or information submitted as a part of such comments.

(3) If the petition resulted in a proposal to issue, amend, or revoke a regulation, all of the documents specified in § 2.10(g).

(4) The record, consisting of any transcripts, minutes of meetings, reports, FEDERAL REGISTER notices, and other documents, resulting from any of the option procedures specified in paragraph (g) of this section, except that it shall not include the transcript of any closed portion of any public advisory committee meeting.

(5) The Commissioner's decision on the petition, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(h).

(7) If any petition for reconsideration or for a stay of action is filed pursuant to paragraph (j) of this section, the administrative record specified in § 2.8(k) or § 2.9(h) respectively.

(j) The administrative record specified in paragraph (i) of this section shall constitute the exclusive record for the Commissioner's decision. The record of the administrative proceeding shall be closed as of the date of the Commissioner's decision unless some other date for the closing of the record is specified by the Commissioner. Thereafter any interested person may submit a petition for reconsideration pursuant to § 2.8 and a petition for stay of action pursuant to § 2.9. Any person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the decision pursuant to this section.

(k) The provisions of this section shall not apply to the referral of a matter to a United States attorney for the initiation of court enforcement action and related correspondence, or to requests, suggestions, and recommendations made informally in routine correspondence received by the Food and Drug Administration. Such correspondence does not constitute a petition within the meaning of this section unless it purports to meet the requirements of this section. Action with respect to such routine correspondence does not constitute final administrative action which is subject to judicial review pursuant to § 2.11.

(l) The Hearing Clerk shall maintain a chronological list of all petitions filed pursuant to this section and § 2.19, but excluding petitions submitted elsewhere in the agency pursuant to § 2.6(a)(1), showing:

(1) The docket number.

(2) The date the petition was filed by the Hearing Clerk.

(3) The name of the petitioner.

(4) The subject matter involved.

(5) The disposition of the petition.

§ 2.8 Administrative reconsideration of action.

(a) The Commissioner may at any time conclude to reconsider any matter, on his own initiative or on the petition of any interested person.

(b) Any interested person may request reconsideration of any part or all of a decision of the Commissioner on any petition submitted pursuant to § 2.6(a). Any such request shall be submitted in accordance with § 2.5 and in the following form no later than 30 days after the date of the decision involved. In the case of a decision published in the FEDERAL REGISTER, the day of publication shall be the day of decision.

(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852

PETITION FOR RECONSIDERATION

Docket No. ------

The undersigned submits this petition for reconsideration of the decision of the Commissioner of Food and Drugs in Docket No. ------

A. Decision Involved.

(A concise statement of the decision of the Commissioner which the petitioner wishes to have reconsidered.)

B. Action Requested.

(The decision which the petitioner requests the Commissioner to make upon reconsideration of the matter.)

C. Statement of Grounds.

(A full statement of the factual and legal grounds upon which the petitioner relies. Such grounds shall demonstrate that relevant data, information, and views contained in the administrative record were not previously or not adequately considered by the Commissioner. No new data, information, or views may be included in a petition for reconsideration.)

Very truly yours,

(Signature)

(Name of petitioner)

(Mailing address)

(Telephone number)

(c) A petition for reconsideration relating to a petition submitted pursuant to § 2.6(a)(2) shall be subject to the requirements of § 2.7 (c) and (d), except that it shall be filed in the same docket file as the petition to which it relates.

(d) The Commissioner shall promptly review a petition for reconsideration. The Commissioner may grant such a petition in any proceeding when he determines that it is in the public interest and in the interest of justice. The Commissioner shall grant a petition for reconsideration in any proceeding if he determines that all of the following apply: (1) the petition demonstrates that relevant data, information, or views contained in the administrative record were not previously or not adequately considered by the Commissioner, (2) the petitioner's position is not frivolous and is being pursued in good faith, (3) the petitioner has demonstrated sound public policy grounds supporting reconsideration, and (4) reconsideration is not outweighed by public health considerations or other public interests.

(e) A petition for reconsideration shall be based only on data, information, and views contained in the administrative record on which the Commissioner made his decision. Any interested person who wishes to rely upon data, information, or views not included in such administrative record shall submit it to the Commissioner with a new petition to modify the decision pursuant to § 2.6(a).

(f) The Commissioner's decision on a petition for reconsideration shall be in writing and shall be placed on public display as part of the administrative file on the matter in the office of the Hearing Clerk. A determination to grant reconsideration shall be published in the FEDERAL REGISTER if the Commissioner's original decision was published in the FEDERAL REGISTER. Any other determination to grant or to deny reconsideration may also be published in the FEDERAL REGISTER.

(g) The Commission will consider a petition for reconsideration only if it is submitted within 30 days of the date of the decision involved and before such petitioner brings legal action in the courts to review such action, except that such a petition shall also be considered if the Commissioner has denied a petition for stay of action and such petitioner has petitioned for judicial review of the Commissioner's action and requested the reviewing court to grant a stay pending consideration of such review. A petition for reconsideration submitted later than 30 days after the date of the decision involved shall be denied as untimely. A petition for reconsideration shall be considered as submitted on the day it is received by the Hearing Clerk.

(h) The Commissioner may on his own initiative decide to reconsider all or part of any matter at any time after it has been decided or action has been taken. If review of such matter is pending in the courts, the Commissioner may request that the court refer the matter back to the agency or hold its review in abeyance pending administrative reconsideration. The administrative record of the proceeding shall include all additional documents relating to such reconsideration.

(i) After determining to reconsider a matter, whether on the petition of an interested person or on his own initiative, the Commissioner shall review and rule on the merits of the matter pursuant to § 2.7(e). The Commissioner may reaffirm, modify, or overrule his prior decision, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted.

(j) The Commissioner's reconsideration of any matter relating to a petition submitted pursuant to § 2.6(a)(2) shall be subject to the provisions of § 2.7(f) through (h), (j), and (k).

(k) The record of the administrative proceeding shall consist of the following.

(1) The record of the original petition specified in § 2.7(i).

(2) The petition for reconsideration, including all data and information on which it relies, filed by the Hearing Clerk.

(3) All comments received on such petition, including all data or information submitted as a part of such comments.

(4) The Commissioner's decision on such petition pursuant to paragraph (f) of this section, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(5) Any FEDERAL REGISTER notices or other documents resulting from such petition.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(h).

(7) If the Commissioner reconsiders the matter, the administrative record relating to such reconsideration specified in § 2.7(i).

§ 2.9 Administrative stay of action.

(a) The Commissioner may at any time stay (including extend) the effective date of any relevant action pending or following his decision on any matter, on his own initiative or on the petition of any interested person.

(b) Any interested person may request the Commissioner to stay the effective date of any administrative action. Such a stay may be requested for a specific time period or for an indefinite time period. Any such request shall be submitted in accordance with § 2.5 and in the following form no later than 30 days after the date of the decision involved. In the case of a decision published in the FEDERAL REGISTER, the day of publication shall be the day of decision.

(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857

PETITION FOR STAY OF ACTION

The undersigned submits this petition requesting that the Commissioner of Food and Drugs stay the effective date of his action with respect to the following matter.

A. *Decision Involved.*

(The specific administrative action being taken by the Commissioner for which a stay is requested, including the docket number or other citation to the action involved.)

B. *Action Requested.*

(The length of time for which the stay is requested, which may be for a specific or indefinite time period.)

C. *Statement of Grounds.*

(A full statement of the factual and legal grounds upon which the petitioner relies for the stay.)

Very truly yours,

(Signature)

(Name of petitioner)

(Mailing address)

(Telephone number)

(c) A petition for stay of action relating to a petition submitted pursuant to § 2.6(a)(2) shall be subject to the requirements of paragraphs (c) and (d) of § 2.7, except that it shall be filed in the same docket file as the petition to which it relates.

(d) Neither the filing of a petition for a stay of action pursuant to this section nor action taken by an interested person in accordance with any other administrative procedure in this part or in any other section of this chapter, e.g., the filing of a citizen petition pursuant to § 2.7 or a petition for reconsideration pursuant to § 2.8 or a request for an advisory opinion pursuant to § 2.18, shall operate to stay or otherwise delay any administrative action by the Commissioner, including enforcement action of any kind, unless one of the following applies:

(1) The Commissioner, in his discretion, determines that a stay or delay is in the public interest and stays the action.

(2) A statutory provision requires that the matter be stayed.

(3) A court orders that the matter be stayed.

(e) The Commissioner shall promptly review a petition for stay of action. The Commissioner may grant or deny such a petition, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted by the petition. The Commissioner may grant a stay in any proceeding if he determines that it is in the public interest and in the interest of justice. The Commissioner shall grant a stay in any proceeding if he determines that all of the following apply: (1) The petitioner will otherwise suffer irreparable injury, (2) the petitioner's case is not frivolous and is being pursued in good faith, (3) the petitioner has demonstrated sound public policy grounds supporting the stay, and (4) the delay resulting from the stay is not outweighed by public health considerations or other public interests.

(f) The Commissioner's decision on a petition for stay of action shall be in writing and shall be placed on public display as part of the file on the matter in the office of the Hearing Clerk. A determination to grant a stay shall be published in the FEDERAL REGISTER if the Commissioner's original decision was published in the FEDERAL REGISTER. Any other determination to grant or to deny a stay may also be published in the FEDERAL REGISTER.

(g) A petition for a stay of action submitted later than 30 days after the date of the decision involved shall be denied as untimely. A petition for a stay of action shall be considered as submitted on the day it is received by the Hearing Clerk.

(h) The record of the administrative proceeding shall consist of the following:

(1) The record of the proceeding to which the petition for stay of action is directed.

(2) The petition for stay of action, including all data and information on which it relies, filed by the Hearing Clerk.

(3) All comments received on such petition, including all data or information submitted as a part of such comments.

(4) The Commissioner's decision on such petition pursuant to paragraph (e) of this section, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(5) Any FEDERAL REGISTER notices or other documents resulting from such petition.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(h).

§ 2.10 Promulgation of regulations for the efficient enforcement of the law.

(a) The Commissioner may propose and promulgate regulations for the efficient enforcement of the laws administered by him whenever he concludes that it is necessary or appropriate to do so. The issuance, amendment, or revocation of any such regulation may be initiated in any of the ways specified in § 2.6.

(1) This section shall apply to any regulation (i) not subject to § 2.12 and Subpart B of this part or (ii) if it is subject to § 2.12 and Subpart B of this part, to the extent that those provisions make this section applicable.

(2) A regulation proposed by an interested person in a petition submitted pursuant to § 2.6(a) shall be published by the Commissioner in the FEDERAL REGISTER as a proposal if he determines that:

(i) The petition contains facts demonstrating reasonable grounds for the proposal.

(ii) The petition contains a substantial showing that the proposal is in the public interest and will promote the objectives of the act and the agency.

(iii) The requested proposal is lawful.

(3) The Commissioner may publish two or more alternative proposed regulations on the same subject in order to obtain comment on the different alternatives.

(4) The Commissioner may publish a regulation proposed by an interested person in a petition submitted pursuant to § 2.6(a) together with the Commissioner's preliminary views on the proposal and any alternative proposal.

(b) Except as provided in paragraphs (d) and (e) of this section, any such regulation shall be the subject of a notice of proposed rule making published in the FEDERAL REGISTER.

(1) Such notice shall contain (i) a general statement in the first or second paragraph describing the substance of the document in easily understandable terms, (ii) a preamble which summarizes the proposal and the facts and policy underlying it, (iii) references to all data and information on which the Commissioner relies for the proposal (copies or a full list of which shall be a part of the administrative file on the matter in the office of the Hearing Clerk), (iv) the authority under which the regulation is proposed, (v) either the terms or substance of the proposed regulation or a description of the subjects and issues involved, (vi) a proposed effective date, (vii) a reference to the existence or lack of need for an environmental impact statement pursuant to § 6.3(a)(3) (ii) or (iii) of this chapter, (viii) the time, place, and method for interested persons to submit written comments on the proposal, and a statement that comments shall be submitted in accordance with the requirements of this part and (ix) the docket number of the matter, which shall be used to identify the administrative file established by the Hearing Clerk for all submissions relating to the matter, as provided in this part.

(2) Such proposal shall ordinarily provide 60 days for comment, although the Commissioner may reduce or extend this time period for good cause. In no event shall the time for comment be less than 10 days.

(3) After publication of the notice of proposed rule making, any interested person may request the Commissioner to extend the comment period for an additional specified period of time by submitting a written request to the Hearing Clerk stating the grounds therefor. Such requests shall be pursuant to § 2.9, except that the heading shall be "REQUEST FOR EXTENSION OF COMMENT PERIOD."

(i) Any such request shall demonstrate why comments could not reasonably be submitted within the time permitted, or that important new information will shortly be available, or that sound public policy otherwise supports an extension of the time for comment. The Commissioner may grant or deny such request or may grant an extension for a time period different than that requested. Extensions of time to comment will not ordinarily be granted. An extension of time to comment may be limited to specific persons who have made and justified such a request, but shall ordinarily apply to all interested persons.

(ii) Any extension of time to comment of 30 days or longer shall be the subject of a notice published in the FEDERAL REGISTER and shall be applicable to all interested persons. Any extension of time to comment of less than 30 days shall be the subject either of a letter or memorandum filed with the Hearing Clerk or of a notice published in the FEDERAL REGISTER.

(4) Four copies of all comments shall be submitted to the Hearing Clerk, except that individuals may submit single copies of comments. Comments will be stamped with the date of receipt and will be numbered chronologically.

(5) Persons submitting comments critical of a proposed regulation are encouraged to include alternative wording that they believe would be preferable.

(c) After the time for comment on a proposed regulation has expired, the Commissioner shall review the entire administrative record on the matter, including all comments, and shall terminate the proceeding, issue a new proposal, or promulgate a final regulation, by notice published in the FEDERAL REGISTER.

(1) The quality and persuasiveness of the comments shall determine the Commissioner's decision with respect to such comments. The number or length of comments shall not ordinarily be a significant factor in such decision. However, the number of comments may be material where the degree of public interest is a legitimate factor for consideration.

(2) The decision of the Commissioner with respect to the matter shall be based solely upon the administrative record.

(3) The preamble to a final regulation published in the FEDERAL REGISTER shall contain in the first and second paragraphs reference to prior notices relating to the same matter and a general statement describing the substance of the document in easily understandable terms, and shall summarize each type of comment submitted on the proposal and the Commissioner's conclusions with respect to each such type of comment. The preamble shall contain a thorough and comprehensible articulation of the reasons for the Commissioner's decision on each issue.

(4) The notice promulgating a final regulation published in the FEDERAL REGISTER shall specify the effective date. Such effective date shall be not less than 30 days after the date of publication in the FEDERAL REGISTER, except for:

(i) A regulation that grants an exemption or relieves a restriction.

(ii) Any other regulation where the Commissioner finds, and states in the notice, good cause for an earlier effective date.

(d) The provisions for notice and comment in paragraphs (b) and (c) of this section shall apply to interpretive rules and to rules of agency practice and procedure except as provided in paragraph (e) of this section. The provisions of paragraphs (b) and (c) of this section shall not apply to general statements of policy in the form of informational notices published in the FEDERAL REGISTER or to matters involving agency organization.

(e) The requirements of notice and public procedure in paragraph (b) of this section shall not apply in any of the following situations:

(1) When the Commissioner determines for good cause that they are impracticable unnecessary, or contrary to the public interest. In such cases, the notice promulgating the regulation shall state the reasons for such determination, and shall provide an opportunity for the submission of comments to determine whether the regulation should subsequently be modified or revoked. A subsequent notice based on those comments may; but need not, provide additional opportunity for public comment.

(2) To food additive and color additive petitions, which are subject to the provisions of § 2.110(b)(2).

(3) To new animal drug regulations, which shall be promulgated by notice pursuant to section 512(i) of the act.

(f) In addition to the notice and public procedure required pursuant to paragraph (b) of this section, the Commissioner may, in his discretion, also subject any proposed or final regulation, before or after publication in the FEDERAL REGISTER, to any of the following additional procedures, where they are reasonably applicable to the matter involved:

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this part.

(3) A public hearing before a public Board of Inquiry pursuant to Subpart C of this part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this part.

(6) A notice published in the FEDERAL REGISTER requesting data, information and views before the Commissioner determines whether to propose a regulation.

(7) A draft of a proposed regulation placed on public display in the office of the Hearing Clerk. If this procedure is used, the Commissioner shall publish an appropriate notice in the FEDERAL REGISTER stating that the document is available and specifying the time within which comments may be submitted orally or in writing on the draft of the proposed regulation.

(8) A revised proposal published in the FEDERAL REGISTER, which shall be subject to all the provisions in this section relating to proposed regulations.

(9) A tentative final regulation or tentative revised final regulation placed on public display at the office of the Hearing Clerk and, if deemed desirable by the Commissioner, published in the FEDERAL REGISTER. If the tentative regulation is placed on display only, the Commissioner shall publish an appropriate notice in the FEDERAL REGISTER stating that the document is available and specifying the time within which comments may be submitted orally or in writing on the tentative final regulation and shall mail a copy of the tentative final regulation and the FEDERAL REGISTER notice to each person who submitted comments on the proposed regulation if one has been published...

(10) A final regulation published in the FEDERAL REGISTER which provides an opportunity for the submission of further comments, in accordance with paragraph (e)(1) of this section, to determine whether the regulation should subsequently be modified or revoked.

(11) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by the terms of those provisions.

(g) The record of the administrative proceeding shall consist of all of the following:

(1) If the regulation was initiated by a petition, the administrative record specified in § 2.7(i).

(2) If any petition for reconsideration or for a stay of action is filed, the administrative record specified in § 2.8(k) and § 2.9(h) respectively.

(3) The notice of proposed rule making published in the FEDERAL REGISTER, including all data and information identified or filed by the Commissioner with

the Hearing Clerk as part of the administrative record supporting the proposal.

(4) All comments received on the proposal, including all data or information submitted as a part of such comments.

(5) The notice promulgating the final regulation, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the administrative record supporting the final regulation.

(6) The transcripts, minutes of meetings, reports, FEDERAL REGISTER notices, and other documents resulting from any of the optional procedures specified in paragraph (f) of this section, except that it shall not include any transcript of any closed portion of any public advisory committee meeting.

(7) All documents submitted to the Hearing Clerk pursuant to § 2.25(h).

(h) The record of the administrative proceeding shall be closed as of the date of the Commissioner's decision unless some other date for the closing of the record is specified by the Commissioner. Thereafter any interested person may submit a petition for reconsideration pursuant to § 2.8 and a petition for stay of action pursuant to § 2.9. Any person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the final regulation.

(i) The Hearing Clerk shall maintain a chronological list of all regulations proposed and promulgated pursuant to this section and § 2.12, but excluding regulations resulting from petitions filed and assigned a docket number pursuant to § 2.7, showing:

(1) The docket number, which in the case of a petition submitted directly to a bureau shall be the number or other designation assigned by the bureau, e.g., the number assigned to a food additive petition.

(2) The name of the petitioner, if any.

(3) The subject matter involved.

(4) The disposition of the petition.

§ 2.11 Court review of final administrative action; exhaustion of administrative remedies.

(a) The provisions of this section shall apply to court review of any final administrative action taken by the Commissioner, including action taken pursuant to §§ 2.6 through 2.10 and § 2.500(b), except action subject to the provisions of § 2.12 and Subpart B of this part.

(b) Any request that the Commissioner take or refrain from taking any form of administrative action shall first be the subject of a final administrative decision based upon a petition submitted to the Commissioner pursuant to § 2.6(a) or, where applicable, a hearing pursuant to § 2.500(b), the Commissioner will request dismissal of such court action or referral to the agency for an initial administrative determination on the grounds of a failure to exhaust the administrative remedies provided in this part, the lack of final agency action as required by 5 U.S.C. 701 et seq., and the lack of an actual controversy as required by 28 U.S.C. 2201.

(c) Any request that any form of administrative action be stayed shall first be the subject of an administrative decision based upon a petition for stay of action submitted to the Commissioner pursuant to § 2.9 before any request is made that a court stay such action. If any court action is filed requesting a stay of any administrative action taken by the Commissioner prior to the Commissioner's decision on a petition submitted in a timely manner pursuant to § 2.9, the Commissioner will request dismissal of such court action or referral to the agency for an initial administrative determination on the grounds of a failure to exhaust the administrative remedies provided in this subpart, the lack of final agency action as required by 5 U.S.C. 701 et seq., and the lack of an actual controversy as required by 28 U.S.C. 2201. If any court action is filed requesting a stay of any administrative action taken by the Commissioner after a petition for a stay of action is denied because it was submitted after expiration of the 30-day time period specified in § 2.9, or after the time for submitting such a petition has expired, the Commissioner will request dismissal of such court action on the ground of a failure to exhaust the administrative remedies set out in this subpart.

(d) The Commissioner's final decision on a petition submitted pursuant to § 2.6(a), on a petition for reconsideration submitted pursuant to § 2.8, on a petition for stay of action submitted pursuant to § 2.9, on any advisory opinion issued pursuant to § 2.19, on any guideline issued pursuant to § 2.20, on any matter involving administrative action which is the subject of an opportunity for a hearing pursuant to § 2.500(b), or the issuance of any final regulation published in accordance with § 2.10, each constitutes final agency action reviewable in the courts pursuant to 5 U.S.C. 701 et seq. and, where appropriate, 28 U.S.C. 2201.

(1) It is the position of the Food and Drug Administration except as otherwise provided in paragraph (d)(2) of this section that:

(i) Any such final agency action exhausts all administrative remedies and is ripe for preenforcement judicial review as of the date of such final decision, unless applicable law explicitly requires that the petitioner take further action before judicial review is available.

(ii) Any interested person is affected by, and thus has standing to obtain judicial review of, such final agency action.

(iii) It is not appropriate to move to dismiss a suit for preenforcement judicial review of such final agency action on the ground that indispensable parties are not joined or that it is an unconsented suit against the United States if such defect could be cured by amending the complaint.

(2) The Commissioner will object to judicial review of any matter if:

(i) The matter is committed by law to the discretion of the Commissioner, e.g., a decision to recommend or not to recommend civil or criminal enforcement action under sections 302, 303, and 304 of the act.

(ii) Review is not sought in a proper court.

(e) Any interested person may request judicial review of any final decision of the Commissioner in the courts without first petitioning the Commissioner for reconsideration or for a stay of action, except that in accordance with paragraph (c) of this section such person shall request a stay by the Commissioner pursuant to § 2.9 before he may request a stay by the court.

(f) The Commissioner will take the position in any action for judicial review under 5 U.S.C. 701 et seq., whether or not it includes a request for a declaratory judgment under 28 U.S.C. 2201, or in any other case in which the validity of administrative action is properly challenged, that the validity of the action shall be determined solely on the basis of the administrative record specified in §§ 2.7(j), 2.8(k), 2.9(h), 2.10(g), and 2.513(c), or the administrative record applicable with respect to any decision or action under the regulations referenced in § 2.500(b), and that additional data, information, or views may not be considered. Any interested person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the action pursuant to § 2.6(a).

(g) The Commissioner requests that all petitions for judicial review of a particular matter be filed in a single United States district court. If such petitions are filed in more than one jurisdiction, the Commissioner shall take appropriate action to prevent a multiplicity of suits in various jurisdictions, such as:

(1) A request for transfer of one or more suits to consolidate separate actions, pursuant to 28 U.S.C. 1404(a) or 28 U.S.C. 2112(a).

(2) A request that actions in all but one jurisdiction be stayed pending the conclusion of one proceeding.

(3) A request that all but one action be dismissed pending the conclusion of one proceeding, with the suggestion that the other plaintiffs intervene in that one suit.

(4) A request that one of the suits be maintained as a class action in behalf of all affected persons.

(h) Upon judicial review of administrative action pursuant to this section:

(1) If a court determines that the administrative record is inadequate to support the action, the Commissioner shall determine whether he wishes to proceed with such action.

(i) If the Commissioner concludes that such action should be pursued, he shall either request that the court remand the matter to the agency to reopen the administrative proceeding and record, or on his own initiative reopen the administrative proceeding and record upon receipt of the court determination. Any such reopened administrative proceeding shall be conducted pursuant to the provisions of this part and in accordance with any directions of the court.

(ii) If the Commissioner concludes that the public interest requires that the action remain in effect pending further administrative proceedings, he shall request that the court not stay the matter in the interim and shall expedite the further administrative proceedings.

(2) If a court determines that the administrative record is adequate, but the rationale for the action requires further elucidation:

(i) The Commissioner shall request either that such further explanation be provided in writing directly to the court without further administrative proceedings, or that the administrative proceeding be reopened pursuant to paragraph (h)(1)(i) of this section.

(ii) If he concludes that the public interest requires that the action remain in effect pending further court or administrative proceedings, he shall request that the court not stay the matter in the interim and shall expedite such further proceedings.

§ 2.12 Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing.

(a) The Commissioner shall promulgate regulations and orders after an opportunity for a formal evidentiary public hearing, in accordance with the procedures established in Subpart B of this part, whenever all of the following apply:

(1) The subject matter of the regulation or order involved is subject by statute to an opportunity for a formal evidentiary public hearing.

(2) The person requesting such a hearing has a right to an opportunity for a hearing and submits adequate justification for such a hearing as required by §§ 2.110 through 2.115 and other applicable provisions in this chapter, e.g., §§ 314.200; 430.20(b), 514.200, and 601.7(a).

(b) The Commissioner may order a formal evidentiary public hearing on any matter whenever he determines, in his discretion, that it would be in the public interest to do so.

(c) The statutory provisions which permit a person who would be adversely affected by administrative action an opportunity for a formal evidentiary public hearing are as follows (the foregoing list imparts no right to a hearing where no opportunity for a hearing is provided by the statutory sections listed):

(1) Section 401 of the act relating to definitions and standards for food.

(2) Section 403(j) of the act relating to regulations for labeling of foods for special dietary uses.

(3) Section 404(a) of the act relating to regulations providing for emergency permit control.

(4) Section 406 of the act relating to tolerances for poisonous substances in food.

(5) Section 409(c), (d), and (h) of the act relating to food additive regulations.

(6) Section 501(b) of the act relating to tests or methods of assay for drugs described in official compendia.

(7) Section 502(d) of the act relating to regulations designating habit-forming drugs.

(8) Section 502(h) of the act relating to regulations designating requirements for drugs liable to deterioration.

(9) Section 502(n) of the act relating to prescription drug advertising regulations.

(10) Section 506(c) of the act relating to insulin regulations.

(11) Section 507(f) of the act relating to regulations for antibiotic drug certification.

(12) Section 512(n)(5) of the act relating to regulations for animal antibiotic drugs and certification requirements.

(13) Section 706 (b) and (c) of the act relating to regulations for color additives listing and certification.

(14) Section 4(a) of the Fair Packaging and Labeling Act relating to food, drug, device, and cosmetic labeling.

(15) Section 5(c) of the Fair Packaging and Labeling Act relating to additional economic regulations for food, drugs, devices, and cosmetics.

(16) Section 505 (d) and (e) of the act relating to new drug applications.

(17) Section 512 (d), (e), (m)(3), and (m)(4) of the act relating to new animal drug applications.

(18) Section 515(g) of the act relating to device premarket approval applications.

(19) Section 351(a) of the Public Health Service Act relating to plant and product licenses for a biologic.

§ 2.13 Separation of functions; ex parte communications.

(a) The provisions of this section shall apply with respect to any matter which is subject by statute to an opportunity for a formal evidentiary public hearing, as listed in § 2.12(c), and any matter subject to a public hearing before a Public Board of Inquiry pursuant to Subpart C of this part.

(b) In the case of any matter listed in § 2.12(c) (1) through (10) and (12) through (15):

(1) Any interested person may meet or correspond with any representative of the Food and Drug Administration with respect to any such matter prior to publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry on the matter. The provisions of § 2.15 shall apply to such meetings and correspondence.

(2) Upon publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry, the following separation of functions shall apply:

(i) The bureau responsible for the matter involved in the hearing shall, as a party to the hearing, be responsible for all investigative functions and for presentation of the position of the bureau at the hearing and in any pleading or oral argument before the Commissioner. Representatives of the bureau shall not participate or advise in any decision except as witness or counsel in public proceedings. There shall be no other communication between representatives of the bureau and representatives of the office of the Commissioner with respect to the matter involved in the hearing prior to the decision of the Commissioner. The Commissioner may, however, when he determines it necessary to ensure the best use of agency resources in deciding a particular matter, designate representatives of a bureau to advise him, or representatives of his office to advise a bureau. The designation shall be in writing and shall be filed with the Hearing Clerk no later than the time specified in paragraph (b)(2) of this section for the application of separation of functions. All members of the Food and Drug Administration other than representatives of the involved bureau (except those specifically designated otherwise) shall be available to advise and participate with the office of the Commissioner in its functions relating to the hearing and the final decision.

(ii) The Chief Counsel for the Food and Drug Administration shall designate members of his office who shall advise and participate with the bureau in its functions in the hearing and members who shall advise the Commissioner in his functions related to the hearing and his final decision. The members of the office of General Counsel designated to advise and participate with the bureau shall not participate or advise in any decision of the Commissioner except as counsel in public proceedings. Such designation shall be in the form of a memorandum filed with the Hearing Clerk and made a part of the administrative record in the proceeding. There shall be no other communication between those members of the office of General Counsel designated to advise the Commissioner and any other other persons in the office of General Counsel or in the involved bureau with respect to the matter involved in the hearing prior to the decision of the Commissioner. The Chief Counsel may in his discretion assign new attorneys to advise either the bureau or the Commissioner at any stage of the proceedings. The Chief Counsel shall ordinarily advise and participate with the office of the Commissioner in its function relating to the hearing and the final decision.

(iii) The office of the Commissioner shall be responsible for the agency review of and final decision on the matter, with the advice and participation of anyone in the Food and Drug Administration other than representatives of the involved bureau and those members of the office of General Counsel who have been designated to assist in the bureau's functions relating to the hearing.

(c) In the case of any matter listed in § 2.12(c) (11) and (16) through (18),

the specific provisions relating to separation of functions set forth in §§ 314.200 (f), 430.20(b)(9), 514.200, and 601.7(a) of this chapter shall be applicable prior to publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry. Upon publication of any such notice the rules in paragraph (b)(2) of this section shall apply.

(d) Except as provided in paragraph (e) of this section, between the date that separation of functions applies pursuant to paragraph (b) or (c) of this section and the date of the Commissioner's decision on the matter, communication with respect to the matter involved in the hearing shall be restricted as follows:

(1) No person outside the agency shall have any ex parte communication with the presiding officer or any person representing the office of the Commissioner with respect to the matter involved in the hearing. Neither the presiding officer nor any person representing the office of the Commissioner shall have any ex parte communication with any person outside the agency with respect to the matter involved in the hearing. All such communications shall be public communications, as witness or counsel, in accordance with the applicable provisions of this part.

(2) Any participant in the hearing may submit a written communication to the office of the Commissioner with respect to a proposal for settlement. Such written communications shall be in the form of pleadings and shall be served on all other participants and filed with the Hearing Clerk in the same manner as any other pleading.

(3) Any written communication contrary to this section shall immediately be served on all other participants and filed with the Hearing Clerk, and any oral communication contrary to this section shall immediately be recorded in a written memorandum served on all other participants, and filed with the Hearing Clerk to become a part of the administrative record of the proceeding. Any person, including any representative of any participant in the hearing, who is involved in any such oral communication shall, if possible, be made available for cross-examination during the hearing with respect to the substance of that conversation. Rebuttal testimony pertinent to any such written or oral communication shall be permitted. Any cross-examination and rebuttal testimony shall be transcribed and filed in the administrative record of the proceeding.

(e) The prohibitions specified in paragraph (d) of this section shall apply to any person having knowledge of a notice of hearing in advance of publication from the time such knowledge is acquired.

(f) The making of any communication contrary to this section may, consistent with the interests of justice and the policy of the underlying statute, result in a decision adverse to the person knowingly making or causing the making of such a communication.

§ 2.14 Referral by court.

(a) The provisions of this section shall apply whenever any Federal, State, or local court holds in abeyance, or refers to the Commissioner, any matter for an initial administrative determination pursuant to § 2.6(c) or § 2.11(b).

(b) The Commissioner shall promptly agree or decline to accept such referral. Whenever feasible in light of agency priorities and resources, the Commissioner shall agree to accept any such referral and shall institute a proceeding to determine the matter so referred.

(c) In reviewing such a matter, the Commissioner may, in his discretion, utilize any of the following procedures:

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this part.

(3) A hearing before a Public Board of Inquiry pursuant to Subpart C of this part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this part.

(6) A regulatory hearing before the Food and Drug Administration pursuant to Subpart F of this part.

(7) A notice published in the FEDERAL REGISTER requesting data, information, and views before the Commissioner makes his decision on it.

(8) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by those provisions.

(d) If the Commissioner's review of the matter results in the proposal of a regulation, the provisions of § 2.10 or § 2.12 shall also apply.

§ 2.15 Meetings and correspondence.

(a) In addition to the public hearings and proceedings established by the provisions of this part and in other sections of this chapter, meetings may be held and correspondence may be exchanged between representatives of the Food and Drug Administration and any interested person outside the Food and Drug Administration with respect to any matter within the jurisdiction of the laws administered by the Commissioner. Action with respect to such meetings and correspondence does not constitute final administrative action which is subject to judicial review pursuant to § 2.11.

(b) The Commissioner may conclude, in his discretion, that it would be in the public interest to hold an open public meeting to discuss a matter (or class of matters) pending before the Food and Drug Administration, at which any interested person may participate.

(1) The Commissioner shall give public notice through the public calendar described in § 2.22(a) of the time and place of the meeting and of the matters to be discussed, and may also publish such notice in the FEDERAL REGISTER.

(2) The meeting shall be conducted informally, i.e., any interested person may attend and participate fully in the discussion without giving prior notice to the agency or requesting time to make a presentation.

(3) No transcript or recording of any such meeting shall be required. A written memorandum summarizing the substance of the meeting shall be prepared by a representative of the Food and Drug Administration.

(c) Any meeting with any person outside the Department, including any person in the executive or legislative branch of the Federal government, relating to a pending court case, administrative hearing, or other regulatory action or decision, which involves more than a brief description of the matter shall be summarized in a written memorandum which shall be filed in the administrative file on the matter.

(d) Every person outside the Federal government has a right to request and obtain a private meeting with a representative of the Food and Drug Administration in agency offices to discuss any matter in which he is interested.

(1) The person requesting such a meeting may be accompanied by a reasonable number of employees, consultants, or other persons with whom he has a commercial arrangement within the meaning of § 4.81(a) of this chapter. Neither the Food and Drug Administration nor any other person may require the attendance of any person who is not an employee of the Executive Branch of the Federal Government without the agreement of the person requesting the meeting. Any person may attend by mutual consent of the person requesting the meeting and the Food and Drug Administration.

(2) The Food and Drug Administration shall determine which representatives of the Food and Drug Administration shall attend the meeting. The person requesting the meeting may request but not require or preclude the attendance of any specific Food and Drug Administration employee.

(3) Whenever appropriate (e.g., the meeting involved a matter covered by paragraph (c) of this section or any other important matter, a decision on an issue, or statements or advice or conclusions to which future reference may be required as part of an administrative record), a written memorandum summarizing the substance of the meeting shall be prepared by a representative of the Food and Drug Administration.

(4) Any person who wishes to attend a specific private meeting, but who is not permitted to attend because the person requesting the meeting or the Food and Drug Administration does not grant permission for such attendance, or because it is conducted by telephone, may request and obtain a separate meeting with the Food and Drug Administration to discuss the same matter or any additional matter.

(e) Food and Drug Administration employees have a responsibility to meet with all segments of the public in order

to promote the objectives of the laws administered by the Food and Drug Administration and the agency. In pursuing this responsibility the following general policy shall apply where agency employees are invited by persons outside the Federal Government to attend or participate in meetings outside agency offices as representatives of the agency.

(1) A person outside the Executive Branch of the Federal Government may invite an agency representative to attend or participate in a meeting outside agency offices. The agency representative is not obligated to attend or participate in any such meeting, but may do so where he concludes that it is in the public interest and will promote the objectives of the act and the agency.

(2) An agency representative may request that any such meeting be an open meeting when he concludes that this would be in the public interest. The agency representative may agree to decline to participate in any such meeting which is held as a private meeting, depending upon which action he concludes will best serve the public interest.

(3) An agency representative shall not knowingly participate in any meeting which is closed on the basis of sex, race, or religion.

(4) Any such meeting, whether open or closed, shall be subject to the requirements of paragraph (d)(3) of this section with respect to memoranda summarizing the substance of the meeting.

(f) Representatives of the Food and Drug Administration may initiate a meeting or correspondence with any person outside the Federal Government with respect to any matter relating to the laws administered by the Commissioner.

(1) Any meeting initiated by the Food and Drug Administration which involves a small number of interested persons, e.g., a meeting with a petitioner or with two manufacturers of a particular product which requires additional testing or with a trade association employee to discuss an industry labeling problem, may be a private meeting. Any meeting initiated by the Food and Drug Administration which involves a large number of interested persons, e.g., 10 manufacturers of an ingredient to discuss appropriate testing or labeling, shall be held as an open conference or meeting pursuant to paragraph (b) of this section.

(2) Whenever appropriate (e.g., the meeting involved a matter covered by paragraph (c) of this section or any other important matter, a decision on an issue, or statements or advice or conclusions to which future reference may be required as part of the administrative record), a written memorandum summarizing the substance of any meeting shall be prepared by a representative of the Food and Drug Administration.

(g) Any person who participates in any meeting described in paragraphs (b) through (f) of this section may prepare and submit to the Food and Drug Administration for inclusion in the administrative file a written memorandum summarizing the substance of the meeting.

(h) All memoranda of such meetings prepared by a representative of the Food and Drug Administration or by any other person and all correspondence which relate to any matter pending before the agency shall promptly be filed in the relevant administrative file of the proceeding.

(i) Any meeting with a representative of Congress relating to a pending or potential investigation, inquiry, or hearing by a congressional committee or a member of Congress shall be summarized in a written memorandum which shall be forwarded to the Food and Drug Administration, Office of Legislative Services. This provision shall not restrict the right of any agency employee to participate in any such meeting.

(j) Any meeting of an advisory committee shall be subject to the requirements of Subpart D of this part.

(k) Pursuant to 42 U.S.C. 2631(a)(8), a log or summary shall be made of all meetings held between representatives of the Food and Drug Administration and representatives of industry and other interested parties with respect to implementation of the Radiation Control for Health and Safety Act of 1968.

§ 2.16 Documentation of significant decisions in administrative file.

(a) The provisions of this section shall apply to every significant Food and Drug Administration decision on any matter under the laws administered by the Commissioner, whether it is raised formally, e.g., by a petition, or informally, e.g., by correspondence.

(b) The Food and Drug Administration employees responsible for handling any matter shall be responsible for assuring the completeness of the administrative file relating to it. Such file:

(1) Shall contain appropriate documentation of the basis for the decision, including relevant evaluations, reviews, memoranda, letters, opinion of consultants, minutes of meetings, and all other written documents pertinent to the matter.

(2) Shall contain the recommendations and decisions of individual employees, including supervisory personnel, responsible for handling the matter.

(i) Such recommendations and decisions shall reveal any significant controversies or differences of opinion and their resolution.

(ii) Any agency employee working on a matter and, consistent with the prompt completion of his other assignments, any agency employee who has worked on a matter shall have the opportunity to record his views on that matter in a written memorandum, which shall be included in the file.

(c) Each written document placed in such an administrative file:

(1) Shall relate to the factual, scientific, legal, or related issues under consideration.

(2) Shall be dated and signed by the author.

(3) Shall be directed to the file, to appropriate supervisory personnel, and to other appropriate employees, and shall show all persons to whom copies were sent.

(4) Shall avoid defamatory language, intemperate remarks, undocumented charges, or irrelevant matters (e.g., personnel complaints).

(5) Shall, if it records the views, analyses, recommendations, or decisions of any agency employee in addition to the author, be given to such other employees.

(6) Shall, once completed (i.e., typed in final form, dated, and signed), not be altered, added to, or removed. Subsequent additions to, or revisions of, any such document shall be accomplished by the preparation of a new document.

(d) Memoranda or other documents prepared by agency employees not contained in the administrative file shall have no status or effect.

(e) All Food and Drug Administration employees working on a matter shall have access to the administrative file on that matter, as appropriate for the conduct of their work. All Food and Drug Administration employees who have worked on a matter shall have access to the administrative file on that matter so long as their attention to their assignments is not impeded. Reasonable restrictions may be placed upon such access to assure the proper cataloging and storage of documents, the availability of the file to others, and the completeness of the file for review.

§ 2.17 Internal agency review of decisions.

(a) Any decision of a Food and Drug Administration employee, other than the Commissioner, on any matter, e.g., an informal opinion on the need for further animal toxicology tests to support a food additive regulation or new drug application, is subject to review by the employee's supervisor under any of the following circumstances:

(1) At the request of the employee.

(2) On the initiative of the supervisor.

(3) At the request of any interested person outside the agency.

(4) As required by duly promulgated delegations of authority.

(b) Such review shall be accomplished by consultation between the employee and the supervisor or by review of the administrative file on the matter, or both. Such review shall ordinarily follow the established agency channels of supervision or review for that matter.

(c) Any interested person outside the agency may request internal agency review of any such decision through the established agency channels of supervision or review for that matter. Personal review of such matters by bureau directors or the office of the Commissioner shall take place for any of the following purposes:

(1) To resolve an issue which cannot be resolved at lower levels within the agency:

(i) Between two parts of a bureau or other component of the agency, or

(ii) Between two bureaus or other components of the agency, or

(iii) Between the agency and an interested person outside the agency.

(2) To review policy matters requiring the attention of bureau or agency management.

(3) In unusual situations requiring an immediate review in the public interest.

(4) As required by duly promulgated delegations of authority.

(d) Internal agency review of any such decision shall be based upon the data and information available in the administrative file. In the event that any interested person presents new data or information not contained in such file, the matter shall be returned to the appropriate lower level within the agency for a reevaluation based upon such new information.

§ 2.18 Dissemination of draft Federal Register notices and regulations.

(a) Any representative of the Food and Drug Administration may discuss orally or in writing with any interested person ideas and recommendations for FEDERAL REGISTER notices or regulations. The Food and Drug Administration welcomes assistance in developing ideas for, and in gathering the data and information to support, notices and regulations.

(b)(1) Once it is determined that a proposed notice or regulation will be prepared, the general concepts may be discussed by a representative of the Food and Drug Administration with any interested person. Details of a draft of a proposed notice or regulation may be discussed with any person outside the Executive Branch of the Federal Government only with the specific permission of the Commissioner.

(2) A draft of a proposed notice or regulation or its preamble, or any portion thereof, may be furnished to an interested person outside the Executive Branch of the Federal Government only if it is made available to all interested persons by a notice published in the FEDERAL REGISTER. A draft of a proposed notice or regulation so made available may, without the prior permission of the Commissioner, be discussed with any interested person to clarify and resolve questions raised and concerns expressed about the proposal.

(c) After publication of a proposed regulation in the FEDERAL REGISTER, and before preparation of a draft of the final regulation, a representative of the Food and Drug Administration may discuss the proposal with any interested person as provided in paragraph (b)(2) of this section.

(d)(1) Details of a draft of a final notice or regulation may be discussed with any interested person outside the Executive Branch of the Federal Government only with the specific permission of the Commissioner.

(2) A draft of a final notice or regulation of its preamble, or any portion thereof, may be furnished to an interested person outside the Executive Branch of the Federal Government only if it is made available to all interested persons by a notice published in the FEDERAL REGISTER, except as otherwise provided in paragraphs (g) and (j) of this section. A draft of a final notice or regulation so made available to any interested person may, without the prior permission of the Commissioner, be discussed with any interested person as provided in paragraph (b)(2) of this section.

(1) The final notice or regulation and its preamble shall be prepared solely on the basis of the administrative record.

(2) If any additional technical information from a person outside the Executive Branch of the Federal government is necessary to draft the final notice or regulation or its preamble, it shall be requested by the Food and Drug Administration in general terms and furnished directly to the Hearing Clerk to be included as part of the administrative record.

(3) If direct discussion by the Food and Drug Administration of a draft of a final notice or regulation or its preamble is required with a person outside the Executive Branch of the Federal Government, appropriate protective procedures will be undertaken to make certain that a full and impartial administrative record is established. Such procedures may include:

(i) The scheduling of an open public meeting conducted pursuant to § 2.15(b) at which any interested person may participate in review of and comment on the draft document.

(ii) The preparation of a tentative final regulation or tentative revised final regulation pursuant to § 2.10(f)(9), on which all interested persons will be given an additional period of time for oral and written comment.

(e) After a final regulation is published in the FEDERAL REGISTER, a representative of the Food and Drug Administration may discuss any aspect of it with any interested person.

(f) In addition to the requirements of this section, the provisions of § 2.13 shall apply to the promulgation of any regulation subject to the provisions of § 2.12 and Subpart B of this part.

(g) A draft of a final food additive, color additive, or new animal drug regulation or a proposed or final antibiotic regulation may be furnished to the petitioner for comment on the technical accuracy of such regulation. Every meeting with a petitioner relating to such a draft shall be recorded in a written memorandum, and all such memoranda and correspondence shall be filed with the Hearing Clerk as part of the administrative record of the regulation, pursuant to the provisions of § 2.15.

(h) Pursuant to 42 U.S.C. 263f, the Commissioner is required to consult with interested persons in the development of, and with the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC) before prescribing, any performance standard for an electronic product. Accordingly, the Commissioner shall publish in the FEDERAL REGISTER an announcement when a proposed or final performance standard, including any amendment thereof, is being considered for an electronic product, and thereafter any draft of any such document shall be furnished to any interested person upon request and may be discussed in detail with any interested person at any time.

(i) The provisions of § 2.15 shall apply to meetings and correspondence relating to draft FEDERAL REGISTER notices and regulations.

(j) The provisions of this section restricting discussion and disclosure of draft FEDERAL REGISTER notices and regulations shall not apply to those situations covered by §§ 4.83 through 4.89 of this chapter.

§ 2.19 Advisory opinions.

(a) Any person may request an advisory opinion from the Commissioner with respect to any matter of general applicability in which he is interested.

(1) Such request shall be granted whenever feasible.

(2) Such request may be denied if any of the following apply:

(i) The request contains incomplete information on which to base an informed advisory opinion.

(ii) The Commissioner concludes that an advisory opinion cannot reasonably be given on the matter involved.

(iii) The matter is adequately covered by a prior advisory opinion or a regulation.

(iv) The request covers a particular product or ingredient or label and does not raise a policy issue of broad applicability.

(v) The Commissioner otherwise concludes, in his discretion, that an advisory opinion would not be in the public interest.

(b) A request for an advisory opinion shall be submitted in accordance with § 2.5, shall be subject to the provisions of § 2.7(c) through (l), and shall be in the following form:

_____
(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857

REQUEST FOR ADVISORY OPINION

The undersigned submits this request for an advisory opinion of the Commissioner of Food and Drugs with respect to _____ (the general nature of the matter involved).

A. *Issues Involved.*

(A concise statement of the issues and questions on which an opinion is requested.)

B. *Statement of Facts and Law.*

(A full statement of all facts and legal points relevant to the request.)

The undersigned certifies that, to the best of his knowledge and belief, this request includes all data, information, and views relevant to the matter, whether favorable or unfavorable to the position of the undersigned, which is the subject of the request.

Very truly yours,

_____

(Mailing address)

_____
(Telephone number)

(c) The Commissioner may, in his discretion, handle any oral or written request to the agency as a request for an advisory opinion, in which case the request shall be filed with the Hearing Clerk and shall be subject to the provisions of this section.

(d) Any statement of policy or interpretation made in any of the following documents, unless subsequently repudiated by the agency or overruled by a court, shall constitute an advisory opinion:

(1) Any portion of a FEDERAL REGISTER notice other than the text of a proposed or final regulation, e.g., a notice to manufacturers or a preamble to a proposed or final regulation.

(2) Trade Correspondence (T.C. Nos. 1-431 and 1A-8A issued by the Food and Drug Administration between 1938 and 1946.

(3) Compliance Policy Guides issued by the Food and Drug Administration beginning in 1968 and codified in the Compliance Policy Guides manual.

(4) Other documents specifically identified as advisory opinions, e.g., advisory opinions on the performance standard for diagnostic x-ray systems, issued prior to July 1, 1975, and filed in a permanent public file for such prior advisory opinions maintained in the Public Records and Documents Center.

(5) Guidelines issued by the Food and Drug Administration pursuant to § 2.20 (b).

(e) An advisory opinion represents the formal position of the Food and Drug Administration on the matter involved, and except as provided in paragraph (f) of this section obligates the agency to follow it until it is amended or revoked. The Commissioner shall not recommend legal action against any person or product with respect to any action taken in conformity with an advisory opinion which has not been amended or revoked.

(f) In unusual situations involving an immediate and significant danger to health, the Commissioner may take appropriate civil enforcement action contrary to an advisory opinion issued pursuant to this section prior to amending or revoking such advisory opinion as provided in paragraph (g) of this section. Such action shall be taken only with the approval of the Commissioner, which may not be delegated. Appropriate amendment or revocation of the advisory opinion involved shall be expedited.

(g) An advisory opinion may be amended or revoked at any time after it has been issued. Notice of such amendment or revocation shall be given in the same manner in which notice was originally given of the advisory opinion or in the FEDERAL REGISTER, and in any event shall be placed on public display as part of the file on the matter in the office of the Hearing Clerk. The Hearing Clerk shall maintain a separate chronological index of all advisory opinions filed. The index shall specify the date of the request for the advisory opinion, the date of the opinion, and identification of the appropriate file.

(h) Action undertaken or completed in conformity with an advisory opinion issued pursuant to this paragraph which has subsequently been amended or revoked shall remain acceptable to the Food and Drug Administration unless the Commissioner determines that substantial public interest considerations preclude such continued acceptance. Whenever possible, an amended or revoked advisory opinion shall state when it has been determined that action previously undertaken or completed in conformity with a prior advisory opinion does not remain acceptable, and any transition period that may be applicable.

(i) Any interested person may submit written comments on an advisory opinion or modified advisory opinion. Three copies of any comments shall be sent to the Hearing Clerk for inclusion in the public file on the advisory opinion. Individuals may submit only one copy. Such comments shall be considered in determining whether further modification of an advisory opinion is warranted.

(j) An advisory opinion may be used in administrative or court proceedings to illustrate acceptable and unacceptable procedures or standards, but not as a legal requirement.

(k) A statement made or advice provided by an employee of the Food and Drug Administration shall constitute an advisory opinion only if it is issued in writing pursuant to this section. A statement or advice given by a Food and Drug Administration employee orally, or given in writing but not pursuant to this section or § 2.20, is an informal communication that represents the best judgment of that employee at that time but does not constitute an advisory opinion, does not necessarily represent the formal position of the Food and Drug Administration, and thus does not bind or otherwise obligate or commit the agency to the views expressed.

§ 2.20 Food and Drug Administration regulations, guidelines, recommendations, and agreements.

(a) *Regulations.* All Food and Drug Administration regulations having general applicability and legal effect shall be promulgated in the FEDERAL REGISTER pursuant to § 2.10 or § 2.12 and codified in the Code of Federal Regulations. Regulations may contain provisions which will be enforced as legal requirements, or which are intended only as guidelines and recommendations, or both. The dissemination of draft notices and regulations shall be subject to the provisions of § 2.18.

(b) *Guidelines.* All Food and Drug Administration guidelines having general applicability shall be included in the public file of guidelines established by the Hearing Clerk, pursuant to this paragraph, unless they have been published in the FEDERAL REGISTER as regulations pursuant to paragraph (a) of this section.

(1) Guidelines establish principles or practices of general applicability and do not include decisions or advice limited to particular situations. Guidelines relate to such matters as performance characteristics, preclinical and clinical test procedures, manufacturing practices, product standards, scientific protocols, compliance criteria, ingredient specifications, labeling, or other technical or policy criteria. Guidelines state procedures or standards of general applicability that are not legal requirements but that are acceptable to the Food and Drug Administration for a subject matter which falls within the laws administered by the Commissioner, e.g., a protocol for a particular type of animal toxicity test or human clinical trial.

(i) A person may rely upon a guideline with assurance that it is acceptable to the Food and Drug Administration, or may folow different procedures or standards. Where a person chooses to use different procedures or standards, he may, but is in no instance required to, discuss the matter in advance with the Food and Drug Administration to prevent the expenditure of money and effort on activity that may later be determined to be unacceptable.

(ii) Use of testing guidelines established by the Food and Drug Administration assures acceptance of a test as scientifically valid, if properly conducted, but does not assure approval of any ingredient or product so tested. The results of any such test or other available information may require disapproval or that additional testing be undertaken.

(2) A guideline represents the formal position of the Food and Drug Administration on the matter involved, and except as provided in paragraph (b)(3) of this section, obligates the agency to follow it until it is amended or revoked. The Commissioner shall not recommend legal action against any person or product with respect to any action taken in conformity with a guideline issued pursuant to this section that has not been amended or revoked.

(3) In unusual situations involving an immediate and significant danger to health, the Commissioner may take appropriate civil enforcement action contrary to a guideline issued pursuant to paragraph (b) of this section prior to amending or revoking such guideline as provided in paragraph (b)(5) of this section. Such action shall be taken only with the approval of the Commissioner, which may not be delegated. Appropriate amendment or revocation of the guideline involved shall be expedited.

(4) A guideline shall be included in the public file upon approval of the guideline by the relevant bureau director and publication by the Commissioner in the FEDERAL REGISTER of a notice of its availability. The notice shall state (i) the title of the guideline, (ii) the subject matter it covers, and (iii) the office or individual responsible for maintaining the guideline.

(5) A guideline may be amended or revoked upon approval of the amended guideline or revocation of the guideline by the relevant bureau director and publication by the Commissioner in the

FEDERAL REGISTER of a notice of such amendment or revocation. The notice shall state (i) the title of the guideline, (ii) the subject matter it covers, and (iii) the office or individual responsible for maintaining the guideline. All original guidelines and subsequent amendments shall be retained in the public file on a permanent basis so that a complete record of the development of each guideline remains available.

(6) Action undertaken or completed in conformity with a guideline issued pursuant to paragraph (b) of this section which has subsequently been amended or revoked shall remain acceptable to the Food and Drug Administration unless the Commissioner determines that substantial public interest considerations preclude such continued acceptance. Such determination may be made at the time of or subsequent to amendment or revocation of the guideline. Whenever possible, the notice of an amended or revoked guideline published pursuant to paragraph (b)(3) of this section shall state when it has been determined that action previously undertaken or completed in conformity with a prior guideline does not remain acceptable, and any transition period that may be applicable.

(7) The notice of a guideline or amended or revoked guideline published pursuant to paragraph (b) (2) or (3) of this section shall state that any interested person may submit written comments on the guideline or amended guideline. Two copies of any comments shall be sent to the Public Records and Documents Center for inclusion in the public file on the guideline and two copies shall be sent to the office or individual designated in the notice as responsible for maintaining the guideline. Such comments shall be considered in determining whether further amendments to or reinstitution of a guideline are warranted.

(8) A guideline may be used in administrative or court proceedings to illustrate acceptable and unacceptable procedures or standards, but not as establishing a legal requirement.

(9) A statement relating to acceptable procedures or standards given by a Food and Drug Administration employee orally, or in writing but not pursuant to § 2.19 or this section, is an informal communication that represents the best judgment of that employee at that time but does not constitute a guideline, does not necessarily represent the formal position of the Food and Drug Administration, and thus does not bind or otherwise obligate the agency to the views expressed.

(10) Because of the large number of analytical methods involved in Food and Drug Administration activities, their length and complexity, and the volume and frequency of amendment, the provisions of paragraph (b)(4) of this section shall not apply to such material except to the extent that the Commissioner concludes, in his discretion, that particular analytical methods should be included in the public file for a particular purpose. Food and Drug Administration analytical methods are available for public disclosure pursuant to the provisions of Part 4 of this chapter.

(11) The dissemination of draft guidelines shall be subject to the same provisions as the dissemination of draft notices and regulations pursuant to § 2.18.

(c) *Recommendations.* In addition to the guidelines subject to paragraph (b) of this section, the Food and Drug Administration often formulates and disseminates recommendations about matters which are authorized by, but do not involve direct regulatory action under, the laws administered by the Commissioner, e.g., model state and local ordinances, or personnel practices for reducing radiation exposure, issued pursuant to 42 U.S.C. 243 and 263d(b). Such recommendations may, in the discretion of the Commissioner, be handled pursuant to the procedures established in paragraph (b) of this section, except that such recommendations shall be included in a separate public file of recommendations established by the Public Records and Documents Center and shall be separated from the guidelines in the notice of availability published in the FEDERAL REGISTER, or be published in the FEDERAL REGISTER as regulations pursuant to paragraph (a) of this section.

(d) *Agreements.* All formal agreements, memoranda of understanding, or other similar written documents executed by the Food and Drug Administration and another person shall be included in the public file on agreements established by the Public Records and Documents Center pursuant to § 4.108 of this chapter. Any such document not included in the public file shall be deemed to be rescinded and shall have no force or effect whatever.

§ 2.21 Participation in outside standard-setting activities.

(a) *General.* This section applies to participation by Food and Drug Administration employees in any standard-setting activities outside the Food and Drug Administration. Standard-setting activities include such matters as the development of performance characteristics, testing methodology, manufacturing practices, product standards, scientific protocols, compliance criteria, ingredient specifications, labeling, or other technical or policy criteria. The Food and Drug Administration encourages employee participation in outside standard-setting activities that are in the public interest.

(b) *Standard-setting activities by other Federal government agencies.* (1) Any Food and Drug Administration employee may participate in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS–3763 "Request for approval of appointment as liaison representative."

(2) The Form PHS–3763 and all pertinent background information describing such activities shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) If any members of the public are invited by the Food and Drug Administration to present views to, or to accompany, the Food and Drug Administration employee at any meeting, such invitations shall be extended to a representative sampling of the public, including consumer groups, industry associations, professional societies, and academic institutions.

(4) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(c) *Standard-setting activities by State and local government agencies and by United Nations organizations and other international organizations and foreign governments pursuant to treaty.* (1) Any Food and Drug Administration employee may participate in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS–3763.

(2) The Form PHS–3763 and all pertinent background information describing such activities shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) The availability for public disclosure of records relating to such activities shall be governed by the regulations in Part 4 of this chapter.

(4) If any members of the public are invited by the Food and Drug Administration to present views to, or to accompany, the Food and Drug Administration employee at any meeting, such invitations shall be extended to a representative sampling of the public, including consumer groups, industry associations, professional societies, and academic institutions.

(5) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(d) *Standard-setting activities by private groups and organizations.* (1) Any Food and Drug Administration employee may engage in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS–3763. A request for such official participation shall be made by the group or organization in writing, shall describe the scope of the activity involved, and shall demonstrate that the minimum standards set out in paragraph (d)(5) of this section are met by the activity involved. Except as provided in paragraph (d)(7) of this section, any such request that is granted shall be the subject of a letter from the Commissioner or the bureau director to the organization stating:

(i) Whether participation by the individual will be as a voting or nonvoting liaison representative.

(ii) That participation by the individual shall not connote Food and Drug Administration agreement with, or endorsement of, any decisions reached.

(iii) That participation by the individual disqualifies him from serving as the deciding official on the standard involved if it should later come before the Food and Drug Administration. The "deciding official" is the person who signs a document ruling upon such standard.

(2) The letter requesting official Food and Drug Administration participation, the Form PHS–3763, and the Commissioner's or bureau director's letter, together with all pertinent background information describing the activities involved, shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) The availability for public disclosure of records relating to such activities shall be governed by the regulations in Part 4 of this chapter.

(4) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(5) The following minimum standards shall apply to all outside private standard-setting activities in which Food and Drug Administration employees participate.

(i) The activities shall be based upon consideration of sound scientific and technological information, shall permit revision on the basis of new information, and shall be designed to protect the public against unsafe, ineffective, or deceptive products or practices.

(ii) The activities and resulting standards shall not be designed for the economic benefit of any company, group, or organization, shall not be used as devices for such antitrust violations as fixing prices or hindering competition, and shall not involve establishment of certification or specific approval of individual products or services.

(iii) The group or organization responsible for the standard-setting activities shall have a procedure through which any interested person shall have an opportunity to provide information and views on the activities and standards involved, without the payment of fees, and such information and views shall be considered. The manner in which this is accomplished, including whether such presentation shall be in person or in writing, shall be decided by the group or organization responsible for the activities.

(6) Membership of a Food and Drug Administration employee in an organization that also conducts standard-setting activities does not invoke the provisions of this paragraph unless the employee participates in such standard-setting activities. Participation in any standard-setting activity shall be subject to the provisions of this paragraph.

(7) The Commissioner may determine in writing that, because direct involvement by the Food and Drug Administration in a particular standard-setting activity is in the public interest and will promote the objectives of the act and the agency, such participation shall be exempt from the requirements set forth in paragraph (d)(1) (ii) and/or (iii) of this section. Any such determination shall be included in this public file on standard-setting activities established by the Public Records and Documents Center and in any relevant administrative file. Such activities may include the establishment and validation of analytical methods for regulatory use, drafting uniform laws and regulations, and the development of recommendations concerning public health and preventive medicine practices by national and international organizations.

(8) Because of the close daily cooperation between the Food and Drug Administration and the associations of State and local government officials listed below, and the large number of agency employees who are members of or work with these associations, such participation in the activities of these associations shall be exempt from the provisions of paragraphs (d)(1) through (d)(7) of this section, except that a list of all committees and other groups of these associations shall be included in the public file on standard-setting activities established in the Public Records and Documents Center:

(i) Association of Food and Drug Officials.

(ii) International Association of Milk, Food and Environmental Sanitarians, Inc.

(iii) Conference of Radiation Control Program Directors.

(iv) Association of American Feed Control Officials, Inc.

(v) National Environmental Health Association.

(vi) National Conference on Weights and Measures.

(vii) American Public Health Association.

(viii) Conference of State Sanitary Engineers.

(ix) National Conference on Interstate Milk Shipments.

(x) National Shellfish Sanitation Program.

(xi) Interstate Seafood Seminar.

(xii) Association of Official Analytical Chemists.

§ 2.22 Public calendar.

(a) *Prospective public calendar of public proceedings.* (1) A public calendar shall be prepared and made publicly available each week showing, to the extent feasible, for the following 4 weeks all public meetings, public conferences, public hearings, public advisory committee meetings, public seminars, and other public proceedings of the Food and Drug Administration, and other significant public events involving the Food and Drug Administration, e.g., congressional hearings and trial or argument of court cases.

(2) A copy of this public calendar shall be placed on public display in the following places:

(i) Office of the Hearing Clerk.

(ii) Office of the Assistant Commissioner for Public Affairs.

(iii) A central place in each bureau.

(iv) A central place in each field office.

(v) A central place at the National Center for Toxicological Research.

(b) *Retrospective public calendar of meetings.* (1) A public calendar shall be prepared and made publicly available each week showing for the previous week all meetings with persons outside the Executive Branch of the Federal Government and other significant events involving the representatives of the Food and Drug Administration designated

under paragraph (b)(3) of this section, except that telephone conversations shall be included on an optional basis and meetings with the working press, except for "house organs" (i.e., publications of firms that manufacture or distribute regulated products, or industry associations), and with on-site contractors shall not be included. Meetings with members of the judiciary, representatives of Congress, or staffs of congressional committees shall be included when the meeting relates to a pending court case, administrative hearing, or other regulatory action or decision and involves more than a brief description of the matter.

(2) Such calendar shall include all meetings, conferences, seminars, social events sponsored by the regulated industry, and speeches. The calendar shall specify the date, the person involved, and the subject matter involved. Where more than one Food and Drug Administration representative is in attendance, only the presiding or head representative shall report the meeting on the public calendar. If a large number of persons are involved, the name of each need not be specified. Meetings the existence of which would prejudice law enforcement activities (e.g., a meeting with an informant) or invade privacy (e.g., a meeting with a candidate for possible employment in the Food and Drug Administration) shall not be reported.

(3) The following Food and Drug Administration representatives and their deputies shall be subject to the requirements of paragraphs (b) (1) and (2) of this section:

(i) Commissioner of Food and Drugs.
(ii) Deputy Commissioner.
(iii) Associate Commissioners.
(iv) Assistant Commissioners.
(v) Executive Director for Regional Operations.
(vi) Director, Office of Legislative Services.
(vii) Director, National Center for Toxicological Research.
(viii) Bureau Directors.
(ix) Chief Counsel for the Food and Drug Administration, or any representative of his office attending in his behalf.

(4) A copy of this public calendar shall be placed on public display in the following places:

(i) Office of the Hearing Clerk.
(ii) Office of the Assistant Commissioner for Public Affairs.
(iii) A central place in each bureau.
(iv) A central place in each field office.
(v) A central place at the National Center for Toxicological Research.

§ 2.23 Representation by an organization.

(a) An organization may represent its members by filing petitions, comments, and objections, and otherwise participating in any administrative proceeding subject to this part.

(b) Any such petitions, comments, objections, or other representations by an organization shall not abridge the right of any member to take any action of a similar type in its own name.

(c) It is requested that each organization participating in Food and Drug Administration administrative proceedings file annually a current list of all of the members of such organization with the Hearing Clerk for permanent filing.

(d) The filing by an organization of an objection or request for hearing pursuant to §§ 2.110 through 2.112 shall not provide to any member any legal right with respect to such objection or request for hearing that the member may exercise in its own name. Any member of an organization wishing to so file an objection or request for a hearing to obtain legal rights thereunder shall do so in its own name.

(e) In any court proceeding in which an organization participates, the Commissioner will take appropriate legal measures to have the case brought or considered as a class action or otherwise as binding upon all members of the organization except those specifically excluded by name for the reason that the organization does not represent their views. Regardless whether the case is brought or considered as a class action or as otherwise binding upon all members of the organization except those specifically excluded by name, the Commissioner will take the position in any subsequent suit involving the same issues and any member of the organization that such issues are precluded from further litigation by such member pursuant to the doctrines of collateral estoppel or res judicata.

§ 2.24 Settlement proposals.

At any time in the course of any proceeding subject to this part, any person may propose settlement of any of the issues involved. All participants in any proceeding shall have an opportunity to consider any proposed settlement. Unaccepted proposals of settlement and related matters, e.g., proposed stipulations not agreed to, shall not be admissible in evidence in any administrative proceeding of the Food and Drug Administration. The Food and Drug Administration will oppose the admission in evidence of any such information in any court proceeding or in any other administrative proceeding.

§ 2.25 Waiver, suspension, or modification of procedural requirements.

The Commissioner or the presiding officer, with respect to matters pending before him, may on his own initiative or at the request of any participant waive, suspend, or modify any provision in Subparts B through F of this part applicable to the conduct of a public hearing by announcement at the hearing or by notice in advance of the hearing, if he determines that no participant will be prejudiced, the ends of justice will thereby be served, and such action is in accordance with law.

PART 6—ENVIRONMENTAL IMPACT CONSIDERATIONS

§ 6.4 [Amended]

4. In Part 6, by amending § 6.4(a)(2) to change the reference to "§ 2.121" to read "Subpart B of Part 5".

PART 8—COLOR ADDITIVES

5. In Part 8, by revising § 8.12 to read as follows:

§ 8.12 Advisory committee on the applicability of the anticancer clause.

All requests for and procedures governing any advisory committee on the anticancer clause shall be subject to the provisions of Subpart D of Part 2, and particularly §§ 2.360 through 2.364, of this chapter.

§§ 8.13, 8.14 [Revoked]

6. By revoking §§ 8.13 and 8.14.

7. By revising §§ 8.18 and 8.19 to read as follows:

§ 8.18 Petition for exemption from certification.

A manufacturer, packer, or distributor of a color additive or color additive mixture may petition for an exemption from certification pursuant to Part 2 of this chapter. Any such petition shall show why such certification is not necessary for the protection of public health.

§ 8.19 Procedure for objections and hearings.

(a) Objections and hearings relating to color additive regulations under sections 706 (b) and (c) of the act shall be governed by Part 2 of this chapter.

(b) The fees specified in § 8.50 shall be applicable.

§§ 8.20, 8.21 [Revoked]

8. By revoking §§ 8.20 and 8.21.

PART 10—DEFINITIONS AND STANDARDS FOR FOOD

9. In Part 10, by revising § 10.2 to read as follows:

§ 10.2 Procedure for establishing a food standard.

(a) The procedure for establishing a food standard under section 401 of the act shall be governed by Part 2 of this chapter.

(b) Any petition for a food standard shall show that the proposal, if adopted, would promote honesty and fair dealing in the interest of consumers.

(c) Any petition for a food standard shall assert that the petitioner commits himself to substantiate the information in the petition by evidence in a public hearing, if such a hearing becomes necessary.

(d) If a petitioner fails to appear, or to substantiate the information in his petition, at a public hearing on the matter, the Commissioner may either (1) withdraw the regulation and terminate the proceeding or (2) if he concludes that it is in accordance with the requirements of section 401 of the act, continue the proceeding and introduce evidence to substantiate such information.

PART 11—STANDARDS OF QUALITY FOR FOODS FOR WHICH THERE ARE NO STANDARDS OF IDENTITY

10. In Part 11, by revising § 11.1(e) to read as follows:

§ 11.1 General principles.

• • • • • •

(e) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may establish, amend, or repeal, under Subpart B of this Part, a regulation prescribing a standard of quality for a food pursuant to Part 2 of this chapter.

PART 80—DEFINITIONS AND STANDARDS OF IDENTITY FOR FOOD FOR SPECIAL DIETARY USES

11. In Part 80, by amending § 80.1 (as published in the FEDERAL REGISTER of October 19, 1976 (41 FR 46156)) by revising paragraph (a)(5) to read as follows:

§ 80.1 Dietary supplements of vitamins and minerals.

• • • • • •

(a) • • •

(5) *Amendments to this standard.* Amendment of the permissible combinations of vitamins and/or minerals, as established in paragraph (b) of this section, or of the permitted range of potency for any vitamin(s) or mineral(s) in a dietary supplement as established in paragraph (c) of this section, or any other amendments to this section, may be proposed by the Commissioner of Food and Drugs on his own initiative or upon petition by an interested person in accordance with the procedure set forth in Part 2 of this chapter. Any such petition shall show that such amendment will promote honesty and fair dealing in the interest of consumers.

• • • • • •

PART 90—EMERGENCY PERMIT CONTROL

12. In Part 90, by revising § 90.2(a) to read as follows:

§ 90.2 Establishment of requirements for exemption from section 404 of the act.

(a) Whenever the Commissioner finds after investigation that the distribution in interstate commerce of any class of food may, by reason of contamination with microorganisms during the manufacture, processing, or packing thereof in any locality, be injurious to health, and that such injurious nature cannot be adequately determined after such articles have entered interestate commerce, he shall promulgate regulations in Subpart B of this part establishing requirements and conditions governing the manufacture, processing, or packing of the food necessary to protect the public health. Such regulations may be proposed by the Commissioner on his own initiative or in response to a petition from any interested person pursuant to Part 2 of this chapter.

• • • • • •

PART 100—NUTRITIONAL QUALITY GUIDELINES FOR FOODS

13. In Part 100, by revising § 100.2 to read as follows:

§ 100.2 Petitions.

The Commissioner of Food and Drugs, on his own initiative, on the advice of the National Academy of Sciences or other experts, or on behalf of any interested person who has submitted a petition, may issue a proposal to issue, amend, or revoke a regulation prescribing a nutritional quality guideline for a class of foods, pursuant to Part 2 of this chapter.

PART 102—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

14. In Part 102, by revising § 102.2 to read as follows:

§ 102.2 Petitions.

(a) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may publish a proposal to issue, amend, or revoke, under Subpart B of this Part, a regulation prescribing a common or usual name for a food, pursuant to Part 2 of this chapter.

(b) If the principal display panel of a food for which a common or usual name regulation is established is too small to accommodate all mandatory requirements, the Commissioner may establish by regulation an acceptable alternative, e.g., a smaller type size. A petition requesting such a regulation, which would amend the applicable regulation, shall be submitted pursuant to Part 2 of this chapter.

PART 121—FOOD ADDITIVES

15. In Part 121, by revising the introductory text of § 121.40(c)(1) to read as follows:

§ 121.40 Affirmation of generally recognized as safe (GRAS) status.

• • • • • •

(c)(1) Persons seeking the affirmation of GRAS status of substances as provided for in § 121.3(e), except those subject to the NAS–NRC GRAS list survey (36 FR 20546), shall submit a petition for GRAS affirmation pursuant to Part 2 of this chapter. Such petition shall contain information to establish that the GRAS criteria as set forth in § 121.3(b) have been met, in the following form:

• • • • • •

16. By revising § 121.4(b)(1) to read as follows:

§ 121.41 Determination of food additive status.

• • • • • •

(b)(1) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may issue a notice in the FEDERAL REGISTER proposing to determine that a substance is not GRAS and is a food additive subject to section 409 of the act. Any petition shall include all relevant data and information of the type described in § 121.74(b). The Commissioner will place all of the data and information on which he relies on public file in the office of the Hearing Clerk and will include in the FEDERAL REGISTER notice the name of the substance, its known uses, and a summary of the basis for the determination.

• • • • • •

17. By revising § 121.55 to read as follows:

§ 121.55 Procedure for objections and hearings.

Objections and hearings relating to food additive regulations under section 409 (c), (d), or (h) of the act shall be governed by Part 2 of this chapter.

§§ 121.56, 121.57, 121.58, 121.59, 121.60, 121.61, 121.62, 121.63, 121.64, 121.65, 121.66, 121.67, 121.68 121.69, 121.70, 121.71, 121.73 [Revoked]

18. By revoking §§ 121.56, 121.57, 121.58, 121.59, 121.60, 121.61, 121.62, 121.63, 121.64, 121.65, 121.66, 121.67, 121.68, 121.69, 121.70, 121.71, and 121.73.

19. By revising § 121.72(b) to read as follows:

§ 121.72 Adoption of regulation on initiative of Commissioner.

• • • • • •

(b) Action upon a proposal made by the Commissioner shall proceed as provided in Part 2 of this chapter.

20. By revising § 121.74 to read as follows:

§ 121.74 Procedure for amending and repealing tolerances or exemptions from tolerances.

(a) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may propose the issuance of a regulation amending or repealing a regulation pertaining to a food additive or granting or repealing an exception for such additive.

(b) Any such petition shall include an assertion of facts, supported by data, showing that new information exists with respect to the food additive or that new uses have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the existing regulation or exemption may justify its amendment or repeal. New data shall be furnished in the form specified in § 121.51 for submitting petitions.

21. By revising the introductory text of § 121.4000(c) to read as follows:

§ 121.4000 General.

• • • • • •

(c) The Commissioner, on his own initiative or on the petition of any inter-

ested person, pursuant to Part 2 of this chapter, may propose an interim food additive regulation. A final order promulgating an interim food additive regulation shall provide that continued use of the substance in food is subject to each of the following conditions:

* * * * *

PART 310—NEW DRUGS

22. In Part 310, by revising § 310.200 (b) to read as follows:

§ 310.200 Prescription-exemption procedure.

* * * * *

(b) *Prescription-exemption procedure for drugs limited by a new drug application.* Any drug limited to prescription use under section 503(b)(1)(C) of the act shall be exempted from prescription-dispensing requirements when the Commissioner finds such requirements are not necessary for the protection of the public health by reason of the drug's toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, and he finds that the drug is safe and effective for use in self-medication as directed in proposed labeling. A proposal to exempt a drug from the prescription-dispensing requirements of section 503(b)(1)(C) of the act may be initiated by the Commissioner or by any interested person. Any interested person may file a petition seeking such exemption, which petition may be pursuant to Part 2 of this chapter, or in the form of a supplement to an approved new drug application.

* * * * *

23. By revising § 310.303(b) to read as follows:

§ 310.303 Continuation of long term studies, records, and reports on certain drugs for which new drug applications have been approved.

* * * * *

(b) A proposal to require additional or continued studies with a drug for which a new drug application has been approved may be made by the Commissioner on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter. Prior to issuance of such a proposal, the applicant will be provided an opportunity for a conference with representatives of the Food and Drug Administration. When appropriate, investigators or other individuals may be invited to participate in the conference. All requirements for special studies, records, and reports will be published in § 310.304.

PART 314—NEW DRUG APPLICATIONS

24. In Part 314, by revising the introductory paragraph of § 314.115 to read as follows:

§ 314.115 Withdrawal of approval of an application.

The Commissioner shall notify the person holding an approved new drug application, and all other persons who manufacture or distribute identical, related, or similar drug products as defined in § 310.6 of this chapter, and afford an opportunity for a hearing on a proposal to withdraw approval of the application as provided in section 505(e) of the act and in accordance with the procedure in §§ 314.200 and 314.201, if:

* * * * *

25. By revising § 314.200 to read as follows:

§ 314.200 Notice of opportunity for hearing; notice of participation and request for hearing; grant or denial of hearing.

(a) The notice to the applicant, and to all other persons who manufacture or distribute identical, related, or similar drug products as defined in § 310.6 of this chapter, of an opportunity for a hearing on a proposal by the Director of the Bureau of Drugs to refuse to approve an application or to withdraw the approval of an application will state the reasons for his action and the grounds upon which he proposes to issue his order.

(1) Such notice may be general (i.e., simply summarizing in a general way the information resulting in the notice) or specific (i.e., either referring to specific requirements in the statute and regulations with which there is a lack of compliance, or providing a detailed description and analysis of the specific facts resulting in the notice).

(2) The notice will be published in the FEDERAL REGISTER and will state that the applicant, and other persons subject to the notice pursuant to § 310.6 of this chapter, has 30 days after the date of publication of the notice within which he is required to file a written notice of participation and request for hearing if he elects to avail himself of the opportunity for a hearing. The failure to file such a written notice of participation and request for hearing within that 30 days constitutes an election by the applicant, and other persons subject to the notice pursuant to § 310.6 of this chapter, not to avail himself of the opportunity for a hearing.

(3) It is the responsibility of every manufacturer or distributor of a drug product to review every notice of opportunity for heating published in the FEDERAL REGISTER to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of such a notice to a specific product he manufactures or distributes that may be identical, related, or similar by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance, HFD-310, 5600 Fishers Lane, Rockville, MD 20857. If such an opinion is requested, the time for filing an appearance and request for hearing and supporting studies and analyses shall begin as of the date or receipt of the opinion from the Food and Drug Administration.

(b) The notice of opportunity for hearing shall be provided to applicants and to other persons subject to the notice pursuant to § 310.6 of this chapter:

(1) To any person who has submitted a new drug application, by delivering the notice in person or by sending it by registered or certified mail to the last address shown in the new drug application.

(2) To any person who has not submitted a new drug application but who is subject to the notice pursuant to § 310.6 of this chapter, by publication of the notice in the FEDERAL REGISTER.

(c)(1) If the applicant, or any other person subject to the notice pursuant to § 310.6 of this chapter, elects to avail himself of the opportunity for a hearing, he shall file with the Hearing Clerk (i) within 30 days after the date of the publication of the notice (or of the date of receipt of an opinion requested pursuant to paragraph (a)(3) of this section) a written notice of participation and request for hearing, and (ii) within 60 days after the date of publication of the notice, unless a different period of time is specified in the notice of opportunity for hearing, the studies on which he relies to justify a hearing as specified in paragraph (d) of this section. The raw data underlying a study submitted may be incorporated by reference from a prior submission as part of a new drug application or other report.

(2) No data or analysis submitted after such 60 days will be considered in determining whether a hearing is warranted unless they are derived from well-controlled studies begun prior to the date of the notice of opportunity for hearing, the results of which were not in existence during that 60 days. Exceptions may be made on the basis of a showing of inadvertent omission and hardship. All studies in progress, the results of which the person requesting the hearing intends later to submit in support of the request for hearing, shall be listed. A copy of the complete protocol, a list of the participating investigators, and a brief status report of the studies shall be included in the submission made pursuant to paragraph (c)(1)(ii) of this section.

(3) Any other interested person who is not subject to the notice of opportunity for hearing may also submit comments on the proposal to withdraw approval of the new drug application. Such comments shall be submitted within the time and pursuant to the requirements specified in this section.

(d) A request for hearing shall be supported by a submission as specified in paragraph (c)(1)(ii) of this section containing the studies (including all protocols and underlying raw data) on which the person relies to justify a hearing with respect to his drug product.

(1) If effectiveness is at issue, a request for hearing shall be supported only by adequate and well-controlled clinical studies meeting all of the precise requirements of § 314.111(a)(5) and, for combination drug products, § 300.50 of this chapter, or by other studies not meeting those requirements for which a waiver has been previously granted by the Food and Drug Administration pursuant to the provisions of § 314.111(a)(5). All adequate and well-controlled clinical studies on the drug product known to the person requesting the hearing shall be submitted. Any unfavorable analyses, views, or judgments with respect to such studies known to such person shall also be submitted. No other data, information, or studies shall be submitted.

(2) Such submission shall include a factual analysis of all studies submitted. If effectiveness is at issue, such analysis shall specify how each such study accords, on a point-by-point basis, with each criterion required for an adequate well-controlled clinical investigation established in § 314.111(a)(5) and, if the product is a combination drug product, with each of the requirements for a combination drug established in § 300.50 of this chapter, or shall be accompanied by an appropriate waiver previously granted by the Food and Drug Administration. If a study deals with a drug entity or dosage form, or condition of use, or mode of administration other than the one(s) in question, such fact(s) shall be clearly stated. Any study conducted on the final marketed form of the drug product shall be so designated.

(3) Such analysis shall be submitted in the following format, except that the required information relating either to safety or to effectiveness shall be omitted if the notice of opportunity for hearing does not raise any issue with respect to that aspect of the drug; and information on compliance with § 300.50 shall be omitted if the drug product is not a combination drug product. Submissions not made in this format or not containing the required analyses will not be considered and will result in denial of a hearing, except that minor technical deficiencies may be excused if it is apparent that a good faith attempt has been made to comply with the requirements of this section and any deficiencies noted are immediately corrected upon request.

I. Safety data.
A. Animal safety data.
1. Individual active component(s).
a. Controlled studies.
b. Partially controlled or uncontrolled studies.
2. Combinations of the individual active components.
a. Controlled studies.
b. Partially controlled or uncontrolled studies.
B. Human safety data.
1. Individual active component(s).
a. Controlled studies.
b. Partially controlled or uncontrolled studies.
c. Documented case reports.
d. Pertinent marketing experiences that may influence a determination as to the safety of each individual active component.
2. Combinations of the individual active components.
a. Controlled studies.
b. Partially controlled or uncontrolled studies.
c. Documented case reports.
d. Pertinent marketing experiences that may influence a determination as to the safety of each individual active components.
II. Effectiveness data.
A. Individual active components: Controlled studies, with an analysis showing clearly how each such study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5).
B. Combinations of individual active components.

1. Controlled studies, with an analysis showing clearly how such study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5).

2. An analysis showing clearly how each requirement of § 300.50 of this chapter has been satisfied.

III. A summary of the data and views setting forth the medical rationale and purpose for the drug and its ingredients and the scientific basis for the conclusion that the drug and its ingredients have been proven safe and/or effective for the intended use. If there is an absence of controlled studies in the material submitted, or the requirements of any element of § 300.50 of this chapter or § 314.111(a)(5) have not been fully met, such fact(s) shall be clearly stated, and a waiver obtained pursuant to § 314.111(a)(1) shall be enclosed.

IV. A statement signed by the person responsible for such submission, that it includes in full (or incorporates by reference as permitted in § 314.200(c)(2)) all studies and information specified in § 314.200(d). (Warning: A willfully false statement is a criminal offense, 18 U.S.C. 1001).

(e) A notice of opportunity for hearing encompasses all issues relating to the legal status of the drug product(s) subject to it, including identical, related, and similar drug products as defined in § 310.6 of this chapter. Any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act, or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962, or for any other reason shall be stated in a notice of appearance and request for hearing pursuant to paragraph (c)(1)(i) of this section and supported by a submission pursuant to paragraph (c)(1)(ii) of this section and shall be the subject of an administrative determination by the Commissioner. The failure of any person subject to a notice of opportunity for a hearing, including any person who manufactures or distributes an identical, related, or similar drug product as defined in § 310.6 of this chapter, to submit a notice of participation and request for hearing or to raise all such contentions on which he relies shall constitute a waiver of any such contentions not so raised.

(1) A contention that a drug product is generally recognized as safe and effective within the meaning of section 201(p) of the act must be supported by submission of the same quantity and quality of scientific evidence as is required to obtain approval of a new drug application for the product, unless a waiver has been obtained from such requirement for effectiveness (as provided in § 314.111(a)(5)) and/or safety for good cause shown. Such submission shall be in the format and with the analyses required by paragraph (d) of this section. The failure to submit such scientific evidence or a submission that is not in the format or does not contain the analyses required by paragraph (d) of this section shall constitute a waiver of any such contention. General recognition of safety and effectiveness shall ordinarily be based upon published studies which may be corroborated by unpublished studies and other data and information.

(2) A contention that a drug product is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938 contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962, shall be supported by submission of evidence of past and present quantitative formulas, labeling, and evidence of marketing, on which reliance is made for such contention. The failure to submit such formulas, labeling, and evidence of marketing in the following format shall constitute a waiver of any such contention.

I. Formulation.
A. A copy of each pertinent document or record to establish the exact quantitative formulation of the drug (both active and inactive ingredients) on the date of initial marketing of the drug.
B. A statement whether such formulation has at any subsequent time been changed in any manner. If any such change has been made, the exact date, nature, and rationale for each change in formulation, including any deletion or change in the concentration of any active ingredient and/or inactive ingredient, shall be submitted, together with a copy of each pertinent document or record to establish the date and nature of each such change including but not limited to the formula which resulted from each such change. If no such change has been made, a copy of representative documents or records showing the formula at representative points in time shall be submitted to support the statement.
II. Labeling.
A. A copy of each pertinent document or record to establish the identity of each item of written, printed, or graphic matter used as labeling on the date the drug was initially marketed.
B. A statement whether such labeling has at any subsequent time been discontinued or changed in any manner. If such discontinuance or change has been made, the exact date, nature, and rationale for each discontinuance or change and a copy of each pertinent document or record to establish each such discontinuance or change shall be submitted, including but not limited to the labeling which resulted from each such discontinuance or change. If no such discontinuance or change has been made, a copy of representative documents or records showing labeling at representative points in time shall be submitted to support the statement.
III. Marketing.
A. A copy of each pertinent document or record to establish the exact date the drug was initially marketed.
B. A statement whether such marketing has at any subsequent time been discontinued. If such marketing has been discontinued, the exact date of each such discontinuance shall be submitted, together with a copy of each pertinent document or record to establish each such date.
IV. Verification.
A statement signed by the person responsible for such submission, that all appropriate records have been searched and to the best of his knowledge and belief it includes a true and accurate presentation of the facts (Warning: A willfully false statement is a criminal offense, 18 U.S.C. 1001).

(3) No drug product, including any active ingredient, which is identical, related, or similar, as defined in § 310.6, to a drug product, including any active ingredient for which a new drug application is or at any time has been effective or deemed approved, or approved under section 505 of the act, will be determined to be exempt from part or all of the new drug provisions of the act.

(4) A contention that a drug product is not a new drug for any other reason must be supported by submission of such factual records, data, and information as is necessary and appropriate to support such contention.

(5) It is the responsibility of every person who manufactures or distributes a drug product in reliance upon a "grandfather" provision(s) of the act to maintain in his files, organized as required by this paragraph, the data and information necessary fully to document and support such status.

(f) Upon receipt of any request for hearing, the Director of the Bureau of Drugs shall prepare an analysis of the request and a proposed order ruling upon the matter. The analysis and proposed order, the request for hearing, and any proposed order denying a hearing and response pursuant to paragraph (g) (2) or (3) of this section, shall be submitted to the office of the Commissioner for independent review and decision. No representative of the Bureau of Drugs shall participate or advise in the review and decision by the Commissioner. The office of the General Counsel shall observe the same separation of functions.

(g) A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing with respect to the particular drug product(s) specified in the request for hearing.

(1) Where a specific notice of opportunity for hearing (as defined in paragraph (a)(1) of this section) is used, it shall state that, if it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the refusal to approve the application or the withdrawal of approval of the application, e.g., no adequate and well-controlled clinical investigations meeting each of the precise elements of § 314.111(a)(5) and, for a combination drug product, § 300.50 of this chapter, showing effectiveness have been identified, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing. Any such order entering summary judgment shall set forth the Commissioner's findings and conclusions in detail and shall specify why each study submitted fails to meet the requirements of the statute and regulations or why the request for hearing does not raise a genuine and substantial issue of fact or shall specify the requirements of this section with respect to format or analyses with which there is a lack of compliance.

(2) Where a general notice of opportunity for hearing (as defined in paragraph (a)(1) of this section) is used and the Director of the Bureau of Drugs concludes that summary judgment against the person(s) requesting a hearing should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information, and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(3) Where a general or specific notice of opportunity for hearing is used and the person(s) requesting a hearing submits data or information of a type required by the statute and regulations, and the Director of the Bureau of Drugs concludes that summary judgment against such person(s) should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information, and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(4) If review of the data, information, and analyses submitted warrants the conclusion that the ground(s) cited in the notice are not valid, e.g., that substantial evidence of effectiveness exists, the Commissioner shall deny the hearing, enter summary judgment for the person(s) requesting the hearing, and rescind the notice of opportunity for hearing.

(5) If a hearing is requested and is justified the hearing will commence no more than 90 days after the expiration of such 30 days unless the parties otherwise agree in the case of denial of approval, and as soon as practicable in the case of withdrawal of approval.

(6) A hearing shall be granted if there exists a genuine and substantial issue of fact or if the Commissioner concludes, in his discretion, that a hearing would otherwise be in the public interest.

(7) If the manufacturer or distributor of a drug product that may be an identical, related, or similar drug product requests and is granted a hearing the issue whether the product is in fact identical, related, or similar to the drug subject to new drug application is properly encompassed within the hearing.

(8) A request for hearing, and any subsequent grant or denial of a hearing, shall be applicable only to the particular drug product(s) named in such documents.

(h) Any drug product subject to a notice of opportunity for hearing, including any identical, related, or similar drug product as defined in § 310.6 of this chapter, for which an opportunity for a hearing is waived or for which a hearing is denied shall promptly be the subject of a notice withdrawing the new drug application approval and declaring all such products unlawful. The Commissioner may, in his discretion, defer or stay such action pending a ruling on any related request for a hearing or pending any related hearing or other administrative or judicial proceeding.

26. By adding a new § 314.201 to read as follows:

§ 314.201 Procedure for hearings.

Hearings relating to new drugs under section 505 (d) and (e) of the act shall be governed by Part 2 of this chapter.

§§ 314.202, 314.203, 314.204, 314.205, 314.206, 314.220, 314.221, 314.222, 314.230, 314.231, 314.232, [Revoked].

27. By revoking §§ 314.202, 314.203, 314.204, 314.205, 314.206, 314.220, 314.221, 314.222, 314.230, 314.231 and 314.232.

28. By revising § 314.235 to read as follows:

§ 314.235 Judicial review.

(a) The transcript and record shall be certified by the Commissioner. In any case in which the Commissioner enters an order without a hearing pursuant to § 314.200(g), the requests for hearing together with the data and information submitted and the Commissioner's findings and conclusions shall be included in the record certified by the Commissioner.

(b) Judicial review of an order withdrawing approval of a new drug application, whether or not a hearing has been held, may be sought by a manufacturer or distributor of an identical, related, or similar drug product, as defined in § 310.6 of this chapter, in a United States court of appeals pursuant to section 505 (h) of the act.

PART 501—ANIMAL FOOD LABELING

28a. By revising § 501.2(f) to read as follows:

§ 501.2 Information panel of package for animal food.

* * * * *

(f) If the label of any package of food is too small to accommodate all of the information required by §§ 501.4, 501.5, 501.8, and 501.17, the Commissioner may establish by regulation an acceptable alternative method of disseminating such information to the public, e.g., a type size smaller than one-sixteenth inch in height, or labeling attached to or inserted in the package or available at the point of purchase. A petition requesting such a regulation, as an amendment to this paragraph shall be submitted pursuant to Part 2 of this chapter.

PART 503—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

28b. In Part 503, by revising § 503.22 to read as follows:

§ 503.22 Petitions.

(a) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may publish a proposal to issue, amend, or revoke, under Subpart B of this part, a regulation prescribing a common or usual name for a food, pursuant to Part 2 of this chapter.

(b) If the principal display panel of a food for which a common or usual name regulation is established is too small to accommodate all mandatory requirements, the Commissioner may establish by regulation an acceptable alternative, e.g., a smaller type size. A petition requesting such a regulation, which would amend the applicable regulation, shall be submitted pursuant to Part 2 of this chapter.

PART 508—EMERGENCY PERMIT CONTROL

28c. In Part 508, by revising § 508.19 (a) to read as follows:

§ 508.19 Establishment of requirements for exemption from section 404 of the act.

(a) Whenever the Commissioner finds after investigation that the distribution in interstate commerce of any class of food may, by reason of contamination with microorganisms during the manufacture, processing, or packing thereof in any locality, be injurious to health, and that such injurious nature cannot be adequately determined after such articles have entered interstate commerce, he shall promulgated regulations in Subpart B of this part establishing requirements and conditions governing the manufacture, processing, or packing of the food necessary to protect the public health. Such regulations may be proposed by the Commissioner on his own initiative or in response to a petition from any interested person pursuant to Part 2 of this chapter.

* * * * *

PART 514—NEW ANIMAL DRUG APPLICATIONS

29. In Part 514, by revising § 514.201 to read as follows:

§ 514.201 Procedure for hearings.

Hearings relating to new animal drugs under section 505 (d), (e), (m)(3), and (m)(4) of the act shall be governed by Part 2 of this chapter.

§§ 514.202, 514.203, 514.204, 514.205, 514.206 514.220, 514.221, 514.222, 514.230, 514.231, 514.232 [Revoked]

30. By revoking §§ 514.202, 514.203, 514.204, 514.205, 514.206, 514.220, 514.221, 514.222, 514.230, 514.231, and 514.232.

31. By revising § 514.235 as follows:

§ 514.235 Judicial review.

(a) The transcript and record shall be certified by the Commissioner. In any case in which the Commissioner enters an order without a hearing pursuant to § 314.200(g) of this chapter, the request(s) for hearing together with the data and information submitted and the Commissioner's findings and conclusions shall be included in the record certified by the Commissioner.

(b) Judicial review of an order withdrawing approval of a new drug application, whether or not a hearing has been held, may be sought by a manufacturer or distributor of an identical, related, or similar drug product, as defined in § 310.6 of this chapter, in a United States court of appeals pursuant to section 505 (h) of the act.

PART 564—DEFINITIONS AND STANDARDS FOR ANIMAL FOOD

31a. In Part 564, by revising § 564.5 to read as follows:

§ 564.5 Procedure for establishing a food standard.

(a) The procedure for establishing a food standard under section 401 of the act shall be governed by Part 2 of this chapter.

(b) Any petition for a food standard shall show that the proposal, if adopted, would promote honesty and fair dealing in the interest of consumers.

(c) Any petition for a food standard shall assert that the petitioner commits himself to substantiate the information in the petition by evidence in a public hearing, if such a hearing becomes necessary.

(d) If a petitioner fails to appear, or to substantiate the information in his petition, at a public hearing on the matter, the Commissioner may either (1) withdraw the regulation and terminate the proceeding or (2) if he concludes that it is in accordance with the requirements of section 401 of the act, continue the proceeding and introduce evidence to substantiate such information.

31b. By adding a new paragraph (1) to § 564.17 to read as follows:

§ 564.17 Temporary permits for interstate shipment of experimental packs of food varying from the requirements of definitions and standards of identity.

* * * * *

(l) Any person who contests denial, modification, or revocation of a temporary permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

PART 570—FOOD ADDITIVES

31c. By revising § 570.15(b) to read as follows:

§ 570.15 Adoption of regulation on initiative of Commissioner.

* * * * *

(b) Action upon a proposal made by the Commissioner shall proceed as provided in Part 2 of this chapter.

31d. In Part 570, by revising the introductory text of § 570.35(c)(1) to read as follows:

§ 570.35 Affirmation of generally recognized as safe (GRAS) status.

* * * * *

(c)(1) Persons seeking the affirmation of GRAS status of substances as provided for in § 570.30(e), except those subject to the NAS–NRC GRAS list survey (36 FR 20546), shall submit a petition for GRAS affirmation pursuant to Part 2 of this chapter. Such petition shall contain information to establish that the GRAS criteria as set forth in § 570.30(b) have been met, in the following form:

* * * * *

31e. By revising § 570.38(b)(1) to read as follows:

§ 570.38 Determination of food additive status.

* * * * *

(b)(1) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may issue a notice in the FEDERAL REGISTER proposing to determine that a substance is not GRAS and is a food additive subject to section 409 of the act. Any petition shall include all relevant data and information of the type described in § 571.130(b) of this chapter. The Commissioner will place all of the data and information on which he relies on public file in the office of the Hearing Clerk and will include in the FEDERAL REGISTER notice the name of the substance, its known uses, and a summary of the basis for the determination.

* * * * *

PART 571—FOOD ADDITIVE PETITIONS

31f. By revising § 571.110 to read as follows:

§ 57.110 Procedure for objections and hearings.

Objections and hearings relating to food additive regulations under section 409 (c), (d), or (h) of the act shall be governed by Part 2 of this chapter.

§ 571.120 [Revoked]

31g. By revoking § 571.120.

31h. By revising § 571.130 to read as follows:

§ 571.130 Procedure for amending and repealing tolerances or exemptions from tolerances.

(a) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may propose the issuance of a regulation amending or repealing a regulation pertaining to a food additive or granting or repealing an exception for such additive.

(b) Any such petition shall include an assertion of facts, supported by data, showing that new information exists with respect to the food additive or that new uses have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the existing regulation or exemption may justify its amendment or repeal. New data shall be furnished in the form specified in § 571.1 for submitting petitions.

§§ 571.200, 571.202, 571.203, 571.204, 571.205, 571.206, 571.208, 571.210, 571.212, 571.214, 571.220, 571.221, 571.222, 571.230 571.232, 571.235 [Revoked]

311. By revoking §§ 571.200, 571.202, 571.203, 571.204, 571.205, 571.206, 571.208, 571.210, 571.212, 571.214, 571.220, 571.221, 571.222, 571.230, 571.232, and 571.235.

PART 601—LICENSING

32. In Part 601, by revoking §§ 601.4, 601.5, and 601.6(c), by redesignating the remainder of § 601.6 as § 601.12, by adding new §§ 601.4 through 601.9, and by revising § 601.22 to read as follows:

§ 601.4 Issuance and denial of license.

(a) An establishment or product license shall be issued upon a determination by the Commissioner that the establishment or the product, as the case may be, meets the applicable standards established in this chapter. Licenses shall be valid until suspended or revoked.

(b) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

§ 601.5 Revocation of license.

(a) An establishment or product license shall be revoked upon application of the manufacturer giving notice of intention to discontinue the manufacture of all products or to discontinue the manufacture of a particular product for which a license is held, and waiving an opportunity for a hearing on the matter.

(b) If the Commissioner finds that (1) authorized Food and Drug Administration employees after reasonable efforts have been unable to gain access to an establishment or a location for the purpose of carrying out the inspection required under § 600.21 of this chapter, (2) manufacturing of products or of a product has been discontinued to an extent that a meaningful inspection or evaluation cannot be made, (3) the manufacturer has failed to report a change as required by § 601.12, (4) the establishment or any location thereof, or the product for which the license has been issued, fails to conform to the applicable standards established in the license and in this chapter designed to ensure the continued safety, purity, and potency of the manufactured product, (5) the establishment or the manufacturing methods have been so changed as to require a new showing that the establishment or product meets the standards established in this chapter in order to protect the public health, or (6) the licensed product is not safe and effective for all of its intended uses or is misbranded with respect to any such use, he shall notify the licensee of his intention to revoke the license, setting forth the grounds for, and offering an opportunity for a hearing on, the proposed revocation. Except as provided in § 601.6 and in cases involving willfulness, the notification required in this paragraph shall provide a reasonable period for the licensee to demonstrate or achieve compliance with the requirements of this chapter, before proceedings will be instituted for the revocation of the license. If compliance is not demonstrated or achieved and the licensee does not waive the opportunity for a hearing, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

§ 601.6 Suspension of license.

(a) Whenever the Commissioner has reasonable grounds to believe that any of the grounds for revocation of a license exist and that by reason thereof there is a danger to health, he may notify the licensee that his license for the establishment or the product is suspended and require that the licensee (1) notify the selling agents and distributors to whom such product or products have been delivered of such suspension, and (2) furnish to the Director, Bureau of Biologics, complete records of such deliveries and notice of suspension.

(b) Upon suspension of a license, the Commissioner shall either (1) proceed pursuant to the provisions of § 601.5(b) to revoke the license, or (2) if the licensee agrees, hold revocation in abeyance pending resolution of the matters involved.

§ 601.7 Procedure for hearings.

(a) A notice of opportunity for hearing, notice of appearance and request for hearing, and grant or denial of hearing for a biological drug pursuant to this Part, for which the exemption from the Federal Food, Drug, and Cosmetic Act in § 310.4 of this chapter has been revoked, shall be subject to the provisions of § 314.200 of this chapter except to the extent that the notice of opportunity for hearing on the matter issued pursuant to § 2.111(b) of this chapter specifically provides otherwise.

(b) Hearings pursuant to §§ 601.4 through 601.6 shall be governed by Part 2 of this chapter.

(c) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

§ 601.8 Publication of revocation.

Notice of revocation of a license, with statement of the cause therefor, shall be issued by the Commissioner and published in the FEDERAL REGISTER.

§ 601.9 Licenses; reissuance.

(a) *Compliance with standards.* An establishment or product license, previously suspended or revoked, may be reissued or reinstated upon a showing of compliance with required standards and upon such inspection and examination as may be considered necessary by the Commissioner.

(b) *Exclusion of noncomplying location.* An establishment or product license, excluding a location or locations that fail to comply with required standards, may be issued without further application and concurrently with the suspension or revocation of the license for noncompliance at the excluded location or locations.

§ 601.22 Products in short supply; initial manufacturing at other than licensed establishment.

Licenses issued to a manufacturer for an establishment shall authorize persons other than such manufacturer to conduct at places other than such establishment the initial, and partial manufacturing of a product for shipment solely to such manufacturer only to the extent that the names of such persons and places are registered with the Commissioner of Food and Drugs and he finds upon application of such manufacturer, that (a) the product is in short supply due either to the peculiar growth requirements of the organism involved or to the scarcity of the animal required for manufacturing purposes, and (b) such manufacturer has established with respect to such persons and places such procedures, inspections, tests or other arrangements as will assure full compliance with the applicable regulations of this subchapter related to continued safety, purity, and potency. Such persons and places shall be subject to all regulations of this subchapter except §§ 601.1 to 601.6, 601.9, 601.10, 601.20, 601.21, 601.30 to 601.33, and 610.60 to 610.65 of this chapter. Failure of such manufacturer to maintain such procedures, inspections, tests, or other arrangements, or failure of any person conducting such partial manufacturing to comply with applicable regulations shall constitute a ground for suspension or revocation of the authority conferred pursuant to this section on the same basis as provided in §§ 601.6 to 601.8 with respect to the suspension and the revocation of licenses.

§§ 601.40, 601.41, 601.42, 601.43, 601.44 [Revoked].

33. By revoking §§ 601.40 through 601.44.

PART 701—COSMETIC LABELING

34. In Part 701, by revising § 701.3 (b) and (e) to read as follows:

§ 701.3 Designation of ingredients.

* * * * *

(b) The declaration of ingredients shall appear with such prominence and conspicuousness as to render it likely to be read and understood by ordinary individuals under normal conditions of purchase. The declaration shall appear on any appropriate information panel in letters not less than 1/16 of an inch in height and without obscuring design, vignettes, or crowding. In the absence of sufficient space for such declaration on the package, or where the manufacturer or distributor wishes to use a decorative container, the declaration may appear on a firmly affixed tag, tape, or card. In those cases where there is insufficient space for such declaration on the package, and it is not practical to firmly affix a tag, tape, or card, the Commissioner may establish by regulation an acceptable alternate, e.g., a smaller type size. A petition requesting such a regulation as an amendment to this paragraph shall be submitted pursuant to Part 2 of this chapter.

* * * * *

(e) Interested persons may submit a petition requesting the establishment of a specific name for a cosmetic ingredient pursuant to Part 2 of this chapter. The Commissioner may also propose such a name on his own initiative.

PART 809—IN VITRO DIAGNOSTIC PRODUCTS FOR HUMAN USE

35. In Part 809, by revising § 809.30(a) (formerly § 328.30 prior to recodification published in the FEDERAL REGISTER of February 13, 1976 (41 FR 6907)) to read as follows:

§ 809.30 Procedure for establishing, amending or repealing standards.

(a) *Basis for standards and available approaches to developing standards.* Whenever in the judgment of the Commissioner the establishment of a product class standard is necessary to reduce or eliminate unreasonable risk of illness or injury associated with exposure to or use of an in vitro diagnostic product and there are no other more practicable means to protect the public from such risk, he may propose such a standard. In proposing a product class standard he shall consider, and publish in the FEDERAL REGISTER findings on, the degree of risk or injury associated with the use of the product, the availability of information relating to the sciences upon which the products or their uses are based, the approximate number of products subject to the standard, the medical need for the products, and the probable effect of the standard upon the utility, cost, or availability of the product, and available means of achieving the objective of the standard with a minimal disruption of supply and of reasonable manufacturing and other commercial practices. Three procedures are available for developing product class standards and may be proposed on the initiative of the Commissioner or by petition of interested persons, pursuant to Part 2 of this chapter: (1) An existing standard may be utilized. (2) interested persons outside of the Food and Drug Administration may develop a proposed standard or (3) the Food and Drug Administration may develop the standard.

* * * * *

Effective date: These regulations shall be effective February 24, 1977.

Dated: January 14, 1977.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

PART VIII

DEPARTMENT OF LABOR

Employment and Training Administration

■

MIGRANT AND SEASONAL FARMWORKERS

Employment Service Complaint System, Monitoring, and Enforcement

Title 20—Employees' Benefits

CHAPTER V—EMPLOYMENT AND TRAINING ADMINISTRATION, DEPARTMENT OF LABOR

MIGRANT AND SEASONAL FARMWORKERS

Employment Service Complaint System, Monitoring, and Enforcement

On October 5, 1976, at 41 FR 44014, the Employment and Training Administration of the Department of Labor proposed for 20 CFR Parts 651, 653, and 658 regulations under the Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49.et seq., governing services to migrant and seasonal farmworkers by the Federal-State public employment service system.

The Department also proposed for 20 CFR Part 658, subpart E, regulations for the establishment and operation of an employment service complaint system for the administrative handling of complaints alleging violations of Employment Service regulations by employers or by the Employment Service.

Finally, the Department proposed for 20 CFR Part 658, subparts F, G, and H regulations governing the monitoring of all Employment Service activities, and the enforcement of Employment Service regulations.

The proposed regulations were part of the Department's continuing effort to publish comprehensive Employment Service regulations which are intended to replace the 4,000 page Employment Security Manual and the multitude of Employment Service directives currently in effect.

The proposed regulations paralleled the court order in the case of *NAACP, Western Region, et al.*, Civil Action No. 2010–72, U.S.D.C., D.C., Aug. 9, 1974 as follows:

1. The proposed 20 CFR Part 653, subpart B, Services for Migrant and Seasonal Farmworkers, (MSFWs) related to Sec. I of the court order, "Provision of Service to Migrant and Seasonal Farmworkers" and to Sec. II of the court order, "Information System".

2. The proposed 20 CFR Part 658, subpart G, Review and Assessment of State Agency Compliance with Employment Service Regulations, related to Sec. III of the court order, "Monitoring", and Sec. V of the court order, "Assurance of State Compliance with Federal Law".

3. The proposed 20 CFR Part 658, subpart E, Employment Service Complaint System, related to Sec. IV of the court order, "Complaint Resolution".

4. The proposed 20 CFR Part 658, subpart H, Federal Application of Remedial Action to State Agencies, related to Sec. V of the court order, "Assurance of State Compliance with Federal Law".

The Department is now publishing the above-described regulations in final form.

These regulations replace Secs. 1765–1769, 2000–2008, and 2056–2059 of the Employment Security Manual. The regulations also replace General Administrative Letter (GAL) 10–75, Field Memorandum (FM) 360–75, and other current directives governing the provision and administration of services to migrant and seasonal farmworkers including the Secretary's "13 Points" of April, 1972 to the extent that the "13 Points" relate to Employment Service activities under the Wagner-Peyser Act.

These regulations supersede the regulations at 20 CFR Parts 601–604 to that extent that the regulations at Parts 601–604 conflict with these regulations. The regulations also supersede all Department of Labor and State agency directives which conflict with the regulations.

Interested persons were invited to submit written comments, data, and arguments on the proposed regulations to the Assistant Secretary for Employment and Training until November 5, 1976. On November 5, 1976 the Department published a notice in the FEDERAL REGISTER extending the comment period to December 6, 1976.

Comments were received from about 75 agencies, organizations and private individuals, including a great many State employment service agencies, several employer organizations and several legal service groups. Comments were received on practically every sentence of Part 653, subpart B—Services for Migrant and seasonal Farmworkers (MSFWs). Comments on Part 658 were mostly general and conceptual in nature rather than specific. The comments were very diverse. Some commentators suggested that the regulations include a number of additional specific protections and benefits for MSFWs. Other commentors stated that many of the provisions and protections included in the proposed regulations were too paternalistic with respect to MSFWs and that, were the Department to require such benefits and protections for MSFWs, other applicant groups might believe themselves shortchanged.

In drafting these final regulations the Department used the following principles:

(1) ES services to MSFWs have traditionally been, and are today, an area of national concern. Because of the migratory nature of MSFW work and MSFW use of the ES interstate clearance system, and because MSFWs are often not working within a State long enough to be eligible for certain State benefits, the Department believes that there is sufficient reason to set forth special regulations on ES services to MSFWs.

(2) It would be self-defeating, however, and a disservice to MSFWs to offer services and benefits to MSFWs, which neither the Department nor the State agencies can realistically provide. Over the last several years the number of MSFWs in the nation has declined substantially. The overall American labor force, however, has increased by many millions. Meanwhile, ES funding has not significantly changed. Nor is there any statutory mechanism for ES funding to automatically increase during periods of high unemployment. The final regulations on services to MSFWs, therefore, were drafted with an eye not only on MSFWs but also on the rest of the American labor force, to which the ES is required by statute to offer service.

(3) The use of the ES system by employers is voluntary (except in the case of certain government contractors and employers seeking to employ foreign workers). If the ES places requirements on employers which the employers consider unreasonable, the employers may take their business elsewhere thus removing their MSFW employees from ES-required benefits and protections. The Department believes that the vast majority of agricultural employers are concerned with the welfare of their MSFW employees. The final regulations on services to MSFWs, therefore, were drafted to contain requirements with respect to employers which the Department believes are reasonably designed to encourage the use of the ES system by employers so that ES-required benefits and services for MSFWs will be able to be extended to the greatest possible number of MSFWs.

The most significant comments, and the Department's response thereto, were as follows:

1. A great many commentators, State agencies, employer groups, and legal service groups, suggested changes to the definitions of "Migrant," "applicant," "seasonal farmworkers" and other definitions. The specific changes suggested were many and diverse. The Department is studying these suggestions and has initially concluded that the definitions can be improved. Nevertheless, because of the complexity of the review process, the extensive change in ETA reporting systems any changes would require, and because of the expense involved, the definitions in the final regulations, with minor clarifications, are the same as in the proposed rulemaking. The Department believes that the definitions are reasonable ones and that they are consistent with present and past practice.

2. Many comments showed that the proposed definition for "intrastate job order" was unsatisfactory for States which use Statewide Job Bank systems. The definition has been clarified to state that a job order is an intrastate order when the order taker determines that workers will be needed who live beyond commuting distance from the worksite.

3. One commentor suggested that counseling, job development and testing be listed as basic services of the ES. This was not accepted. Sec. 3 of the Wagner-Peyser Act mandates the basic service of the ES as a no-fee labor exchange.

4. One commentor suggested that day-hauls be required to offer the full range of ES services. This was not accepted. Not only is this a practical impossibility, but it would negate the entire day-haul concept to change day-hauls into what would in effect be additional local offices. Workers at day-hauls will, however, be informed of the full range of ES services available at local offices.

5. One commentor suggested that "minimum levels" be established for all ES services. This was not accepted except to the extent that minimum requirements are set forth in the regulations. MSFWs, like other job applicants, may or may not need or may or may not desire specific ES services or a specific "level" of services beyond those required to be afforded them in the regulations.

6. Several commentors objected to the terms "if feasible" and "if appropriate" which occurred several times in the proposed rule-making especially with reference to Spanish language requirements. The final regulations avoid the use of these terms whenever possible. Local offices which serve a significant number of MSFWs (such offices will be designated by the ETA national office) must have bilingual (English-Spanish) staff if a substantial portion of the MSFWs they serve are fluent and/or literate in Spanish but are not fluent or literate in English.

7. Many commentors expressed confusion over the proposed "Job Bank information" Section. Most thought it was tautological or, if not tautological, hard to understand. The section has been retitled "job information" and has been clarified and simplified.

8. Many commentors expressed dissatisfaction with the wording of the Waiver Form. Some State agencies suggested meritorious alternate wording. The waiver forms are already in print and being used. However, upon approval of the Administrator, a State agency may use a form it thinks will be clearer to the MSFWs.

9. Some commentors questioned whether State agencies should be permitted to establish day-hauls but not operate them. The final regulations no longer permit a State agency to establish a day-haul without operating it. Further, no referrals may be made to day hauls not operated by the State agency or another State agency.

10. In response to one comment, the day haul section has been clarified to require ES personnel to report apparent law violations to the local office manager.

11. In response to many comments, the outreach section has been amended to preclude political and unionization activities and to omit language which many commentors interpreted as encouraging officious attempts to disrupt the work which the MSFW has scheduled for himself or herself. The MSFW, however, will be informed of ES services such as referral to year round job opportunities and supportive services.

12. In response to several comments, the requirements in the proposed regulations regarding the job description portion of interstate job orders have been extended to intrastate job orders.

13. Two commentors suggested that employers be required to guarantee a certain amount of work to MSFWs. This was rejected as being too much of a burden on employers.

14. One commentor requested that discrimination by "marital status" on job orders be prohibited. This was not accepted. The regulations do prohibit discrimination by sex, but do not go beyond current Federal statutes which do not prohibit discrimination by marital status per se.

15. Some commentors suggested that all MSFWs be given copies of interstate job orders. The Department, however, believes that the present requirement of giving such job orders on request has adequately served both the MSFWs and the administrative process of the Department. Some 19,000 of such job orders were given on request last year. The Department is, however, requiring employers to give a copy of the work contract to all agricultural workers recruited through the ES interstate or intrastate clearance system.

16. One commentor suggested that the "changes in crop situations" section be amended to address changes due to over-recruitment. This has been done.

17. One commentor suggested that field checks be done on all employers to which the ES has referred workers. This was not accepted. The Department believes that field checks are a reasonable service for MSFWs who migrate using the ES clearance system. To expand this to the millions of employers served by the ES including State governments, hospitals, mines, factories, Indian reservations, the military, etc. would be seriously impractical and prohibitively expensive and would involve the ES in enforcement activities expressly committed by Congress and State legislatures to specially authorized, funded and trained enforcement agencies. The Department believes that in requiring field checks for migratory MSFWs, the Department has gone a long way indeed toward reasonably looking after the employment rights of MSFWs, a group for which the Department has a genuine national concern.

18. One commentor suggested that the head of the State agency have overall responsibility for State agency self-monitoring. This has been done.

19. Some commentors suggested that the ES-complaint system handle complaints which are not ES-related, that is, which are not against the ES itself or against an employer for allegedly violating ES regulations. In addition to the legal question as to whether the ES may use Wagner-Peyser funds to finance a complaint system for arguably non-ES related complaints, the ES has to consider that, with present funding and staffing, the ES system serves far less of the general labor force than it could potentially serve. To significantly divert ES funds to handle non-ES related complaints would not best serve the interests of the ES system or of the employers or applicants, including MSFWs.

20. One commentor suggested that the ES fund institutions who would, in turn, bring complaints on behalf of MSFWs against the ES system. This comment was not accepted. The Department believes that legal service groups and even MSFWs themselves are capable of representing the interests of MSFWs.

21. One comment stated that, since the complaint system will handle complaints against employers, a complainant would have to exhaust the system before bringing, for example, a contract action against an employer. The Department, however, intends the complaint system, with respect to complaints against employers, to preclude, before the exhaustion of the complaint system, only court actions alleging an employer's breach of ES regulations.

22. One commentor noted that it is the "outcome of services" such as placement which "actually affect the lives of farmworkers" and objected to the section of the proposed regulations which stated that State agencies do not have substantial control over outcomes. While it may well be true that MSFWs are affected more by outcomes than by anything else, it is also true that State agencies have only indirect control over these outcomes. That is simply the nature of the system set up by the Wagner-Peyser Act and of the nation's free contractual employment system. The Department believes, however, that, if the requirements set forth in the regulations are adhered to, the outcomes for MSFWs will be considerably, if indirectly, enhanced.

23. One commentor asked that judicial review be provided after final DOL action against a State agency. This was not accepted. Judicial review should be determined on a case-by-case basis.

24. Some commentators suggested replacing the complaint system with a compulsory arbitration system. This was not accepted. The complaint system will be concerned, not with the give and take of contractual rights, but with adjudicating violations of Federal regulations. Thus, the procedure set forth in the regulations is a system with the full extent of procedural due process.

25. One commentor suggested that the role of the Governor be more clearly set forth in the regulations. The Department intends to deal with this comment very carefully in its drafting of 20 CFR Part 652—Basic Organization of the ES System and Part 657—Grants to State Agencies.

26. One commentor requested that State agencies be allowed to seek regional office review of State hearing officer decisions. This comment is being held in abeyance. The Department will carefully monitor the complaint system to see whether the regulations should be so amended at a future date.

27. One commentor objected to the language in the proposed rulemaking which stated that the ES complaint system would supersede the system at 29 CFR Part 31. Thus, there will not be two alternate systems for handling complaints alleging unlawful discrimination by race, color or national origin.

28. Some State agencies raised questions on funding and with respect to the Resource Allocation Formula. The Department will continue to work closely with the State agencies on this problem and has sent copies of these comments to the groups who are now engaged in special studies on the funding matter.

29. Some commentors suggested that State agencies be given an opportunity for a hearing whenever any remedial action or disallowance is applied. This suggestion has been accepted. With regard to certain remedial actions, an opportunity for a prior conference with the Assistant Secretary has also been added.

30. At the suggestion of many commentors the requirement that the employer sign an intrastate or interstate job order "in the presence of the order taken" has been omitted.

31. As a result of a great many comments, the term "employer-related complaint" has been dropped. All complaints handled by the ES-complaint system are now called "ES-related" complaints.

32. Many commentors suggested that the ES monitor not only employers but also employees and that the ES refuse to service employees who are truant, tardy, lazy, obstinate, or who say they are qualified for jobs for which they turn out not to be qualified. Although there appears to be a logical symmetry to this request, the Department would like to emphasize that the ES is not an enforcement agency; it is basically, under the statute, a labor exchange agency. The ES enforces only its own regulations. That the regulations on MSFWs place more requirements on employers than do the vast majority of ES regulations comes from the Department's desire to provide reasonable employment protections for this especially vulnerable group of workers. The Department hopes that most employers will understand and accept this reasoning and that they will continue to use the ES and to assist the ES in affording appropriate employment for MSFWs.

33. Many commentors criticized the "full-application-waiver" procedures as being too cumbersome and time consuming and of very little real usefulness to MSFWs. A few commentors, however, suggested that the full procedure be mandated at day hauls. The procedure is substantially the same as in the proposed rule-making. The Department will continue to assess this issue.

34. Many commentors stated that the time limits for handling complaints were too long; many said they were too short. Most commentors, however, did not question them. The final regulations have the same time limits as the proposed rule-making.

35. Many other clarifying, editorial and technical changes have been made.

Accordingly 20 CFR Chapter V is amended, effective February 24, 1977, to read as follows:

PART 601—ADMINISTRATIVE PROCEDURE

§ 601.6 [Amended]

1. In paragraph (b), first paragraph, the phrase "central office of the Administration" is changed to "ETA national office".

2. In paragraph (b), second paragraph, the term "Administration" is changed to "ETA national office".

3. In paragraph (c), the phrase "Director of the Employment Service" is changed to "ETA national office" each time it appears, and the term "Director" is changed to "ETA national office".

§ 601.8 [Amended]

4. The term "Director" is changed to "Secretary".

5. The phrase "Post Office Department" is changed to "U.S. Postal Service" each time it appears.

§ 601.9 [Amended]

6. The phrase "State Audit Branch, Division of Business Management" is deleted.

7. The term "Director" is changed to "ETA".

PART 602—FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM

8. In the table of contents for Part 602, §§ 602.9 and 602.21 are deleted.

§ 602.1 [Amended]

9. In paragraph (a), the words "and all rules, regulations, and standards promulgated thereunder" are deleted.

§ 602.9 [Deleted]

10. § 602.9 is deleted.

§ 602.15 [Amended]

11. The words "ETA 'Standards for a Merit System of Personnel Administration' " are changed to "the Civil Service Commission regulations at 45 CFR Part 70".

§ 602.18 [Amended]

12. In paragraph (a), the term "Director" is changed to "Administrator".

§ 602.21 [Deleted]

13. Section 602.21 *Delegation of Authority*, is deleted.

PART 603—STATE PROGRAM BUDGET PLANS UNDER THE WAGNER-PEYSER ACT

14. The title of the Part is changed to STATE PROGRAM BUDGET PLANS UNDER THE WAGNER-PEYSER ACT.

§ 603.1 [Amended]

15. The phrase "plan of operation", each of the three times it appears, is changed to "program budget plan".

§ 603.2 [Amended]

16. In paragraph (a) the phrase "Title IV of the Servicemen's Readjustment Act of 1944 as amended" is changed to read "38 U.S.C. Chapters 41 and 42".

17. Section 603.3 is revised to read as follows:

§ 603.3 Compliance with USES regulations.

Each State agency shall submit a statement, as part of its State program budget plan, that it will comply with the regulations of the USES at 20 CFR Parts 601–604, 620, 621, 651–658, and at 29 CFR Part 8.

§ 603.5 [Amended]

18. The phrase "plan of operation" is changed to "program budget plan".

PART 604—POLICIES OF THE UNITED STATES EMPLOYMENT SERVICE

19. Paragraphs (b) and (c) are revised to read as follows:

§ 604.2 Clearance.

* * * * *

(b) To recruit qualified workers from local sources before resorting to clearance unless a shortage of local workers is anticipated.

(c) To place into clearance only those job orders which specify at least the applicable Federal or State minimum wage, and to place job orders for agricultural workers into intrastate and interstate clearance in accordance with the regulations at § 653.108 of this Chapter.

* * * * *

§ 604.5 [Amended]

20. Everything after the phrase "and related industries" is deleted.

21. The following new Part 651 is added to Title 20.

PART 651—GENERAL PROVISIONS GOVERNING THE FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM

Sec.

651.1 Scope and purpose of the Federal-State employment service system.
651.2 Basic structure of the employment service system.
651.3 Federal statutes governing the employment service system.
651.4 Executive Orders affecting the employment service system.
651.5 Format of the regulations for the employment service system.
651.6 Consolidated table of contents for Parts 651–658.
651.7 Definitions of terms used in Parts 651–658.

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq., unless otherwise noted.

§ 651.1 Scope and purpose of the Federal-State employment service system.

(a) The basic purpose of the Federal-State employment service system is to provide a national system of public employment offices through which no-fee employment services are provided to workers who are seeking employment and to employers who are seeking job applicants. The basic employment service of the employment service system, therefore, is the referral of workers to jobs through the operation, without fee, of a labor-exchange system.

(b) The employment service system also performs other functions related to its basic labor-exchange function. Such ancillary functions include developing job openings, employment counseling and testing, assisting employers with certain employment-related problems, the processing of labor certification applications for the temporary and permanent employment of foreign workers in the United States, the conducting of prevailing wage surveys, and the performance of other employment-related activities as set forth in the regulations at Parts 601–604, 620, 621 and 651–658 of this Chapter and at 29 CFR Parts 8, 26, and 75.

§ 651.2 Basic structure of the employment service system.

(a) Sec. 1 of the Wagner-Peyser Act of 1933 (Act) established as a component of the Department of Labor a United States Employment Service (USES). Sec. 3(a) of the Act sets forth basic responsibility of the USES. It states:

> It shall be the province and duty of the bureau [USES] to promote and develop a national system of employment offices for men, women, and juniors who are legally qualified to engage in gainful occupations, including employment counseling and placement services for handicapped persons, to maintain a veterans' service to be devoted to securing employment for veterans, to maintain a farm placement service, and, in the manner hereinafter provided, to assist in establishing and maintaining systems of public employment offices in the several States and the political subdivisions thereof in which there shall be located a veterans' employment service. The bureau [USES] shall also assist in coordinating the public employment offices throughout the country and in increasing their usefulness by developing and prescribing minimum standards of efficiency, assisting them in meeting problems peculiar to their localities, promoting uniformity in their administrative and statistical procedure, furnishing and publishing information as to opportunities for employment and other information of value in the operation of the system, and maintaining a system for clearing labor between the several States.

(b) Sec. 4 of the Act provides that any State which wishes to receive funds under the Act must, through its legislature, accept the provisions of the Act and must designate or authorize the creation of a State agency vested with all the powers necessary to cooperate with the USES under the Act.

(c) Sec. 8 of the Act requires that State agencies submit to the Secretary of Labor detailed plans for carrying out the provisions of the Act within the State.

(d) Sec. 9 of the Act requires State agencies to make operational and expenditures reports as prescribed by the Secretary of Labor. It requires the Secretary to monitor State agencies operations and expenditures, and authorizes the Secretary to apply remedial actions to State agencies which have violated the Secretary's rules and regulations, after notice to the State agency.

(e) Sec. 11 of the Act establishes a Federal Advisory Council to advise the Secretary on the operation of the employment service system. It also requires that State agencies establish similar advisory councils.

(f) Sec. 12 of the Act authorizes the Secretary to make such rules and regulations as may be necessary to carry out the provisions of the Act.

§ 651.3 Federal statutes governing the employment service system.

(a) The Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq., sets forth the basic responsibilities of the employment service system.

(b) In addition to Wagner-Peyser Act responsibilities, the employment service system is governed or affected by the following Federal statutes:

(1) The Social Security Act, Titles III, IX and XII;

(2) 38 U.S.C. Chapters 41 and 42;

(3) Titles VI and VII of the Civil Rights Act of 1964;

(4) Sec. 212(a)(14) of the Immigration and Nationality Act;

(5) The Consolidated Farm and Rural Development Act of 1972; and

(6) The Farm Labor Contractor Registration Act of 1963, as amended.

§ 651.4 Executive Orders affecting the employment service system.

The following Executive Orders have an impact upon the employment service system:

(a) Executive Order 10582—Implementing the Buy American Act;

(b) Executive Order 10650—Relating to the Selection of Persons with Critical Skills for Enlistment in the Ready Reserves;

(c) Executive Order 11190—Relating to the Screening of the Ready Reserve;

(d) Executive Order 11075—Providing for the Implementation of the Trade Expansion Act;

(e) Executive Order 11141—Declaring a Public Policy Against Discrimination on the Basis of Age;

(f) Executive Order 11246—Relating to Equal Employment Opportunity;

(g) Executive Order 11478—Relating to Equal Employment in the Federal Government;

(h) Executive Order 11307—Providing for the Coordination of Federal Programs Affecting Agricultural and Rural Area Development;

(i) Executive Order 11490—Relating to Emergency Preparedness Functions;

(j) Executive Order 11575—Relating to the Disaster Relief Act;

(k) Executive Order 11701—Relating to Employment of Veterans by Federal Agencies and Government Contractors and Subcontractors.

§ 651.5 Format of the regulations for the employment service system.

(a) Part 651 contains the general provisions governing the Federal-State employment service system.

(b) Part 652, when published, will set forth the basic requirements relative to the establishment and organization of State employment service agencies.

(c) Part 653 contains the requirements governing the principal services of the employment service system.

(d) Part 654, when published, will set forth the provisions governing special services of the employment service system.

(e) Part 655, when published, will contain the labor certification process for the temporary employment of foreign workers in the United States.

(f) Part 656 contains the regulations governing the labor certification process for the permanent employment of foreign workers in the United States.

(g) Part 657, when published, will set forth the requirements for State agency program budget plans, including their development, submission, and approval, and the allocation of funds to the State agencies.

(h) Part 658 contains the general administrative provisions of the employment service system, including personnel, fiscal, reporting, and nondiscrimination standards, the employment service complaint system, and monitoring and enforcement standards.

§ 651.6 Consolidated table of contents for Parts 651–658.

The table of contents for Parts 651–658 is as follows:

PART 651—GENERAL PROVISIONS GOVERNING THE FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM

Sec.

651.1 Scope and purpose of the Federal-State employment service system.
651.2 Basic structure of the employment service system.
651.3 Federal statutes governing the employment service system.
651.4 Executive Orders affecting the employment service system.
651.5 Format of the regulations for the employment service system.
651.6 Consolidated table of contents for Parts 651–658.
651.7 Definitions of terms used in Parts 651–658.

PART 652—BASIC ORGANIZATION OF THE EMPLOYMENT SERVICE SYSTEM [RESERVED]

PART 653—SERVICES OF THE EMPLOYMENT SERVICE SYSTEM

SUBPART A—BASIC SERVICES OF THE EMPLOYMENT SERVICE SYSTEM [RESERVED]

SUBPART B—SERVICES FOR MIGRANT AND SEASONAL FARMWORKERS (MSFWS)

Sec.
653.100 Purpose and scope of subpart.
653.101 Provision of services to migrant and seasonal farmworkers (MSFWs).
653.102 Job information.
653.103 MSFW job applications.
653.104 Job applications of MSFW families and crew members.
653.105 Situations requiring neither full applications nor waivers.
653.106 ES day-haul responsibilities.
653.107 Outreach.
653.108 Requirements for intrastate and interstate job orders seeking agricultural workers.
653.109 Changes in crop and recruitment situations.
653.110 Field checks.
653.111 State agency self-monitoring.
653.112 Data collection.
653.113 Disclosure of data.
653.114 State agency staffing requirements.
653.115 State agency program budget plans.

SUBPART C—SERVICES FOR VETERANS

653.200 Purpose and scope of subpart.
653.201 Definitions of terms used in subpart.

FEDERAL ADMINISTRATION

653.210 Role of the Administrator.
653.211 Role of the Veterans Employment Service (VES).
653.212 Role of Regional Administrator (RA).

Sec.
653.213 Assignment and role of Regional Veterans' Employment Representatives (RVERs).
653.214 Assignment and role of State Veterans' Employment Representatives (SVERs).

STANDARDS OF PERFORMANCE GOVERNING STATE AGENCY SERVICES TO VETERANS AND ELIGIBLE PERSONS

653.220 Standards of performance.
653.221 Standards of performance governing State agency services.
653.222 Performance standard on facilities for VES staff.
653.223 Performance standards on reporting.
653.224 Performance standards governing the assignment and role of Local Veterans' Employment Representatives (LVERs).
653.225 Standards of performance governing State agency cooperation and coordination with other agencies and organizations interested in the employment development of veterans and eligible persons.
653.226 Standards of performance governing complaints of veterans and eligible persons.

FEDERAL MONITORING OF STATE AGENCY COMPLIANCE

653.230 Veterans preference indicators of compliance.
653.231 Secretary's annual report to Congress.

PART 654—SPECIAL RESPONSIBILITIES OF THE EMPLOYMENT SERVICE SYSTEM [RESERVED]

PART 655—LABOR CERTIFICATION PROCESS FOR THE TEMPORARY EMPLOYMENT OF ALIENS IN THE UNITED STATES [RESERVED]

PART 656—LABOR CERTIFICATION PROCESS FOR THE PERMANENT EMPLOYMENT OF ALIENS IN THE UNITED STATES

SUBPART A—PURPOSE AND SCOPE OF PART 656

656.1 Purpose and scope of Part 656.
656.2 Description of the Immigration and Nationality Act and of the Department of Labor's role thereunder.

SUBPART B—OCCUPATIONAL LABOR CERTIFICATION DETERMINATIONS

656.10 Schedule A.
656.11 Schedule B.

SUBPART C—LABOR CERTIFICATION PROCESS

656.20 Introduction.
656.21 Basic labor certification application process.
656.22 Applications for labor certifications for Schedule A occupations.
656.23 Applications for labor certifications for Schedule B occupations; requests for waivers from Schedule B.
656.24 Labor certification determinations.
656.25 Procedures following a labor certification determination.
656.26 Administrative-judicial review of denials of labor certification.
656.27 Hearings.
656.28 Document transmittal following the granting of a labor certification.
656.29 Filing of a new application after the denial of a labor certification.
656.30 Validity of and invalidation of labor certifications.
656.31 Labor certification applications involving fraud or willful misrepresentation.
656.32 Fees for services and documents.

SUBPART D—DEFINITIONS

Sec.
656.50 Definitions, for purposes of this Part, of terms used in this Part.

SUBPART F—ADDRESSES OF DEPARTMENT OF LABOR REGIONAL OFFICES

656.60 Addresses of Department of Labor regional offices.

PART 657—PROVISIONS GOVERNING GRANTS TO STATE AGENCIES FOR EMPLOYMENT SERVICES ACTIVITIES (RESERVED)

PART 658—ADMINISTRATIVE PROVISIONS GOVERNING THE EMPLOYMENT SERVICE SYSTEM

SUBPART A—(RESERVED)

SUBPART B—[RESERVED]

SUBPART C—[RESERVED]

SUBPART D—[RESERVED]

SUBPART E—EMPLOYMENT SERVICE COMPLAINT SYSTEM

658.400 Purpose and scope of subpart.
658.401 Types of complaints handled by ES complaint system.

STATE AGENCY ES COMPLAINT SYSTEM

658.410 Establishment of State agency ES complaint systems.
658.411 Initial handling of complaints by the State or local office.
658.412 State agency officials responsible for handling ES-related complaints.
658.413 Action on ES-related complaints concerning employers.
658.414 Action on ES-related complaints concerning the State agency.
658.415 Hearings.
658.416 Decision of the hearing official.

FEDERAL ES COMPLAINT SYSTEM

658.420 Establishment of the ES complaint system at the ETA regional office.
658.421 Handling of complaints by the RA.
658.422 Hearings.
658.423 Decision of the DOL Hearing Officer.

SUBPART F—DISCONTINUATION OF SERVICES TO EMPLOYERS BY THE EMPLOYMENT SERVICE SYSTEM

658.500 Scope and purpose of subpart.
658.501 Informal resolution.
658.502 Discontinuation of services.

SUBPART G—REVIEW AND ASSESSMENT OF STATE AGENCY COMPLIANCE WITH EMPLOYMENT SERVICE REGULATIONS

658.600 Scope and purpose of subpart.
658.601 State agency responsibility.
658.602 ETA national office responsibility.
658.603 ETA regional office responsibility.
658.604 Assessment and evaluation of program performance data.
658.605 Communication of findings to State agencies.

SUBPART H—FEDERAL APPLICATION OF REMEDIAL ACTION TO STATE AGENCIES

658.700 Scope and purpose of subpart.
658.701 State agency violations of ES regulations.
658.702 Initial action by the RA.
658.703 Disallowance of expenditures; corrective action plans.
658.704 Remedial actions.
658.705 Decision to decertify.
658.706 Notice of remedial action.
658.707 Requests for hearings.
658.708 Hearings.
658.709 Conduct of hearings.
657.710 Decision of the Hearing Officer.
658.711 Decision of the Secretary.

§ 651.7 Definitions of terms used in Parts 651–658.

"Administrator, United States Employment Service (Administrator)" shall mean the chief official of the United States Employment Service (USES) or the Administrator's designee.

"Agricultural worker" shall mean a worker, whose primary work experience has been in industries with a Standard Industrial Classification (SIC) of 01–07, except 027, 074, 0752, 0761, and 078, whether alien or citizen, who is legally allowed to work permanently in the United States.

"Applicant" shall mean a person who contacts a local office to seek employment or employability development services.

"Application Card" shall mean the basic local office record for an applicant.

"Day-haul" shall mean the assembly of workers at a pick-up point, transportation of them to agricultural employment, and the return of the workers to the pick up point on the same day.

"DOL" shall mean the Department of Labor.

"D.O.T." shall mean the Dictionary of Occupational Titles, the reference work published by the USES which contains brief, non-technical definitions of U.S. job titles, distinguishing number codes, and worker trait data.

"Employment and Training Administration (ETA)" shall mean the component of the Department of Labor containing the United States Employment Service (USES).

"Employment Service (ES)" shall mean the nationwide system of public employment offices consisting of the United States Employment Service (USES), its grantee State agencies, and the various offices of the State agencies.

"ES" shall mean "employment service".

"ES regulations" shall mean the Federal regulations at 20 CFR Parts 601–604, 620, 621, and 651–658, and at 29 CFR Parts 8, 26 and 75.

"ETA" shall mean the Employment and Training Administration.

"Hearing Officer" shall mean a Department of Labor official, hearing officer or Administrative Law Judge, designated to preside at DOL administrative hearings.

"Interstate job order" shall mean a job order describing one or more hard-to-fill job openings which a State agency uses to request recruitment assistance from other State agencies. Job orders used for day-haul operations which extend across State lines and Job Banks which extend across State lines are not included in this definition.

"Intrastate job order" shall mean a job order describing one or more hard-to-fill job openings, which a local office uses to request recruitment assistance from other local offices within the State. Placement into a Statewide Job Bank system in and of itself does not make a job order an intrastate job order. The job order shall be an intrastate job order only if the job order taker makes the determination that workers are needed from other parts of the State which are not within commuting distance of the worksite.

"Job Bank" shall mean the employment service's computerized job data storage system.

"Job Information Service (JIS)" shall mean a unit or an area within an ES local office where applicants primarily, on a self-service basis or with minimum professional help, can obtain specific and general information on where and how to get a job.

"Local office" shall mean a local employment service office which is part of a State agency. A local office which serves a significant number of MSFWs shall mean a local office which is officially designated as such by the ETA.

"Local office manager" shall mean the ES official in charge of all ES activities in a local office of a State agency.

"Local Veterans' Employment Representative (LVER)" shall mean the local office official designated by the State Director to serve veterans and eligible persons as defined at § 653.201 of this chapter.

"LMI" shall mean labor market information.

"Migrant" shall mean both:

(1) "Migrant Farmworker," that is, a seasonal farmworker whose farmwork experience during the preceding 12 months required travel such that the worker was unable to return to his/her residence (domicile) in the same day; and

(2) "Migrant Food Processing Worker," that is, a person who has had experience during the preceding 12 months doing food processing (as classified in the 1972 Standard Industrial Classification (SIC) definitions 201, 2033, 2035, and 2037 for food processing establishments) for a scheduled period of less than 150 days, provided that it required travel such that the worker was unable to return to his/her residence (domicile) in the same day.

"MSFW" shall mean a migrant or seasonal farmworker.

"RA"; see "Regional Administrator".

"Program Budget Plan (PBP)" shall mean the annual planning document for the SESA required by Sec. 8 of the Wagner-Peyser Act containing the SESA's detailed planning, programming and budget for carrying out employment security activities. For the purpose of ES regulations, this definition shall be restricted to the employment service portion of the PBP.

"Regional Administrator, Employment and Training Administration (RA)" shall mean the chief DOL Employment and Training Administration (ETA) official in each DOL regional office.

"Regional Veterans' Employment Representative (RVER)" shall mean the Federal official designated by the Director, Veterans Employment Service (VES) in each DOL regional office who, under the RA, serves veterans and eligible persons as defined at § 653.201 of this Chapter.

"Seasonal farmworker" shall mean a person who has had at least 25 days experience during the preceding twelve months working for wages in farmwork for a scheduled period of less than 150 consecutive days at any one establishment engaged in agricultural production or agricultural services (as classified in the 1972 Standard Industrial Classification (SIC) definitions included in industries 01 through 07, except 027, 074, 0752, 0761 and 078). Nonmigrant individuals who are full-time students are excluded, as are migrant workers who are full-time students but who travel in organized groups rather than with their families.

(1) For purposes of this definition an "establishment" shall mean an economic unit, generally at a single physical location, where business is conducted or where (or from which) services are performed. (For example, a farm, orchard, ranch, or an organization providing agricultural commodities or services from a single location.) Farm labor contractors and crew leaders are not considered establishments, but the organizations to which they supply workers are to be considered establishments for purposes of this definition.

(2) For purposes of this definition, an individual who is hired repeatedly on a short term basis is a seasonal farmworker even if this results in his/her working for any one agricultural establishment for a period of 150 consecutive days or more.

(3) There are two types of seasonal farmworkers—migrant and non-migrant.

"Secretary" shall mean the Secretary of Labor or the Secretary's designee.

"SESA"; see "State Employment Security Agency".

"Solicitor" shall mean the chief legal officer of the U.S. Department of Labor or the Solicitor's designee.

"State" shall include the fifty states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.

"State Administrator" shall mean the chief official of the State Employment Security Agency (SESA).

"State agency" shall mean the State employment service agency designated under section 4 of the Wagner-Peyser Act to cooperate with the USES in the operation of the employment service system.

"State Director" shall mean the chief official of the State employment service agency (State agency).

"State Employment Security Agency (SESA)" shall mean the State agency which, under the State Administrator, contains both the State employment service agency (State agency) and the State unemployment compensation agency.

"State hearing official" shall mean a State official designated to preside at State administrative hearings convened to resolve ES-related complaints pursuant to subpart E of Part 658 of this Chapter.

"United States Employment Service (USES)" shall mean the component of the Employment and Training Admnistration of DOL which was established under the Wagner-Peyser Act of 1933 to promote and develop a national system of public employment service offices.

"Veterans Employment Service (VES)" shall mean the organizational component within the United States Employment Service which is concerned with policies and services relating to employment development on behalf of veterans and eligible persons as defined at § 653.201 of this Chapter.

Subpart B—Services for Migrant and Seasonal Farmworkers (MSFWs)

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 *et seq.*, unless otherwise noted.

§ 653.100 Purpose and scope of subpart.

This subpart sets forth the principal regulations of the USES for counseling, testing, and job and training referral services for migrant and seasonal farmworkers (MSFWs) on a basis which is qualitatively equivalent and quantitatively proportionate to services provided to non-MSFWs. It also contains requirements that State agencies establish a system to monitor their own compliance with USES regulations governing services to MSFWs, including the regulations under this subpart.

§ 653.101 Provision of services to migrant and seasonal farmworkers (MSFWs).

(a) Each State agency and each local office shall offer to migrant and seasonal farmworkers (MSFWs) the full range of employment services, benefits and protections, including the full range of counseling, testing, and job and training referral services as are provided to

non-MSFWs. In providing such services, the State agency shall consider and be sensitive to the preferences, needs and skills of individual MSFWs and the availability of job and training opportunities.

(b) Each State agency shall assure that, in a local area, the same local offices, including itinerant and satellite offices, but exclusive of day-haul operations and temporary seasonal facilities, offer service to both non-MSFWs and MSFWs. Separate farm labor service local offices, which offer only farmwork to agricultural workers while another local office serving the same geographic area offers other ES services to other applicants, are prohibited so that all applicants are able to receive employment services on the same basis.

§ 653.102 Job information.

(a) Each State agency shall assure that the same job information, including Job Bank order information, which is regularly provided to areas not containing a significant number of MSFWs, shall be extended into nearby areas which contain a significant number of MSFWs.

(b) State agencies shall assist MSFWs to use job information.

§ 653.103 MSFW job applications.

(a) Every local office shall determine whether or not applicants are MSFWs as defined at § 651.7 of this Chapter.

(b) Except as provided in § 653.105 of this subpart, when an MSFW applies for a job or registers for work at a local office, the local office shall explain to the MSFW orally and/or in writing the benefits which might follow from the filing of a full application, such as counseling, job development and testing. Local offices which serve a significant number of MSFWs shall give or write the explanation in Spanish whenever a significant number of such MSFWs are fluent and/or literate in Spanish but are not fluent or literate in English. Other local offices shall provide such MSFWs with the same services whenever this is feasible.

(c) If the MSFW wishes to file a full application, the local office shall make sure that the application is complete and cludes the significant history of the MSFW's prior employment, training and educational background and a statement of any desired training and/or employment. All applicable items shall be completed according to the ETA instructions for preparation of the application card (ES-511). Additional D.O.T. codes shall be assigned based on the MSFW's work history, training, and skills, knowledges, and abilities, and secondary cards shall be completed and separately filed.

(d)(1) If an MSFW does not wish to file a full application, a partial application shall be taken and the MSFW shall be requested to sign a waiver of additional ES services at that time except for job referral and referral to training or supportive services. In no case may job referral or referral to training or supportive services be refused because an MSFW has waived a full application. The MSFW shall then be offered job referral services and referral to available training and supportive services, with the assistance of a staff member and/or through self-selection in a Job Information Service (JIS), if a JIS is available.

(2) If the waiver form is in English, it shall be worded as follows unless the Administrator has approved a State agency's alternate wording:

WAIVER OF FULL APPLICATION

I have been advised of my right to complete this application and I have been told of the additional services I may get if I do. I do not want these additional services and I do not want to complete the full application at this time.

Date: ----------
Signature of Applicant

Employment Service Representative

(3) If a Spanish waiver form is used, it shall be worded as follows (except that it may be revised to accommodate colloquial differences) unless the Administrator has approved a State agency's alternate wording:

RENUNCIA DE SOLICITUD ENTERA

Me han avisado de mi derecho de llenar todas las partes de esta solicitud y me han informado de los servicios adicionales que pudiera recibir si lo hago. No deseo estos servicios adicionales, ni deseo llenar la solicitud entera a este tiempo.

Fecha: ----------
Firma del Solicitante

Representante del Servicio de Empleo

(4) Local offices, which keep applications in a computer file, shall use an additional hard copy waiver form which shall be signed by the applicant and the interviewer.

(e) If an MSFW does not wish to file a full application or sign a waiver, the interviewer shall try to obtain enough information to complete a partial application and shall then sign the waiver on the ES representative line noting that the applicant did not wish to sign, and, if possible, the reason. The interviewer shall offer to refer the applicant to any available jobs for which the MSFW may be qualified, and shall advise the MSFW that the MFSW may file a full application at any time.

(f) If a partial application is taken, the local office shall assure that the following items are completed on the application card:

(1) Social Security Number;
(2) Applicant Type (new or renewal);
(3) Name;
(4) Address, including name of county, and phone number;
(5) Sex;
(6) Birth date;
(7) Highest school grade completed;
(8) County code;
(9) Group;
(10) Spanish-American;
(11) Seasonal Farmworker/migrant/migrant food processing worker;
(12) Registration date;
(13) Employment status;
(14) Claimant;
(15) Local office; and
(16) Any additional characteristics which apply (such as Veteran, Handicapped, and food stamp).

(g) Partial applications for MSFWs shall be filed in accordance with local office procedures for filing other partial applications.

(h) At least those MSFWs who file full or partial application shall be issued an Identification Card at the initial visit and shall be advised to show it whenever they use employment service facilities or services.

§ 653.104 Job applications of MSFW families and crew members.

(a) Except as provided at §§ 653.103 (e) and 653.105 of this subpart, no local office shall refer an MSFW family or crew unless each working member of the family or crew, and the crew leader or family head (if the crew leader or family head is a working member), has either filed a full application or signed a waiver either at the local office or in the presence of an outreach worker. Local offices, however, may provide general information, such as on types of crops, to crew leaders and family heads prior to the registration of all working members.

(b) No local office shall service a farm labor contractor on a job order for agricultural workers unless the farm labor contractors shows a valid Federal Farm Labor Contractor (FLC) certificate, where required by Federal law, and a valid State certificate where required by State law. If a farm labor contractor is temporarily without his or her valid FLC certificate, the local office shall try to verify the existence of the valid FLC by telephoning the Department of Labor's Employment Standards Administration regional office. The local office, however, shall not serve the farm labor contractor until the existence of the valid FLC is verified.

§ 653.105 Situations requiring neither full job applications nor waivers.

(a) If a MSFW has been referred on an interstate or intrastate order and it is known to the order-holding local office that the MSFW has completed a full application or waiver in the applicant-holding office or elsewhere, an additional application or waiver need not be taken by the order-holding office unless the MSFW requests ES services in addition to referral on the interstate or intrastate job order.

(b) If the State agency is operating a day-haul facility, a full application shall be taken whenever an MSFW requests the opportunity to file a full application unless this is impractical at that time. Waivers need not be obtained. In such cases, a full application shall be taken at the earliest practical time.

§ 653.106 ES day-haul responsibilities.

(a) This section applies not only to MSFWs, but to all workers who use State agency operated day-hauls.

(b) State agencies may establish an agricultural day-haul to facilitate the employment of workers living within daily commuting distance of places of employment. State agency staff shall operate any day-haul established by the State agency. No applicant shall be referred to any day-haul which is not operated by State agency staff.

(c) Before it establishes an agricultural day haul, a State agency shall conduct a survey to determine need and feasibility. The State agency shall document the method and results of the survey.

(d) State agency operated day-hauls may extend across State lines, provided the State agencies involved enter into written working agreements. Such agreements shall provide for offices in each State to communicate directly with each other. Such agreements may provide for the visiting of "demand" State employers by "supply" State agency personnel, the active participation of "demand" State agency personnel in the recruitment and referral activities of the "supply" State, and other arrangements designed to facilitate the flow of labor. State agencies shall secure the written approval of the RA before putting such an interstate agreement into effect, or of both RAs if the States are in different ETA regions.

(e) At State agency operated day-hauls:

(1) Job applications shall be taken pursuant to § 653.105(b) of this subpart. Workers using day-hauls shall be informed of the availability of ES services such as counseling, testing, and referral to jobs, training and supportive services.

(2) Information such as posters and pamphlets concerning the ES complaint procedure, appropriate unemployment compensation programs, wage and hour information, equal opportunity, age discrimination, and worker protection and benefits shall be made available at day-haul facilities. Such posters and pamphlets shall be printed in English and, if the day-haul is used by workers who are fluent and/or literate in Spanish but not in English, in Spanish.

(3) To the extent feasible, job order information shall be used to expose applicants to a wide range of job opportunities, and assistance in the use of such information shall be provided.

(4) In taking employer job orders, ES staff shall record the number of workers needed, the work to be performed, the transportation arrangements, the wages, and the length of the working day and other relevant working conditions. The employer shall be told to notify the day-haul site or appropriate local office of any change in labor needs, working conditions, etc. which would materially affect the job order.

(5) ES staff shall monitor the compliance by employers and their agents and by crew leaders with ES regulations. To the extent of their expertise, they shall also observe the compliance by employers and their agents and by crew leaders with relevant Federal and State laws governing vehicle registration, wages, hours, working conditions, and nondiscrimination. If the ES staff observe an apparent violation of ES regulations, they shall report this to the local office manager and the procedures set forth at subpart F of Part 658 of this Chapter shall be followed. If ES staff observe an apparent violation of laws other than ES regulations, they shall report this to the local office manager and the local office manager shall refer the matter to the appropriate Federal or State enforcement agency.

(f) State agencies are encouraged to develop written agreements with enforcement agencies, in accord with which the enforcement agencies will spot-check for law violations at day-hauls operated by the State agency.

§ 6653.107 Outreach.

(a) State agencies shall operate outreach programs for MSFWs who may be in need of service both in home-base areas while they are in residence and in places along the migrant stream.

(b) The outreach program shall include an active effort to contact MSFWs who do not come to local offices by seeking out such workers in their living areas and/or if possible, in their work places. The program shall also involve developing and improving ES relationships with public and private community agencies, MSFW groups and employers. State agencies shall also explore the possibility of conducting and/or coordinating outreach through public and private community agencies and MSFW groups.

(c) Both home base and in-stream outreach for MSFWs shall attempt to explain to MSFWs available local office services with respect to referral to long-range, year-round employment opportunities, alternatives to seasonal or migratory agricultural work, training opportunities, social services, including Federal and State assistance programs, and with respect to the ES complaint procedures set forth in subpart E of Part 658 of this Chapter. Outreach workers, however, shall not include, as part of their outreach activities, political or unionization activities.

§ 6653.108 Requirements for intrastate and interstate job orders seeking agricultural workers.

(a) This section contains the requirements for intrastate and interstate job orders seeking agricultural workers. This section, therefore, contains requirements which affect not only MSFWs, but which affect all agricultural workers who are recruited through the ES intrastate or interstate clearance systems.

(b) (1) In view of the statutorily established basic function of the employment service as a no-fee labor exchange, that is, as a forum for bringing together employers and job seekers, neither the ETA nor the State agencies are guarantors of the accuracy or truthfulness of information contained on job orders submitted by employers. Nor does any job order accepted of recruited upon by the ES constitute a contractual job offer to which the ETA or a State agency is in any way a party. Nevertheless, if the ETA or a State agency discovers that an employer's job order contains a material misrepresentation, the procedures at Subpart F of Part 658 of this Chapter shall be followed.

(2) As soon as it is administratively convenient, intrastate and interstate job orders shall be amended to include the language of the first two sentences of paragraph (b)(1) of this section.

(c) No local office shall place a job order for agricultural workers into intrastate clearance unless:

(1) The job order does not contain an unlawful discriminatory specification by race, color, religion, national origin, age, sex, citizenship, mental or physical status unrelated to job performance (handicap), or veteran or nonveteran status;

(2) The employer has signed the statement required by paragraph (c)(3) of this section that the job offer states all the material terms and conditions of the employment, including:

(i) The crop;
(ii) The nature of the work;
(iii) The anticipated period and hours of employment;
(iv) The anticipated starting date of employment and the anticipated number of weeks and days thereafter for which work will be available;
(v) The hourly wage rate or the piece rate estimated in hourly wage rate equivalents;
(vi) Any deductions to be made from wages;
(vii) Any non-monetary benefits to be provided by the employer;
(viii) Any days or weeks for which work is guaranteed, and, for each guaranteed week of work, the exclusive manner in which the guarantee may be abated due to weather conditions or other Acts of God beyond the employer's control;
(ix) Any bonus or work incentive payments or other expenses which will be paid by the employer in addition to the basic wage rate, including the anticipated time period(s) within which such payments will be made. No such payments, however, shall be made contingent upon the worker continuing employment beyond the period of employment specified in the job order or, in the case of any worker with children of school age who has migrated away from home with such children, beyond the time needed to return home for the beginning of the school year;
(x) An assurance that the working conditions comply with applicable Federal and State minimum wage, child labor, social security, health and safety, farm labor contractor registration and other employment-related laws; and
(xi) An assurance that the employer will provide a copy of the work contract to the worker, which shall be written in Spanish if the worker is fluent or literate in Spanish but is not fluent or literate in English.

(3) The employer has read the order and has verified that the job order contains all the material terms and conditions of the job, and that all items

therein are actual conditions of the job offer by signing the following statement: "This job offer describes the actual terms and conditions of the employment being offered by me and contains all the material terms and conditions of the job";

(4) The wages and working conditions offered are not less than the prevailing wages and working conditions among similarly employed agricultural workers in the area of intended employment or the applicable Federal or State minimum wage, whichever is higher. If a base rate and a bonus is offered, the base rate must be not less than the prevailing wage rate or applicable Federal or State minimum wage, whichever is higher;

(5) The employer has agreed to provide or pay for the transportation of the workers on at least the same terms as transportation is commonly provided by employers in the area of intended employment to agricultural workers recruited from the same area of supply;

(6) If the workers are to be housed, the employer has signed an assurance that its housing meets the full set of standards set forth at Part 620 of this Chapter or the full set of standards set forth at 29 CFR 1910.142; and

(7) The local office and the employer have attempted and have not been able to obtain sufficient workers within the local labor market area, or the local office anticipates a shortage of local workers.

(d) No State agency shall place a agricultural job order into interstate clearance unless:

(1) It meets the requirements set forth at paragraphs (c)(1) through (c)(5) of this section;

(2) The employer will provide housing for the workers which meets the full set of standards set forth at Part 620 of this Chapter or the full set of standards set forth at 29 CFR 1910.142; and

(3) The State agency and the employer have attempted and have not been able to locate sufficient workers within the State, or the State agency anticipates a shortage of workers within the State.

(e)(1) The local office shall use the agricultural clearance form prescribed by ETA, and shall see that all necessary items on the form are completed, including items on attachments to the form prescribed by ETA.

(2)(i) The original of an interstate agricultural clearance form shall be retained for the order-holding local office files. At a minimum, additional copies of the form with all attachments shall be distributed as follows:

(A) At least one clear copy to each of the State agencies selected for recruitment (areas of supply);

(B) One copy to each applicant-holding ETA regional office;

(C) One copy to the order-holding (area of employment) State office;

(D) Two copies to order-holding ETA regional office, one of which shall be forwarded immediately upon receipt to the ETA national office; and

(ii) One copy of the form with all attachments shall be provided to the referred worker by the applicant-holding office upon the request of the worker.

(f) The local office may place an intrastate or interstate agricultural order for a specific crew leader or worker preferred by the employer provided the order meets ES nondiscrimination criteria. The order would not meet such criteria, for example, if it requested a "white male crew leader" or "any white male crew leader".

(g) Local offices, which serve a significant number of agricultural workers who are fluent and/or literate in Spanish but are not fluent or literate in English, shall us bilingual (English-Spanish) staff to assist such workers to understand the terms and conditions of intrastate and interstate job orders. Other local offices shall provide such workers with the same services if feasible, and/or, to the extent feasible, shall provide such workers with checklists in Spanish showing wage payment schedules, working conditions and other material specifications of the job order. As soon as it is administratively convenient, such checklists shall be amended to include the language of the first two sentences of § 653.108(b)(1) of this subpart.

(h) With respect to intrastate job orders, local offices with access to statewide Job Banks using microfiche viewers shall provide workers with a statement showing wage payment schedules, working conditions, and the other material specifications of the job order. If needed or requested by a worker, a local office, which serves a significant number of agricultural workers who are fluent and/or literate in Spanish but are not fluent or literate in English, shall provide such statements in Spanish. As soon as it is administratively convenient, such statements shall be amended to include the language of the first two sentences of § 653.108(b)(1) of this subpart.

§ 653.109 Changes in crop and recruitment situations.

The labor demand State agency, through the labor supply State agency, shall inform, as quickly as possible, crews and families scheduled through the ES clearance system that a crop is maturing earlier or later than expected or that other material factors including recruitment factors have changed so that the State agencies involved may adjust arrangements on behalf of such crews or families. If weather conditions, over-recruitment or other conditions have eliminated the scheduled job opportunities, the State agencies involved shall make every effort to refer the workers to alternate job opportunities.

§ 653.110 Field checks.

(a) State agencies, through their local offices or otherwise, shall conduct periodic, unannounced field checks on agricultural worksites to which MSFW referrals have been made through the intrastate or interstate clearance system to determine and document whether wages, hours, working and housing conditions are as specified in job orders. If State agency personnel find reason to believe that worksite conditions are not as stated or promised on the job order, the State agency shall follow the procedures set forth at subpart F of Part 658 of this Chapter. If State agency personnel find reason to believe that an employer is violating an employment-related law other than ES regulations, they shall report these findings to the local office manager and the local office manager shall refer the matter in writing to the appropriate Federal or State enforcement agency.

(b) State agencies, to the extent feasible, shall make formal or informal arrangements with appropriate State and Federal enforcement agencies, pursuant to which such agencies will agree to conduct periodic field checks on agricultural worksites to which the State agency has referred MSFWs and to inform the State agency if worksites conditions are not as stated or promised on the job order.

§ 653.111 State agency self-monitoring.

(a) State Directors shall assure that their State agencies monitor their own compliance with the regulations under this subpart on an ongoing basis. The State Director shall have overall responsibility for State agency self-monitoring.

(b) The State Director or State Administrator shall designate a State Monitor Advocate, who shall devote full-time to the duties of the State Monitor Advocate at the State office level unless the Administrator permits the use of a part-time State Monitor Advocate based upon documentary evidence submitted by the State agency showing a paucity of MSFWs and that the duties required of the State Monitor Advocate by ES regulations will be adequately performed by a part-time State Monitor Advocate. The State Monitor Advocate shall:

(1) Review or supervise all aspects of the monitoring;

(2) Participate in on-site local office formal monitoring reviews on a selective basis;

(3) Assure that local offices serving a significant number of MSFWs are reviewed on-site at least once a year, and that, if necessary, those local offices in which significant problems are revealed by required reports, management information, the ES complaint system or otherwise are reviewed as soon as possible;

(4) Participate in arranging cooperative agreements authorized under this subpart between the State agency and enforcement agencies;

(5) Maintain cooperative relationships with organizations involved in MSFW activities including employer organizations;

(6) Review State agency directives which are likely to have a significant impact on MSFWs; and

(7) Review State agency compliance with the data collection requirements of § 653.112 of this subpart.

(c) State agencies shall conduct on-site local office formal monitoring reviews to review services to MSFWs.

(1) Before beginning such a review, the reviewer(s) shall study the data on the local office in required reports and ES complaint system complaints originating from the local office.

(2) The monitoring review format, developed by ETA, shall be used by reviewers as a guideline when they conduct local office on-site formal monitoring reviews.

(3) Upon completion of a local office on-site formal monitoring review, the reviewer(s) shall hold one or more wrap-up sessions with the local office manager and staff to discuss any obvious findings and offer initial recommendations and appropriate technical assistance.

(4) After each review the reviewer(s) shall conduct an in-depth analysis of the review data. The conclusions and recommendations of the reviewer(s) shall be put in writing, shall be sent to the State Monitor Advocate, and shall then be discussed with the official of the State agency with line authority over the local office.

(5) If needed, the State agency shall develop a written corrective action plan. The plan shall direct the local office to correct or to make major steps to correct the problem pursuant to the plan within 30 days or if the plan allows for more than 30 days for full compliance, the length of, and the reasons for, the extended period shall be specifically stated.

(6) State agencies shall be responsible for assuring and documenting that the local office is in compliance within the time period designated in the plan. State agencies shall submit to the appropriate ETA regional offices summary data on the on-site local office formal monitoring reviews, along with a narrative statement of significant overall findings pursuant to ETA instructions.

§ 653.112 Data collection.

State agencies shall: (a) Collect data on MSFWs including data on the number registering for service, referred to jobs, placed in jobs, enrolled in training, receiving counseling, receiving job development, receiving testing, referred to supportive service, receiving some service, placed according to wage rates, and placed according to duration.

(b) Collect data on the number of MSFWs who were served as to whether they were male, female, black, Spanish-American or American Indian.

(c) Provide necessary training to State agency, including local office, personnel to assure accurate reporting of data;

(d) Collect, and submit to the ETA as directed by the ETA, data comparing the quantity and quality of services to MSFWs as compared to services for non-MSFWs; and

(e) Submit additional reports to the ETA at such times and containing such items as the ETA directs.

§ 653.113 Disclosure of data.

(a) State agencies shall disclose to the public, on written request, the data collected by State and local offices pursuant to § 653.112 of this subpart, if possible within 10 working days after receipt of the request.

(b) If a request for data which is held by a State agency is made to the ETA national or regional office, the ETA shall forward the request to the State agency for response by the State agency.

(c) If the requested data cannot be supplied within 10 working days of its receipt by the State agency, the State agency shall respond to the requestor in writing, giving the reason for the delay and specifying the date by which it expects to be able to comply.

(d) State agency intra-agency memoranda and reports (or parts thereof) and memoranda and reports (or parts thereof) between the State agency and the ETA, however, to the extent that they contain statements of opinion rather than facts, may be withheld from public disclosure provided this reason for withholding is given to the requestor in writing. Similarly, documents or parts thereof, which, if disclosed, would constitute an unwarranted invasion of personal or employer privacy, may also be withheld provided the reason is given to the requestor in writing.

§ 653.114 State agency staffing requirements.

State agencies shall assure that bilingual (English-Spanish) regular and outreach staff are assigned to every local office which serves a significant number of MSFWs whenever a substantial portion of such MSFWs are primarily fluent and/or literate in Spanish but are not fluent or literate in English. State agencies shall develop written affirmative action plans as part of their program budget plans to implement this requirement. State agencies shall also undertake affirmative action to recruit MSFWs and persons from MSFW backgrounds for their State agency staffs, and shall include a description of the specific efforts they are planning to make in their program budget plans.

§ 653.115 State agency program budget plans.

Each State agency, in its annual program budget plan, shall describe its plans to carry out the requirements of this subpart in the following year. For example, each State agency shall describe its proposed level of outreach activity, taking into consideration the amount of MSFW employment in the State, the State agency's level of resources, the extent of activities required by ES regulations for other applicants, and other relevant factors. The RA shall review the plan in light of the requirements of this subpart and shall make an initial written determination as to whether or not the program budget plan, including this part of the State agency program budget plan, is acceptable.

Subpart F—Discontinuance of Services to Employers by the Employment Service System

Sec.

658.500 Scope and purpose of subpart.
658.501 Informal resolution.
658.502 Discontinuation of services.

Subpart G—Review and Assessment of State Agency Compliance With Employment Service Regulations

658.600 Scope and purpose of subpart.
658.601 State agency responsibility.
658.602 ETA national office responsibility.
658.603 ETA regional office responsibility.
658.604 Assessment and evaluation of program performance data.
658.605 Communication of findings to State agencies.

Subpart H—Federal Application of Remedial Action to State Agencies

658.700 Scope and purpose of subpart.
658.701 State agency violations of ES regulations.
658.702 Initial action by the RA.
658.703 Disallowance of expenditures; corrective action plans.
658.704 Remedial actions.
658.705 Decision to decertify.
658.706 Notice of remedial action.
658.707 Requests for hearings.

Sec.
658.708 Hearings.
658.709 Conduct of hearings.
658.710 Decision of the Hearing Officer.
658.711 Decision of the Secretary.

Subpart E—Employment Service Complaint System

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.; 38 U.S.C. Chapters 41 and 42; unless otherwise noted.

§ 658.400 Purpose and scope of subpart.

This subpart sets forth the regulations governing the employment service complaint system at both the State and Federal levels.

§ 658.401 Types of complaints handled by the ES complaint system.

(a) The types of complaints which shall be handled by the ES complaint system (ES-related complaints) are as follows: (1) Complaints alleging an employer's failure to comply with ES regulations; and (2) Complaints by any individual, organization or employer about employment service actions or omissions under ES regulations.

(b) Complaints by veterans alleging employer violations of the mandatory listing requirements under 38 U.S.C. 2012 shall not be handled under this subpart. The State agency shall handle such complaints under the Department's regulations at 41 CFR Part 60–250.

(c) Complaints alleging employer violations of employment-related State or Federal laws other than ES regulations shall not be handled under the procedures set forth in this subpart. If a State agency or the ETA receives such a complaint, the State agency or ETA shall direct the complainant to the appropriate State or Federal enforcement agency. The State agency need not make a record of such referrals nor is any further action required.

STATE AGENCY ES COMPLAINT SYSTEM

§ 658.410 Establishment of State agency ES complaint systems.

(a) Each State agency shall establish and maintain an employment service complaints system pursuant to this subpart.

(1) State agencies shall ensure that centralized control procedures are established for the handling of complaints and files relating to the handling of those complaints.

(2) State agencies shall ensure that any action taken on a complaint by the responsible official is fully documented in a file containing such information as a copy of the original complaint form, copies of any related correspondence, and a log of related telephone calls.

(b) State agencies shall ensure that information pertaining to use of the complaint system is publicized. This shall include the prominent display of the approved ETA complaint system poster in each local office, satellite office, and at each State agency operated day-haul facility.

§ 658.411 State agency officials responsible for handling ES-related complaints.

(a) *State office level.* The State Director shall have overall responsibility for the operation of the State agency ES complaint system.

(1) The handling of all ES-related complaints received by the State office alleging unlawful discrimination by race, color, religion, national origin, sex, age, citizenship, physical or mental status unrelated to job performance (handicap), or veteran or non-veteran status shall be assigned to a State EEO representative. The handling of all other ES-related complaints received by the State office shall be assigned to a State Monitor Advocate designated by the State Administrator or State Director.

(2) The State Director shall assure that all ES-related complaints, and all correspondence relating thereto are logged with a notation of the nature of each item.

(b) *Local office level.* At the local office level, the local office manager shall be responsible for the overall operation of the ES complaint system. The local office manager shall assure that all ES-related complaints, and all correspondence relating thereto, are logged with a notation of the nature of each item.

(1) All ES-related complaints alleging unlawful discrimination as described in paragraph (a)(1) of this section shall be assigned to a local office EEO representative if the local office has a trained and designated EEO Representative, or, if the local office does not have such a Representative, shall be sent immediately to the State EEO Representative.

(2) All ES-related complaints from veterans, except those from veterans who are MSFW's and ES-related complaints from veterans alleging unlawful discrimination as discrimination as described in paragraph (a)(1) of this section shall be assigned to the Local Veterans' Employment Representative (LVER) if the local office has an LVER. If the local office does not have an LVER, such complaints shall be sent immediately to the State Monitor Advocate.

(3) All ES-related complaints other than those described in paragraphs (b)(1) and (2) of this section may be personally handled by the local office manager or may be assigned by the local office manager to another local office employee.

§ 658.412 Initial handling of complaints by the State or local office.

(a) Whenever any type of complaint by any individual, organization or employer is received by a State or a local office, the responsible official shall determine whether it is an ES-related complaint.

(b) If the complaint is not ES-related, the official shall refer the complainant to an attorney, consumer advocate, enforcement or other public agency or to other appropriate assistance. No written record need be made of such referrals, nor is any further action required.

(c) If the complaint is ES-related complaint, the official shall require the complainant to put the complaint in writing on the ES Complaint Form prescribed or approved by the ETA. The official shall offer to assist the complainant in filling out the form and shall do so if the complainant desires such assistance. If the complainant represents several complainants, all such complainants shall be named on the ES Complaint Form.

(1) The ES Complaint Form shall be used for all ES-related complaints, including complaints by veterans and complaints about discrimination.

(2) A copy of the completed ES Complaint Form shall be given to the complainant.

(d) Whenever an ES-related complaint deals with an employer in another State or another State agency, the State agency shall send the ES Complaint Form to the ETA Regional Office with jurisdiction over the State agency in which it was received for transmission to the other State agency. A copy of the referral letter shall be sent to the complainant.

§ 658.413 Action on ES-related complaints concerning employers.

(a) The State agency official, in handling an ES-related complaint against an employer, shall:

(1) Offer to assist the complainant through the provision of appropriate ES services, such as referral to another job; and

(2) With respect to the employer alleged to have violated ES regulations, follow the procedures set forth at Subpart F of this Part.

(b) The provisions of S 658.414–416 of this subpart are not applicable to ES-related complaints against employers.

§ 658.414 Action on ES-related complaints concerning the State agency.

(a) The State agency official who handles an ES-related complaint from an individual, organization or employer against the State agency shall: (1) Offer the complainant appropriate ES services; and (2) Investigate and attempt to informally resolve the complaint.

(b) If a local office official is attempting to informally resolve a complaint under this section, and if informal resolution has not been achieved within 15 working days, or five working days with respect to complaints by MSFWs, the local office official shall send the complaint to the State office and shall notify the complainant in writing of the referral.

(c) If a State office official is attempting to resolve a complaint under this section, and if informal resolution has not been accomplished within 30 working days (20 working days with respect to complaints by MSFWs) after its receipt by the State office (whether the complaint was received directly or from a local office pursuant to paragraph (b) of this section), the State office shall send a written notice to the complainant, with a copy to the RA, explaining why the complaint has not yet been resolved and offering the complainant a hearing before a State hearing official. The notice shall advise the complainant that the complainant must advise the State office in writing within 30 calendar days of the date of the notice, as to whether the complainant desires a hearing.

(d) If the State office, within 30 calendar days of the notice provided for in paragraph (c) of this section, receives a written request from a complainant, the State office shall refer the complaint to a State hearing official for hearing. The complainant shall then be notified in writing by the State office that:

(1) The complainant will be notified of the date, time and place of the hearing;

(2) The complainant will have opportunity to be represented at the hearing;

(3) The complainant may be represented at the hearing by an attorney or other representative;

(4) The complainant may bring witnesses and/or documentary evidence to the hearing;

(5) The complainant may cross-examine opposing witnesses at the hearing;

(6) The decision on the compaint will be based on the evidence presented at the hearing;

(7) The State hearing official may reschedule the hearing at the request of the complainant, the complainant's representative, or other party; and

(8) The complainant or the complainant's representative may withdraw the request for hearing in writing before the hearing.

§ 658.415 Hearings.

(a) Hearings shall be held by State hearing officials. A State hearing official may be any State official authorized to hold hearings under State law. Thus, they may be, for example, the same referees who hold hearings under the State unemployment compensation law and/or the Work Incentive Program or any official of the State agency, authorized by State law to preside at State administrative hearings.

(b) The State hearing official, upon the referral of a case for a hearing, shall:

(1) Notify all involved parties of the date, time and place of the hearing; and

(2) Re-schedule the hearing, as appropriate.

(c) In conducting a hearing the State hearing official shall:

(1) Regulate the course of the hearing;

(2) Issue subpoenas, if necessary;

(3) Assure that all relevant issues are considered;

(4) Rule on the introduction of evidence and testimony; and

(5) Take any other actions, consistent with due process, which are necessary to insure an orderly hearing.

(d) The testimony at the hearing shall be recorded and may be transcribed when appropriate.

(e) The parties shall be afforded the opportunity to present, examine, and cross-examine witnesses.

(f) The State hearing official may elicit testimony from witnesses, but shall not act as advocate for any party.

(g) The State hearing official shall receive, and make part of the record documentary evidence offered by any party and accepted at the hearing. Copies thereof shall be made available by the party submitting the document to other parties to the hearing upon request.

(h) The case record, or any portion thereof, shall be available for inspection and copying by any party at, prior to, or subsequent to the hearing upon request. Special procedures may be used for disclosure of medical and psychological records such as disclosure to a physician designated by the individual.

(i) The State hearing official shall, if feasible, resolve the dispute by conciliation at any time prior to the conclusion of the hearing.

§ 658.416 Decision of the State hearing official.

(a) The State hearing official may:

(1) Rule that the case is improperly before it, that is, that there is a lack of jurisdiction over the case;

(2) Rule that the complaint has been withdrawn in writing;

(3) Rule that reasonable cause exists to believe that the request has been abandoned or that repeated requests for re-scheduling are arbitrary and for the purpose of unduly delaying or avoiding a hearing; or

(4) Render such other rulings as are appropriate to the issues in question. However, the State hearing official shall not have jurisdiction to consider the validity or constitutionality of ES regulations or of the Federal statutes under which they are promulgated.

(b) Based on the entire record including any evidence provided at the hearing, the State hearing official shall prepare a written decision. The State hearing official shall send a copy of the decision stating the findings and conclusions of law and fact and the reasons therefor to the complainant, the State office, the RA, and the Solicitor of Labor Attn: Associate Solicitor for Employment and Training Legal Services, Department of Labor, Room N2101, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

(c) All decisions of a State hearing official shall be accompanied by a written notice informing the complainant that, if the complainant is not satisfied, the complainant may, within 30 calendar days of the date of the decision, file a complaint in writing with the RA. The notice shall give the address of the RA.

FEDERAL ES COMPLAINT SYSTEM

§ 658.420 Establishment of ES complaint system at the ETA regional office.

(a) Each RA shall establish and maintain an ES complaint system at the DOL regional office level.

(b) The RA shall designate DOL officials to handle ES-related complaints as follows:

(1) The handling of all ES-related complaints alleging discrimination by race, color, religion, national origin, sex, age, citizenship, physical or mental status unrelated to job performance (handicap), or veteran or non-veteran status shall be assigned to a Regional Equal Employment Opportunity Representative (REEOR);

(2) The handling of all ES-related complaints from veterans, except from veterans who are MSFWs, and complaints from veterans about discrimination as described in paragraph (b)(1) of this section shall be assigned to the Regional Veterans' Employment Representative (RVER);

(3) The handling of all ES-related complaints other than those described in paragraphs (b)(1) and (2) of this section, shall be assigned to a Regional Monitor Advocate.

(c) The RA shall assure that all ES-related complaints and all correspondence relating thereto are logged, with a notation of the nature of each item.

§ 658.421 Handling of complaints by the RA.

(a) No ES-related complaint, shall be handled at the ETA regional office level until the complainant has exhausted the State agency administrative remedies set forth at SS 658.410–416 of this subpart. Therefore, if the RA determines that any complainant, who has filed an ES-related complaint with the regional office, has not yet exhausted the administrative remedies at the State agency level, the RA shall inform the complainant in writing that the complainant must first exhaust those remedies before the complaint may be filed in the regional office. A copy of this letter shall be sent to the State Director.

(b) Upon receipt of a complaint by the RA after the exhaustion of State agency administrative remedies, the RA shall send for the complete State agency file, including the original *ES Complaint Form*.

(c) The RA shall review the file in the case and shall determine whether any further investigation or action is appropriate.

(d) If the RA determines that no further action is warranted, the RA shall send this determination in writing to the complainant, and may offer the complainant a hearing before a DOL Hearing Officer provided the complainant requests such a hearing in writing from the RA within 30 calendar days of the date of the RA's offer of hearing.

(e) If the RA determines that further investigation or other action is warranted, the RA shall undertake such an investigation, informal resolution or other action.

(f) If the RA finds reason to believe that an employer has violated ES regulations, the RA shall direct the State agency to follow the procedures set forth at Subpart F of this Part.

(g) If the RA finds reason to believe that a State agency or one of its local offices has violated ES regulations, the RA shall follow the procedures set forth at Subpart H of this Part.

(h) If the complaint is not resolved to the complainant's satisfaction, the RA may offer the complainant in writing a hearing before a DOL Hearing Officer provided the complainant requests such a hearing in writing from the RA within 30 calendar days of the date of the RA's offer of hearing.

(i) If the complainant requests a hearing pursuant to paragraphs (d) or (h) of this section the RA shall:

(1) Send the complainant a written notice containing the statements set forth at § 658.414(d) of this subpart;

(2) Compile four hearing files containing copies of all documents relevant to the case, indexed and compiled chronologically;

(3) Send simultaneously one hearing file to the DOL Chief Administrative Law Judge, 1111 20th Street, N.W., Washington, D.C. 20036, one hearing file to the ETA national office, and one hearing file to the Solicitor of Labor, Attn: Associate Solicitor for Employment and Training, and retain one hearing file.

(j) Upon the receipt of a hearing file, the DOL Hearing Officer designated by the Chief Administrative Law Judge shall notify the complainant, the State agency, the RA, the Administrator, and the Solicitor of the receipt of the case and shall afford them 30 days to submit written evidence and/or legal arguments in the case. After the 30 days elapse, the Hearing Officer shall schedule a hearing.

§ 658.422 Hearings.

(a) The DOL Hearing Officer shall:

(1) Notify all involved parties of the date, time and place of the hearing; and

(2) Re-schedule the hearing, as appropriate.

(b) In conducting a hearing the DOL Hearing Officer shall:

(1) Regulate the course of the hearing;

(2) Issue subpoenas if necessary;

(3) Consider all relevant issues which are raised;

(4) Rule on the introduction of evidence and testimony;

(5) Take any other action, consistent with due process, which is necessary to insure an orderly hearing.

(c) The testimony at the hearing shall be recorded, and shall be transcribed if appropriate.

(d) The parties to the hearing shall be afforded the opportunity to present, examine, and cross-examine witnesses.

(e) The DOL Hearing Officer may elicit testimony from witnesses, but shall not act as advocate for any party.

(f) The DOL Hearing Officer shall receive, and make part of the record, documentary evidence offered by any party and accepted at the hearing. Copies thereof shall be made available by the party submitting the documentary evidence, to any party to the hearing upon request.

(g) The case record, or any portion thereof, shall be available for inspection and copying by any party to the hearing at, prior to, or subsequent to the hearing upon request. Special procedures may be used for disclosure of medical and psychological records such as disclosure to a physician designated by the individual concerned.

(h) The DOL Hearing Officer shall, if feasible, encourage resolution of the dispute by conciliation at any time prior to the conclusion of the hearing.

§ 658.423 Decision of the DOL Hearing Officer.

(a) The DOL Hearing Officer may:

(1) Rule that there is a lack of jurisdiction over the case;

(2) Rule that the complaint has been withdrawn in writing;

(3) Rule that reasonable cause exists to believe that the request has been abandoned or that repeated requests for re-scheduling are arbitrary and for the purpose of unduly delaying or avoiding a hearing; or

(4) Render such other rulings as are appropriate to the issues in question. However, the Hearing Officer shall not have jurisdiction to consider the validity or constitutionality of ES regulations or of the Federal statutes under which they are promulgated.

(b) Based on the entire record including any evidence provided at the hearing, the DOL Hearing Officer shall prepare a written decision. The DOL Hearing Officer shall send a copy of the decision stating the findings and conclusions of law and fact and the reasons therefor to the complainant, the State office, the RA, the Administrator, and the Solicitor.

(c) The decision of the Hearing Officer shall be the final decision of the Secretary.

Subpart F—Discontinuation of Services to Employers by the Employment Service System

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq., unless otherwise noted.

§ 658.500 Scope and purpose of subpart.

This subpart contains the regulations governing the discontinuation of services to employers by the employment service system.

§ 658.501 Informal resolution.

(a) Whenever a State agency receives a complaint filed under subpart E of this Part which alleges that an employer has violated ES regulations, and whenever a local office manger or higher State official has reason to believe that an employer has violated ES regulations, a State agency official shall attempt to informally resolve the issue with the employer. If the issue cannot be resolved within 30 calendar days, the State agency official shall refer the matter in writing to the State Director for formal investigation.

(b) The employer shall be notified in writing of the outcome of the State agency investigation. If the case arose through a complaint filed under the ES complaint system at subpart E of this Part, the complainant shall also be notified in writing of the outcome of the investigation. The notice shall also state that, if the complainant is not satisfied, the complainant may file a complaint with the RA. If the State Director determines that a violation of ES regulations has occurred, the employer shall be notified in writing of the determination, the reasons therefor, and that termination of all the ES services to the employer will be initiated in 30 calendar days unless the employer provides conclusive, documented evidence within the 30 day period that it is not in violation or that the violation has been corrected. Notices under this paragraph shall inform the employer that State agency personnel will be available to assist in resolving the dispute during the 30 day period.

§ 658.502 Discontinuation of services.

(a) If the issue has not been resolved within the 30 calendar days described in § 658.501 of this subpart, the State Director shall send a written notice to the employer that all services will be terminated in 15 calendar days unless within that period the employer requests a hearing by mailing a written request for hearing to the State Director, or unless within that period the employer provides conclusive, documented evidence that the violation has been corrected or that the violation does not exist.

(b) Unless otherwise provided in ES regulations, if the employer fails to request a hearing or has not given adequate evidence of correction or non-existence of the violation within the 15 calendar day period, all ES services to the employer shall be terminated until such time as the employer provides conclusive, documented evidence that the violation has been corrected or does not exist.

(c) If the employer makes a timely request for a hearing, the State agency shall follow the procedures set forth at § 658.415–416 of this Part.

Subpart G—Review and Assessment of State Agency Compliance With Employment Service Regulations

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.; 5 U.S.C. 301 et seq.

§ 658.600 Scope and purpose of subpart.

This subpart sets forth the regulations governing review and assessment of State agency compliance with the Employment Service regulations at 20 CFR Parts 601, 602, 603, 604, 620, 621, 651–658 and 29 CFR Part 8.

§ 658.601 State agency responsibility.

(a) Each State agency shall establish and maintain a State agency Self-Appraisal System pursuant to ETA standards, and shall use this system to evaluate and assess its ES program, and to assure its compliance with ES regulations.

(b) Each State Director and local office manager shall assure that their staffs know and carry out ES regulations, including regulations on performance standards and program emphases, and any corrective action plans imposed by the State agency or by the ETA.

(c) Each State Director shall assure that the State agency complies with its approved program budget plan.

(d) Each State Director shall assure to the maximum extent feasible the accuracy of data entered by the State agency into ETA required management information systems. Each State agency shall establish and maintain a data validation system pursuant to ETA instructions. The system shall review every local office at least once every four years. The system shall include the validation of time distribution reports and the review of data gathering procedures.

§ 658.602 ETA national office responsibility.

The ETA national office shall: (a) Monitor ETA regional offices' carrying out of ES regulations;

(b) From time to time, conduct such special reviews and audits as necessary to monitor ETA regional office and State agency compliance with ES regulations;

(c) Offer technical assistance to the ETA regional offices and State agencies in carrying out ES regulations and programs;

(d) Have reports validation surveys conducted in support of resource allocations;

(e) Develop tools and techniques for reviewing and assessing State agency performance and compliance with ES regulations; and

(f) Assign to a National Monitor Advocate the responsibility to:

(1) Develop and maintain monitoring and evaluating instruments for monitoring the delivery of services to migrant and seasonal farmworkers (MSFWs);

(2) Develop and maintain instruments for monitoring and assessing the ES complaint system set forth at Subpart E of this Part;

(3) Provide technical assistance to ETA regional office and State agency staffs for administering the ES complaint system; and

(4) As appropriate, participate in reviews of State agency performance and monitoring reports with respect to services for MSFWs and the ES complaint system.

§ 658.603 ETA regional office responsibility.

(a) The RA shall have responsibility for the regular review and assessment of State agency performance and compliance with ES regulations.

(b) The RA shall review and initially approve annual program budget plans for the State agencies within the region. In reviewing the program budget plans the RA shall consider relevant factors including the following:

(1) State agency compliance with ES regulations;

(2) State agency performance against the goals and objectives established in the previous year's program budget plan;

(3) The effect which economic conditions and other external factors considered by the ETA in the resource allocation process may have had or are expected to have on State agency performance;

(4) State agency adherence to national program emphasis; and

(5) The adequacy and appropriateness of the program budget plan for carrying out ES programs.

(c) The RA shall assess the overall performance of State agencies on an ongoing basis through desk reviews and the use of required reporting systems and other available information.

(d) As appropriate, RAs shall conduct or have conducted:

(1) Comprehensive on-site reviews of State agencies and their offices to review State agency organization, management, and program operations;

(2) Periodic performance reviews of State agency operation of ES programs to measure actual performance against the program budget plan, past performance, the performance of other State agencies, etc.;

(3) Audits of State agency programs to review State agency program activity and to assess whether the expenditure of grant funds has been in accordance with the approved budget. RAs may also conduct audits through other agencies or organizations or may require the State agency to have audits conducted;

(4) Validations of data entered into management information systems to assess;

(i) The accuracy of data entered by the State agencies into management information system;

(ii) Whether the State agencies' data validating and reviewing procedures conform to ETA instructions; and

(iii) Whether State agencies have implemented any corrective action plans required by the ETA to remedy deficiencies in their validation programs;

(5) Technical assistance programs to assist State agencies in carrying out ES regulations and programs; and

(6) Reviews to assess whether the State agency has complied with corrective action plans imposed by the ETA or by the State agency itself.

(e) The RA shall provide technical assistance to State agencies to assist them in carrying out ES regulations and programs;

(f) Each RA shall designate a Regional Monitor Advocate who shall:

(1) Have primary responsibility at the ETA regional level for monitoring the effectiveness of the ES complaint system set forth at Subpart E of this Part, apprising appropriate State and ETA officials of problems with respect to the complaint system, and providing technical assistance to State Monitor Advocates, as appropriate; and

(2) With respect to State agencies' services to MSFWs, provide input to regional reviews of State agency program budget plans, monitor and evaluate State agency services to MSFWs, and participate in on-site local office formal monitoring reviews, as appropriate.

§ 658.604 Assessment and evaluation of program performance data.

(a) State agencies shall compile program performance data required by ETA including statistical information on program operations.

(b) The ETA shall use the program performance data in assessing and evaluating whether the State agencies have complied with ES regulations and their State agency program budget plans.

(c) In assessing and evaluating program performance data, the ETA shall act in accordance with the following general principles:

(1) The fact that the program performance data from a State agency, whether overall or relative to a particular program activity, indicate poor program performance is not in itself a breach of ES regulations or of the State agency's responsibilities under its State agency program budget plan;

(2) Program performance data, however, may so strongly indicate that a State agency's performance is poor that the data may raise a presumption (prima facie case) that a State agency is violating ES regulations or the State agency program budget plan. In such cases, the ETA shall afford the State agency an opportunity to rebut the presumption of poor performance pursuant to the procedures at Subpart H of this Part.

(3) The ETA shall take into account that certain program performance data may measure items over which State agencies have direct or substantial control while other data may measure items over which the State agency has indirect or minimal control.

(i) Generally, for example, a State agency has direct and substantial control over the delivery of employment services such as referrals to jobs, job development contacts, applicant counseling and referrals to supportive services.

(ii) State agencies, however, have only indirect control over the outcome of services. State agencies, for example, cannot guarantee that an employer will hire a referred applicant, nor can they guarantee that the terms and conditions of employment will be as stated on a job order.

(iii) Outside forces, moreover, such as a sudden heavy increase in unemployment rates, a strike by State agency employees, or a severe drought or flood may skew the results measured by program performance data;

(4) The ETA shall consider a State agency's failure to keep accurate and complete program performance data required by ES regulations as a breach of the ES regulations.

§ 658.605 Communication of findings to State agencies.

(a) The RA shall inform State agencies in writing of the results of review and assessment activities and, as appropriate, shall discuss with the State Administrator and the State Director the impact or action required by ETA as a result of review and assessment activities.

(b) The ETA national office shall transmit the results of any review and assessment activities conducted by it to the RA, who shall send the information to the State agency.

(c) Whenever the review and assessment indicates a State agency violation

of ES regulations or of its State agency program budget plan, the RA shall follow the procedures set forth at Subpart H of this Part.

(d) RAs shall follow-up any corrective action plan imposed on a State agency under Subpart H of this Part by further review and assessment of the State agency pursuant to this subpart.

Subpart H—Federal Application of Remedial Action to State Agencies

AUTHORITY: Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.; 5 U.S.C. 301 et seq.

§ 658.700 Scope and purpose of subpart.

This subpart sets forth the procedures which ETA shall follow when State agencies are not adhering to ES regulations.

§ 658.701 State agency violations of ES regulations.

It is the policy of the Employment and Training Administration (ETA) to receive information concerning alleged violations by State agencies of the ES regulations at 20 CFR Parts 601–604, 620, 621, and 651–658 and at 29 CFR Part 8 from any person or organization.

§ 658.702 Initial action by the RA.

(a) Whenever an RA discovers or is apprised of possible State agency violations of ES regulations by the review and assessment activities under subpart G of this Part, required reports, or complaints from individuals, organizations or employers which are filed with ETA after the exhaustion of State agency administrative remedies, the RA shall investigate the matter. If the matter concerns a possible violation of ES regulations by a local office, the RA may refer the matter to the State Director for investigation with instructions that the State Director report the results of the investigation to the RA within a specified time.

(b) When the RA review and/or the investigation is complete, the RA shall prepare written initial findings. If the RA determines that there is no probable cause to believe that a State agency has violated ES regulations, the RA need take no further action. If the RA determines that there is probable cause to believe that a State agency has violated ES regulations, the RA shall follow the procedures set forth in § 658.703 of this subpart.

§ 658.703 Disallowance of expenditures; corrective action plans.

Whenever the RA, in the written initial findings, finds probable cause to believe that a State agency has violated ES regulations, the RA shall send the findings to the State agency, giving the reasons therefor. The State agency shall have 20 working days to comment on the findings, or a longer period if the RA determines that such a longer period is appropriate. After the period elapses, the RA shall prepare written final findings. If, in the final findings, the RA determines that the State agency has not violated ES regulations, the RA need take no further action. If the RA determines that a State agency has violated ES regulations:

(a) If the matter involves the misspending of grant funds, the RA may issue a disallowance of the expenditure and may either demand repayment or withhold future funds in the amount in question. If the RA disallows costs, the RA shall send a written notice of disallowance by registered mail, to the State agency, giving the reasons for the disallowance, informing the State agency that the disallowance is effective immediately and that no more funds may be spent in the unallowed manner, and offering the State agency the opportunity to request a hearing pursuant to § 658.707 of this subpart. The offer, or the acceptance of an offer of a hearing, however, shall not stay the effectiveness of the disallowance.

(b) If the violation does not involve mis-spending of grant funds or the RA judges that the circumstances warrant other action:

(1) The RA shall notify the State agency by registered mail of the specific violation(s) and shall direct the State agency to implement a specific corrective action plan to correct all violations within a specified time. The specified time period shall commence with the date of signature on the registered mail receipt.

(2) When the time period provided for in paragraph (b)(1) of this section elapses, ETA staff shall review the State agency's efforts by follow-up visit or otherwise.

(3) If the RA determines that the State agency has corrected the violation(s), the RA need take no further action except to document that fact.

(4) If the State agency has not corrected the violation(s) and has not made good faith efforts and adequate progress to that end, the RA shall apply remedial actions to the State agency pursuant to § 658.704 of this subpart.

(5) If adequate progress has been made toward correcting the violation(s) so that it appears that the violation(s) will be fully corrected within a reasonable time period, the State agency shall be advised by registered mail of this conclusion, of remaining deficiencies, of further needed corrective action, and that all deficiencies must be corrected within a specified new time period beginning with the date of signature on the receipt.

(6) If the State agency has been given an additional time period pursuant to paragraph (b)(5) of this section, ETA staff shall review the State agency's efforts at the end of the time period by follow-up visit or otherwise. If the State agency has corrected the violation(s), no further action, except to document the fact, need be taken by the RA. If the State agency has not corrected the violation(s), the RA shall apply remedial actions to the State agency pursuant to § 658.704 of this subpart.

§ 658.704 Remedial actions.

If a State agency fails to carry out a corrective action plan imposed under § 658.703 of this subpart, the RA shall apply one or more of the following remedial actions to the State agency:

(a) Imposition of special reporting requirements for a specified period of time;

(b) Restrictions of obligational authority within one or more expense classifications;

(c) Implementation of specific operating systems or procedures for a specified time;

(d) Requirement of special training for State agency personnel;

(e) With the approval of the Assistant Secretary and after affording the State Administrator or State Director the opportunity to request a conference with the Assistant Secretary, elevation of specific decision making functions from the State Director to the RA and/or imposition of Federal staff in key State agency positions;

(f) Funding of the State agency on a quarterly or other short-term basis;

(g) With the approval of the Assistant Secretary and after affording the State Administrator or State Director the opportunity to request a conference with the Assistant Secretary, withholding of funds for a specific function or for a specific geographical area;

(h) Holding of public hearings in the State on the State agency's deficiencies;

(i) Disallowance of funds pursuant to § 658.703(a) of this subpart; or

(j) If the matter is a serious or a continual violation, formal designation of the State agency as out of compliance with ES regulations and initiation of decertification procedures against the State agency. The RA shall initiate decertification by notifying the State agency by registered mail that decertification may be forthcoming, stating the reasons therefor. Whenever such a notice is sent to a State agency, the RA shall prepare five indexed copies containing, in chronological order, all the documents pertinent to the case. One copy shall be retained. Three shall be sent to the ETA national office, and one shall be sent to the Solicitor of Labor, Attention: Associate Solicitor for Employment and Training.

§ 658.705 Decision to decertify.

(a) Upon receipt of a request for decertification, the Assistant Secretary for Employment and Training shall review the case and shall decide whether decertification is appropriate.

(b) If the Assistant Secretary decides that decertification is not appropriate, the Assistant Secretary, if appropriate, shall instruct that an alternate remedial action or actions be applied.

(c) If the Assistant Secretary decides that decertification is appropriate, the Assistant Secretary shall submit the case to the Secretary giving the reasons for the recommendation of decertification. The Secretary shall then decide whether decertification is appropriate or whether other remedial actions should be applied.

§ 658.706 Notice of Remedial Action.

(a) Whenever a decision has been made to apply a remedial action to a State agency, the RA, or the Secretary in cases of decertification, shall send a *Notice of Remedial Action* to the State agency by registered mail.

(b) If the remedial action is decertification, the notice shall state that the decertification will take effect in 30 calendar days unless the State agency requests a hearing in writing by filing the request for hearing pursuant to § 658.707 of this subpart with the Secretary within 30 calendar days of the State agency's receipt of the notice. If a timely request for hearing is filed, decertification shall be stayed pending the outcome of the hearing procedures.

(c) If the remedial action is other than decertification, the notice shall state that the remedial action shall take effect immediately. The notice shall also state that the State agency may request a hearing pursuant to § 658.707 of this subpart by filing a request in writing with the RA pursuant to § 658.707 of this subpart within 30 calendar days of the State agency's receipt of the notice. The offer of hearing, or the acceptance thereof, however, shall not stay the implementation of the remedial action.

(d) The *Notice of Remedial Action* shall set forth the reasons for the remedial action.

§ 658.707 Requests for hearings.

(a) Any State agency which received a *Notice of Remedial Action* under § 658.706 of this subpart or a notice of disallowance under § 658.703 of this subpart may request a hearing on the issue by filing a written request for hearing with the RA (or Secretary in cases of decertification) within 30 calendar days of receipt of the *Notice of Remedial Action* or notice of disallowance stating the reasons the State agency believes the bases of the decision to be wrong, and signed by the State Director or State Administrator.

(b) When an RA receives a request for hearing from a State agency, the RA shall make five indexed and tabulated copies of a file containing, in chronological order, all materials and correspondence relevant to the case. The RA shall retain one file and sent two copies of the appeal file to the ETA national office, one to the Solicitor of Labor, Attention: Associate Solicitor for Employment and Training, and one to the Chief Administrative Law Judge of the Department of Labor.

(c) In decertification cases, the Administrator shall send a copy of the file to the Chief Administrative Law Judge.

§ 658.708 Hearings.

(a) Upon receipt of a hearing file by the Chief Administrative Law Judge, the case shall be docketed and notice sent by registered mail, return receipt requested, to the Solicitor of Labor, Attention: Associate Solicitor for Employment and Training, the Administrator, the RA and the State Director. The notice shall set a time, place and date for a hearing on the matter and shall advise the parties that:

(1) They may be represented at the hearing;

(2) They may present oral and documentary evidence at the hearing;

(3) They may cross-examine opposing witnesses at the hearing; and

(4) They may request re-scheduling of the hearing if the time, place or date set are inconvenient.

(b) The Solicitor of Labor or the Solicitor's designee shall represent the Department at the hearing.

§ 658.709 Conduct of hearings.

(a) The hearing shall be conducted in accordance with Sections 5–8 of the Administrative Procedure Act, 5 U.S.C. 553 et seq.

(b) Technical rules of evidence shall not apply, but rules or principles designed to assure production of the most credible evidence available, and to subject testimony to test by cross-examination, shall be applied if necessary by the Hearing Officer conducting the hearing. The Hearing Officer may exclude irrelevant, immaterial or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties. Opportunity shall be given to refute facts and arguments advanced on either side of the issue. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record.

(c) The general provisions governing discovery as provided in the Rules of Civil Procedure for the United States District Court, Title V, 28 U.S.C., Rules 26 through 37, may be made applicable to the extent that the Hearing Officer concludes that their use would promote the proper advancement of the hearing.

(d) When a public officer is a respondent in a hearing in an official capacity and during its pendency dies, resigns, or otherwise ceases to hold office, the proceeding does not abate and the officer's successor is automatically substituted as a party. Proceedings following the substitution shall be in the name of the substituted party, but any misnomer not affecting the substantive rights of the parties shall be disregarded. An order of substitution may be entered at any time, but the omission to enter such an order shall not affect the substitution.

§ 658.710 Decision of the Hearing Officer.

(a) The Hearing Officer shall have jurisdiction to decide all issues of fact and related issues of law and to grant or deny appropriate motions, but shall not have jurisdiction to decide upon the validity of Federal statutes or regulations.

(b) The decision of the Hearing Officer shall be based on the hearing record, shall be in writing and shall state the factual and legal bases of the decision.

(c) Except when the case involves the decertification of a State agency, the decision of the Hearing Officer shall be the final decision of the Secretary.

(d) If the case involves the decertification of a State agency, the decision of the Hearing Officer shall contain a notice stating that, within 30 calendar days of the decision, the State agency or the Administrator may appeal to the Secretary by sending by registered mail, return receipt requested, a written appeal to the Secretary, care of the Hearing Officer who made the decision.

§ 658.711 Decision of the Secretary.

(a) Upon the receipt of an appeal to the Secretary, the Hearing Officer shall certify the record in the case to the Secretary, who may take additional evidence, provided time to rebut such new evidence is given to the opposing party, or who may make a decision to decertify or not on the basis of the hearing record.

(b) The decision of the Secretary shall be final, shall be in writing, and shall set forth the factual and legal bases for the decision.

Signed at Washington, D.C. this 19th day of January, 1977.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

CONDOMINIUM DOCUMENTATION

Statement of Proposed Policies

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Consumer Affairs and Regulatory Functions

[Docket No. N-77-684]

CONDOMINIUM DOCUMENTATION

Statement of Proposed Policies

INTRODUCTION

In August, 1975, the U.S. Department of Housing and Urban Development (HUD) organized a Condominium Task Force composed of HUD, Veterans Administration (VA), Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC). This action was taken as a result of a Congressionally-mandated study of condominiums and cooperatives which HUD completed in 1975. The study had identified that a major problem confronting consumers, builders, lenders and others was a lack of uniformity in legal and underwriting policies for condominium mortgages insured, guaranteed, or purchased by the four Task Force members. The purpose of the Task Force was to maximize agreement on condominium requirements by the four organizations. It is hoped that the development of more uniform policies among the member organizations will facilitate the purchase, insurance or guarantee of condominium mortgages for those desiring to utilize the services of the member organizations, with resulting direct or indirect benefits for the public.

The U.S. Department of Housing and Urban Development, in its capacity as chair of the Condominium Task Force, publishes for public comment the Task Force's first major document: "Statement of Proposed Policies Relating to Condominium Documentation".

The members of the Task Force intend, through publication of these proposed policies, to reach the broadest possible spectrum of the public, and strongly encourage comment by all interested parties.

TASK FORCE APPROACH

The Task Force is organized into two standing committees. The first, the Legal Committee, deals with matters of legal significance pertaining to insuring, guaranteeing, or purchasing mortgages on condominium units. Most of the matters addressed in this initial statement relate to provisions usually contained in the condominium Decraration or equivalent recorded instrument. It is planned that the Legal Committee next consider issues arising from the application of the present requirements of the member organizations to resales of existing units.

The second committee, the Risk Determination Committee, is charged with seeking maximum agreement among the four members on such risk determination issues as appraisal requirements, architectural considerations and mortgage credit conditions.

It is contemplated that each committee will follow the same general process of issue analysis and development of proposed policies and that on the basis of preliminary agreements reached among the members, public comment will be sought. Following receipt of the comments the member organizations will reconsider the proposed policies and make such changes in their programs as they believe advisable. For example, if the comments do not suggest any sound reasons for not doing so, HUD intends to discontinue requiring use of its model forms for condominium organization. It is contemplated that this process will be an on-going mode of operation for the Task Force.

The applicable regulations and related publications of the Department of Housing and Urban Development and the Veterans Administration and the basic contracts and guides of the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation should be consulted for a complete statement of the respective policies of the Task Force member organizations governing their approval of condominiums or unit mortgages.

STATEMENT OF PROPOSED POLICIES FOR CONDOMINIUM DOCUMENTATION

The Task Force considered those elements which should be included in the basic condominium instruments, primarily the Declaration, in order for those instruments to be acceptable to the participants.

The Statement of Proposed Policies represents the current consensus by the four member organizations as to many provisions of legal significance relating to condominium documentation; however, these provisions do not necessarily represent existing policies of the organizations.

This document is not a complete list of legal documentation policies for condominiums. Each member organization is willing to accept the proposed policies as maximum requirements for proposed condominiums or partially sold or completed condominiums where the documents are capable of being amended, leaving to each organization the right to accept a provision less stringent for both proposed or existing units. A condominium document that contains less stringent requirements, though, while acceptable to one organization, may not be acceptable to others. In addition to the proposed policies, each organization has companion policies in complementary areas.

The members also recognize that State laws differ as to the way they treat certain provisions and as to which documents must contain specific provisions. Therefore, the members agree that treatment of the provisions found in the Statement of Proposed Policies is subject to the law of the jurisdiction within which the condominium is located. The Task Force has kept in mind advances in State legislation and the development of a proposed Uniform Condominium Act by the National Conference of Commissioners on Uniform State Laws. The Task Force is also concerned with the issue of adequate disclosure of information to interested parties.

Comments are invited on any topic in the Statement of Proposed Policies or any other topic which falls within the jurisdiction of the Task Force. Suitable justification should be included.

Comment is particularly invited on the subject of condemnation and staged, phased, or expandable developments. Comments on insurance requirements for condominiums from the perspective of the mortgage holder, unit owner, and owners association are also invited.

Comments are also invited on what, if any, additional provisions should be contained in the basic organizational documentation for condominiums.

Comments received prior to April 1, 1977, will be considered by the Task Force members as they re-evaluate the proposed statement. Comments are to be sent to the Rules Docket Clerk, Department of Housing and Urban Development, Room 10141, Washington, D.C. 20410. Comments received will be distributed by HUD to all members of the Task Force.

STATEMENT OF PROPOSED POLICIES RELATING TO CONDOMINIUM DOCUMENTATION

1. Types of condominiums.
2. Estate of unit owner.
3. Condominium documentation:
(a) Compliance with local law; (b) Recordation; (c) Availability.
4. Property description.
5. Declarant's rights and restrictions:
(a) Acts and reserved rights which are usually unacceptable; (b) Reserved rights which are usually acceptable.
6. Transfer of control for single phased condominium regimes.
7. Owners association's rights and restrictions:
(a) Right of entry upon units and common elements; (b) Assessments:
(i) Levy and collection; (ii) Reserves and working capital; (iii) Priority of lien.
8. Unit owners' rights and restrictions:
(a) Obligation to pay expenses; (b) Ingress and egress of unit owners; (c) Easements for encroachments—units and common elements; (d) Right of first refusal; (e) Leasing restrictions.
9. First lien holders' rights:
(a) Notices of action; (b) Inspection of association books and records.
10. Amendment to documents.
11. Condemnation.
12. Rights of action.
13. Staged, phased or expandable developments.

1. TYPES OF CONDOMINIUMS

The following types of basic ownership arrangements are generally acceptable provided they are established in compliance with the condominium enabling statute of the applicable jurisdiction:

(a) Ownership of units by individual owners coupled with an undivided interest in all common elements.

(b) Ownership of units by individual owners coupled with an undivided interest in general common elements and specified limited common elements.

The agencies and corporations will consider for approval, on an individual case basis, an arrangement involving ownership of units by individual owners coupled with an undivided interest in the general common elements and/or limited common elements, with title to additional property for common use vested in an association of unit owners, where such a configuration of ownership is not precluded by the applicable condominium enabling statute. As to this type of ownership arrangement, in addition to compliance with the requirements of the organizations' respective condominium programs there must be compliance with the applicable requirements of the organizations' respective planned unit development (PUD) programs.

The above description of types of ownership arrangements are not intended to exclude other variations. Other forms of ownership may be acceptable, on an individual case basis, to any or all of the agencies and corporations.

2. ESTATE OF UNIT OWNER

The legal estate of each unit owner must generally be held in fee simple or acceptable leasehold estate. The acceptability of leasehold estates varies among the member organizations.

3. CONDOMINIUM DOCUMENTATION

(a) *Compliance with local law.* The declaration, by-laws and other regime enabling documentation shall conform to the condominium enabling statutes governing the establishment and maintenance of condominium regimes within the jurisdiction in which the condominium is located, and to all other laws which apply to each condominium.

(b) *Recordation.* The declaration and all amendments or modifications thereof shall be placed of record in the manner prescribed by the appropriate jurisdiction. If recording of plats, plans, by-laws or equivalent documents and all amendments or modifications thereof is the prevailing practice or is required by law within the jurisdiction where the project is located, then such documents shall be placed of record. If the by-laws are not recorded, then covenants, restrictions and other matters requiring record notice should be contained in the Declaration or equivalent document.

(c) *Availability.* During normal business hours or under other reasonable circumstances, the owners association shall have available for inspection by owners, lenders and prospective purchasers, current copies of the declaration, by-laws and other rules govering the operation of the condominium regime.

4. PROPERTY DESCRIPTION

The description of the units, the common elements, any recreational facilities and other amenities appurtenant to the condominium, and any limited common elements shall be clear and unambiguous and in conformity with the law of the jurisdiction where the project is located.

There must be no ambiguity concerning responsibility for maintenance and repair of any portion of the condominium.

5. DECLARANT'S RIGHTS AND RESTRICTIONS

Any rights reserved by the declarant shall be reasonable and consistent with the overall plan.

(a) *Acts and reserved rights which are usually unacceptable.* The following actions on the part of the declarant, the developer, an affiliate of the declarant, the sponsor of a project, or any other party, (collectively referred to as "declarant") usually would be unacceptable:

(1) Reserving the right to include in the condominium adjoining land without adequate restrictions assuring that its future improvement will be of compatible style, quality, size and cost.

(2) Retaining rights, without adequate restrictions, to change the style, floor plan, size and quality of future buildings to be constructed as part of the condominium projects.

(3) Binding the owners association to any contract or lease which is not bona fide or which is not commercially reasonable to the unit owners at the time entered into under the circumstances then prevailing.

(4) Binding the owners association to any of the following agreements unless the owners association shall have a right of termination thereof which is exercisable at any time without penalty upon not more than 90 days' notice to the other party thereto:

(a) Any management contract, employment contract or lease of recreational or parking areas or facilities;

(b) Any contract or lease, including franchises and licenses, to which a declarant is a party.

As used in the foregoing, "affiliate of a declarant" shall mean any person who controls, is controlled by, or is under common control with, a declarant. A person shall be deemed to control a declarant if that person is a partner, officer, director, or employee of the declarant or if that person directly or indirectly or acting in concert with one or more persons, or through one or more subsidiaries, owns, controls, or holds with power to vote, or holds proxies representing, more than 25 percent of the voting shares of the declarant, or controls in any manner the election of a majority of the directors of the declarant. A person shall be deemed to be controlled by a declarant if that declarant is a partner, officer, director, or employee of the person or if that declarant directly or indirectly or acting in concert with one or more persons or through one or more subsidiaries, owns, controls, or holds with power to vote, or holds proxies representing, more than 25 percent of the voting shares of that person, or controls in any manner the election of a majority of the directors of that person.

(b) *Reserved rights which are usually acceptable.* The following rights in the common elements may usually be reserved by the declarant for a reasonable period of time:

(1) Easement over and upon the common elements and upon lands appurtenant to the condominium for the purpose of completing improvements for which provision is made in the declaration, but only if access thereto is otherwise not reasonably available.

(2) Easement over and upon the common elements for the purpose of making repairs required pursuant to the declaration or contracts of sale made with unit purchasers.

(3) Right to maintain in the common area sales and management offices, model units, and advertising signs during the sales period of the condominium project, such items to be identified in the declaration.

6. TRANSFER OF CONTROL FOR SINGLE PHASED CONDOMINIUM REGIMES

Control of the owners association shall pass to the purchasers of units within the project not later than the earlier of the following: (a) 120 days after the earliest date on which the aggregate voting strength of all purchasers of units to whom title thereto has been conveyed shall comprise at least 75 percent of the total voting strength of the project, or (b) the last date of a specified period of time following the first conveyance of title to a unit within the project, such period of time to be a reasonable period for the particular project and to be subject to approval in each instance by the agency or corporation concerned. The maximum permissible length of the period of time referred to in (b) above usually will be from three to five years. Declarants should provide for and foster early participation of unit owners in the management of the project. The foregoing requirements apply only to transfers of control in single-phased condominium regimes.

7. OWNERS ASSOCIATION'S RIGHTS AND RESTRICTIONS

(a) *Right of entry upon units and common elements.* The owners association shall be granted a right of entry upon the unit premises and any limited common elements to effect emergency repairs and a reasonable right of entry thereupon to effect other repairs, improvements, or replacements, or maintenance deemed necessary.

(b) *Assessments.* (i) *Levy and collection.* The declaration or its equivalent shall describe the authority of the owners association to levy and enforce the collection of general and special assessments for common expenses and shall describe adequate remedies for failure to pay such common expenses. Allocation of common expenses shall be made on an equitable basis. The common expenses assessed against any unit, with interest, costs and reasonable attorney's fees shall be a continuing lien upon such unit until fully paid. Each such assessment, together with interest, costs, and reasonable attorney's fees, shall also be the personal obligation of the person who was the owner of such unit at the time the assessment fell due. The personal obligation for delinquent assessments shall not pass to successors in title or interest unless assumed by them.

Common expenses as used in this Statement of Policies shall mean expenditures made or liabilities incurred by or on behalf of the owners association, together with any assessments for the creation and maintenance of reserves.

(ii) *Reserves and working capital.* There shall be established an adequate reserve fund for the periodic maintenance, repair and replacement of the common elements, which fund shall be maintained out of regular assessments for common expenses. Additionally, a working capital fund must be established for the initial months of the project operations equal to at least a two months' estimated common area charge for each unit.

(iii) *Priority of lien.* To the extent permitted by applicable law, the declaration shall provide for the subordination of any lien of the owners association for common expense charges and assessments to any first mortgage on any unit recorded prior to the date on which such lien of the association arises. Such a lien for common expense charges and assessments shall not be affected by any sale or transfer of a unit except that a sale or transfer pursuant to a foreclosure shall extinguish a subordinate lien for common expense charges and assess-

ments which became payable prior to such sale or transfer. Any such sale or transfer pursuant to a foreclosure shall not relieve the purchaser or transferee of a unit from liability for, nor the unit so sold or transferred from the lien of, any common expense charges thereafter becoming due.

8. UNIT OWNERS' RIGHTS AND RESTRICTIONS

(a) *Obligation to pay expenses.* The declaration or equivalent document shall establish a duty on each unit owner to pay a pro rata share of common expenses upon being assessed therefor by the owners association. Such a pro rata share shall be clearly described and reasonably related to the percentage of ownership, or value in relation to the overall condominium project, attributable to the unit owned.

(b) *Ingress and egress of unit owners.* There may not be any restriction upon any unit owner's right of ingress and egress to his or her unit. It is recommended that the declaration affirmatively provide for the right of ingress to and egress from such unit, with such right being perpetual and appurtenant to the unit ownership.

Appropriate cross-easements over common elements for unit owners shall be clearly set forth in the declaration.

(c) *Easements for encroachments—units and common elements.* In the event any portion of the common elements encroaches upon any unit or any unit encroaches upon the common elements or another unit as a result of the construction, reconstruction, repair, shifting, settlement or movement of any portion of the improvements, a valid easement for the encroachment and for the maintenance of the same shall exist so long as the encroachment exists. The declaration may provide, however, reasonable limits on the extent of any easement created by the overlap of units, common elements, and limited common elements resulting from such encroachments.

(d) *Right of first refusal.* The right of a unit owner to sell, transfer, or otherwise convey his or her unit in a condominium shall not be subject to any right of first refusal or similar restriction. It is recommended that the declaration affirmatively provide that a unit owner may transfer his or her unit free of any such restriction.

(e) *Leasing restrictions.* (i) All of the agencies and corporations agree that unit owners should be prohibited from leasing their units for less than 30 days, that all leases be in writing and subject to the declaration and by-laws.

(ii) FNMA, HUD and VA agree that unit owners should be prohibited from leasing their units for less than 30 days, but that no prohibition related to the term of a lease shall apply to a lease having a term exceeding six months. The restrictions in this paragraph are not required by FHLMC; however, FHLMC would not object to such restrictions.

(iii) FHLMC deals with items (i) and (ii) above by restricting use of units in condominium regimes through a requirement that at least 80 percent of all units within the regime must be sold to or occupied by unit owners as their primary, year-round residence.

9. FIRST LIEN HOLDERS' RIGHTS

(a) *Notices of action.* A holder or insurer of a first mortgage, upon written request to the owners association, (such request to state the name and address of such holder or insurer and the unit number), will be entitled to timely written notice of:

1. Any proposed amendment of the condominium instruments effecting a change in (1) the boundaries of any unit, (2) the undivided interest in the common elements appertaining to any unit or the liability for common expenses appertaining thereto, (3) the number of votes in the owners association appertaining to any unit or (4) the purposes to which any unit or the common elements are restricted;

2. Any proposed termination of the condominium regime;

3. Any condemnation or eminent domain proceeding affecting the condominium regime or any portion thereof;

4. Any significant damage or destruction to the common elements; and

5. Any default under the declaration or by-laws which gives rise to a cause of action against the owner of a unit subject to the mortgage of such holder or insurer, where the defalut has not been cured in 60 days.

(b) *Inspection of association books and records.* The declaration shall provide that the holder and insurer of the first mortgage on a unit shall be entitled, upon request, to: (a) inspect the books and records of the owners association during normal business hours and (b) require the preparation of and, if preparation is required, receive an annual audited financial statement of the owners association for the immediately preceding fiscal year, except that such statement need not be furnished earlier than 90 days following the end of such fiscal year. The declaration shall also provide that all unit owners have reasonable access to inspect the books, records and financial statements of the owners association, including annual audited financial statements when such are prepared.

10. AMENDMENT TO DOCUMENTS

(a) The consent of all unit owners shall be required for any amendment of condominium instruments effecting a change in (1) the boundaries of any unit, (2) the undivided interest in the common elements appertaining to the unit or the liability for common expenses appertaining thereto, (3) the number of votes in the owners association appertaining to the unit, or (4) the fundamental purposes to which any unit or the common elements are restricted.

(b) The consent of owners of units to which at least 80 percent of the votes of the owners association appertain and the approval of the eligible holders of first mortgages on units to which at least 75 percent of the votes of units subject to a mortgage appertain shall be required to terminate the condominium regime.

(c) Except as provided in (a) and (b) above, the agreement of owners of units to which at least 65 percent of the votes of the owners association appertain and the approval of the eligible holders of the first mortgages on units to which at least 51 percent of the votes of units subject to a mortgage appertain shall be required to amend the condominium declaration or its equivalent; provided, however, that (except as provided in (a) and (b) above) the instruments may otherwise be amended pursuant to specific criteria which are subject to the approval of the agencies and corporations concerned, in order to effectuate a satisfactory plan of expansion or phased development as expressly set forth in the declaration, or where the amendment, by reason of its subject matter, would not reasonably require agreement or approval by owners and first mortgage holders in the percentages provided above. In instances where the condominium instruments are permitted to be amended with less than the above-stated percentage of votes or approvals, the subject matter and manner of effecting such amendment, including the percentage of votes or approvals required, together with any other pertinent criteria, must be clearly and expressly stated in the declaration.

(d) For first mortgagees to be eligible holders under paragraphs (b) and (c) above, they must request notice in accordance with the provisions of Section 9(a).

(e) HUD and VA will accept, but do not require, the provisions of paragraphs (b) and (c) relating to mortgagee approval.

11. CONDEMNATION

The declaration should contain adequate provisions for fair and equitable disposition or distribution of condemnation proceeds, reallocation of interests and restoration and repair of the regime and units therein.

12. RIGHTS OF ACTION

The owners association and any aggrieved unit owner shall be granted a right of action against unit owners for failure to comply with the provisions of the declaration, by-laws, or equivalent documents, or with decisions of the owners association which are made pursuant to authority granted the owners association in such documents. Unit owners shall have similar rights of action against the owners association.

13. STAGED, PHASED, OF EXPANDABLE DEVELOPMENTS

The condominum documents shall disclose in clear and precise terms the proposed improvements and alternatives thereto, a time period for undertaking these improvements and the method and timing of transfer of control. (See also Sections 5 and 6.)

Issued at Washington, D.C., January 18, 1977.

CONSTANCE B. NEWMAN,
Assistant Secretary for Consumer Affairs and Regulatory Functions.

DEPARTMENT OF STATE

Office of Fisheries Affairs

APPLICATIONS FOR PERMITS TO FISH OFF THE COASTS OF THE UNITED STATES

Pursuant to Fishery Conservation and Management Act, 1976

PL-77-0001 YC
PL-77-0033

DEPARTMENT OF STATE

Office of Fisheries Affairs

[Public Notice 518]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United Sates

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing beginning March 1, 1977, have been received from the Governments of Poland and the German Democratic Republic, and are published herewith.

Dated: January 18, 1977.

ALBERT L. ZUCCA,
Director, Office of Fisheries Affairs.

THE UNITED STATES OF AMERICA
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

APPLICATION FOR VESSEL PERMITS TO FISH WITHIN THE FISHERY CONSERVATION ZONE OF THE UNITED STATES, OR FOR ANADROMOUS SPECIES OR CONTINENTAL SHELF FISHERY RESOURCES

PL-77-0001 YC

DATE 1-3-77 APPLICATION NO. PL-77-0033
for use of issuing Officer

In accordance with the provision of Section 204 of the Fishery Conservation and Management Act of 1976, (16 U.S.C. 1801-1382), and the governing international fisheries agreement entered into with the Government of the United States of America, which entered into force on _____, date

the government (or competent authority) of Poland

hereby submits this application for permits for fishing vessels under its jurisdiction to fish within the fishery conservation zone of the United States, or beyond that zone for anadromous species or Continental Shelf fishery resources subject to the jurisdiction of the United States.

The following information is submitted in support of this application (Use additional sheets as required).

A completed Fishing Vessel Identification Form for each permit that is requested; and a compilation of data contained in questions 5 and 20 in the attached Fishing Vessel Identification Form.

Submitted January 3, 1977 (Date)

Jozef Soldaczuk
Signature of Authorized Official

Permit Period Applied For: 1977

Application No. PL-77-0017 For Use of Issuing Office

State: POLAND

1. Name of Vessel KASZALOT
2. Vessel No.: Hull No. SWI - 202 Registration No. 440025
3. Name and Address of Owner / Name and Address of Charterer
   Name: DEEP SEA FISHING COMPANY "ODRA"
   Address: 72-602 Swinoujście / Jana Sołtana 1.
   Cable Address: Odra - Swinoujście
4. Homeport and State of Registry: Swinoujście
5. Type of Vessel stern trawler, B-18
6. Tonnage (Gross) 2478 (Net) 1041
7. Length 87,05 M. 8. Breadth 14,17 M. 9. Draft 5,40 M.
10. Horsepower 2250 shp. 11. Maximum Speed 12,5 kt.
11. Propulsion: Diesel (x), Steam ( ), Diesel/Electric ( ), Other
13. Date Built 1968
14. Number and Nationality of Personnel 80 Poles
    Officers 16 Crew 64 Other (Specify)
15. Communications: VHF-FM (x), AM/SSB, Voice (x), Telegraphy (x), Other
    International Radio Call Sign SPYL
    Radio Frequencies Monitored 500 kHz.
    Other Working Frequencies kHz: 410,425,454,468,480,512
    Schedule 08.00-12.00, 20.00-22.00 on the zone times
16. Navigation Equipment: Loran C ( ), Loran A (x), Omega (x), Decca (X), Navsat ( ), Radar (X), Fathometer (X), Other
17. Cargo Capacity (MT)

Salted Fish	
Fresh Fish	
Frozen Fish	750
Fish Meal	100
Other	Fish oil 50

18. Cargo Space

	Number	Name
Freezer	3	1, 2, 3
Dry Hold	1	
Tanks	3	19, 20, 21
Other		

19. Processing Equipment (Indicate daily capacity,MT)
    Baador-33/unit 1/- 140 fish/min., Arenco CIM/unit 1/- 145 fish/min, Bibun D'luxe/unit 1/. Freezering tunnel/unit 1/- 18 tons/day, plate freezers/units 3/ - 18 tons/day. Fish meal and oil plant F.M.-25, - 25 tons/day raw mat.
20. Fisheries for which Permit is Requested:

Ocean Area	Period (From-To)	Species	Contemplated Catch (MT)	Gear to be Used
NW Atlantic	1977	Mackerel	1.100 ton	Midwater otter trawl
		Squid	650 ton	XXXXXXXXXXXXXXXXX
		Herring	350 ton	
		Other	350 ton	

2nd Tiar about 2.000 ton

21. Name and Address of Agent appointed to receive any legal process issued in the United States:
    Amerpol International Inc. Official Reprezentative
    Two World Trade Center Ireneusz Wrześniewski
    Suite 2222, New York, N.Y. 10048

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

PL-77-0018

THE UNITED STATES OF AMERICA
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

APPLICATION FOR VESSEL PERMITS TO FISH WITHIN THE FISHERY CONSERVATION ZONE OF THE UNITED STATES, OR FOR ANADROMOUS SPECIES OR CONTINENTAL SHELF FISHERY RESOURCES

GC-77-0001 to GC-77-0027

DATE December 15,1976 APPLICATION NO. ==
for use of issuing Officer

In accordance with the provision of Section 204 of the Fishery Conservation and Management Act of 1976, (16 U.S.C. 1801-1882), and the governing international fisheries agreement entered into with the Government of the United States of America, which entered into force on _____, date

the government (or competent authority) of _____
German Democratic Republic
hereby submits this application for permits for fishing vessels under its jurisdiction to fish within the fishery conservation zone of the United States, or beyond that zone for anadromous species or Continental Shelf fishery resources subject to the jurisdiction of the United States.

The following information is submitted in support of this application (Use additional sheets as required).

A completed Fishing Vessel Identification Form for each permit that is requested; and a compilation of data contained in questions 5 and 20 in the attached Fishing Vessel Identification Form.

Submitted December 20,1976 Date

Signature of Authorized Official

[illegible] Title

GC-77-0001 to GC-77-0027

Annex: Data compilation of questions contsined in Section 5 and 20

No.	Ocean Area	Name of Vessel	Typ of Vessel	Period (from-to)	Species	Contemplated catch (mt)	Gear to be Used

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

Title 3—The President

CORRECTION

Executive Order 11952

Conforming the Foreign Service and Civil Service Retirement and Disability Systems

In section 2(d) of Executive Order 11952, appearing at page 2295 in the FEDERAL REGISTER issue of January 11, 1977, a typographical error resulted in an incorrect reference to "Section 221 of the Foreign Service Act of 1946." The correct reference is "Section 821 of the Foreign Service Act of 1946."

As corrected, the first paragraph of section 2(d) reads as follows:

(d) In accord with Public Law 93–474, Section 821 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1076), shall be deemed to be amended to provide for the recomputation of annuities for nonmarried annuitants, as follows:

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1516.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Docket No. AO–333–A5]

PART 912—HANDLING OF GRAPEFRUIT GROWN IN THE INDIAN RIVER DISTRICT IN FLORIDA

Order Amending Order, as Amended

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each previously issued amendment thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed amendment of the marketing agreement, as amended, and Order No. 912, as amended (7 CFR Part 912), regulating the handling of grapefruit grown in the Indian River District in Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of grapefruit grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of grapefruit grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of grapefruit grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Grapefruit Grown in the Indian River District in Florida" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping the grapefruit covered by the said order, as amended, and as hereby further amended) who, during the period August 1, 1975, through July 31, 1976, handled not less than 50 percent of the volume of such grapefruit covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period August 1, 1975, through July 31, 1976 (which has been deemed to be a representative period), have been engaged within the Indian River District in Florida, in the production of grapefruit for market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, that on and after the effective date hereof, the handling of grapefruit, shall be in conformity to and in compliance with the terms and conditions of the said order, as amended, and as hereby further amended, as follows:

1. a. Section 912.8 is revised to read as follows:

§ 912.8 Carton or standard packed carton.

"Carton or standard packed carton" means a unit of measure equivalent to four-fifths (⅘) of a United States bushel of grapefruit, whether in bulk or in any container.

b. Paragraph (a) of § 912.41 is revised to read as follows:

§ 912.41 Assessments.

(a) Each handler who first handles fruit shall pay to the committee, upon demand, such handler's pro rata share of the expenses which the Secretary finds will be incurred by such committee for its maintenance and functioning during each fiscal period. Each such handler's share of such expenses shall be that proportion thereof which the total quantity of fruit shipped by such handler as the first handler thereof during the applicable fiscal period is of the total quantity of fruit so shipped by all handlers during the same fiscal period. The Secretary shall fix the rate of assessment per standard packed carton of fruit to be paid by each such handler. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

* * * * *

c. Section 912.50 is revised to read as follows:

§ 912.50 Overshipments.

During any week for which the Secretary has fixed the total quantity of grapefruit which may be handled, any person who has received an allotment may handle, in addition to the total allotment available to him, an amount of grapefruit equivalent to 10 percent of such total allotment or 1,000 cartons, whichever is greater: *Provided*, That the Secretary, on the basis of a recommendation of the committee or other available information, may set such amount at any figure not less than 1,000 cartons and not more than 2,000 cartons. Handlers may overship (a) during such week the entire 1,000 cartons or other amount not in excess of 2,000 cartons as may be set by the Secretary, or (b) during two or more consecutive weekly periods when regulations are in effect, any portion of such 1,000 cartons or any other amount set by the Secretary until the accumulated overshipments reach the applicable maximum number of cartons permitted to be overshipped. The quantity of grapefruit so overshipped when regulations are in effect shall be deducted from such person's allotment for the week following the one in which the total permitted overshipment is reached or for the week in which such person makes no shipments of grapefruit. If such person's allotment for such week is an amount less than the excess shipments permitted under this section, the remaining quantity shall be deducted from succeeding weekly allotments issued to such person until such excess has been entirely off-

set: *Provided*, That any time there is no volume regulation in effect it shall be deemed to cancel all requirements to undership allotment because of previous overshipments pursuant to this part.

2. Paragraph (b) of § 912.32 is revised to read as follows:

§ 912.32 Procedure of committee.

• • • • •

(b) For any decision or recommendation with respect to regulations to be effective during any calendar week, nine members shall constitute a quorum and nine concurring votes shall be required: *Provided*, That the quorum necessary to make a recommendation for regulation for any week immediately following three or more continuous weeks of regulation shall be twelve members and twelve concurring votes shall be required. The requirements of this paragraph shall not apply to recommendations to amend an existing regulation.

• • • • •

3. Section 912.24 is amended as follows:

a. Redesignate paragraph (b) as paragraph (c) and insert a new paragraph (b) as follows:

§ 912.24 Nomination of handler members for the Indian River Grapefruit Committee.

(a) • • •

(b) The committee, as soon as practicable after issuance of the amendment to this part and every third year thereafter, not later than the date prescribed in paragraph (a) of this section, shall reallocate the six handler member and six handler alternate member positions for which voting for nominees is to take place. At such meetings, voting for nominees shall be in accordance with representation which may be required as a result of any reallocation. The reallocation of committee member and alternate member positions shall be between handlers affiliated with bona fide cooperative fresh fruit marketing organizations, herein referred to as "cooperative" handlers, and handlers not so affiliated, herein referred to as "independent" handlers, on the basis of the relative amounts of grapefruit shipped by each group during each of the three immediately preceding completed crop years. The committee shall make its recommendation for allocating handler member positions to the Secretary. The following percentages of grapefruit shipments shall be used by the committee as a basis for allocating handler member and alternate member representation: *Provided*, That the committee, with the approval of the Secretary, may modify the percentages and/or allocation, whenever necessary to meet changing circumstances: *Provided*, That in no event shall any group be allocated less than one member.

Percentages of grapefruit shipped previous 3-year-period		Allocation of handler members	
Cooperatives	Independents	Cooperatives	Independents
Under 25	75 and above	1	5
25 through 41.99	58 through 74.99	2	4
42 through 57.99	42 through 57.99	3	3
58 through 74.99	25 through 41.99	4	2
75 and above	Under 25	5	1

• • • • •

b. Section 912.25 is amended to read as follows:

§ 912.25 Selection of handler members of the Indian River Grapefruit Committee.

From the nominations made pursuant to § 912.24, or from other qualified persons, the Secretary shall select six members and six alternate members of the committee. Three such members and their alternates shall be affiliated with bona fide cooperative fresh fruit marketing organizations, and three such members and their alternates shall not be so affiliated: *Provided*, That when membership is reallocated as provided in § 912.24(b), selection shall reflect such reallocation.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Effective Date: February 28, 1977.

Signed at Washington, D.C., on January 21, 1977.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.77–2557 Filed 1–25–77;8:45 am]

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS: MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

[Docket No. CRPA–2]

PART 1205—COTTON RESEARCH AND PROMOTION

Subpart—Cotton Research and Promotion Order

ORDER AMENDING ORDER

On December 6, 1976, there was published in the FEDERAL REGISTER (41 FR 53350) a proposed order amending the Cotton Research and Promotion Order which was annexed to and made a part of the final decision and referendum order of the Secretary of Agriculture. The referendum was conducted among cotton producers during the period December 13–17, 1976 to determine whether the requisite number of producers voting in the referendum favor the issuance of said order amending the Cotton Research and Promotion Order, and such producers favored such issuance. Therefore, it is hereby ordered that at the time hereinafter specified, the aforesaid order amending the Cotton Research and Promotion Order shall become effective.

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Cotton Research and Promotion Act, as amended (80 Stat. 279 et. seq., 90 Stat. 991; 7 U.S.C. 2101–2118), and the applicable rules of practice and procedure governing the formulation and amendments of cotton research and promotion orders (7 CFR Part 1205), a public hearing was held upon proposed amendment of the Cotton Research and Promotion Order. Upon the basis of the record thereof it is found that:

(1) The order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act; and

(2) All cotton produced and handled in the United States is in the current interstate or foreign commerce, or directly burdens, obstructs, or affects interstate or foreign commerce in cotton and cotton products.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective January 26, 1977. Any delay beyond that date would tend to disrupt the procedure for implementing the order amending the order.

In order for the Cotton Board to be ready to start the collection of the supplemental producer assessment as set forth in the order amending the order beginning with the 1977 ginning season, it will be necessary to issue rules and regulations to specify the method of collection, including any procedural changes necessary for collecting the supplemental assessment. These proceedings and actions are expected to take several months.

The provisions of the order amending the order are well known to cotton producers and other interested parties by reason of the public hearing and other procedures previously conducted with respect to the order amending the order, and the publication in the FEDERAL REGISTER of the notice of hearing, and recommended and final decisions (September 3, 1976 (41 FR 37337); November 15, 1976 (41 FR 50270); December 6, 1976 (41 FR 53350), respectively). All producers eligible to vote in the referendum were mailed a summary of the provisions of the order amending the order and copies were available to producers and other interested parties upon request. Compliance with the provisions of this order amending the order will not require advance preparation on the part of persons subject thereto which cannot be completed prior to the effective date of

regulations that may be issued thereunder.

In view of the foregoing, it is hereby found and determined that good cause exists for making this order effective January 26, 1977 and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER (sec. 553(d), Administrative Procedure Act; 5 U.S.C. 551–559).

(c) *Determinations.* It is hereby determined that the issuance of this order amending the Cotton Research and Promotion Order is favored or approved by at least two-thirds of the cotton producers who participated in a referendum on the question of its approval, and who, during calendar year 1976 (the period determined to be a representative period for the purpose of such referendum) were engaged in the production of Upland cotton in the United States for the 1976 crop.

It is therefore ordered, that at the time hereinafter specified, the aforesaid Cotton Research and Promotion Order is hereby amended as follows, shall become effective:

1. Revise § 1205.302 to read:

§ 1205.302 Act.

"Act" means the Cotton Research and Promotion Act, as amended (80 Stat. 279 et seq., 90 Stat. 991; 7 U.S.C. 2101–2118).

§ 1205.327 [Amended]

2. Amend § 1205.327(b) by adding "s" to the word "assessment".

3. Revise § 1205.330 to read:

§ 1205.330 Expenses.

(a) The Board is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the Board for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this subpart.

(b) The Board shall reimburse the Secretary (1) for expenses up to $200,000 incurred by him in connection with any referendum conducted under the Act and (2) for expenses incurred by the Department of Agriculture for administrative and supervisory costs up to five employee years annually.

(c) The funds to cover such expenses incurred under paragraphs (a) and (b) of this section shall be paid from assessments received pursuant to § 1205.331.

4. Revise § 1205.331 to read:

§ 1205.331 Assessments.

Each cotton producer or other person for whom cotton is being handled shall pay to the handler thereof designated by the Cotton Board pursuant to regulations issued by the Board and such handler shall collect from the producer or other person for whom the cotton, including cotton owned by the handler, is being handled, and shall pay to the Cotton Board, at such times and in such manner as prescribed by regulations issued by the Board, assessments as prescribed in paragraphs (a) and (b) of this section to be used for such expenses and expenditures, including provision for a reasonable reserve, as the Secretary finds are reasonable and likely to be incurred by the Cotton Board and the Secretary under this subpart:

(a) An assessment at the rate of $1 per bale of cotton handled.

(b) A supplemental assessment on cotton handled which shall not exceed one percent of the value of such cotton as determined by the Cotton Board and approved by the Secretary and published in Cotton Board rules and regulations. For the 1977 and subsequent crops of cotton this supplemental assessment shall be at the rate of fourtenths of one percent of the value of cotton: *Provided*, That for any crop of cotton, beginning with the 1978 crop, the rate of the supplemental assessment may be increased or decreased by the Cotton Board with the approval of the Secretary. The Secretary shall prescribe by regulation whether the assessment rate shall be levied on (1) the current value of cotton, or (2) an average value determined from current and/or historical cotton prices and converted to a fixed amount for each bale.

§ 1205.334 [Amended]

5. Amend § 1205.334(c) by adding "s" to the word "assessment".

(Secs. 5 and 10, 80 Stat. 279 et. seq.) 90 Stat. 991 (7 U.S.C. 2101–2118).)

Issued at Washington, D.C. this 21st day of January 1977.

Effective date: January 26, 1977.

RICHARD L. FELTNER,
Assistant Secretary for Marketing and Consumer Services.

[FR Doc.77–2556 Filed 1–25–77;8:45 am]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 500—MANDATORY GASOLINE AND DIESEL FUEL RATIONING REGULATIONS

Adoption of New Part Establishing Contingency Rationing Plan for Gasoline and Diesel Fuel

On May 25, 1976, the Federal Energy Administration (FEA) issued a notice of proposed rulemaking and public hearing (41 FR 21918, May 28, 1976) to amend Chapter II, Title 10 of the Code of Federal Regulations, to establish a new part setting forth regulations with respect to mandatory gasoline and diesel fuel rationing. Written comments were invited through June 28, 1976. Public hearings were held on June 21, 22 and 24, 1976, in Washington, Atlanta, Kansas City, San Francisco and Anchorage.

One hundred and seven written comments were received in response to the notice of proposed rulemaking and 37 oral presentations were made at the five public hearings. Those making comments included representatives of the travel industry, vehicle rental companies, firms engage in direct sales, refiners and others associated with the petroleum industry, Federal, State and local government, agriculture, transportation industry and firms engaged in energy production.

This contingency rationing plan, required by section 203 of the Energy Policy and Conservation Act (EPCA) (Pub. L. 94–163), if approved by the Congress, would remain in standby status unless the President finds that putting the plan into effect is required by a severe energy supply interruption or in order to fulfill obligations of the United States under the international energy program and transmits such finding to the Congress, together with a statement of the effective date and manner for exercise of such plan. Pursuant to section 203(b) of EPCA, the President would also be required in order to implement a standby rationing plan to find that such plan is necessary to attain, to the maximum extent practicable, the objectives specified in section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973 (EPAA) (Pub. L. 94–163), as amended, and the purposes of the EPCA. For the rationing contingency plan to become effective and be converted from standby status, the President's request to the Congress to put the plan into effect must not be disapproved by either House of Congress. After these steps are completed, the rationing contingency plan would be implemented for the period specified in the plan but for not more than nine months.

The basic provisions of the contingency gasoline and diesel fuel rationing plan adopted today are essentially the same as proposed. FEA will issue ration coupons and ration credits ("ration rights") for each ration period equal to the total estimated available supply of gasoline for the ration period. FEA would then distribute these ration rights through four basic programs. First, FEA would provide ration coupons to all eligible individuals. Second, FEA would provide ration credits to all firms which are engaged in priority activities for which a ration credit level has been established. These ration credits would be in addition to any ration coupons received by a person as an eligible individual. Third, FEA would distribute three percent of all ration rights through the State Hardship Reserves which would be used to meet the needs of certain specified users; e.g., handicapped persons, migrant workers, etc. Fourth, FEA would reserve one percent of the ration rights to distribute itself through the National Ration Reserve.

Persons to whom ration rights are issued would redeem their ration rights for gasoline or could sell them in a ration rights exchange market or give them away.

A supplier of gasoline would be required to collect, redeem, and deposit in the supplier's redemption account ration coupons, ration credit checks or redemption checks for all gasoline sold. Retail sales outlets could agree to supply gasoline to a consumer without ration rights provided the retail sales outlet itself ob-

tained ration rights to cover the transaction within ten days of the sale.

Ration periods for coupons would vary in length depending upon projected supply conditions and other factors and would be announced by FEA's publication of a notice in the FEDERAL REGISTER at least ten days in advance of the ration period. The reason for providing for variable ration periods for coupons is to permit FEA to adjust the number of ration coupons to correspond to the available supply after deduction for the State Hardship Reserves, the National Ration Reserve, and the number of ration credits issued to firms entitled to a ration credit level.

Eligible individuals would apply for ration coupons at issuance points to be designated by FEA, on days designated by FEA. Issuance of ration coupons to eligible individuals would be, for the most part, dependent upon the person's having a valid driver's permit issued by a State. Indians living on reservations under the jurisdiction of the Bureau of Indian Affairs and Alaska Natives may in certain circumstances qualify as eligible individuals even though they do not have driver's permits.

Firms entitled to a ration credit level would be issued ration credits rather than ration coupons. The ration credits would be deposited by FEA each month on the first day of the month in the firm's primary ration credit account maintained with an FEA Regional Processing Center. The firm could then withdraw its ration credits by issuing a ration credit check drawn on its primary ration account to the order of its gasoline supplier. The firm could also issue a ration credit acount for its subsidiaries so that any person; the check could then be deposited in a secondary ration credit account or exchanged for coupons at a ration coupon issuance point. Typically, a firm would open a secondary ration credit account for its subsidiaries so that those subsidiaries could write their own ration credit checks for the purchase of gasoline.

Any firm that was not in operation during a base period could apply to FEA for assignment of a base period use and ration credit allotment. FEA would determine the appropriate base period use, taking into account the typical gasoline or diesel fuel consumption patterns of similar firms.

FEA would establish Regional Processing Centers to perform automated account posting activities in support of the majority of FEA's ration banking activities. FEA would determine the number and location of these Centers, which would serve as sole processing facilities for all ration credit and redemption accounts within given geographic regions. The Regional Processing Centers would establish a check file for each ration credit account. The Centers would arrange to supply the necessary ration credit checks and deposit forms to account owners.

Although not part of the regulations issued today, guidelines are being developed to set forth the procedures which FEA and participating banks and issuance points would follow in carrying out the regulatory program for issuing ration rights and clearing primary and secondary ration credit accounts and redemption accounts. Representatives from the commercial banking industry are assisting in the development of these guidelines.

The functions of the State Rationing Offices and Local Rationing Boards remain essentially as proposed. Hardship allotments could be made by Local Rationing Boards to handicapped persons; low-income, long distance commuters; migrant workers; and, as discussed in more detail below, certain persons engaged in household moves. Other hardship needs could also be handled through the Local Rationing Boards.

The regulations adopted today include the limited diesel fuel rationing program as proposed. Eligible individuals would use their allotments of gasoline ration coupons for their diesel fuel requirements. Firms which have an allocation level under the middle distillate allocation program and which operate diesel-powered vehicles would be issued a diesel fuel entitlement card for each such vehicle, to be used at the time of purchase of diesel fuel at a retail sales outlet. The entitlement card would be linked to a ration credit account maintained by FEA for all firms purchasing diesel fuel at retail sales outlets. A firm having an entitlement card would be able to purchase volumes of diesel fuel comparable to what it would be entitled to receive under the allocation level established in Subpart G of 10 CFR Part 211 (the Mandatory Petroleum Allocation Regulations), but without application of an allocation fraction.

The regulations adopted today contain several modifications to the proposed regulations. The most significant changes are the following:

Relationship of allocation to rationing and maintenance of base period supplier/purchaser relationships. As proposed, the regulations included provisions for the allocation of gasoline from suppliers to wholesale purchaser-resellers utilizing the bulk of the allocation concepts currently contained in 10 CFR Part 211. The existing allocation program would have been substantially modified by eliminating the concept of supplier/purchaser relationships between suppliers and ultimate consumers.

FEA determined that it was preferable to continue to require the maintenance of base period supplier/purchaser relationships between suppliers and bulk purchasers of gasoline. Incorporation of this concept essentially adopts all of 10 CFR Part 211 as it relates to the allocation of motor gasoline. This being so, there is no longer any need to set forth separate gasoline allocation regulations in the Rationing Contingency Plan since the allocation regulations as set forth in 10 CFR Part 211 are adequate.

In reaching the decision to require the maintenance of base period supplier/purchaser relationships between suppliers and bulk purchasers of gasoline, FEA believed that it would make little sense to provide ration rights to bulk purchasers of gasoline without requiring their historical suppliers to supply them with their pro-rata share of gasoline. Therefore, the existing requirement that a bulk purchaser's base period supplier must continue to supply the bulk purchaser is included in the Rationing Contingency Plan. This concept is effectuated by permitting the allocation program in 10 CFR Part 211 to operate as currently in effect and to tie ration credit levels to the allocation levels set forth in Subpart F of the Mandatory Petroleum Allocation Regulations.

It should be noted that the obligation of a supplier to continue to supply its base period customers applies only to those customers which are bulk purchasers as defined in 10 CFR 211.102. Firms (including individuals) which are not bulk purchasers will, of course, be entitled to receive allotments of ration rights, but such purchasers are not entitled to an allocation level and do not have supplier/purchaser relationships which must be maintained for the duration of the Mandatory Petroleum Allocation Program.

In making allotments to firms entitled to a ration credit level, the FEA will deposit ration rights into such firms' primary ration credit accounts in amounts equal to the volume of gasoline those firms would be entitled to receive under the allocation regulations as modified at the time rationing becomes effective, whether or not those firms qualified as bulk purchasers. Also, the number of ration rights allotted to such firms will be calculated without the application of an allocation fraction. For example, a firm entitled to an allocation level of 100 percent of base period use subject to an allocation fraction, which had a base period use of 10,000 gallons of gasoline and whose supplier is applying an allocation fraction of 0.9, would have an allocation entitlement of 9,000 gallons of gasoline (10,000 gallons base period use $\times$0.9 fraction $=$9,000 gallons). The number of ration rights which FEA would allot to that firm, however, would be 10,000 since that is 100 percent of the firm's base period use.

As proposed, the rationing regulations established three gasoline ration credit levels depending on the end use of the gasoline—100 percent of current requirements, 100 percent of base period use, and 90 percent of base period use. The regulations then specified the types of end uses which qualified for each ration credit level. Since the ration credit levels are now tied to the allocation levels, set forth in the Mandatory Petroleum Allocation Regulations, the ration credit to be allotted to a particular firm will be based on the allocation levels in Subpart F of 10 CFR Part 211 as amended at the time rationing begins. Also, the definitions of the various end uses (e.g., Department of Defense use, agricultural production, sanitation services, etc.) shall be the definitions set forth in 10 CFR 211.51 as amended at the start of the rationing program as discussed below.

Definitions and ration credit levels. As indicated above, the definitions of end uses of gasoline for purposes of the rationing regulations shall be the same as set forth for the allocation regulations. It is anticipated that, if the rationing regulations are put into effect, the definitions of the following terms will be changed as indicated.

The definition of "Department of Defense use" would be modified from the proposed definition to substitute "national defense operations" for "strategic defense operations" in recognition of the difficulty of separating strategic activities from other essential national defense activities.

The definition of "agricultural production" would also be modified. The new definition would permit firms producing essential food for human consumption to be eligible for 100 percent of current requirements for gasoline for their essential food producing activities, with non-essential food production and all non-food agricultural activities eligible for 90 percent of base period use. FEA recognizes that the use of Standard Industrial Classification (SIC) codes is an imperfect means of distinguishing essential foods from non-essential foods, but feels that other definitions of essential foods would lead to greater problems of definition and interpretation than the SIC codes.

The definition of "emergency services" would be modified to include emergency road services, including snow removal, and the repair of essential public utilities.

The definition of "passenger transportation services" would be restricted to include only vehicles with a manufacturer's seated-capacity rating of greater than 10 persons, counting the driver. FEA has chosen to exclude taxicabs on the gorunds that taxicabs can achieve gasoline savings through reduced cruising, increased use of taxi stands, and greater use of radio call equipment. Carpool vehicles would benefit from the pooled ration coupon allotments of all drivers sharing the pool vehicle.

The definition of "telecommunications services" would be changed to delete the reference to "periods of substantial disruption of normal service" and to exclude sales and routine administrative activities.

The definition of "sanitation services" would be changed to delete reference to "during emergency conditions."

It is FEA's current view that the definitions described above would read as follows:

"Department of Defense use" means those activities of the United States armed forces directly connected with and essential to national defense operations excluding administrative activities.

"Agricultural production" means: (a) all of the activities classified under the industry code numbers specified below, as set forth in the Standard Industrial Classification Manual, 1972 Edition:

011 Cash Grains (excluding 0119, Cash Grains Not Elsewhere Classified)
0133 Sugar Crops
0134 Irish Potatoes
016 Vegetables and Melons
017 Fruits and Tree Nuts (excluding Vineyards)
0182 Food Crops Grown Under Cover
021 Livestock, except Dairy, Poultry, and Animal Specialties (excluding 0214, Sheep and Goats)
024 Dairy Farms
025 Poultry and Eggs
091 Commercial Fishing (excluding 0919, Miscellaneous Marine Products)
201 Meat Products
202 Dairy Products (excluding 2024, Ice cream and Frozen Desserts)
203 Canned and Preserved Fruits and Vegetables
2041 Flour and Other Grain Mill Products
2043 Cereal Breakfast Foods
2044 Rice Milling (except Brewers' Rice)
2045 Blended and Prepared Flour
205 Bakery Products (except dessert products such as pastries, pies, cookies and cakes)
2061 Cane Sugar, Except Refining Only
2062 Cane Sugar Refining
2063 Beet sugar
209 Miscellaneous Food Preparations and Kindred Products;

(b) The following activities classified in the industry code numbers specified below, but only to the extent that they relate to production (including transportation) of food for human consumption:

0119 Cash Grains, Not Elsewhere Classified
0139 Field Crops, Except Cash Grains, Not Elsewhere Classified
0181 Ornamental Floriculture and Nursery Products (limited to vegetable seed production and growing of fruit stocks)
019 General Farms, Primarily Crop
0214 Sheep and Goats
027 Animal Specialties
029 General Farms, Primarily Livestock
071 Soil Preparation Services
072 Crop Services
0741 Veterinary Services for livestock, Except Animal Specialties
0751 Livestock Services, Except Services for Animal Specialties
076 Farm Labor and Management Services
0849 Gathering of Forest Products, Not Elsewhere Classified (limited to gathering of maple sap)
0919 Miscellaneous Marine Products
092 Fish Hatcheries and Preserves
147 Chemical and Fertilizer Mineral Mining
2046 Wet Corn Milling
2048 Prepared Feeds and Feed Ingredients for Animals and Fowls, Not Elsewhere Classified
207 Fats and Oils
2819 Industrial Inorganic Chemicals, Not Elsewhere Classified
286 Industrial Inorganic Chemicals (limited to pesticides and intermediates for the manufacture of pesticides)
287 Agricultural Chemicals
421 Trucking, Local and Long Distance (limited to trucking of fresh produce, perishable foods, livestock and poultry)
497 Irrigation Systems

"Emergency services" means fire fighting, emergency police activities (excluding routine activities), emergency medical services, emergency repair of essential public utilities, and emergency road services including snow removal.

"Passenger transportation services" means (a) surface passenger-carrying services and facilities (excluding water and rail transportation) which serve the general public, whether publicly or privately owned, excluding vehicles with a maufacturer's seated-capacity rating of ten (10) or fewer persons, counting the driver; (b) bus transportation of pupils to and from school.

"Sanitation services" means the collection and disposal for the general public of solid wastes, whether by public or private entities, and the maintenance, operation and repair of liquid purification and waste facilities. Sanitation services also includes the provision of water supply services by public utilities, whether privately or publicly owned or operated.

"Telecommunications services" means the repair, operation, and maintenance of voice, data, telegraph, video, and similar communications services to the public by a communications common carrier, excluding sales and routine administrative activities.

With respect to regulations dealing with ration credit levels, it was proposed that non-governmental firms not otherwise accorded a ration credit level would be given a level of 90 percent of base period use if they reported gasoline as an expense to the Internal Revenue Service or were engaged in religious, charitable, educational or other eleemosynary activities. Because gasoline is not always reported as a separate expense but rather is included usually in overall business expenses, FEA currently anticipates that the regulations on allocation levels in 10 CFR 211.103 would be amended to provide an allocation level of 90 percent of base period use (subject to an allocation fraction) for nongovernmental uses by firms not otherwise accorded an allocation level which include gasoline as an expense, whether or not separately identified, on schedules or forms filed with the Internal Revenue Service. Ninety percent of base period use (subject to an allocation fraction) would be the allocation level proposed for religious, charitable, educational or other eleomosynary activities not otherwise accorded an allocation level.

It is anticipated that at the time rationing would be put into effect the allocation levels currently in 10 CFR 211.103 for cargo, freight and mail hauling by truck, aviation ground support vehicles and equipment, industrial use, commercial use, governmental use and social service agency use would all be subsumed within the allocation level for all other non-governmental uses not otherwise accorded an allocation level (90 percent of base period use subject to an allocation fraction). Ration credit levels would be the same as the allocation levels without application of a fraction. As in the case of all other currently anticipated amendments to the allocation regulations, these amendments would be subject to public comment and further consideration by FEA before any of them were adopted.

Based on the revised definitions of end use activities described above, it is currently anticipated that the allocation levels in 10 CFR 211.103 would be amended at the time rationing is implemented to reflect the following

changes in order of precedence of end uses:

(1) *One hundred percent of current requirements (not subject to an allocation fraction).* Department of Defense use; Agricultural production; Emergency services; and Passenger transportation services.

(2) *One hundred percent of base period use (subject to an allocation fraction).* Telecommunication services; Sanitation services; and Energy production.

(3) *Ninety percent of base period use (subject to an allocation fraction).* All other government uses; All other uses by firms which include gasoline as an expense, whether or not separately identified, on schedules or forms filed with the Internal Revenue Service; and All other uses for religious, charitable, educational or other eleemosynary purposes not otherwise accorded a ration credit level.

Ration credit levels for all of the foregoing uses would be the same as the suggested allocation levels but without application of an allocation fraction.

The definitions of "firm" and "retail sales outlet", which are adopted in the rationing regulations issued today, would require amendment to conform to the definitions used in the Mandatory Petroleum Allocation Regulations. The definition of "firm" specifies that the various departments, agencies, offices and instrumentalities of the Federal Government are to be treated as separate firms since the Federal Government does not have centralized records with respect to gasoline consumption. The definition of "retail sales outlet" has been narrowed from the meaning originally proposed so as to make it clear that the entity to which that term applies is clearly understood to be the typical service station where sales of gasoline are made to owners of passenger cars and trucks. The term does not refer to rack sales by jobers or refiners to commercial accounts. To qualify as a retail sales outlet, the maximum amount of fuel, either gasoline or diesel fuel, which could be pumped into a vehicle's fuel tanks would be 130 gallons. The volume of 130 gallons was chosen because it was FEA's understanding that that is the maximum fuel tank size of any vehicle for which fuel would be purchased at a service station.

Alaska Natives. In response to a unique situation in the State of Alaska, the definition of the term "eligible individuals" has been modified to include Alaska Natives of at least age 16 who have no driver's permit but who use gasoline in snowmobiles, boats, or other vehicles or tools. Persons other than Alaska Natives who are similarly situated should apply to their local Rationing Board for assistance.

Invalidation of ration coupons. Several comments addressed the proposed provisions as to the invalidation of ration coupons. Under the regulation issued today, FEA could declare a particular series of ration coupons invalid. Invalidation would occur only where there is evidence of counterfeiting or other severe threat to the integrity of a particular ration coupon series. Invalidation would only occur after sufficient advance notification to the public. It is not anticipated that FEA would exercise this authority except in the most severe situation. FEA recognizes that the authority to invalidate a coupon series may affect the operation of the ration rights exchange market. This provision, however, which would be exercised only upon sufficient advance notice and only when the circumstances clearly require its exercise, is essential to protect ration coupon integrity. Since it is unlikely that invalidation would ever be required, it would have minimal impact on the ration rights exchange market.

Base period use for vehicle rental companies. There was considerable comment with respect to the special meaning of "base period use" for vehicle rental companies. As proposed, and adopted, the base period use for a vehicle rental company includes volumes of gasoline purchased or obtained by a vehicle rental company for its direct use but not including any volumes used by the vehicle rental company's customers. Concern was expressed that customers which have long-term leases with vehicle rental companies would not have available the information to determine their base period use for rented vehicles. It was also suggested that vehicle rental companies should be able to include in their base period use those volumes which were supplied to all customers who leased vehicles during the base period since the vehicle rental company supplies the gasoline as part of an overall service. FEA believes that vehicle rental companies should experience little difficulty in supplying base period consumption information to their customers. With this information, the lessee can apply, as would any other firm, to establish a base period use.

To the extent that a vehicle rental company supplies gasoline as part of its overall service to a customer, that vehicle rental company would be acting as a wholesale purchaser-reseller of gasoline. If a vehicle rental company wishes to acquire supplies from its supplier of gasoline to enable the rental company to continue this service activity, the rental company would have to open a redemption account and pay for its purchases like any other wholesale purchaser-reseller.

The regulations permit a vehicle rental company to require advance payment of ration rights by a lessee. For example, a vehicle rental company could require its lease customer to issue to the rental company on the first day of each month a ration credit check for the estimated amount of gasoline the lessee would use during a month. The vehicle rental company would then be able to deposit this ration credit check into its redemption account and still be able to issue a redemption check to its supplier within 10 days of receipt of the gasoline from its supplier. The vehicle rental company would obviously have to adjust the amount of the next succeeding ration credit check to be requested from the customer to reflect the difference in the estimated amount of gasoline for which it received a ration credit check and the actual volumes of gasoline supplied to the customer.

Base period use for firms with independent sales representatives. As proposed, the Rationing Contingency Plan permitted firms having commissioned direct sales representatives to include in their base period uses the volumes of gasoline used in the sales activities of the firms' commissioned direct sales representatives. On the basis of comments received, the regulations adopted today deal with independent sales representatives rather than commissioned sales representatives. The regulation has also been modified to define more precisely the method by which such firms may include their representatives' gasoline volumes in determining base period use. Those representatives associated with the firm during the base period may, if they themselves would otherwise qualify as firms, agree with the firm to have their base period uses included in the firm's base period use provided the representatives certify to the firm in writing the amount of their base period uses and that they have not and will not include such base period uses in any application to any other firm or to FEA.

New representatives may agree with the firm to have base period uses for their needs included in the firm's total base period use. The volume to be included for each such new representative would be the amount of gasoline equal to the average of all other such representatives' base period uses in the same period. Sales representatives who have entered into an agreement pursuant to the special regulation establishing base period use for firms having independent sales representatives would receive their ration rights directly from the firm.

A firm which includes existing and new independent sales representatives in the firm's base period use must submit a monthly report to FEA indicating the number of such representatives included in the firm's base period use, and the corresponding base period gasoline volumes, broken down by market area or other basis to be specified by FEA. The firm must also agree to make its records available at its headquarters office for FEA audit.

Discrimination between purchasers. The proposed regulations included a provision (proposed § 700.51) which would have prohibited a supplier from discriminating between purchasers. This provision has been eliminated since to some extent a supplier must discriminate in favor of its base period customers which are bulk purchasers of gasoline. In addition, FEA believes 10 CFR 210.62 already prohibits discrimination among purchasers of allocated products where such acts would circumvent the objectives of the EPAA. Therefore, the regulations adopted today do not contain an explicit provision against discrimination among purchasers.

A supplier must accept from a consumer valid ration coupons which are tendered as evidence of entitlement to redeem gasoline if they are offered at the time of sale. A firm, including a supplier, may accept a ration credit check, but the burden of accepting a check for which there are insufficient ration credits is on the payee, who will be responsible for acquiring valid ration rights to cover any deficiency. Of course, except for a firm entitled to a ration credit level of 100 percent of current requirements, anyone who issues a ration credit check for which there are insufficient credits in the owner's ration credit account will be in violation of the Mandatory Gasoline and Diesel Fuel Rationing Regulations. See 10 CFR 500.42(e) and 500.43(d).

Procedural amendments. At the time rationing is implemented, in addition to the amendments to the Mandatory Petroleum Allocation Regulations already discussed, amendments would be proposed to the Administrative Procedures and Sanctions, 10 CFR Part 205, to provide the necessary procedures in Subpart Q of that part for the administration of those sections of the rationing program delegated to the various States and Local Rationing Boards. 10 CFR Part 205 would also be amended to subject violations of the rationing program to the various remedial provisions, including sanctions set forth in that part. Public comment would be sought when these amendments are proposed.

Impact on tourism. Representatives of the tourist industry were concerned that the Rationing Contingency Plan would have a severe and adverse impact upon their businesses. FEA agrees that, during a period in which rationing is in effect, it is likely that there would be substantial impact on the tourist industry. However, the cause for the disruption would not be the rationing program, but rather would be the lack of available gasoline and the need to structure that program so that priority uses receive equitable treatment.

FEA believes that the implementation of rationing during a period of shortage will in fact be of value to the tourist industry. Because the issuance of ration coupons and ration credits is determined by the actual supply of gasoline, holders of ration rights will be reasonably certain of finding available supplies as they travel throughout the United States. Thus, the fear of being unable to locate supplies during a trip to another section of the country will be greatly reduced since if one has ration rights, there should be available product wherever he travels. However, the rationing program cannot overcome the probable psychological impact of the shortage on most drivers who will understandably attempt to conserve their ration rights for periods of emergency or other unexpected needs, which in all likelihood will mean that most drivers will not engage in what they perceive to be non-essential activities. FEA emphasizes that this would be a consequence of a gasoline shortage and not of the Rationing Contingency Plan.

Hardship allotments for persons engaged in household moves. Several persons commented that there should be a provision for granting an allotment of ration rights from the State Hardship Reserves for persons who must make household moves. It was pointed out that without such a provision, a household would be forced to use the services of a commercial moving company or would have to absorb the cost of purchasing ration rights on the ration rights exchange market sufficient to meet the needs of the vehicle(s) involved in the move. Since many persons must move themselves because they cannot afford either of these alternatives, they would be effectively barred from moving. To avoid this undesirable result, provisions have been included for such households to seek additional ration rights from the State Hardship Reserves.

Adjustments to base period use. In the proposed regulations, there were provisions that firms entitled to a ration credit level would have their base period uses adjusted downward if their requirements for gasoline decreased by 25 percent as compared to volumes used during the base period. Since the regulations as adopted today tie ration credit levels to allocation levels, it is appropriate that the adjustment for decreased base period use be determined by the provisions of 10 CFR 211.13. Any increase in base period use accorded a firm pursuant to 10 CFR 211.13 would, of course, serve to increase the base period use for purposes of the Rationing Contingency Plan. It is anticipated that if rationing were implemented, FEA would propose to amend 10 CFR 211.13 to increase the threshold for unusual growth from ten percent to twenty percent.

Allocation entitlements for the construction industry would continue to be subject to the special provisions of 10 CFR 211.27. The base period use for allocation purposes which is established for a specific construction project will serve as the base period use for calculation of the ration credit allotment.

Current requirements. In the notice of proposed rulemaking, FEA sought comments with respect to retaining the concept of providing 100 percent of current requirements for selected end uses. Those persons addressing this issue supported the continuation of the concept for those uses of clearly high priority. Therefore, the concept of providing 100 percent of current requirements to certain end-uses will be continued.

To prevent an inequity in the operation of the ration rights exchange market, a new provision has been added to prevent firms entitled to a ration credit level of 100 percent of current requirements from overdrawing their ration credit accounts in excess of their true needs and selling the unneeded volume of ration rights on the ration rights exchange market. As adopted, the regulations provide that the FEA will deposit into the primary ration credit account of a firm entitled to a ration credit level of 100 percent of current requirements a volume of ration credits equal to 100 percent of such firm's base period use. If that firm needs less than 100 percent of its base period use, it, like any other firm, may sell the remaining ration rights on the ration rights exchange market. However, if a firm entitled to 100 percent of current requirements needs greater than 100 percent of its base period use, it may overdraw its account to the extent of its actual needs. The resulting overdraft will be recorded at the FEA Regional Processing Center at which time FEA will credit a supplemental ration credit allotment to the firm's account to offset the overdraft. In succeeding months, FEA will again allot to such firm 100 percent of its base period use, and if necessary, that firm may again overdraw its ration credit account without penalty so long as the overdraft is used to reach 100 percent of the current requirements of that firm. However, any firm which overdraws its ration credit account to meet 100 percent of its current requirements may not thereafter sell any of its ration rights in the ration rights exchange market. FEA will monitor those firms which overdraw their ration credit accounts to assure that such firms are not participating in the ration rights exchange market and need the additional ration rights to satisfy those activities accorded a ration credit level of 100 percent of current requirements.

State and Local Rationing Offices. Although there was some disagreement, there was general acceptance of the proposed regulations which set forth the roles of the State and Local Rationing Office. Therefore, the regulations adopted today are essentially the same as the regulations proposed. The criteria for delegation of authority to State Rationing Offices will not be addressed until the Congress approves the rationing plan. FEA will seek additional public participation in shaping the criteria for delegation of authority to State Rationing Offices after Congressional approval has been obtained for the remainder of the Rationing Contingency Plan.

Mid-period eligibility. It was suggested that there would be an inequity if an eligible individual with a valid driver's permit failed to obtain his ration coupons by the first day of rationing and thereafter was prohibited from obtaining ration coupons for that ration period. To permit flexibility to cope with such a situation, the regulations adopted today permit FEA to declare a grace period during which eligible individuals (including new eligible individuals) will be given additional time to acquire ration coupons for a ration period already in progress, as well as for succeeding ration periods.

Initial redemption account credit. As proposed, the rationing regulations did not address the issue of how a retail sales outlet or other supplier would pay its suppliers for initial deliveries of gasoline. The regulations adopted today provide that an initial redemption account credit would be entered into each redemption account when the redemption account is opened equal to the greater of (1) the amount of an average single delivery during the base year or (2) 10 days' average gasoline receipts during the base year. In addition, within 30 days after the start of rationing, each firm would report its initial inventory levels measured on the first day of rationing before

any sales or deliveries are made. On this report, each supplier would compute its adjusted redemption account credit which would be equal to a volume of an average single delivery received during the base year or ten days' average receipts in the base year, whichever is greater, plus 20 percent of total gasoline inventory capacity, minus inventory on the first day of rationing. If the result of this computation is less than zero, the adjusted redemption account credit would be equal to zero.

Special redemption account. FEA recognizes that there are some suppliers in remote regions in the United States (especially in Alaska) which are subject to infrequent supply schedules or which are in areas subject to highly seasonal demand. These suppliers may apply to FEA for a special redemption account credit if the adjusted redemption account credit computed in accordance with the immediately preceding paragraph is insufficient to cover actual gasoline receipts less the amount of ration credits and redemption checks which are received or expected to be received from customers during the first 20 days of the rationing program.

Sales by retail sales outlets to customers not having ration rights. There was some confusion over the purpose of the provision in the proposed regulations which permits a retail sales outlet to sell gasoline to customers without requiring them to transfer ration rights at the time of sale. The purpose of the provision is to permit a retail sales outlet at its option to make sales to customers without ration rights on the assumption that the retail sales outlet will be able through purchase of ration rights from the ration rights exchange market to cover those transactions. The retail sales outlet must obtain the additional ration rights within 10 days of making a sale to a customer who does not have ration rights. The purpose of the 10-day period is not to permit the customer who purchases from the retail sales outlet to go out and find ration rights and then present them to the retail sales outlet. The customer who purchases from a retail sales outlet without transferring ration rights is under no obligation to return ration rights. Presumably such a customer would have paid the retailer the value of the coupons required for the sale in addition to the cost of the gasoline purchased. The obligation is on the operator of the retail sales outlet to either collect ration rights at the time of sale or to use the ration rights exchange market and obtain the necessary ration rights within 10 days of having made the sale.

Excess acquisition of product. Several suppliers commented that in many cases a wholesale purchaser-reseller picks up product directly from its supplier's storage area without any monitoring by the supplier's personnel. This arrangement permits a customer to overdraw his entitlement in violation of the Mandatory Petroleum Allocation Regulations. It was suggested that liability for such excess acquisitions be placed on the customer and that the supplier be exonerated from any such violations. Existing regulations (10 CFR 211.25) permit suppliers and wholesale purchasers to agree between and among themselves to either borrow from future allocations or defer current allocations, or both, on a volume for volume basis within the total allocations for one calendar year as long as such arrangements do not result in an involuntary reduction in allocations to other wholesale purchasers. FEA does not believe it would be in the best interests of the Mandatory Petroleum Allocation Program to shift responsibility for adherence solely to the purchaser when the obligations should fall equally on seller and purchaser to comply with the regulatory program. If the supplier is concerned that its customers will pick up excess supplies of product, it must exercise prudent judgment and station personnel at its storage area to prevent such violations.

Precedence of delivery. Section 203(a)(1)(B) of the EPCA requires that the gasoline and diesel fuel rationing contingency plan provide, among other things, that there be a system whereby end users may obtain gasoline or diesel fuel in precedence to other classes of end users not similarly situated. In the proposals for the Rationing Contingency Plan, a provision to effectuate this provision of the EPCA was not included. The regulations adopted today contain a provision which requires that suppliers who have customers who would be accorded priority one status under 10 CFR 211.10 (c) of the Mandatory Petroleum Allocation Regulations must arrange mutually acceptable delivery schedules with those customers before making commitments for deliveries to its other customers who are not in priority one status. The adoption of this provision does not preclude States from adopting complementary plans to augment this regulation. See FEA Ruling 1974–6 (39 FR 6111, February 19, 1974).

Restrictions on endorsements. In the proposed regulations there was a total prohibition against endorsement of ration credit checks to third parties. To permit greater flexibility in the rationing program, the regulations adopted today permit endorsement of ration credit checks by the payee to designated ration coupon issuance points when the payee wishes to exchange a ration credit check for ration coupons. Endorsements to other third parties, however, remain prohibited.

Ration credit levels for diesel fuels. As originally proposed, the ration credit levels for those firms which purchase diesel fuel at retail sales outlets were to be equal to the allocation entitlements specified in the allocation regulations for middle distillates. As proposed, the regulations would have required that the ration credit level incorporate the concept of an allocation fraction. Since the FEA would not be aware of the allocation fraction being applied by a particular supplier until after ration credits were allotted each month, the regulations adopted today with respect to ration credit levels for purchasing diesel fuel at retail sales outlets parallel the gasoline rationing program in specifying that the ration credit level for a firm entitled to a ration credit level shall be equal to the volume of diesel fuel to which such firm is entitled under the allocation regulations prior to the application of any allocation fraction.

Banking service fees and secondary ration credit accounts. In its proposed regulations, FEA had included a provision for the collection of fees for opening and maintaining ration bank accounts. The principal purpose of these fees would have been to discourage the indiscriminate opening and excessive use of ration bank accounts. In light of comments received from representatives of the banking industry, FEA has decided to eliminate these fees altogether.

To prevent the excessive use of secondary ration credit accounts the regulations issued today include a provision that a minimum initial deposit of 300 gallons of ration rights will be required to open a secondary ration credit account.

These changes will simplify the banking system required for the rationing program while maintaining a barrier to improper use of ration bank accounts. Participating banks like other program participants will be compensated by FEA for their rationing activities from the per gallon fees collected by FEA on each gallon of gasoline sold.

ENVIRONMENTAL ASSESSMENT

By notice issued August 27, 1976 (41 FR 36823, September 1, 1976) FEA advised interested persons that it had completed an environmental assessment of the Rationing Contingency Plan. Copies of the environmental assessment are available for review and comment as indicated in the August 27, 1976 notice.

ECONOMIC ANALYSIS AND INFLATIONARY IMPACT

As required by section 201(f) of the EPCA, an economic analysis has been prepared with respect to the Rationing Contingency Plan. Copies of this economic analysis are available for public review in the FEA Freedom of Information Office, Room 2107, 1200 Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

As required by Executive Order 11821 and Office of Management and Budget Circular A–107, the inflationary impact of the Rationing Contingency Plan has been considered.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended Pub. L. 93–511, Pub. L. 94–99, Pub. L. 93–133 and Pub. L. 94–163; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163; E.O. 11790 (39 FR 23185); E.O. 11912 (41 FR 15825).)

In consideration of the foregoing, Chapter II of Title 10 of the Code of Federal Regulations is amended to add a new Part 500, as set forth below, subject to the approval by a resolution by each House of Congress in accordance with the procedures specified in in section 552 of the Energy Policy and Conservation Act (Pub. L. 94–163), said Part 500 only to become effective as provided in section 201(b) of that Act.

Issued in Washington, D.C., January 18, 1977.

DAVID G. WILSON,
Acting General Counsel.

10 CFR Chapter II is amended by adding Part 500, to read as follows:

Subpart A—General Provisions

Sec.
500.1 Scope.
500.2 Relationship of subparts.
500.3 General definitions.
500.4 Ration coupons as obligations of the United States, crimes and offenses.

Subpart B—Rationing of Gasoline

500.21 General.
500.22 Ration rights.
500.23 Validity of ration rights.
500.24 Issuance of ration rights to eligible individuals.
500.25 Issuance of ration rights to firms entitled to a ration credit level.
500.26 Calculations.
500.27 Recordkeeping requirements.

Subpart C—Redemption, Validation of Ration Rights, Scrip and Precedence of Delivery

500.31 General.
500.32 Invalidated ration rights.
500.33 Cancelled ration rights.
500.34 Redeemed ration rights.
500.35 Restriction on endorsements.
500.36 Scrip.
500.37 Precedence of delivery.

Subpart D—Ration Credit and Redemption Accounts

500.41 General.
500.42 Primary ration credit accounts.
500.43 Secondary ration credit accounts.
500.44 Redemption accounts.
500.45 Recordkeeping requirements and reports.
500.46 Redemption account credits.

Subpart E—National Ration Reserve

Sec.
500.51 National Ration Reserve.

Subpart F—State Rationing Offices and Local Rationing Boards

500.61 State Rationing Office.
500.62 Local Rationing Boards.
500.63 Hardship applications.
500.64 Selection of Local Rationing Panel and Local Rationing Board Manager.
500.65 State Hardship Reserves.
500.66 Timeliness.
500.67 Appeals.

Subpart G—Diesel Fuel Rationing

500.71 General.
500.72 Issuance of ration rights.
500.73 Redemption.

Subpart A—General Provisions

§ 500.1 Scope.

(a) This part applies to the end-use rationing of gasoline and diesel fuel produced in or imported into the United States.

(b) *Effective date.* The subparts of this part shall become effective severally or in toto on a date or dates to be specified by the Federal Energy Administration and published in the FEDERAL REGISTER, subject to the provisions of section 201 (b) and (c) of the Energy Policy and Conservation Act (Pub. L. 94–163).

(c) *Relationship to other parts.* Unless otherwise specified, the provisions of parts 205, 210 and 211 of this chapter shall apply to this part. The pricing provisions applicable to this part are provided in Part 212 of this chapter.

§ 500.2 Relationship of subparts.

Unless otherwise specified in a particular subpart, the general provisions set forth in this subpart apply to the mandatory rationing of gasoline and diesel fuel.

§ 500.3 General definitions.

For purposes of this part—

"Allotment" means the value in gallons of gasoline or diesel fuel of the ration rights issued to an eligible individual or any firm.

"Base period" means the calendar month in the base year corresponding to the current calendar month.

"Base period use" means base period use as defined in § 500.25(c).

"Base year" means a calendar year to be determined by FEA and published in the FEDERAL REGISTER.

"Bulk purchaser" means bulk purchaser as defined in § 211.102 of this chapter.

"Current requirements" means the amount of gasoline or diesel fuel needed by a firm to meet its present supply requirements for a particular use of those products, but does not include any amounts which the firm (a) purchases or obtains for resale, (b) accumulates as an inventory in excess of that firm's customary inventory maintained according to its normal business practices, or (c) uses in excess of the supply necessary to meet present supply requirements as constrained by the implementation of the energy conservation program required in § 211.21 of this chapter.

"Diesel fuel" means No. 2–D diesel fuel as defined in American Society of Testing and Materials (ASTM) D975–71 and No. 1–D diesel fuel as defined in ASTM D975–71. Excluded from the definition is No. 4–D diesel fuel as defined in ASTM D975–71.

"Eligible individual" means (a) a natural person having a valid motor vehicle operator's permit, other than a learner's permit, issued by a State in his or her name, (b) an Indian residing on a reservation under the jurisdiction of the Bureau of Indian Affairs of the Department of the Interior who has no State driver's permit but who is permitted by the Bureau of Indian Affairs to drive a motor vehicle on the reservation, (c) an Alaska Native of age sixteen (16) or over who has no driver's permit but who uses gasoline in a snowmobile, boat, or other vehicle or tool, or (d) any other natural person designated as an eligible individual by FEA.

"End-user" means end-user as defined in § 211.51 of this chapter.

"FEA" means the Federal Energy Administration or its delegate.

"Firm" means any association, company, corporation, estate, individual, joint-venture, partnership, or sole proprietorship or any other entity however organized including a charitable, educational, or other eleemosynary institution, State and local governments and the various departments, agencies, offices, corporations and other instrumentalities of the Federal Government. The FEA may, in regulations and forms issued in this part, treat as a firm:

(a) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (b) a parent and its consolidated entities, (c) an unconsolidated entity, or (d) any part of a firm.

"Gasoline" means motor gasoline as defined in § 211.51 of Part 211 of this chapter excluding, however, aviation fuels as defined in § 211.142 of this chapter.

"Individual" means a natural person.

"Local Rationing Board" means the group consisting of the Local Rationing Panel, the Local Rationing Board Manager and the Local Rationing Board Staff.

"National Ration Reserve" means the ration rights reserved by FEA for each ration period for distribution to meet special or urgent needs during that ration period pursuant to Subpart E of this part.

"Ration credit level" means ration credit level as defined in § 500.25(d).

"Ration period" means the period from the date on which one ration coupon series becomes valid to the date the immediately following ration coupon series becomes valid.

"Ration rights" means ration coupons and ration credits made available pursuant to Subparts B, E, F, and G which shall be evidence of an eligible individual's or firm's right to purchase specified volumes of gasoline and diesel fuel.

"Rationed product" means gasoline distributed pursuant to Subparts B and F of this part and diesel fuel distributed pursuant to Subparts F and G.

"Retail sales outlet" means a site on which a supplier maintains an on-going business of selling any rationed product to any ultimate consumer, provided that the major activity of that supplier is to supply during the course of any single transaction one hundred thirty (130) gallons or less of a rationed product into supply tanks on a vehicle for use as fuel for that vehicle.

"Scrip" means any certificate, writing or token which represents less than five (5) gallons of a rationed product, and which a retail sales outlet may offer to any firm (including an individual) which has accepted less rationed product than the gallon amount of the ration rights surrendered to the retail sales outlet.

"State" means any one of the fifty States, the District of Columbia, Puerto Rico or any territory or possession of the United States.

"State Rationing Office" means the office established by the Chief Executive of each State to carry out the authorities delegated to that office by FEA pursuant to Subpart F of this part.

"State Hardship Reserves" means the ration rights provided to the State Rationing Offices by FEA for distribution within the States to meet the hardship needs of firms (including individuals)

having needs for rationed products in addition to the amounts, if any, allotted to such firms pursuant to Subparts B and G.

"Supplier" means any firm or any part or subsidiary of any firm other than the Department of Defense which currently, during the base period, or during any period between the base period and the present, supplies, sells, transfers or otherwise furnishes (as by consignment) any allocated or rationed product to wholesale purchasers or end-users, including, but not limited to refiners, importers, resellers, jobbers, and retailers.

"Wholesale purchaser" means wholesale purchaser as defined in § 211.51 of this chapter.

"Wholesale purchaser - consumer" means wholesale purchaser-consumer as defined in § 211.51 of this chapter.

"Wholesale purchaser-reseller" means wholesale purchaser-reseller as defined in § 211.51 of this chapter.

"Vehicle rental company" means a firm which rents or leases motor vehicles to other firms (including individuals) who are bailees of the motor vehicles for the period of the rental or lease.

§ 500.4 Ration coupons as obligations of the United States; crimes and offenses.

(a) Ration coupons are an obligation of the United States within the meaning of 18 U.S.C. 8. The provisions of title 18 of the United States Code, "Crimes and Criminal Procedure," relative to counterfeiting and alteration of obligations of the United States and the uttering, dealing in, etc., of counterfeit obligations of the United States are applicable to ration coupons.

(b) Any firm having custody, care and control of ration coupons shall at all times, in receiving, storing, transmitting, or otherwise handling ration coupons, take all precautions necessary to avoid acceptance, transfer, negotiation, or use of spurious, altered, or counterfeit ration coupons and to avoid any unauthorized transfer, negotiation, or use of ration coupons. Such firms shall also safeguard ration coupons from theft, embezzlement, loss, damage, or destruction.

Subpart B—Rationing of Gasoline

§ 500.21 General.

(a) For the duration of the Mandatory Gasoline Rationing Program, no supplier shall supply and no firm shall obtain gasoline from any supplier without transferring to the supplier within ten (10) days valid ration rights or redemption checks for redemption by the supplier equal on a gallon basis to the amount of gasoline transferred, except that any retail sales outlet may transfer gasoline to any firm (including an individual) other than a supplier without obtaining and redeeming ration rights from such firm if the retail sales outlet agrees to obtain and redeem the appropriate amount of ration rights from any source within ten (10) days of the transaction.

(b) For purposes of this subpart, "ration rights" means ration coupons and ration credits issued pursuant to this subpart.

§ 500.22 Ration rights.

(a) For each ration period, FEA shall issue ration rights equal to the estimated total available supply of gasoline for that ration period, as follows:

(1) One (1) percent shall be reserved for distribution pursuant to Subpart E (the National Ration Reserve).

(2) Three (3) percent shall be reserved for distribution to the States based on population and other relevant factors pursuant to Subpart F.

(3) FEA shall issue ration rights to all firms, but not eligible individuals, each calendar month pursuant to § 500.25 of this subpart. The total amount of ration rights issued to firms in a ration period is determined by adding together the pro-rata shares of all firms' allotments for calendar months which fall wholly or partially within the ration period.

(4) The remaining ration rights not issued according to paragraphs (a) (1) through (3) of this section will be issued to eligible individuals pursuant to § 500.24.

(b) Ration rights issued to firms will be distributed in the form of ration credits deposited into a primary ration credit account for each firm. Ration rights issued to eligible individuals will be distributed in the form of ration coupons. Ration credits may be used directly for gasoline or exchanged for coupons at coupon issuance points designated by FEA. Valid ration coupons may be deposited in ration credit accounts, and be subsequently withdrawn as ration credits.

§ 500.23 Validity of ration rights.

(a) *Ration credits.* Unless withdrawn by FEA, ration credits are valid from the date of issuance by FEA through the end of the Mandatory Gasoline Rationing Program. Ration credits may be accumulated in ration credit accounts or may be withdrawn at any time after their issuance.

(b) *Coupons.* Unless declared invalid by FEA or redeemed or cancelled pursuant to Subparts C and D of this part, ration coupons of any series shall be valid from the first day of the ration period for which they are issued through the end of the Mandatory Gasoline Rationing Program even though the ration period for which the ration coupons were issued has ended. FEA may by advance public notice in the FEDERAL REGISTER declare any series or any portion of a series of ration coupons to be invalid. By notice to any holder of particular ration coupons, FEA may declare any ration coupons held by that holder to be invalid and require that such invalid ration rights be immediately surrendered to FEA.

§ 500.24 Issuance of ration rights to eligible individuals.

(a) *Ration periods.* (1) A ration period shall be designated by FEA at least ten (10) days prior to the first day of that ration period by notice published in the FEDERAL REGISTER. A notice designating a ration period may designate more than one ration period and shall establish the term of each ration period designated in the notice.

(2) FEA may by notice published in the FEDERAL REGISTER advance the commencement date of a previously designated ration period.

(b) *Eligible individual's ration allotment.* (1) For each ration period, FEA shall distribute ration rights to eligible individuals equal to the difference between the total ration rights issued for that ration period minus the ration rights to be distributed pursuant to Subparts E and F and § 500.25 of this subpart.

(2) Each eligible individual shall be entitled to receive ration rights as determined pursuant to § 500.26. FEA shall provide notice of the number of ration rights to be issued each eligible individual for a ration period at least ten (10) days prior to the commencement of the ration period.

(c) *Ration coupons.* A ration coupon shall be redeemable for five (5) gallons of gasoline, unless pursuant to advance notice in the FEDERAL REGISTER FEA orders that a ration coupon shall be redeemable for a different volume of gasoline.

(d) *Distribution of ration rights to eligible individuals.* (1) Each eligible individual may obtain his or her ration allotment at an issuance point designated by FEA. For the first three (3) ration periods, an eligible individual will be required to fill out an application form and present his or her State driver's license. Unless otherwise provided by notice published in the FEDERAL REGISTER, for ration periods subsequent to the first three (3) ration periods an eligible individual will be issued his or her ration allotment for three (3) ration periods upon surrender of an authorization card, as provided by paragraph (e) of this section, issued to that eligible individual which is valid for those three (3) ration periods. FEA by notice will designate the day or days on which eligible individuals may apply for their ration allotments. Upon an eligible individual's presentation of a valid authorization card and delivery of his or her ration allotment for one or more designated ration periods, the eligible individual's authorization card for the series of ration rights issued shall be retained and marked or cancelled at the issuance point.

(2) The procedures of paragraph (d) (1) of this section may be followed by agents of eligible individuals unable to apply personally for ration rights. Such agents must present documents authorizing the agent to act on behalf of a particular eligible individual signed by the eligible individual in accordance with FEA forms and instructions.

(3) Indians residing on reservations under the jurisdiction of the Bureau of Indian Affairs may apply to the Bureau of Indian Affairs for their allotments. Alaska Natives may apply to the State agency for their allotments.

(4) Except as provided in paragraph (d) (5) of this section, any eligible individual who applies for a ration allotment after the start of a ration period will receive no allotment for the ration period in progress, but may be given allotments for the next subsequent ration period or periods.

(5) Notwithstanding the provisions of paragraph (d) (4) of this section, FEA may provide additional time at the beginning of any ration period during which any eligible individual may apply for a ration allotment for that ration period.

(e) *Authorization cards.* (1) Any person who is an eligible individual shall be provided with valid authorization cards by the State agency authorized by FEA to issue and distribute authorization cards to licensed drivers holding driver's licenses from that State.

(2) Each eligible individual shall be issued one authorization card for designated ration periods by the appropriate State agency in accordance with notice given by FEA. No eligible individual shall accept or use more than one authorization card for any designated ration period.

(3) Appropriate State agencies shall be authorized by FEA to issue and distribute authorization cards.

(4) State agencies which enter into agreements with FEA to issue and distribute authorization cards which have been approved by FEA in writing shall do so in accordance with forms and instructions issued by FEA.

(5) *Records and reports.* Each State agency authorized by FEA to issue authorization cards shall keep records and submit such reports and other information as FEA may from time to time require.

(6) *Retention of records.* Each State agency shall retain all records and reports submitted to it for possible FEA audit for a period of three (3) years.

(7) *Lost, stolen, or misplaced authorization cards.* Any eligible individual whose authorization card is lost, stolen or misplaced shall immediately report such fact to the State agency. The State agency may issue to such eligible individual a new authorization card in accordance with procedures developed by the State agency and approved in writing by FEA. Within five (5) days of notification, the State agency must transmit the name and number of the lost, stolen, or misplaced authorization card to FEA.

(8) *Appeals concerning authorization cards.* Any individual aggrieved by any act or omission of the State agency with respect to any authorization card may file an appeal in accordance with the provisions of Subpart Q of Part 205 of this chapter.

(9) Each State agency shall establish procedures approved by FEA to ensure timely distribution of authorization cards to eligible individuals.

§ 500.25 Issuance of ration rights to firms entitled to a ration credit level.

(a) For each calendar month, FEA shall issue and distribute ration credits equal to the sum of the ration credit allotments of all firms entitled to a ration credit level and which have primary ration credit accounts with FEA.

(b) *Allotments.* (1) On the first day of each calendar month a firm entitled to a ration credit level of one hundred (100) percent of current requirements and with a primary ration credit account shall receive from FEA an initial allotment equal to one hundred (100) percent of the firm's base period use. If a firm's current requirements exceed one hundred (100) percent of its base period use, the provisions of § 500.42(f) shall determine the manner in which supplementary allotments shall be made to meet the firm's current requirements.

(2) On the first day of each calendar month a firm entitled to a ration credit level other than one hundred (100) percent of current requirements and with a primary ration credit account shall receive from FEA an allotment equal to the firm's ration credit level multiplied by the firm's base period use.

(c) *Base period use.* (1) Except as otherwise specified in paragraphs (c) (2) and (3) of this section, base period use means base period volume or adjusted base period volume, as appropriate. A wholesale purchaser-consumer's or end-user's base period use is the volume of gasoline purchased or obtained in a base period for a use for which there is a ration credit level, including gasoline used by employees or agents of such a wholesale purchaser-consumer or end-user, provided that the gasoline was used for activities authorized as within the scope of the business activities of that wholesale purchaser-consumer or end-user and the employees or agents were reimbursed for the cost of the gasoline they obtained. In the case of a new wholesale purchaser-consumer or new end-user, base period use means the volume assigned by FEA. Suppliers do not have a base period use for the purposes of this subpart except when acting as a wholesale purchaser-consumer or new end-user, base period use means the volume.

(2) *Vehicle rental companies.* For vehicle rental companies, base period use means the base period volume or adjusted base period volume, as appropriate, used by employees or agents of the firm on firm business. Volumes of gasoline used by customers of the vehicle rental company are not included in the firm's base period use. In those instances where a vehicle rental company has not distinguished between gasoline used by customers and gasoline used by employees and agents of the firm, reasonable estimates based on actual mileage records may be used in establishing the firm's base period use. For the purposes of this part, if a vehicle rental company supplies gasoline for a customer's use, that vehicle rental company shall be deemed to be a wholesale purchaser-reseller for such volumes of gasoline supplied.

(3) *Independent sales representatives.* (i) Any firm using independent sales representatives who are not employees of the firm may include the base period use of such representatives in the firm's base period use provided (A) that each such representative would otherwise qualify as a firm for the purposes of receiving an allotment from FEA, (B) that each such representative certifies the amount of his or her base period use, and that he or she has not and will not include such base period use in any application to any other firm or to FEA, and (C) that the firm agrees to provide each such representative with an amount of ration rights equal to the amount such representative would have received from FEA by separate application for uses connected with carrying out the firm's activities.

(ii) Subject to FEA approval, a firm may also include in its base period use for each new such representative who has no base period use an amount of gasoline equal to the average of all other such representatives' base period uses in the same period.

(iii) Any firm which includes in its base period use the volumes permitted in paragraphs (c) (3) (i) or (ii) of this section must attach to its application and submit monthly thereafter a certification showing the current number of such representatives by market area or other basis established by FEA, and the corresponding volumes associated with such representatives which are included in the firm's base period use.

Each such firm must also maintain records of the names, addresses, and telephone numbers of all such representatives, and must make these records available to FEA upon request by FEA at the firm's principal office address shown on its application form. FEA or its representatives may perform audits of these records to verify their accuracy.

(d) *Ration credit level.* A ration credit level is the percentage of current requirements or of base period use of an end-user or wholesale purchaser-consumer, whether or not a bulk purchaser as defined in § 211.102 of this chapter, that FEA shall use in computing the allotment for such firms each calendar month. The ration credit levels for gasoline shall be the same as the allocation levels for motor gasoline specified in § 211.103 of this chapter without application of an allocation fraction.

(e) *Basis of entitlement to ration credits.* A firm entitled to a ration credit level shall receive ration credits based on its conduct of an ongoing business or maintenance of an established end-use for which there is a ration credit level.

(f) *End-users and wholesale purchaser-consumers as firms.* For purposes of defining an end-user or wholesale purchaser-consumer in this part, a firm shall mean all parts of the parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls and which act as ultimate consumers, including all sites, storage tanks and other facilities or entities of the end-user or wholesale purchaser-consumer that use or store gasoline.

(g) *Loss of ration credit entitlement for discontinued activities.* A firm shall not be eligible to receive ration rights based upon discontinued activities and no firm shall accept or use ration rights issued or distributed to that firm or any other firm based upon discontinued activities.

(h) *New wholesale purchaser-consumers and end-users.* Wholesale purchaser-consumers and end-users which did not purchase gasoline during any base period may apply to FEA for assignment of a base period use pursuant to this subpart and to § 211.12(e) of this chapter. In determining base period use for a firm which was not in operation during the base year, FEA shall among other things review the firm's gasoline purchases preceding the firm's application to FEA, the types of vehicles used, and the number of miles driven. FEA will also consider typical consumption patterns of similar firms.

(i) *Adjustments to base period use.* Any firm entitled to a ration credit level which receives an adjustment to its base period use pursuant to § 211.13 and Subpart D of this chapter shall receive an identical adjustment to its base period use for purposes of this part.

(j) *Distribution of ration rights to firms.* (1) Each firm other than a Federal department, agency, office, or other instrumentality, may submit an application for a ration allotment and a primary ration credit account at a participating bank or other initial processing point designated by FEA, during a period to be designated by FEA.

(2) Each Federal department, agency, office or other instrumentality may submit an application for a ration allotment and a primary ration credit account to the FEA National Office.

(3) Following the acceptance and approval of its application by FEA, each firm will receive ration checking materials, forms and instructions to enable it to draw on its primary ration credit account in accordance with Subpart D of this chapter.

§ 500.26 Calculations.

(a) This section establishes the formulae for calculating a firm's ration credit allotments, the total available supply, the adjusting term, and the length of the ration period. A "computation period" is used in these calculations initially, since the precise length of the ration period is not known until the final calculation is made. The first computation period will be 30 days; once rationing has begun the computation period will have the same number of days as the immediately preceding ration period.

(b) For purposes of paragraphs (c)–(i) of this section, the following symbols have the following meanings:

Symbol	Units	Meaning
REF	Gallons	Projected refinery output of gasoline during computation period.
IMP	do	Projected imports of gasoline during computation period.
EXP	do	Projected exports of gasoline during computation period.
LOS	do	Projected losses of gasoline from spillage, evaporation, and casualty losses during computation period.
NEI	Persons	Number of eligible individuals (latest count from State agencies and Bureau of Indian Affairs).
BM,V	Gallons	The base period use of a firm in month *i*.
DM,	Days	Number of days in calendar month *i*.
DM,C	do	Number of days in calendar month *i* which fall within the computation period.
INV	Gallons	Amount of desired gasoline inventory drawdown during computation period from industry and any Government-held (strategic) inventories.
NRR	do	Amount of allotment to be reserved for use in the National Ration Reserve for the upcoming ration period.
ΣSHR	do	Amount of allotment to be provided for the State Hardship Reserves for the upcoming ration period.
CP	Days	Length of the computation period.
BA	Gallons per individual per ration period.	The basic allotment for each eligible individual in a ration period (equal to *NCU*×*VCU*).
NCU	Coupons per ration period	Number of coupons to be given to each eligible individual in a ration period.
VCU	Gallons per coupon	Gallon value of each coupon.
RCL	Fraction expressed as a decimal.	Ration credit level for a firm (90 pct=0.9; 100 pct=1.0)
TAS	Gallons	The total available supply of gasoline to be rationed during a ration period.
ADJ	do	An adjusting term representing errors, roundings, authorized overdrafts, and returned allotments in previous periods.
NAS	do	The net available supply of gasoline during a computation period, equal to the TAS minus amounts necessary for the National Ration Reserve and the State Hardship Reserves.
NDAS	do	The net daily available supply equal to the NAS divided by the number of days in the computation period.
FA,	do	The allotment for the firm in month *i*.
FD,,	do	The weighted average daily allotment for a firm in the computation period.
ΣFD,,	do	The total weighted average daily allotment for all firms in the computation period (computed by adding *FD,,* for all firms).
RP	Days	The length of a ration period.

(c) *Total available supply (TAS).* The total available supply (TAS) of gasoline which can be sold during the computation period is determined from data available on the refining and importing of gasoline, adjusted for exports, losses, and inventory changes.

$$TAS = REF + IMP - EXP - LOS + ADJ + INV$$

(d) *Adjusting term (ADJ).* The adjusting term is the sum of adjustments required as a result of errors, roundings, authorized overdrafts, and unclaimed allotments from previous ration periods.

ADJ equals $\Sigma(TAS_{\text{Current est}} - TAS_{\text{prior est}})$ for all previous ration periods,
plus UNCLAIMED ALLOTMENTS from individuals, especially those with multiple licenses,
plus RETURNED ALLOTMENTS from firms with reduced or eliminated activities,
plus ROUNDING ADJUSTMENT in computing the prior ration period, where ROUNDING ADJUSTMENT equals

$$\frac{RP \text{ Rounded} - RP}{RP} \times BA \times NEI$$

minus Authorized overdrafts by firms entitled to ration credit level of one hundred (100) percent of current requirements.

(e) *Net available supply (NAS).* The net available supply is computed by subtracting from the TAS the allotments necessary to replenish or increase the National Ration Reserve and the State Hardship Reserves.

$$NAS = TAS - NRR - \Sigma SHR$$

(f) *Net daily available supply (NDAS).* The net daily available supply (NDAS) is computed by dividing the NAS by the number of days in the computation period.

$$NDAS = \frac{NAS}{CP}$$

(g) *Allotment for each firm (FA_i).* The monthly allotment for each firm is determined by multiplying the firm's base period use times the appropriate ration credit level.

$$FA_i = BM_iV \times RCL$$

(h) *Average daily allotment for each firm (FD_{cp}).* The average daily allotment for each firm during a computation period is calculated using a weighted average to take into account the fact that a computation period will usually overlap two calendar months.

$$FD_{cp} = \left[\frac{FA_1}{DM_1} \times \frac{DM_1C}{CP}\right] + \left[\frac{FA_2}{DM_2} \times \frac{DM_2C}{CP}\right]$$

(i) *Length of ration period.* The length of the ration period is determined as follows:

$$RP = \frac{BA \times NEI}{NDAS - \Sigma FD_{cp}}$$

The ration period length computed above will be rounded up to the nearest whole day.

§ 500.27 Recordkeeping requirements.

All firms must maintain at their principal business address records on gasoline purchased, supplied, or obtained during each base period and during each month the Mandatory Gasoline Rationing Program is in effect. The records shall be subject to FEA audit and must be retained for three (3) years after the termination of the Mandatory Gasoline Rationing Program.

Subpart C—Redemption, Invalidation of Ration Rights, Scrip and Precedence of Delivery

§ 500.31 General.

(a) Subject to the provisions of § 500.42 (f), ration rights may be freely transferred for or without consideration provided that such ration rights have not been redeemed, cancelled or invalidated by FEA.

(b) No supplier (including a retail sales outlet) shall require any purchaser to purchase ration rights from any firm (including itself) as a condition of transferring gasoline.

(c) For purposes of this subpart, "ration rights" means ration coupons or ration credits issued pursuant to Subpart B of this part.

(d) No supplier, including a retail sales outlet, may refuse to accept valid ration coupons offered as evidence of entitlement to purchase gasoline if such coupons are tendered by a wholesale purchaser-consumer or end-user at the time of sale. A supplier may accept ration credit checks from a wholesale purchaser-consumer or end-user as evidence of entitlement to purchase gasoline, but if there are insufficient ration credits in the ration credit account on which the check is drawn, it shall be the payee's responsibility to secure valid ration rights to cover the deficiency.

§ 500.32 Invalidated ration rights.

Ration rights which have been invalidated by FEA are not transferable for value and shall be surrendered to FEA.

§ 500.33 Cancelled ration rights.

(a) Ration rights which have not been redeemed for gasoline may be deposited into a ration credit account. Such ration rights are cancelled when deposited.

(b) An owner of a ration credit account shall endorse ration rights to be deposited into that ration credit account with the account owner's name and account number, and shall indelibly mark ration rights with the legend "cancelled" at the time of deposit.

§ 500.34 Redeemed ration rights.

(a) Ration rights and redemption checks shall be redeemed by exchanging them for gasoline and shall be surrendered as provided by these regulations.

(b) A supplier (including a retail sales outlet) which accepts ration rights or redemption checks in exchange for gasoline shall redeem such ration rights and redemption checks by indelibly marking them with the supplier's name, its redemption account number and the legend "redeemed".

(c) A supplier (including a retail sales outlet) shall deposit redeemed ration coupons, ration credit checks and redemption checks in its redemption account.

(d) No supplier (including a retail sales outlet) shall accept from any firm ration coupons, ration credit checks or redemption checks marked "redeemed," "cancelled," or "specimen." No supplier shall deposit in its redemption account any redeemed ration rights or redemption checks which the supplier did not redeem for gasoline.

§ 500.35 Restriction on endorsements.

Except when surrendered for ration coupons by the payee at ration coupon issuance points, ration credit checks must be deposited by the payee and may not be endorsed to third parties.

§ 500.36 Scrip.

A retail sales outlet may issue scrip for any unused value on a ration coupon or ration credit check transferred for a purchase of gasoline. The type and form of the scrip are discretionary with the issuer. The scrip must be redeemed upon demand by the retail sales outlet which issued it. Retail sales outlets may agree among themselves to accept scrip issued by other retail sales outlets.

§ 500.37 Precedence of delivery.

Prior to agreeing to any other delivery schedules, suppliers shall first establish mutually satisfactory delivery schedules with all their wholesale purchaser-resellers and bulk purchasers entitled to the first priority level of allocation pursuant to § 211.10(c)(1) of this chapter.

Subpart D—Ration Credit and Redemption Accounts

§ 500.41 General.

(a) FEA shall establish, maintain and administer primary ration credit accounts, secondary ration credit accounts, redemption accounts and any other accounts required by FEA at FEA Regional Processing Centers.

(b) FEA may authorize certain firms to act as participating banks to accept applications to establish primary ration credit accounts, secondary ration credit accounts, redemption accounts and any other accounts required by FEA, to accept deposits into such accounts and to perform such other duties and services as FEA may authorize.

(c) For purposes of this subpart, "ration rights" means ration coupons or ration credits issued pursuant to Subpart B of this part.

(d) Ration credit checks drawn on either primary or secondary ration credit accounts and redemption checks shall only be issued on forms approved and distributed by FEA.

§ 500.42 Primary ration credit accounts.

(a) Upon application by any firm (including an individual) entitled to a ration credit level, and in accordance with forms and instructions to be issued by FEA, FEA shall establish a primary ration credit account for such firm.

(b) On the first day of each calendar month, FEA shall deposit ration credits for that calendar month in a firm's primary ration credit account in an amount equal to the firm's ration credit allotment.

(c) A firm may deposit additional ration rights in its primary ration credit account; *Provided*, That such ration rights have not been previously canceled, redeemed or declared invalid.

(d) A firm may withdraw ration credits from its primary ration credit account by issuing a ration credit check to the order of the firm to which it wishes to transfer ration credits.

(e) Except as provided in paragraph (f) of this section, no firm shall issue a ration credit check drawn upon a primary ration credit account in which there are insufficient ration credits to cover that ration credit check and other outstanding ration credit checks drawn on that account.

(f) Notwithstanding the provisions of paragraph (e) of this section, a firm entitled to a ration credit level of one hundred (100) percent of current requirements may draw upon its primary ration credit account in excess of the balance in that account; *Provided*, That such firm has not previously or shall not in the future transfer ration rights to another firm except to redeem its ration rights for gasoline to be utilized for activities having a ration credit level of one hundred (100) percent of current requirements.

§ 500.43 Secondary ration credit accounts.

(a) Upon application of any firm in accordance with forms and instructions to be issued by FEA, FEA shall establish secondary ration credit accounts for that firm. The minimum initial deposit required to open a secondary ration credit account shall be three hundred (300) gallons.

(b) A firm may deposit ration rights in its secondary ration credit account; *Provided, That* such ration rights have not been previously cancelled, redeemed or declared invalid by FEA.

(c) A firm may withdraw ration credits from its secondary ration credit account by issuing a ration credit check to the order of the firm to which it wishes to transfer ration rights.

(d) No firm shall issue a ration credit check drawn upon a secondary ration credit account in which there are insufficient ration credits to cover that ration credit check and other outstanding ration credit checks drawn on that account.

§ 500.44 Redemption accounts.

(a) Every supplier including every retail sales outlet shall apply to FEA for the establishment of a redemption account in accordance with forms and instructions issued by FEA.

(b) Suppliers shall deposit in their redemption accounts all redeemed ration rights and redemption checks which they have accepted.

(c) Within ten (10) days of purchasing or obtaining gasoline from any supplier, a wholesale purchaser-reseller must issue a redemption check to such supplier drawn on its redemption account in exchange for gasoline received.

(d) Participating banks shall accept redeemed ration rights and redemption checks on behalf of FEA for deposit in a supplier's redemption account.

§ 500.45 Recordkeeping requirements and reports.

Participating banks shall maintain such records and issue such reports as may be required from time to time by FEA.

§ 500.46 Redemption account credits.

(a) Based on information contained in the supplier's application for a redemption account, every supplier shall receive an initial redemption account credit equal to the greater of (1) the amount of an average single delivery during the base year or (2) ten (10) days' average gasoline receipts during the base year, computed by dividing the base year volume by three hundred sixty-five (365) and multiplying the result by ten (10).

(b) Within thirty (30) days from the date ration rights are required for the purchase of gasoline, every supplier shall report in accordance with FEA forms and instructions its initial inventory levels measured on the first day of rationing before any sales or deliveries of gasoline are made. On this report form each supplier must compute its adjusted redemption account credit, which shall be equal to the volume of an average single delivery received during the base year, or ten (10) days' average receipts during the base year, if greater, plus twenty (20) percent of total gasoline inventory capacity, minus inventory on the first day of rationing. If the result is less than zero, the adjusted redemption account credit is equal to zero.

(c) Suppliers which are located in remote areas subject to infrequent or irregular supply schedules, and suppliers in areas subject to highly seasonal demand may apply to FEA for a special redemption account credit, if the adjusted redemption account credit computed according to paragraph (b) above will be insufficient to cover actual gasoline receipts less the amount of ration credits and redemption checks received or expected to be received from customers during the first twenty (20) days of the rationing program.

Subpart E—National Ration Reserve

§ 500.51 National Ration Reserve.

(a) The National Ration Reserve shall be used by FEA to meet national disaster relief needs or for emergency replenishment of a State Hardship Reserve or for any other emergency need at the discretion of the Administrator of the FEA.

(b) Each ration period, one (1) percent of the ration rights issued by the FEA pursuant to Subpart B of this part shall be reserved for distribution at the discretion of the FEA National Office through the National Ration Reserve. The percentage of ration rights to be retained in the National Ration Reserve may be increased or decreased during subsequent ration periods upon notice published in the FEDERAL REGISTER.

Subpart F—State Rationing Offices and Local Rationing Boards

§ 500.61 State Rationing Office.

(a) Any State may apply to the FEA National Office to create a State Rationing Office within the State. The Bureau of Indian Affairs shall be treated as a State Rationing Office with respect to the Indian reservations under its jurisdiction.

(b) After FEA review of the criteria in paragraph (d) of this section and upon certification by FEA, such State Rationing Office will be delegated authority (1) to administer the State Hardship Reserve alloted by FEA to that State, (2) to receive petitions from any user of rationed products with respect to the priority and entitlement of such user under these regulations, and (3) consistent with these regulations and guidelines issued by FEA, to order a reclassification or modification of any prior determination made with respect to such user's rationing priority or rights specified in paragraph (b)(2) of this section subject to review by FEA.

(c) Each State shall maintain a primary ration credit account into which FEA shall deposit each month ration credits equal to that State's Hardship Reserve. No State shall issue a ration credit check drawn upon this ration credit account if there are insufficient ration credits to cover that ration credit and other outstanding ration credit checks drawn on that account.

(d) The State Rationing Office may redelegate the authority given to it by FEA to one or more Local Rationing Boards.

(e) *Criteria for delegation of authority to State Rationing Offices.* [Reserved]

§ 500.62 Local Rationing Boards.

(a) Local Rationing Boards may be established within a State by the State Rationing Office pursuant to § 500.61.

(b) Each Local Rationing Board shall include a Local Rationing Panel selected pursuant to § 500.64.

(c) The Local Rationing Board shall be allotted an equitable portion of the State Hardship Reserve by the State Rationing Office. The Local Rationing Board shall maintain a secondary ration credit account into which it shall deposit the portion of the State Hardship Reserve it receives from time to time. From this secondary account, the Local Rationing Board may issue ration rights to eligible individuals determined to be experiencing hardships pursuant to § 500.63. The Local Rationing Board shall not issue a ration credit check drawn upon its secondary ration credit account if there are insufficient ration credits to cover that ration credit check and other outstanding ration credit checks drawn on that account.

(d) Each Local Rationing Board shall accept hardship applications pursuant to § 500.63 and either approve or disapprove such petitions pursuant to instructions and guidelines to be issued by FEA.

(e) Each week the Local Rationing Board shall report to the State Rationing Office with respect to the preceding week (1) the number of hardship applications received per category of hardship alleged, (2) the disposition made of hardship applications, and (3) the amount of ration rights issued to individuals found to be experiencing hardships.

(f) The Local Rationing Panel shall review and decide all appeals of decisions made by the Local Rationing Board pursuant to § 500.63(d) and in accordance with guidelines to be issued by FEA. The Local Rationing Panel shall also review and decide appeals filed by any person aggrieved by a decision of the Local Rationing Board with respect to any matters redelegated to it by the State Rationing Office pursuant to § 500.61. Appeals from the decision of the Local Rationing Panel may be further appealed pursuant to § 500.67.

(g) The Bureau of Indian Affairs may establish Local Rationing Boards on Indian reservations under its jurisdiction. Such boards will carry out the duties and functions of Local Rationing Boards as set forth in this subpart.

§ 500.63 Hardship applications.

(a) An individual may file a hardship application for rationing rights in addition to the rationing rights, if any, which he or she is entitled to receive pursuant to Subpart B of this part. The application shall be made in accordance with FEA forms and instructions.

(b) Hardship applications will be received by the Local Rationing Board for review and determination if the applicant alleges any one or more of the following hardships:

(1) *Handicapped persons.* Any individual who, by reason of disease, injury, age, congenital malfunction, or other permanent incapacity or disability, is unable without special facilities, planning or design to utilize mass transportation vehicles, facilities and services, who has a substantial, permanent impediment to mobility and whose needs for rationed products exceed the amount, if any, represented by the ration rights issued pursuant to Subpart B of this part may file a hardship application.

(2) *Low-income, long-distance commuters.* Persons who without ration rights in addition to the amount, if any, allotted to them pursuant to Subpart B of this part would be forced to spend over five (5) percent of their adjusted gross incomes purchasing ration rights for travel to and from their place of employment, and for whom carpooling or public transportation is not a reasonable alternative, may file a hardship application.

(3) *Migrant workers.* An individual who holds a drivers licensed by a State, who travels from one agricultural work site to another agricultural work site, and whose needs for rationed products exceed the amount represented by the ration rights, if any, issued pursuant to Subpart B of this part may file a hardship application with the Local Rationing Board which serves the community in which the current work site is located. The applicant should be awarded sufficient ration rights to assist the individual in traveling to his or her next work site.

(4) *Persons engaged in household moves.* Persons who are driving vehicles as part of their own household move and who in order to complete the move will need more than twenty-five (25) percent of the total amount of ration rights for one ration period allotted to all members of the household pursuant to Subpart B of this part may file a hardship application. Rationed products needed by firms engaged in household moving for hire may not be obtained through the Local Rationing Board.

(5) *Other recurring or one-time hardship needs.* Any individual experiencing severe hardships on a recurring or one-time-only basis, who is not specified in paragraphs (b)(1), (2), (3) and (4) above, may file a hardship application. The Local Rationing Board must review and decide any application filed pursuant to this paragraph (b)(5) consistent with the objectives of the Mandatory Gasoline Rationing Program.

(c) *Processing of applications.* (1) The Local Rationing Board may initiate an investigation of any statement in an application, whether written or verbal, and use in its evaluation any relevant facts obtained by such investigation. The Local Rationing Board may solicit and accept submissions from third persons relevant to any application provided that the applicant is afforded an opportunity to respond to all third person submissions. In evaluating an application, the Local Rationing Board may consider any other source of information. The Local Rationing Board on its own initiative may convene a conference, if, in its discretion, it considers that a conference will advance its evaluation of the application.

(2) If the Local Rationing Board determines that there is insufficient information upon which to base a decision and if upon request the necessary additional information is not submitted, the Local Rationing Board may dismiss the application without prejudice. If the failure to supply additional information is repeated or willful, the Local Rationing Board may dismiss the application with prejudice.

(3) After processing, the Local Rationing Board or upon appeal the Local Rationing Panel shall either grant or deny a hardship application. If the application is granted, the Local Rationing Panel or the Local Rationing Board shall determine the amount of ration rights to be granted, shall notify the applicant in writing of the amount determined, and shall issue ration rights to the applicant in that amount. If the Local Rationing Board or the Local Rationing Panel determines that the application is not to be granted, the applicant shall be notified in writing promptly upon such determination.

(d) An applicant who does not receive as many ration rights as he or she applied for or an applicant whose application is not granted may appeal to the Local Rationing Panel. The appeal must be filed within fifteen (15) calendar days of receipt of the notice of determination specified in paragraph (c)(3) of this section. There has not been an exhaustion of administrative remedies until an appeal has been filed and decided, and all further appellate proceedings provided in § 500.67 of this subpart have been completed.

§ 500.64 Selection of Local Rationing Panel and Local Rationing Board Manager.

The Local Rationing Panel shall consist of an odd number of volunteers selected by the local government in which the panel serves in accordance with FEA guidelines. The members of the Local Rationing Panel shall designate one of their members as the individual responsible for calling meetings of the panel to determine local procedures and to carry out the duties of the Local Rationing Panel. The Local Rationing Board Manager shall be selected by the Chief Executive of the State in which the Local Rationing Board is located.

§ 500.65 State Hardship Reserves.

(a) Pursuant to Subpart B of this part, FEA shall distribute ration rights to each State Rationing Office to be used by Local Rationing Boards to meet the needs of approved individual hardship applicants pursuant to § 500.63 of this subpart and to meet the needs of approved hardship applications filed with the State Rationing Office by firms pursuant to paragraph (b) of this section.

(b) *Application by firms experiencing severe hardships.* (1) A firm entitled to a ration credit level, other than as a supplier or a wholesale purchaser-reseller, may file an application with the State Rationing Office for rationing rights in addition to any rationing rights it is entitled to receive pursuant to Subparts B and G of this part. The application shall be made in accordance with FEA forms and instructions.

(i) The State Rationing Office may initiate an investigation of any statement in an application, whether written or verbal, and use in its evaluation any relevant facts obtained by such investigation. The State Rationing Office may solicit and accept submissions from third persons relevant to any application provided that the applicant is afforded an opportunity to respond to all third person submissions. In evaluating an application, the State Rationing Office may consider any other source of information. The State Rationing Office on its own initiative may convene a conference, if, in its discretion, it considers that a conference will advance its evaluation of the application.

(ii) If the State Rationing Office determines that there is insufficient information upon which to base a decision and if upon request the necessary additional information is not submitted, the State Rationing Office may dismiss the application without prejudice. If the failure to supply additional information is repeated or willful, the State Rationing

Office may dismiss the application with prejudice.

(2) The State Rationing Office shall notify the applying firm in writing of the decision made with respect to the application and the amount, if any, of ration rights the firm is to receive from the State Hardship Reserve.

(3) Any firm aggrieved by the decision of the State Rationing Office with respect to its application may appeal that decision pursuant to § 500.67(c) of this subpart.

(c) Each month the State Rationing Office shall report to FEA with respect to the preceding month (1) the number of hardship petitions received per category of hardship alleged, (2) the disposition made of hardship applications, and (3) the amount of ration rights issued from the State's Hardship Reserve.

(d) Within ten (10) days of the end of a ration period, any ration rights remaining in the State Hardship Reserve shall be reported to FEA. FEA may, among other courses of action, add it to the State Hardship Reserve for the next ration period, transfer all or a portion of the balance to another State Hardship Reserve, or treat the balance as an advancement on the State Hardship Reserve for the next ration period.

§ 500.66 Timeliness.

(a) If the Local Rationing Board, the Local Rationing Panel or the State Rationing Office fails to take action on an individual's or a firm's application, respectively, within ten (10) days of filing, the applicant may treat the application as having been denied in all respects and may appeal therefrom as provided in § 500.67.

(b) Notwithstanding paragraph (a) of this section, the Local Rationing Board or the State Rationing Office may temporarily suspend the running of the 10-day period if it finds that additional information is necessary or that the application was improperly filed. The temporary suspension shall remain in effect until the Local Rationing Board or the State Rationing Office serves upon the individual or firm notice that the additional information has been received and accepted or that the application has been properly filed as appropriate. Unless otherwise provided in writing, the 10-day period shall resume running on the first day that is not a Saturday, Sunday, or Federal legal holiday and that follows the day on which the Local Rationing Board or the State Rationing Office serves upon the person the notice described in this paragraph.

§ 500.67 Appeals.

(a) An individual aggrieved by a decision made by a Local Rationing Board may appeal that decision to the Local Rationing Panel pursuant to § 500.63(d).

(b) An individual aggrieved by an appeal decision of a Local Rationing Panel may appeal that decision to the State Rationing Office in accordance with the procedures established by the State office. The appeal shall be filed within fifteen (15) days of serivce of the order from which the appeal is taken. There has not been an exhaustion of administrative remedies until an appeal has been filed and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

(c) Any person aggrieved by a decision made by a State Rationing Office with respect to any matters coming within the authority delegated to it pursuant to § 500.61 or relating to its decisions on applications for additional ration rights made pursuant to § 500.65 or on an appeal decision made pursuant to paragraph (b) of this section may file an appeal of that decision pursuant to Subpart Q of Part 205 of this chapter.

Subpart G—Diesel Fuel Rationing

§ 500.71 General.

(a) No firm shall obtain diesel fuel at retail sales outlets from any supplier without transferring to the supplier valid ration rights equal on a gallon basis to the amount of diesel fuel transferred and no supplier (including a retail sales outlet) shall transfer diesel fuel at retail sales outlets to any wholesale purchaser-consumer or end-user, without obtaining and redeeming ration rights from such wholesale purchaser-consumer or end-user, except that a supplier at a retail sales outlet may transfer diesel fuel to any firm other than a supplier without obtaining and redeeming ration rights from such firm if the supplier at a retail sales outlet agrees to obtain and redeem the appropriate amount of ration rights from any source and does so within ten (10) days of the transaction.

(b) For purposes of this subpart, "ration rights" means ration coupons issued pursuant to Subparts B and F of this part or charges against a diesel fuel entitlement card issued by FEA pursuant to § 500.72.

§ 500.72 Issuance of ration rights.

(a) Ration coupons issued for gasoline pursuant to the provisions of Subparts B and F of this part may be used to purchase diesel fuel at retail sales outlets in lieu of gasoline at the option of the holder. However, no ration coupon may be used for both gasoline and diesel fuel.

(b) Ration coupons issued pursuant to Subparts B and F of this part which the holder uses to purchase diesel fuel at retail sales outlets shall be valid in the same manner as specified in § 500.23.

(c) A firm which purchases diesel fuel at retail sales outlets may apply to FEA for establishment of a diesel fuel ration credit account and for issuance of a diesel fuel entitlement card which shall enable the holder to purchase diesel fuel at retail sales outlets. The amount of the ration allotment which FEA will make for each diesel fuel primary ration credit account shall be the same as the allocation levels for middle distillate specified in Part 211 of this chapter prior to the application of an allocation fraction.

(d) Firms applying for a diesel fuel entitlement card shall be provided a diesel fuel ration credit account to which FEA will credit in each calendar month the amount of diesel fuel to which the firm is entitled pursuant to paragraph (c) of this section.

(e) A firm which wishes to purchase diesel fuel at retail sales outlets in excess of volumes purchased at retail sales outlets during the base period may petition FEA pursuant to Subpart D of Part 205 to increase the amount of the firm's ration credits to be issued by FEA in a calendar month. A firm which did not purchase diesel fuel at retail sales outlets during a base period may apply for assignment of a base period use pursuant to Subpart C of Part 205.

(f) A firm may apply to FEA for a diesel fuel entitlement card in accordance with FEA forms and instructions. The applicant shall be required to determine its base period use of diesel fuel and to indicate for each period corresponding to a base period how much by volume of its base period use of diesel fuel was purchased at retail sales outlets.

(g) FEA may invalidate any diesel fuel entitlement card by notice to the firm to which it was issued if FEA finds, among other things, that the card is being improperly used or is reported lost or stolen.

(h) Sales to holders of diesel fuel entitlement cards at retail sales outlets of diesel fuel shall be made by imprinting the information on the card on an FEA form which shall, among other information, indicate the volume of diesel fuel sold; the date of sale; the name of the retail sales outlet; and certification by the card holder that he or she is currently authorized by the firm (including an individual) to which the card was issued to use the card for purchases of diesel fuel at retail sales outlets. A copy of the completed form shall be provided to the holder; a second copy held for transmittal to the FEA regional processing center; and a third copy maintained by the retail sales outlet.

§ 500.73 Redemption.

(a) The retail sales outlet of diesel fuel shall collect all ration rights exchanged for diesel fuel and after stamping any ration coupons redeemed for diesel fuel with the legend "redeemed for diesel," keep all such ration rights separate from ration rights exchanged for gasoline. Those ration rights exchanged for diesel fuel shall not be deposited in a wholesale purchaser-reseller's redemption account.

(b) From time to time and upon prior notification by FEA, retail sales outlets of diesel fuel may be required to transmit to a FEA regional processing center all ration rights exchanged for diesel fuel including copies of the transaction forms used by holders of diesel fuel entitlement cards which the owner of the retail sales outlet retained at the time of sale pursuant to § 500.72(h).

CHAPTER III—U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

PART 711—GUIDELINES FOR ENVIRONMENTAL REVIEW

Miscellaneous Amendments

On February 14, 1974, guidelines were promulgated and published in the FEDERAL REGISTER (39 FR 5620) establishing

policies and procedures for the discharge of the responsibilities of the Atomic Energy Commission (AEC)—operations with respect to the National Environmental Policy Act of 1969 (NEPA) and other related authorities. The Energy Research and Development Administration (ERDA), the statutory successor to the operational functions of the AEC as a result of the Energy Reorganization Act of 1974, adopted those guidelines on March 3, 1975 (40 FR 8794). The purpose of those regulations was explained in the preamble to the AEC operations guidelines.

Experience with these guidelines has indicated that certain changes are needed for the sake of clarity, particularly in amending the guidelines to conform to ERDA's organizational structure. Accordingly, Part 711 of Title 10, Code of Federal Regulations is amended as set forth below.

These amendments will apply to all units of ERDA. They will apply to all reviews of proposed actions not yet commenced and will also apply to the maximum extent practicable to reviews currently in process. These amendments are promulgated as final amendments to the guidelines since they are matters relating to agency procedures and the agency desires that these procedures be available immediately for application to the large number of environmental reviews currently in process. For these reasons, the agency has determined that it is not necessary to provide notice of proposed rulemaking, opportunity for public participation or delay of effective date. However, in order to provide the public with an opportunity to comment on these guidelines, interested persons may submit, on or before March 14, 1977, written comments to the Director, Office of NEPA Coordination, Mail Station E-201, U.S. Energy Research and Development Administration, Washington, D.C. 20545. These comments will be considered with respect to the desirability of further amendment of this Part.

These amendments are promulgated under authority provided in Section 105, 88 Stat. 1238 (42 USC 5815), and section 102, 83 Stat. 853 (42 USC 4332) and are effective January 26, 1977. Part 711 is hereby revised to read as follows.

Dated at Germantown, Maryland, this 8th day of December 1976.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator,
for Environment and Safety.

Subpart A—General

Sec.
711.1 Background.
711.2 Purpose.
711.3 Policy.
711.5 Applicability.
711.7 Definitions.

Subpart B—Environmental Impact Assessments

711.23 Criteria for determining need for environmental impact assessments.
711.25 Content of environmental impact assessments.
711.27 Submission of environmental impact assessments.
711.29 Review of environmental impact assessments.
711.31 Negative declarations.

Subpart C—Environmental Impact Statements

711.41 Criteria for determining need for environmental impact statements.
711.43 Scope of environmental impact statements.
711.45 Timing of environmental impact statements.
711.47 Responsibilities for preparation of environmental impact statements.
711.49 Notice of intent.
711.51 Required lists.
711.53 Submission and review of draft environmental impact statements.
711.55 Public hearings.
711.57 Preparation, review and distribution of final environmental impact statements.
711.65 Timing for proposed ERDA actions.
711.67 Amendments or supplements to final environmental impact statements.
711.69 Review of other agencies' environmental impact statements.

Subpart D—General Guidance for Content of Environmental Impact Statements

711.81 Cover.
711.83 Body of statement.

AUTHORITY: Sec. 105, 88 Stat. 1238 (42 U.S.C. 5815); Sec. 102, 83 Stat. 853 (42 U.S.C. 4332).

Subpart A—General

§ 711.1 Background.

(a) The National Environmental Policy Act of 1969 (NEPA), implemented by Executive Order 11514 (E.O. 11514) dated March 5, 1970 (35 FR 4247), and the Guidelines of the Council on Environmental Quality (CEQ) of August 1, 1973 (40 CFR Part 1500, 38 FR 20550), require that all agencies of the Federal Government prepare detailed environmental statements on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment. The objective of NEPA is to build into the Federal agency decisionmaking process, beginning at the earliest possible point, an appropriate and careful consideration of environmental aspects of proposed actions in order that adverse environmental effects may be avoided or minimized. In addition, section 309 of the Clean Air Act (CAA), as amended, provides that the Administrator of the Environmental Protection Agency (EPA) shall review and comment on any matter relating to EPA's authority contained in such proposed legislation or such other major Federal action. Office of Management and Budget (OMB) Bulletin No. 72-6 of September 14, 1971, and OMB Circular No. A-95 (Revised) of January 2, 1976, provide guidance in connection with the evaluation, review and coordination of Federal projects and activities.

§ 711.2 Purpose.

(a) This Part establishes policy and procedure for discharging the Energy Research and Development Administration's (ERDA) responsibilities with respect to NEPA, E.O. 11514, section 309 of the CAA, OMB Bulletin No. 72-6, OMB Circular No. A-95 (Revised) and the CEQ Guidelines, as they may be amended from time to time. This Part will be reviewed and revised, in consultation with CEQ, to ensure full compliance with these directives. This Part is intended to provide guidance for:

(1) Identifying the agency environmental appraisal process, those ERDA actions requiring environmental impact assessments and statements and the time schedule for appropriate participation prior to agency decision of applicable Federal, State and local governmental units and members of the public;

(2) Obtaining information to allow the potential environmental impact of administrative and legislative actions to receive full consideration in the agency decisionmaking process;

(3) Obtaining information and internal ERDA review required for the preparation of environmental impact assessments and statements;

(4) Designating the ERDA officials who are to be responsible for preparation, review and approval of environmental impact assessments and statements.

§ 711.3 Policy.

(a) Consistent with ERDA's statutory responsibilities and other essential considerations of national policy, ERDA shall conduct its activities in a manner calculated to promote the general welfare, to encourage productive and enjoyable harmony between man and his environment, to minimize damage to the environment, to enhance environmental quality, to restore environmental quality lost previously, and to preserve natural systems and resources to the greatest possible extent.

(b) To this end, ERDA will incorporate into its planning and decisionmaking processes, a careful consideration of the environmental consequences which may be caused by its proposed actions by:

(1) Evaluating both the long-range and short-range implications of such actions to man, including his physical and social surrounding, and to nature;

(2) Exploring, developing and analyzing alternative actions that may avoid, minimize or compensate adverse impacts;

(3) Providing for disclosure of the potential environmental effects of such proposed actions to agency and other decisionmakers, including Congress and the President, and to the public.

§ 711.5 Applicability.

(a) This part applies to all ERDA organizations.

(b) This part covers ERDA administrative actions and legislative proposals, including those actions and proposals sponsored jointly with other agencies. In this latter connection, if an environmental impact assessment or statement is to be prepared, the agencies involved shall determine as early as possible their respective responsibilities the preparation and processing of that document including designation of a single agency to assume leadership responsibilities where appropriate. Where a lead agency prepares the document, the other agencies involved are expected to provide assistance with

respect to their areas of jurisdiction and expertise. Factors relevant in determining an appropriate lead agency include time sequence in which the agencies become involved, the magnitude of their respective involvement, and their relative expertise with respect to the anticipated environmental effects of the proposed action. Whether an assessment or statement is prepared by a lead agency or is prepared jointly by several agencies, the document should:

(1) Evaluate the environmental consequences of the full range of Federal actions involved;

(2) Reflect the views of all participating agencies;

(3) Be prepared before major or irreversible actions have been taken by any of the participating agencies.

(c) This part applies to proposed actions which may have a significant environmental effect even though they arise from projects or programs initiated prior to enactment of NEPA.

(d) The following actions are not subject to the requirements of this part:

(1) Administrative procurements (e.g., general supplies);

(2) Contracts for personal services;

(3) Personnel actions;

(4) Legislative proposals originating in another agency;

(5) Legislative proposals not relating to or affecting matters within ERDA's primary areas of responsibility;

(6) Legislative or administrative actions in the nature of conceptual design, architectural and engineering studies, basic research, and other administrative matters or legislative proposals having no foreseeable impact on the quality of the human environment.

§ 711.7 Definitions.

(a) An "action" as used in this Part is one which may affect the quality of the human environment.

(1) An "administrative action" is an ERDA action, other than a legislative action (as defined herein), which includes but is not necessarily limited to:

(i) A new or continuing project or program, or expansion or revision to a continuing program:

(A) Directly undertaken by ERDA;

(B) Supported in whole or in part through ERDA contracts, grants, loans, guarantees, subsidies, or other forms of financial assistance;

(C) Involving an ERDA lease, permit, or license.

(ii) The establishment or modification by ERDA of rules, regulations, or policies.

(2) A "budgetary action" is a legislative action (as defined herein), involving an ERDA request to Congress for authorization and appropriation of funds for a proposed construction line item, or other proposed major activity or program.

(3) A "legislative action" is a favorable report or recommendation on a proposal for legislation sponsored by ERDA, including a budgetary action as defined herein.

(b) An "environmental development plan" (EDP) is generally anticipated to be the basic ERDA management document for planning, budgeting, managing, and reviewing the broad environmental implications of an ERDA energy research, development and demonstration program.

(c) An "environmental impact assessment" (EIA) is a written document which evaluates the environmental impacts of proposed ERDA actions to assure that environmental values are considered at the earliest meaningful point in the decisionmaking process, and which provides the basis for a determination whether an environmental impact statement will be prepared.

(d) An "environmental impact statement" (EIS) is a written document prepared at the earliest meaningful point in the decisionmaking process which analyzes the environmental impacts associated with a proposed ERDA action and of reasonably available alternatives and reflects responsible public and governmental views and concerns.

(1) A "draft environmental impact statement" (DEIS), is a preliminary statement which is circulated for review and comment outside of ERDA as a vehicle for eliciting additional public and governmental participation in the ERDA environmental review process.

(2) A "final environmental impact statement" (FEIS) is a revised DEIS which considers and evaluates (a) the substantive issues and comments raised and (b) new information developed during the public review period.

(e) A "negative declaration" is a document prepared subsequent to a decision that an environmental impact statement will not be prepared for a proposed action where the action is one which: (1) Has been identified earlier in an EDP or EIA as an action for which a statement would be prepared; (2) Is similar to actions for which ERDA has prepared a significant number of statements; (3) Has previously been announced as being the subject of a statement; or (4) ERDA has determined not to prepare such a statement in response to a request from CEQ to prepare a statement. This document shall set forth the decision and briefly state the reasons therefor.

(f) "Programs" are aggregates of projects which share a common objective or purpose and are so inter-related that planning or decisionmaking with respect to any one component would be likely to significantly affect planning or decisionmaking with respect to any other component.

(g) "Projects" are individualized ERDA actions including, but not limited to, proposed construction of a facility which may, but need not, constitute a part of a larger program.

(h) "Responsible Assistant Administrator" is that Assistant Administrator who has been assigned overall responsibility for the conduct of a program, project, or other ERDA action which may be subject to this Part.

(i) "Appropriate ERDA official" is the program division, field organization, or any other subunit head within ERDA who has been assigned direct responsibility for the conduct of a program, project, or other ERDA action subject to this Part.

(j) "Summary sheet" is a brief summary of the significant aspects of an environmental impact statement which accompanies the EIS. It is prepared in accordance with Appendix I of the CEQ Guidelines (40 CFR 1500).

Subpart B—Environmental Impact Assessments

§ 711.23 Criteria for determining need for environmental impact assessments.

(a) An environmental impact assessment is ordinarily not required for actions and alternatives with respect to which an environmental impact assessment or statement has been formerly prepared by ERDA or another Federal agency and that in the opinion of the AES still reflects a current evaluation of such impacts and issues. In these instances, the relevant assessment or statement should accompany the proposal for such action through the ERDA review and decisionmaking process to the same extent as an assessment or statement prepared under this Part.

(b) The appropriate ERDA officials are responsible for the preparation of environmental impact assessments for all proposed administrative and legislative actions to which this Part is applicable and have not been previously identified as requiring environmental impact statements.

(c) The Assistant Administrator for Environment and Safety (AES), in consultation with the Office of the General Counsel (OGC), may request the responsible Assistant Administrator or appropriate ERDA official to prepare an environmental impact assessment for any proposed ERDA action under their respective jurisdiction, which, in the opinion of the AES, may impact the quality of the environment.

§ 711.25 Content of environmental impact assessments.

(a) Environmental impact assessments (EIA) should be brief, factual documents that evaluate and analyze the environmental consequences of proposed ERDA actions in enough detail to assure that environmental values are considered as early as possible in the decisionmaking process and to provide the factual basis for a determination of the need for the preparation of an environmental impact statement. Assessments should be structured in a manner that is most useful for planning and decisionmaking. EIA's should ordinarily contain the following information:

(1) *Description of the proposed action.* The proposed action should be briefly described and known environmental issues should be identified. Drawings, maps, and charts should be included only if directly pertinent to the assessment.

(2) *Description of the existing environment.* The existing environment affected by the proposed action should be described only in sufficient detail to permit a meaningful evaluation of the potential environmental consequences of the proposed action.

(3) *Potential environmental impacts.* The potential impacts and risks of the proposed action should be assessed, including those adverse impacts which cannot be avoided should the proposal be implemented. The potential cumulative and long-term environmental effects, including any benficial effects should also be evaluated. Any known issue identified in subparagraph (1) above, should be discussed. The risks and effects of significant credible accidents should be evaluated For proposed construction projects, potential impacts in the following three areas should be addressed:

(i) *Construction.* The probable environmental effects that may occur from site preparation, roads, excavation, utilities, parking lots, hauling, clean-up, etc., should be assessed. Included should be the effects of dust, earthmoving, silt, water and noise. Secondary impacts, such as increased labor force and effect on community resources, and new housing and services, should be discussed whenever appropriate.

(ii) *Operation.* The probable environmental impacts from the use of resources, such as materials, supplies, fuel, personnel, and from plant affluents, should be assessed.

(iii) *Site restoration.* The plans, if any, that may be required for site restoration and the resulting impacts should be briefly described.

(4) *Coordination with Federal, state, regional or local plans.* The potential conflicts of the proposed action with Federal, state, regional or local plans and policies and how any conflicts will be mitigated or resolved should be described.

(5) *Description of alternatives.* The reasonably available alternatives to the proposed action should be briefly described.

§ 711.27 Submission of environmental impact assessments.

(a) Environmental impact assessments shall be submitted to the AES through the responsible Assistant Administrator along with a recommendation as to whether an environmental impact statement should be prepared and the reasons therefor. If it is recommended that a statement should be prepared, the transmittal shall include the information specified in § 711.47(b).

§ 711.29 Review of environmental impact assessments.

(a) The AES, in consultation with OGC, shall review environmental impact assessments and accompanying recommendations in accordance with § 711.41 to determine whether proposed actions require the preparation of an environmental impact statement.

(b) If the AES determines that a statement is required, he will so inform the responsible Assistant Administrator who shall cause the preparation of an environmental impact statement in accordance with § 711.47, and Subpart D.

(c) A copy of all environmental impact assessments shall remain on file with AES who shall place copies of unclassified documents in appropriate ERDA public document room(s) for public inspection as soon as possible. Unless or until superseded by an environmental impact statement, environmental impact assessments shall accompany the proposed action through the agency decisionmaking process.

§ 711.31 Negative declarations.

(a) If it is determined that a proposed action does not require the preparation of an environmental impact statement and the proposed action meets the criteria of § 711.7(e), the AES shall so inform the appropriate ERDA official and cause a negative declaration to be prepared which documents the reasons for that determination. Negative declarations shall be published in the FEDERAL REGISTER. No action related to the subject of the negative declaration shall be taken sooner than 15 days following publication in the FEDERAL REGISTER.

(b) Lists of negative declarations shall be provided to CEQ at least quarterly in accordance with 40 CFR 1500.6(e).

Subpart C—Environmental Impact Statements

§ 711.41 Criteria for determining need for environmental impact statements.

(a) An environmental impact statement is ordinarily not required for actions with respect to which an environmental impact statement has been formerly prepared by ERDA or another Federal agency and that in the opinion of the AES still reflects a current evaluation of such impacts and the issues involved in ERDA's implementation of the proposed action. In these instances, the relevant statement should accompany the proposal for such action through the ERDA review and decisionmaking process to the same extent as a statement prepared under this Part.

(b) Environmental impact statements shall be prepared for those proposed actions identified in current environmental development plans as requiring such statements except as provided in § 711.31 and all other major ERDA actions having a potentially significant effect on the quality of the human environment.

(c) In determining what is a "major ERDA action having a potentially significant effect on the quality of the human environment", the following should be considered:

(1) The term "major ERDA actions" implies a threshold of magnitude of ERDA involvement which must be met before a statement is required. The action must be one where there is sufficient ERDA control and responsibility to influence the course of the action. In assessing the nature of the action, the role of ERDA funds, manpower, studies and discretionary decisions should be considered.

(2) The term "significantly affecting the quality of the human environment" implies a threshold of impacts which must be met before a statement is required. In assessing the significance of the impact, the following should be considered:

(i) The overall cumulative impact of the proposed action and related Federal actions;

(ii) The potential for degradation of the quality of the environment, curtailment of the range of beneficial uses of the environment, and the furtherance of short-term to the disadvantage of long-term environmental goals;

(iii) Effects on management, allocation or consumption of important scarce or nonrenewable resources; and

(iv) Whether expected environmental impacts are likely to be controversial.

(3) Significant effects may include secondary effects such as socioeconomic impacts and actions which could have both beneficial and adverse effects. Additional guidance is set forth in the CEQ Guidelines, 40 CFR 1500.6 (a), (b) and (c).

§ 711.43 Scope of environmental impact statements.

(a) Programmatic environmental impact statements. The scope of programmatic environmental impact statements should be determined on a case by case basis. The following is provided as general guidance only:

(1) Environmental impact statements covering a program as defined in § 711.7 (f), generally shall assess all reasonably foreseeable environmental consequences generic to component subprograms, projects, and actions; and shall focus on the cumulative effects of such related activities. In general, an analysis of specific impacts and alternatives dependent upon design, site, or other specific details of component projects or actions should be treated in environmental impact assessments or statements for specific projects or actions.

(2) Environmental impact statements covering technology research, development, demonstration, or commercialization programs generally shall discuss the anticipated impacts of commercial deployment of such technology, including discussion of any major uncertainties with respect to the environmental effects of such deployment.

(b) Project environmental impact statements. Environmental impact statements covering projects ordinarily should focus on the localized environmental impacts of a specific proposed action, such as the construction and operation of a proposed facility at a specific site.

(c) Site environmental impact statements. Environmental impact statements covering a site under ERDA jurisdiction generally should assess collectively the environmental consequences of a number of continuing and/or proposed individual actions such as the operation of facilities at the given site. They should also discuss the interrelationship of the cumulative environmental effects from past activities at the site with those expected from continuing and/or proposed activities at the site.

§ 711.45 Timing of environmental impact statements.

(a) Programmatic environmental impact statements. The planned timing for preparation of a programmatic environmental impact statement shall be determined on a case by case basis and identified as appropriate in the environmental development plan for the specific program.

(1) For research, development and demonstration programs, a programmatic environmental impact statement should be written late enough in the development process to contain meaningful information on the effects of application of the technology. However, it should be written early enough so that the environmental information contained can be factored into the decisionmaking process before the development process has reached a stage of investment or commitment to implementation likely to determine subsequent development or to foreclose or restrict later alternatives. Therefore, the following factors, among others, should be evaluated and periodically reevaluated (particularly when new information becomes available concerning the potential environmental impacts of the program) to determine the appropriate point for preparation of a program statement:

(i) The magnitude of Federal investment in the program.

(ii) The likelihood and proximity of widespread application of the technology;

(iii) The degree and controversial nature of the environmental effects of the program, individually and cumulatively, which are likely to occur in the event the technology were widely applied.

(iv) The pace at which the program is moving from basic research toward demonstration of a viable technology.

(v) The extent to which continued investment in the new technology is likely to foreclose or restrict future alternatives.

(2) For commercialization or other programs not identified in paragraph (a)(1) of this section, a programmatic environmental impact statement should be written late enough in the formulation of the proposed program to contain meaningful information on the likely environmental impacts of implementation but early enough so that the environmental information contained therein can be factored into the decisionmaking process prior to the foreclosure or restriction of reasonable alternatives.

(b) Project environmental impact statements. The environmental impact statement shall be prepared late enough in the development of the proposal to contain meaningful information on the potential localized environmental impacts at the site of the construction and operation of a proposed specific research, development, demonstration, or commercial facility but early enough to provide meaningful environmental input into the decisionmaking process. In all cases, the statement should be prepared before major resources are irrevocably or irreversibly committed and prior to taking an action with respect to the proposed project that has a potential for significant environmental impact.

(c) Legislative actions involving environmental impact statements. To the maximum extent practicable final environmental impact statements should be prepared in time for consideration by the Administrator before submission to the Congress of ERDA legislative actions. In cases where that is not practical and where the scheduling of Congressional hearings on such actions do not allow adequate time for the completion of a final environmental impact statement, a draft environmental impact statement may be furnished to the Congress with transmittal of comments as received. In any event, the text of the final environmental impact statement should be made available (1) when completed and (2) prior to administrative implementation.

§ 711.47 Responsibilities for preparation of environmental impact statements.

(a) Appropriate ERDA officials shall undertake the preparation of environmental impact statements in accordance with § 711.43 and Subpart D for proposed actions identified as requiring the preparation of an EIS (1) in an appropriate environmental development plan, (2) in accordance with § 711.29, or (3) by the AES, after consultation with OGC and the responsible Assistant Administrator.

(b) Before preparation of an environmental impact statement is initiated, the appropriate ERDA official shall submit through the responsible Assistant Administrator the following information to the AES for concurrence:

(1) A description of the proposed action and scope of the document.

(2) An outline of what is intended to be discussed in the statement, including identification of known environmental issues.

(3) The alternatives which will be analyzed.

(4) The anticipated dates of issuance for both draft and final statements.

(5) A description of activities, if any, which will continue, commence or occur with respect to the subject of the document prior to 30 days after issuance of the final environmental impact statement.

(6) Recommendations as to the need for, and composition of, intra-agency or inter-agency task forces to prepare or assist in the preparation of the environmental impact statement and the suggested composition.

(7) A recommendation regarding the desirability of a joint statement with the participation of other agencies in light of § 711.5(b), and, if so, the conditions under which such participation should proceed.

(c) If, after consultation with OGC, the AES concurs in the approach described pursuant to paragraph (b) of this section, he shall advise the appropriate ERDA official to commence preparation of the environmental impact statement and shall publish a notice of intent pursuant to § 711.49. If, after consultation with OGC, the AES does not concur he shall advise the appropriate ERDA official of the modifications which will be required to obtain AES concurrence.

§ 711.49 Notice of intent.

(a) After a determination has been made to prepare an EIS, the responsible Assistant Administrator, at the direction of the AES, shall cause to be submitted to the AES:

(1) A Notice of Intent to prepare an environmental impact statement which:

(i) Describes the proposed action and proposed scope of the document in sufficient detail to promote responsive comment.

(ii) Lists the alternatives to be analyzed.

(iii) Indicates the location(s) of known documentation to be utilized in the preparation of the statement.

(iv) Invites comments and suggestions for consideration in the preparation of the environmental impact statement.

(2) A list of individuals or organizations whom the appropriate ERDA official has identified as having interest in the environmental implications of the subject action.

(b) Whenever practicable, the AES shall cause to be published in the FEDERAL REGISTER the Notice of Intent to prepare the environmental impact statement and shall transmit a copy of that Notice of Intent to appropriate Federal, state, and local agencies and to persons or groups known to be interested in the environmental implications of the proposed action.

§ 711.51 Required lists.

(a) The AES shall be responsible for the preparation and maintenance of:

(1) Lists of actions for which environmental impact statements are being prepared.

(2) Lists of actions for which negative declarations have been prepared.

(3) Lists of persons or groups known to be interested in the environmental implications of specific ERDA actions (interest lists).

(b) The AES shall revise lists (1) and (2) in paragraph (a) of this section at least quarterly and shall transmit a copy of those unclassified lists and subsequent revisions to CEQ.

(c) The AES shall compile list (3) in paragraph (a) of this section from those individuals or groups who have either:

(1) Requested that copies, or notification of availability, of draft environmental impact statements be sent to them.

(2) Commented on a previous draft environmental impact statement.

(3) Participated in a public hearing held on an environmental impact statement.

(4) Been identified by the appropriate ERDA official as having an interest in the environmental implications of a proposed ERDA action.

(d) List (3) in paragraph (a) of this section shall be maintained in accordance with the provisions of the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a).

(e) Individuals or organizations desiring to be placed on specific interest lists or to request copies of environmental impact statements and notifications of intent to prepare such statements should address their requests to:

Director, Office of NEPA Coordination, Energy Research and Development Administration, Washington, D.C. 20545.

§ 711.53 Submission and review of draft environmental impact statements.

(a) Internal review and approval of draft environmental impact statements.

(1) The appropriate ERDA official shall submit the draft environmental impact statement (DEIS) through the responsible Assistant Administrator to the AES for review and approval.

(2) The AES shall be assisted in his review by OGC and an Interdisciplinary Review Committee (IRC), chaired by the Director of the Office of NEPA Coordination, or his representative, and composed of such representatives of ERDA Headquarters and field organizations as the AES deems appropriate.

(b) External review of draft environmental impact statement Upon the completion of ERDA's review, the AES shall make the draft environmental impact statement and Summary Sheet available to the CEQ, and solicit comments from appropriate Federal, state and local agencies and organizations and individuals. He shall publish a FEDERAL REGISTER notice of the public availability and the comment period for the draft environmental impact statement, and make copies available for comment upon request. Copies of the FEDERAL REGISTER notice will be made available to those on the appropriate interest list. Copies of the DEIS will be placed in appropriate places for public inspection.

(c) Commenting entities should endeavor to furnish comments on draft environmental statements which follow the format of the statement wherever practical and should be as specific, substantive and factual as possible without undue attention to matters of form in the statement. They should place emphasis on the environmental impacts of the proposed action and the acceptability of those impacts on the quality of the environment particularly as compared or contrasted with the impacts of reasonably available alternatives. Commenting entities may recommend modifications to the proposed action and/or new alternatives that they believe will enhance environmental quality and avoid or minimize adverse environmental impacts.

(d) Comments on the draft environmental impact statement shall be considered in the final environmental impact statement if received by the Director, Office of NEPA Coordination within the comment period announced in the CEQ and ERDA Notices of Availability of environmental statements in the FEDERAL REGISTER. A 45 calendar day comment period will be used unless a different period is specified in the ERDA's notice of availability of the draft statement covering the proposed action.

(e) The AES, upon request, may grant extensions of time for receipt of comments for such periods as he deems appropriate. In determining the appropriate period for comment or in acting upon an extension request, consideration will be given to the magnitude and complexity of the statement, and the extent of public interest in the proposed action. Where no time extension has been requested and granted and comments are not received within the designated comment period, it shall be conclusively presumed that no comment is to be made.

§ 711.55 Public hearings.

(a) The AES determines, in consultation with the responsible Assistant Administrator and OGC, whether a public hearing would be appropriate and in the public interest considering among other things:

(1) The magnitude of the proposed action in terms of economic costs, the geographic area involved, and the uniqueness or size of the commitment of the resources involved;

(2) The degree of interest in the proposed action, as evidenced by requests from the public and from Federal, state, and local authorities that a hearing be held;

(3) The complexity of the issues and the likelihood that additional information will be of assistance to the agency in fulfilling its responsibilities under NEPA; and

(4) The extent to which public involvement already has been achieved through other means, such as earlier public hearings, meetings with citizen representatives and/or written comments or suggestions on the proposed action.

(b) If it is determined as set forth in the above paragraph that a public hearing is to be held, the AES will issue a notice in the FEDERAL REGISTER at least 15 calendar days prior to the time of such hearing which will:

(1) Identify the subject matter of the hearing;

(2) Announce the date, time and place of such hearing and the procedures to be followed;

(3) Indicate the availability of the draft environmental impact statement, the comments, if any, received to date, and other data, as determined appropriate, for public inspection. The hearing will also be announced through local news media when practicable.

(c) Written notification of the scheduling of a public hearing, providing the information referred to in paragraph (b) of this section, shall be sent to all persons and organizations known to be interested in the action, including those who have commented on the draft environmental impact statement, and those who have requested copies of such statement.

(d) Public hearings will be legislative rather than adjudicatory in nature with no right to formal discovery, subpoena of witnesses, cross-examination of participants, testimony under oath, and other similar formalities more appropriate to an adjudicatory procedure. OGC shall prescribe the detailed procedures to be followed for specific hearings.

(e) Public hearings will be conducted by a Presiding Board appointed by the AES.

(f) After the close of the hearing, a hearing record will be prepared which consists of the transcript of the hearing and all documents, exhibits and other papers received into the record by the Presiding Board. The Presiding Board shall render a report based upon its review of the draft environmental impact statement, the comments received thereon, and the hearing record and shall forward its report, together with the record, to the AES. The report shall (1) identify unresolved issues raised at the hearing which the Presiding Board deems to be material to future decisions concerning the subject matter of the environmental impact statement, and (2) include recommendations concerning the treatment of these issues in the final environmental impact statement in a manner to promote informed decisionmaking. In discharging its functions, however, the Presiding Board shall not undertake to resolve issues or render judgment concerning the proposed action.

(g) The hearing record and the Board report shall be placed in appropriate places for public inspection and considered in the preparation of the final environmental impact statement. The text of the Board report shall be appended to the final statement.

§ 711.57 Preparation, review and distribution of final environmental impact statements.

(a) Preparation of final environmental impact statements. As soon as practicable after the expiration of the written comment period and the closing of the public hearing record, if any, the appropriate ERDA official shall initiate the preparation of the final environmental impact statement and summary sheet, taking into account all substantive written comments received, the hearing record, the Board report and new information developed during the review period. The final environmental impact statement shall include a meaningful, objective and informative treatment of all substantive issues raised, including a description of known responsible views on such issues. The text of all comments received, and the Board report, or summaries thereof, shall be appended to the statement.

(b) Internal review of final environmental impact statements

(1) The appropriate ERDA official shall submit final environmental impact statements (FEIS) through the responsible Assistant Administrator to the AES for review.

(2) The AES shall be assisted in his review by OGC and an Interdisciplinary Review Committee (IRC), chaired by the Director of the Office of NEPA Coordination or his designee.

(3) Upon completion of AES review and approval of the FEIS, the responsi-

ble Assistant Administrator shall transmit the FEIS through the AES to the Administrator for his review and approval for issuance.

(c) Distribution of final environmental impact statements.

(1) Upon receipt of Administrator approval, the AES shall:

(i) Sign the FEIS and distribute the statement and Summary Sheet to CEQ, EPA, and Federal, State and local agencies, and others who submitted timely comments, participated in the public hearing on the draft environmental impact statement, or requested a copy of the FEIS prior to its issuance. In the case of FEISs on legislative actions approved by the Administrator, the AES shall submit the statement to the Congress and the OMB in accordance with OMB Bulletin 72–6.

(ii) Publish a Notice of Availability of the FEIS in the FEDERAL REGISTER which notice shall include the location(s) at which the statement is available for public inspection and where copies can be obtained.

(iii) Transmit copies of the FEIS to appropriate ERDA public document room(s).

§ 711.65 Timing for proposed ERDA actions.

(a) Except in special cases when approval is given after consultation with CEQ, no proposed ERDA action for which an environmental impact statement is prepared shall be taken:

(1) Sooner than 90 calendar days after a draft environmental impact statement has been issued; or

(2) Sooner than 30 calendar days after the final environmental impact statement has been issued. (This period may run concurrently with that in paragraph (a)(1) of this document).

§ 711.67 Amendments or supplements to final environmental impact statements.

(a) Since the ERDA environmental review process is designed to subject ERDA actions to formal review at the earliest stages in their development, it is recognized that additional reviews may be necessary or desirable as the action evolves and matures. Accordingly, whenever substantial new information pertinent to an existing final environmental impact statement becomes available, or whenever substantial modifications of an action covered by such final statement occurs, the appropriate ERDA official shall consult with AES and OGC to determine whether to amend or supplement the existing final environmental impact statement.

(b) When a determination is made to prepare such a supplement or amendment, the resulting document shall be subject to the procedures governing draft environmental impact statements under this Part unless, after consultation with OGC and CEQ, it is determined by the AES that circulation for comment is unnecessary. In that event, the document shall be subject to the procedures governing final environmental impact statements under this part.

§ 711.69 Review of other agencies' environmental impact statements.

(a) The Office of NEPA Coordination shall maintain a list of environmental impact statements received from other agencies for comment and shall identify those environmental impact statements which involve matters of interest to ERDA due to jurisdiction by law, special expertise or otherwise.

(b) Environmental impact statements so identified shall be transmitted to the appropriate ERDA organizational units for review and comment. Review and comment shall be conducted according to the instructions of 40 CFR 1500.9(e). ERDA reviews should identify possible conflicts with known current or future programs, indicate areas of research which are underway or planned by ERDA which may suggest new alternatives, ways to mitigate effects, or gaps in the state of relevant knowledge and offer comments in ERDA areas of jurisdiction by law and special expertise.

(c) Such comments shall be transmitted to the Office of NEPA Coordination who shall coordinate the comments and forward them to the initiating agency and the CEQ.

Subpart D—General Guidance for Content of Environmental Impact Statements

§ 711.81 Cover.

The cover shall indicate the type of statement (draft or final), the official project title and location, the month that the statement is issued, the agency and, for final statements, the signature of the issuing official on the title page.

§ 711.83 Body of statement.

(a) Each environmental impact statement should be prepared in accordance with the precept in section 102(2)(C) of the National Environmental Policy Act of 1969, that all agencies of the Federal government "utilize a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts in planning and decisionmaking which may have an impact on man's environment." The statement should be a factual and objective evaluation of actions and their reasonable alternatives in light of environmental considerations. The presentation should be (1) concise, including or referencing relevant data, information, and analyses necessary to permit independent evaluation and appraisal of the environmental effects of the proposed ERDA action and its reasonable alternatives, and (2) structured in a manner that is most useful for planning and decisionmaking. Statements should not be drafted in a style which requires extensive scientific or technical expertise to comprehend and should focus on environmental issues relevant to the proposed action. Underlying studies, reports and other information obtained and considered in preparing the statement should be identified at appropriate points in the text. Highly technical and specialized analyses and data should be avoided in the text but should be attached as appendices or referenced with footnotes. Where there are references to documents not likely to be easily accessible, such as internal studies or reports, the statement should summarize wherever practicable and indicate how such information may be obtained. Many evaluations of environmental impact will involve measurements, analyses, calculations, and design drawings much too voluminous to be included in an environmental impact statement of workable length. In these cases, it will not be possible for the reader to make a completely independent evaluation of environmental impact from the statement itself. However, it should be possible for the reader to understand, from the text combined with the appendices and references, the types of impact which have been considered, the general methods of evaluation used and the types of data behind them, and the factual conclusions reached.

(b) Each statement shall disclose and evaluate the environmental trade-offs of proposed actions and of reasonably available alternatives in sufficient detail to permit an independent appraisal of the environmental aspects of the proposed action in relationship to alternatives.

(c) Each statement shall discuss or refer to responsible views regarding the environmental impacts of the proposed action. Substantive suggestions and comments made by other Federal, State, and local agencies and by private organizations and individuals prior to preparation of the environmental impact statement (draft or final) shall be identified and analyzed in the appropriate sections of the draft statement. Similarly, substantive comments received as a result of review of the draft statement shall be considered in the preparation of the final statement.

(d) Environmental impact statements ordinarily should contain the following information:

(1) *Summary.* The salient information and factual conclusions of the environmental statement should be concisely summarized at the beginning of the document. Emphasis should be on any unresolved environmental issues and on factual conclusions concerning the significance of the impacts associated with the proposed action and the relative merits of alternatives.

(2) *Description of proposed action.* The proposed action, its purpose and the policy objectives and tangible benefits both short- and long-term, sought to be realized by implementation of the proposed action should be briefly described. Among factors to be described are the location and duration of the proposed action; historical information necessary to place the proposed action in proper perspective; its relationship to other projects or programs of the Federal Government; and an overall physical description if appropriate, emphasizing features with environmental significance. The environmental controls and other mitigating measures, including plans for site restoration, that are designed into the proposed action should also be described.

(3) *A characterization of the existing environment likely to be affected by the proposed action.* A brief overview of the environmental features of the areas likely to be affected by the proposed action should be described in order to provide a baseline for analysis of environmental impacts. Wherever appropriate, an identification should be made of population and growth characteristics of the affected areas and of the current uses of such areas. Detailed descriptions of the existing environment should be either included in an appendix to the statement or referenced in the text, when necessary for a thorough understanding of the environmental implications of a proposed action. The amount of detail provided should be commensurate with the extent of the expected impact of the action, and the amount of information required at the particular level of environmental analysis.

(4) *Potential environmental impacts of the proposed action.* The probable environmental impacts of the proposed action (assuming implementation of proposed mitigating measures) should be analyzed in order to determine what, if any, environmental issues may be involved in the proposed action. In so doing, the analysis should describe those effects on the environment, beneficial as well as adverse, which could be caused by the proposed action, evaluate the magnitude and importance of each such effect, and identify the time frames in which these effects are anticipated. Any unknowns as to the probable environmental impacts should be clearly identified. The probable primary (direct) as well as secondary (indirect) environmental consequences should be assessed. In this context, "secondary" consequences refer to associated investments and changed patterns of social and economic activities likely to be induced by the proposed action. Such secondary effects, through their impacts on existing community facilities and activities and through changes in natural conditions, may be more substantial than the primary effects of the proposed action. The extent to which the proposal will conform or conflict with any applicable Federal, State, or local statutes, regulations, standards limitations, and policies respecting environmental quality (air and water quality, wastes, pesticides, etc.) should be discussed. The risks attributable to accidental or intentional environmental destruction as well as to normal operations should also be assessed. Risks should be expressed in terms of probability of occurrence and magnitude of consequences to the extent practicable.

(5) *Unavoidable adverse environmental effects.* Adverse environmental effects that cannot be avoided should the proposed action, with its environmental protection strategy, be implemented, and the magnitude and importance of each such effect, should be briefly summarized.

(6) *Irreversible and irretrievable commitment of resources.* The extent to which the proposed action would consume, destroy, or transform scarce or nonrenewable resources, thus curtailing the diversity and range of potential uses of the environment should be summarized. In this context, "resources" means labor and materials devoted to the proposed action as well as natural and cultural resources.

(7) *Relationship of land use plans, policies, and controls.* For project or site statements, there should be an evaluation of how the proposed action may conform or conflict with the objectives and specific terms of approved or proposed Federal, State, and local land use plans, policies and controls, if any, for the affected area.

(8) *The relationship between short-term uses of the environment and the maintenance and enhancement of long-term productivity.* The extent to which the proposed action would constrain the diversity and range of potential uses of the environment, including nonutilitarian preservation, should be briefly discussed. The cumulative and long-term environmental effects of the proposed action should be assessed from the perspective that each generation is trustee of the environment for succeeding generations. This involves consideration of the present condition and use of the site of the proposed action, its use if the proposed action is implemented, and the long-term prospects for other uses. A brief assessment should be made of the extent to which the proposed action involves trade-offs between short-term gains at the expense of long-term losses, or vice versa, and a discussion of the extent to which the proposed action and its alternatives foreclosed future options. In this context, short-term and long-term do not refer to any fixed periods but should be viewed in terms of the environmentally significant consequences of the proposed action.

(9) *Alternatives.* A rigorous exploration and factual evaluation of the environmental impacts of the full range of reasonable available alternatives to the proposed action should be presented. In particular, reasonable alternatives to the proposed action that might be specifically formulated to enhance environmental quality or to avoid, mitigate, or compensate for some of the adverse environmental effects should be discussed, e.g., environmental protection strategies beyond those designed in the proposal. The specific alternative of taking no action should always be evaluated. Examples of other alternatives include: the alternative of postponing action pending further study; alternatives requiring actions of a significantly different nature which would provide similar benefits with different environmental impacts; alternatives related to different designs or details of the proposed action which would have different environmental impacts, and alternatives to provide for compensation of fish and wildlife loss, including the acquisition of land, waters, and interests therein. In each case, the analysis of alternatives should be sufficiently detailed to permit comparative evaluation of the environmental trade-offs of the proposed action and each reasonable alternative. Where an existing impact statement already contains an analysis of an alternative(s), its treatment of the alternative(s) may be summarized and incorporated by reference provided that such treatment is current and relevant to the precise objective of the proposed action. The range of alternatives should not be limited to measures which the agency has authority to adopt but should include a meaningful discussion of all reasonable alternatives to the proposed action. A more detailed analysis should be made of the environmental impact of alternatives that can be implemented within the same time frame as the proposed action than for those alternatives within different time frames.

(10) *Environmental trade-off analysis.* At the conclusion of the statement there should be a synthesis of the information contained in the body of the statement and analysis of the environmental trade-offs associated with the proposed action and reasonably available alternatives. This analysis should be sufficiently detailed to permit an independent evaluation of the effects associated with the proposed action and each reasonably available alternative so that an informed judgment can be made about the wisdom of undertaking the proposed action rather than one of the alternatives (including the alternative of no action).

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

[Ruling 1977-3]

CARGO SALES

Ruling

Facts. Firm A is a reseller of covered products, engaged principally in the resale of those products through several terminals, which receive covered products and from which sales are made and products distributed.

In addition to these sales, Firm A is engaged in buying and reselling cargo lots of covered products, a practice known in the industry as "trading". Typically, a transaction of this type involves an agreement between Firm A and Firm B for a specified quantity of product to be furnished to Firm B at a set price on a specific date. Firm A arranges to purchase the product from Firm C for delivery to Firm B. The product never physically enters into Firm A's terminal or distribution system. Firm B is not a regular purchaser from Firm A's terminal.

Firm A made sales of this type prior to May, 1973 and such sales have always been accounted for as separate transactions under Firm A's historical accounting system. Traditionally, these purchases and resales have had a lower margin than those made within Firm A's normal distribution system.

They are high volume sales and the cargoes involved are always identifiable with a specific purchaser. Prices charged in such resales have always been determined exclusively with respect to the cost of the cargo concerned and without regard to the cost or selling prices of product held in inventory by Firm A in its terminals. "Trading" transactions of the nature described above often oc-

curred quite rapidly, with particular cargoes being purchased and resold on the same day, sometimes within less than an hour.

Issue. May Firm A, under the Mandatory Petroleum Price Regulations applicable to resellers of covered products (Subpart F of 10 CFR, Part 212) and prior to the adoption of the "separate inventory" rule effective May 1, 1976, calculate the increased costs of the cargo sold to Firm B separately from the increased costs of the same product purchased and held for resale through its normal terminal and distribution system?

Ruling. Firm A may, prior to the adoption of the "separate inventory" regulations, separately calculate the increased costs of the cargo lot of product purchased and resold to Firm B.

Maximum prices are determined by resellers pursuant to § 212.93(a) which has always provided that "[a] seller may not charge a price for an item . . . which exceeds the weighted average price at which the item was lawfully priced by the seller in transactions with the class of purchaser concerned on May 15, 1973, plus an amount which reflects, on dollar-for-dollar basis, the increased product costs concerned." Section 212.92 defines "increased product costs" as "the difference between the weighted average unit cost of a product in inventory and the weighted average unit cost of that product in inventory on May 15, 1973." Pursuant to an amendment adopted effective May 1, 1976 (41 FR 19110, May 10, 1976), "product in inventory" is defined in § 212.92 as:

> . . . at the option of the seller concerned, either: (1) the entire, undivided stock of a covered product, no matter where located, purchased and held for resale by the seller concerned; or (2) that portion of the total stock of a covered product purchased and held for resale by the seller concerned which constitutes a separate inventory under generally accepted accounting principles consistently and historically applied by the seller concerned . . . .

Under that definition, the cargo lot of product sold to Firm B would represent a "separate inventory," as to which a separate calculation of increased costs of product would be permitted.

Prior to the May 1, 1976 amendment, the price regulations applicable to resellers did not include a definition of "product in inventory." In adopting the May 1, 1976 "separate inventory" amendment, FEA stated:

> Prior to today's amendment, FEA interpreted "product in inventory" to mean the seller's entire undivided stock of a product held for resale.

Even under that interpretation, however, it is not appropriate to regard the cargo lot, in the circumstances described above, as constituting a part of Firm A's "entire undivided stock of a product held for resale." This is because cargo lot resales of the type in which Firm A was engaged have, by their particular nature, never been part of a seller's stock of a product held for resale through the seller's normal distribution system but, of practical necessity, have always been accounted for separately.

The cargo sales represent isolated transactions. Firm A's cost and pricing decisions with regard to the purchases and resales made in the normal distribution system have always been made without taking into account the cost or price of purchases and resales such as the one to Firm B. Indeed, because of the relative speed with which such "trading" transactions often took place, it would have been impracticable, if not impossible, for Firm A to derive a weighted average cost of its terminal inventories, together with the cargo lot in question, prior to the resale of the cargo lot. This is particularly true when such transactions involve several different cargo lots on the high seas which may or may not be in transit at the same time depending on shipment delays caused by weather or other factors.

Moreover, because such cargo lots were purchased and priced for resale without regard to the cost of Firm A's product held for resale in terminals, to have made such a weight-averaging could have seriously distorted Firm A's pricing with respect to its terminal sales. The historically lower margin on this type of sale, reflecting the lower costs associated with these resales, is further indication of the difference in treatment accorded these sales.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

JANUARY 20, 1977.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—ORGANIZATION, PROCEDURES AND RULES OF PRACTICE

PART 4—MISCELLANEOUS RULES

Requests for Disclosure of Records

The Federal Trade Commission's current regulations concerning requests for disclosure of records are set forth in § 4.11 of its procedures and rules of practice (16 CFR 4.11).

At present § 4.11(a)(2)(i)(A) allows a requester 30 days to appeal the Secretary's initial determination of an access request. Where access is granted in part and denied in part, a requester is frequently forced to appeal before he has the opportunity to review all the records to which he has been granted access.

As amended § 4.11(a)(2)(i)(A) would allow for an appeal anytime from the Secretary's initial determination up to 30 days after the last record has been made available.

In light of the foregoing, the Federal Trade Commission announces the following amendment, which is effective on January 26, 1977.

§ 4.11 Requests for disclosure of records.

(a) * * *

(2) *Appeals to the Commission from initial denials.*—(i) *Form and contents; time of receipt.* (A) If the Secretary denies an initial request for records in its entirety, the requester may, within 30 days of the date of the Secretary's determination, appeal such denial to the Commission. If the Secretary denies an initial request in part, the time for appeal shall not expire until 30 days after the date of the letter notifying the requester that all records to which access has been granted have been made available. The appeal shall be in writing and should include a copy of the initial request and a copy of the Secretary's response, if any. The appeal shall be addressed as follows:

> Freedom of Information Act Appeal, Office of General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580.

(15 U.S.C. 46(g), 5 U.S.C. 552.)

By direction of the Commission dated January 19, 1977.

JOHN F. DUGAN,
Acting Secretary.

[FR Doc.77-2484 Filed 1-25-77;8:45 am]

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. CP77-116]

PART 2—GENERAL POLICY AND INTERPRETATIONS

Interpretive Order

JANUARY 14, 1977.

By telegrams of December 23, 1976, Houston Pipe Line Company (Houston) proposed to sell and deliver up to 150,000 Mcf per day of natural gas commencing January 6, 1977, to United Gas Pipe Line Company (United) at or near the tailgates of the Katy Gas Plant, Waller County, Texas, the Karon Gas Plant, Live Oak County, Texas, and the TCB Gas Plant, Jim Wells County, Texas, pursuant to a contract dated December 21, 1976, and to sell and deliver up to 85,000 Mcf per day of natural gas commencing January 6, 1977, to Transcontinental Gas Pipe Line Corporation (Transco), acting as agent for certain of its distribution customers, at or near the tailgate of the Pledger Gas Plant, Brazoria County, Texas, pursuant to a contract dated December 2, 1976. At the time of the telegrams Houston had been selling and delivering approximately 150,000 Mcf per day of natural gas to Transco at the points at which it proposed to sell and deliver gas to United and had been delivering approxmiately 85,000 Mcf per day of natural gas at the point it proposed to sell and deliver gas to United. Said sales and deliveries were made pursuant to § 2.68 of the Commission's general policy and interpretations (18 CFR 2.68). Houston seeks Commission assurance that upon commencement of the deliveries under the December 21, 1976, and December 2, 1976, contracts, Houston, an intrastate natural gas pipeline company, would not lose its otherwise exempt status under section 1(b) of the Natural Gas Act.

By order issued January 5, 1977, the Commission provided for the development of an administrative hearing record on questions related to the Houston proposal. That order also provided that the otherwise non-jurisdictional status of Houston and any producers supplying Houston under the Natural Gas Act would not be affected by continued deliveries of natural gas by Houston to United or Transco, during the period the Commission would consider the instant matter on its merits and until 24 hours after the issuance of a Commission opinion on the matter. The Commission's hearing in this matter was conducted on January 13 and 14, 1977.

The record amply demonstrates the existence of emergency conditions on the Transco and United systems and the necessity of these pipelines being able to avail themselves of § 2.68(a) procedures. We do have before the Commission an administrative record which indicates that numerous other natural gas pipelines are now facing, or shortly will face, natural gas supply shortfalls to meet high priority loads. Clearly, emergency conditions may vary from system to system depending upon operating factors. In order to mitigate the severity of the current supply situation of these systems, including the need for delivery, storage injection and replenishment,[1] we recognize that a number of pipelines will apply § 2.68 (a) or (b) self-help procedures with increasing frequency for the remainder of the winter heating season of 1977, i.e., for the period ending March 31, 1977, and beyond.

In the context of the Houston, Transco and United proposal, the Commission finds the § 2.68(a) procedures appropriate for this and similar circumstances. In doing so, we also recognize that, in some cases, pipelines and their non-jurisdictional suppliers may not have new or separate source contracts, but rather may have continuing sales arrangements. For the latter type transactions, § 2.68(b) procedures would be appropriate. In that respect, it should be noted that prior interpretations of § 2.68(b) permit certain roll-over operations.[2] Section 2.68 (a) and (b) procedures are alternative, and one does not limit the other. Being self-help measures, the affected systems may utilize one or both.

As a part of this proceeding, the Commission was advised by numerous members of the Congress,[3] that the Congress would undertake a reassessment of the Natural Gas Act in light of current regulatory jurisdiction of this Commission and state regulatory agencies. The Commission will report to Congress and make available copies of the administrative hearing record to the standing Committees with legislative responsibilities over this Commission, the Senate Committee on Commerce and the House Committee on Interstate and Foreign Commerce.

The Commission finds. (1) There is an existing natural gas supply emergency on the systems of United Gas Pipe Line Company and Transcontinental Gas Pipe Line Corporation, contributed to and exacerbated by severe weather conditions, as demonstrated by the record evidence developed at the public hearings held before this Commission on January 13 and 14, 1977.

(2) The sales and deliveries under the contract of December 21, 1976, between Houston and United and the contract of December 2, 1976, between Houston and Transco are emergency sales and deliveries to be initiated within the contemplation of § 2.68(a) of the Commission's general policy and interpretations.

(3) Emergencies exist on the systems of United and Transco such that supplies of natural gas are required from Houston, within the contemplation of § 2.68 (a) of the Commission's general policy and interpretations, for periods of 60-days.

The Commission orders. The status of Houston, of otherwise being exempt from the provisions of the Natural gas Act pursuant to section 1(b) thereof, will not be jeopardized by the initiation of sales and deliveries of natural gas to United and Transco, pursuant to contracts of December 21, 1976, and December 2, 1976, respectively, within the contemplation of § 2.68(a) of the Commission's general policy and interpretations.

By the Commission.[4]

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2429 Filed 1-25-77;8:45 am]

[1] See Nueces Industrial Gas Company, 46 F.P.C. 873, 877 (1971); and General Counsel letter to Richard A. Rosan, Esq., Columbia Gas System Service Corporation, dated November 19, 1976.

[2] Since February 7, 1975, the Commission has permitted at least 9 roll-over operations pursuant to § 2.68(b) including: Llanco, Inc., issued February 7, 1975. Panhandle Eastern Pipeline, issued January 9, 1975. City of Columbia, Kentucky, issued July 17, 1975. City of Norris, Illinois, issued July 14, 1975.

[3] The following members of Congress testified before the Commission: Senator Strom Thurmond, South Carolina; Senator Ernest F. Hollings, South Carolina; Senator Jesse Helms, North Carolina; Senator Robert Morgan, North Carolina; Congressman L. H. Fountain, North Carolina; Congressman Robert E. Bauman, Maryland; Congressman James G. Martin, North Carolina. These members of Congress urged the Commission to approve the proposed transaction due to the potential impact of the shortfall of supplies in the southeastern part of the United States. Recognizing the critical national emergency, they expressed their concern on the issues of pricing, supply shortfall, unemployment, and conservation and their expectation of Congressional action.

[4] Filed as part of the original document.

Smith, Commissioner, would make an explicit condition of this interpretation the Commission's intent to examine the § 2.68 transactions made pursuant to this order on or before the end of the winter heating season and, therefore, concurs in its issuance.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

PART 655—TRAFFIC OPERATIONS

Highway Safety Improvement Program; Correction

In FR Doc. 76-35716 appearing at page 53003 in the issue for Friday, December 3, 1976, the amendment to § 655.507 should read:

The third sentence in § 655.507 is amended by striking the period at the end thereof and adding the following: "and 203 of the Highway Safety Act of 1973, as amended."

Issued on: January 14, 1977.

D. H. ANDERS,
Acting Chief Counsel.

[FR Doc.77-2527 Filed 1-25-77;8:45 am]

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 9—MINING AND MINING CLAIMS

Comprehensive Regulations

On November 11, 1976, the Department of the Interior published in the FEDERAL REGISTER (41 FR 49862) Interim Regulations and Proposed Comprehensive Regulations. The Proposed Comprehensive Regulations were made available for public review and comment for a period of thirty (30) days following publication in the FEDERAL REGISTER and ending December 13, 1976.

A total of 14 written replies with recommendations or comments were received during the comment period, with about one-half being received from mining companies, which as a group stated that the Proposed Comprehensive Regulations went beyond the intent of Congress in the enactment of the Act of September 28, 1976 (Pub. L. 94-429, 90 Stat. 1342, 16 U.S.C. 1901 et seq.) and jeopardized the economic viability of mining operations within the National Park System. On the other hand, two conservation groups stated that these regulations were not, in their present form, strong enough to protect the resources and environments of the units of the National Park System affected by this statute. The additional comments suggested editorial, grammatical, or in some instances, substantive changes in the meaning of specific sections and paragraphs of the proposed regulations.

An attempt was made to utilize as many of the comments and recommendations as was appropriate in carrying out the provisions of section 2 of the Act of September 28, 1976, 16 U.S.C. 1901 et seq., in conjunction with the other statutory National Park Service responsibilities. A number of comments pertained to the preamble of the proposal. Since this has no particular standing with respect to the regulations themselves, no attempt was made to address those issues, with the one exception found in the following

paragraph. The preamble serves only to discuss and/or explain the regulations.

It was noted that a misstatement of section 4 of the Act appeared in the preamble of the proposed regulations. The proper interpretation of this section is that, where there has been no significant disturbance to the surface of one of the enumerated units for purposes of mineral extraction, an operation may expand an existing excavation only if the Secretary finds that such expansion is necessary to make feasible continued production therefrom at an annual rate not to exceed the average annual production level of that operation for the calendar years 1973, 1974, and 1975.

Likewise, a number of comments pertained to the Interim Regulations. Because these regulations were not open for comment and review and will be superseded upon publication of the Final Comprehensive Regulations, it was determined unnecessary to respond. The purpose of the Interim Regulations was to maintain essentially the status quo while more comprehensive regulations could be prepared following passage of the Act of September 28, 1976 (16 U.S.C. 1901 et seq.).

One major area of concern in the comments which were received was that the standards for approval of a plan of operations and for reclamation lacked clarity, particularly with regard to the concepts of "nuisance" and "injury." Those sections have been altered in response to these comments. However, since these doctrines all have foundation in jurisprudence, it has been determined that they are appropriate terms and concepts.

Comments were also received concerning compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4331 et seq.) (NEPA). The National Park Service has prepared an environmental assessment of the proposed regulations. Based on this assessment, it has been determined that the proposed action is not a major Federal action that would have a significant impact on the human environment, and therefore, that an environmental impact statement is not required prior to promulgation of the final regulations. Furthermore, an analysis of the environmental impacts associated with execution of each plan of operations submitted by an operator for approval will be made, and in the event that approval of the plan would constitute a major Federal action resulting in a significant impact on the human environment then an environmental impact statement as required by section 102(2)(C) would be prepared prior to approving or denying the plan of operations.

In addition to complying with the general provisions of NEPA, we have increased the potential for public participation by eliminating requirements for submission of certain proprietary documents, and by making available for public review copies of all plans of operations submitted by operators proposing mining activities in units of the National Park System.

A majority of comments related to the surface disturbance moratorium. It has been determined by the National Park Service that the terms and conditions concerning surface disturbance were set by Congress with the passage of the Act of September 28, 1976, (16 U.S.C. 1901 et seq.) and little or no discretion is vested with the Secretary to allow additional surface disturbance, except as expressly authorized by the Act.

The section on the use of water in support of mining operations has been clarified to reflect that the Department's concern is for uses of water from sources within the units of the National Park System. The modification in this provision was made to reflect more accurately the limited extent of the Secretary's authority to dispose of water reserved to the United States.

Certain changes in § 9.5 of these regulations were made in response to comments concerning recorded proofs of labor and other recording requirements. The alterations made should also be considered as amendments to the requirements of the Notice of October 20, 1976, 41 FR 46357.

The regulations also make clear that the filing of notice with the National Park Service satisfies the requirement for the initial filing of notice of a mining claim under section 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2743, 43 U.S.C. 1701, for mining claims within the National Park System. Thus, only one initial notice must be filed for unpatented claims in units of the National Park System and that is the notice prescribed by these regulations, which is a restatement of the October 20, 1976 Notice requirements with the amendments noted above. However, the subsequent annual notice requirements of section 314 are applicable and claimants must file the annual notice prescribed by section 314 and the implementing regulations.

The regulations also provide that the surface use provisions of 43 CFR, Subpart 3826 and 36 CFR 7.26 and paragraphs (a) and (b) of § 7.44 are superseded by the regulations of this Part. However, the regulations in 43 CFR 3826.2–5 and 3826.2–6, 3826.4–1(g) and 3826.4–1(h), and 3826.5–3 and 3826.5–4 will remain applicable to those claimants who wish to take their claim to patent. A technical amendment will also be made to delete the provisions of 36 CFR 7.26 and 7.44 (a) and (b) which have only interim application to existing permits for 120 days after publication of the final regulations unless extended by the Superintendent. The amendments will be made by separate publication.

Modification was made to § 9.11 *Reclamation Requirements* to more adequately reflect the tenet that a holder of a claim patented prior to the establishment of the areas as a unit of the National Park System shall not undertake activities on those lands so as to constitute a nuisance to the federally owned lands or adversely affect those lands. Claims not taken to patent are subject to a stricter reclamation standard.

Two new definitions have been added. *Designated Roads*, § 9.2(n), was added to clarify the meaning of existing and open public roads that might be used with respect to mining operations only outside a unit. Only those roads so designated shall be used for this purpose. In § 9.4(c) *lands contiguous to the existing excavation* is defined to further amplify the public's understanding of the surface disturbance moratorium.

Concerning a prohibition on future surface mining activities within units of the National Park System not covered by the moratorium, it has been determined that with respect to unpatented claims or claims patented with surface use restrictions, surface mining will be permitted in the future only where such activity will not jeopardize the pristine beauty of the unit, or adversely affect the ecological or cultural resources thereof. As a caveat, it should be clearly noted that section 4 of the Act places a moratorium on surface mining activities in Death Valley and Organ Pipe Cactus National Monuments and Mount McKinley National Park, notwithstanding, when the location was made. All units of the National Park System upon establishment are closed to further mineral entry and location unless Congress expressly provides otherwise. With respect to the six units of the System which were open to mineral entry and location (now closed under section 3 of Pub. L. 94–429), entry and location was subject to such surface use regulations and restrictions as the Department of the Interior might adopt. Those laws read together with Pub. L. 94–429 now provide a basis for restricting new surface mining operations in units of the National Park System. This restriction will not preclude underground or subsurface mining operations, even if a portal or entry tunnel is required to be developed within the unit.

Additional clarification was made to § 9.10 *Plan of Operations Approval* in order to develop standards for approval of three classes of claims based on the status of the claims and whether extraction operations had begun. As such, no plan of operations shall be approved: (1) For existing or new operations that would constitute a nuisance or injure Federal land if the claim was patented without surface use restrictions; or (2) where the surface of the claim, either unpatented or patented with surface use restrictions, was not significantly disturbed and the operations would preclude management or injure the resources of a unit; or (3) where the surface of the claim, either unpatented or patented subject to surface use restrictions, had been significantly disturbed and the operations would constitute a nuisance or injure Federal lands. In the latter class of claims the provisions of § 9.4 of this Part will apply to other units of the System besides Death Valley and Organ Pipe Cactus National Monuments and Mount McKinley National Park.

These regulations shall take effect on January 26, 1977, because it has been determined that the immediate application of these regulations is necessary to preserve units of the National Park System in their pristine character to fulfill the Congressional mandate that such units be managed to preserve and protect them for present as well as future generations. Furthermore, the continued application of the Interim Regulations would not be in the public interest, because those regulations are only designed to maintain the status quo, rather than comprehensively implement the policy and provisions of Pub. L. 94–429 (16 U.S.C. 1901 et seq.). Therefore the regulations contained in this Part shall be effective on January 26, 1977.

The purpose of these regulations is to provide control over mining activities within areas of the National Park System to the extent authorized by section 2 of Pub. L. 94–429, but not to constitute a "taking" of any compensable property interest of a mining claimant.

The National Park Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A–107.

Title 36 of the Code of Federal Regulations is hereby amended by the addition of a new Part 9 as follows:

Sec.

9.1 Purpose and scope.
9.2 Definitions.
9.3 Access permits.
9.4 Surface disturbance moratorium.
9.5 Recordation.
9.6 Transfer of interest.
9.7 Assessment work.
9.8 Use of water.
9.9 Plan of operations.
9.10 Plan of operations approval.
9.11 Reclamation requirements.
9.12 Supplementation or revision of plans of operations.
9.13 Performance bond.
9.14 Appeals.
9.15 Use of roads by commercial vehicles.
9.16 Penalties.
9.17 Public inspection of documents.
9.18 Surface use and patent restrictions.

AUTHORITY: Mining Law of 1872 (R.S. 2319; 30 U.S.C. 21 et seq.); Act of August 25, 1916 (39 Stat. 535, as amended (16 U.S.C. 1 et seq.); Act of September 28, 1976; 90 Stat. 1342 (16 U.S.C. 1901 et seq.))

§ 9.1 Purpose and scope.

These regulations will control all activities resulting from the exercise of valid existing mineral rights on claims within any unit of the National Park System in order to insure that such activities are conducted in a manner consistent with the purposes for which the National Park System and each unit thereof were created, to prevent or minimize damage to the environment or other resource values, and to insure that the pristine beauty of the units are preserved for the benefit of present and future generations. These procedures apply to all operations conducted on claims in any unit of the National Park System.

§ 9.2 Definitions.

The terms used in this Part shall have the following meanings:

(a) *Secretary.* The Secretary of the Interior.

(b) *Operations.* All functions, work and activities in connection with mining on claims, including: prospecting, exploration, surveying, development and extraction; dumping mine wastes and stockpiling ore; transport or processing of mineral commodities; reclamation of the surface disturbed by such activities; and all activities and uses reasonably incident thereto, including construction or use of roads or other means of access on National Park System lands, regardless of whether such activities and uses take place on Federal, State, or private lands.

(c) *Operator.* A person conducting or proposing to conduct operations.

(d) *Person.* Any individual, partnership, corporation, association, or other entity.

(e) *Superintendent.* The Superintendent, or his designee, of the unit of the National Park System containing claims subject to these regulations.

(f) *Surface mining.* Mining in surface excavations, including placer mining, mining in open glory-holes or mining pits, mining and removing ore from open cuts, and the removal of capping or overburden to uncover ore.

(g) *The Act.* The Act of September 28, 1976, 90 Stat. 1342, 16 U.S.C. 1901 et seq.

(h) *Commercial Vehicle.* Any motorized equipment used for transporting the product being mined or excavated, or for transporting heavy equipment used in mining operations.

(i) *Unit.* Any National Park System area containing a claim or claims subject to these regulations.

(j) *Claimant.* The owner, or his legal representative, of any claim lying within the boundaries of a unit.

(k) *Claim.* Any valid, patented or unpatented mining claim, mill site, or tunnel site.

(l) *Regional Director.* Regional Director for the National Park Service region in which the given unit is located.

(m) *Significantly disturbed for purposes of mineral extraction.* Land will be considered significantly disturbed for purposes of mineral extraction when there has been surface extraction of commercial amounts of a mineral, or significant amounts of overburden or spoil have been displaced due to the extraction of commercial amounts of a mineral. Extraction of commercial amounts is defined as the removal of ore from a claim in the normal course of business of extraction for processing or marketing. It does not encompass the removal of ore for purposes of testing, experimentation, examination or preproduction activities.

(n) *Designated roads.* Those existing roads determined by the Superintendent in accordance with 36 CFR 2.6(b) to be open for the use of the public or an operator.

(o) *Production.* Number of tons of a marketable mineral extracted from a given operation.

§ 9.3 Access permits.

(a) All special use or other permits dealing with access to and from claims within any unit are automatically revoked 120 days after January 26, 1977. All operators seeking new or continued access to and from a claim after that date must file for new access permits in accordance with these regulations, unless access to a mining claim is by pack animal or foot. (See § 9.7 for restrictions on assessment work and § 9.9(d) and § 9.10 (g) for extensions of permits.)

(b) Prior to the issuance of a permit for access to any claim or claims, the operator must file with the Superintendent a plan of operations pursuant to § 9.9. No permit shall be issued until the plan of operations has been approved in accordance with § 9.10.

(c) No access to claims outside a unit will be permitted across unit lands unless such access is by foot, pack animal, or designated road. Persons using such roads for access to such claims must comply with the terms of § 9.15 where applicable.

§ 9.4 Surface disturbance moratorium.

(a) For a period of four years after September 28, 1976, no operator of a claim located within the boundaries of Death Valley National Monument, Mount McKinley National Park, or Organ Pipe Cactus National Monument (see also claims subject to § 9.10(a)(3)) shall disturb for purposes of mineral exploration or development the surface of any lands which had not been significantly disturbed for purposes of mineral extraction prior to February 29, 1976, except as provided in this section. However, where a claim is subject, for a period of four years after September 28, 1976, to this section solely by virtue of § 9.10(a)(3), the date before which there must have been significant disturbance for purposes of mineral extraction is January 26, 1977.

(b) An operator of a claim in one of these units seeking to enlarge an existing excavation or otherwise disturb the surface for purposes of mineral exploration or development shall file with the Superintendent an application stating his need to disturb additional surface in order to maintain production at an annual rate not to exceed an average annual production level of said operations for the three calendar years 1973, 1974, and 1975. Accompanying the application shall be a plan of operations which complies with § 9.9 and verified copies of production records for the years 1973, 1974, and 1975.

(c) If the Regional Director finds that the submitted plan of operations complies with § 9.9, that enlargement of the existing excavation of an individual mining operation is necessary in order to make feasible continued production therefrom at an annual rate not to exceed the average annual production level of said operation for the three calendar years 1973, 1974, and 1975, and that the plan of operations meets the applicable standard of approval of § 9.10 (a)(1), he shall issue a permit allowing the disturbance of the surface of the lands contiguous to the existing excavation to the minimum extent necessary to effect such enlargement. For the purpose of this section "lands contiguous to the existing excavation" shall include land which actually adjoins the existing excavation or which could logically become an extension of the excavation; for example, drilling to determine the extent and direction to which the existing ex-

cavation should be extended may be permitted at a site which does not actually adjoin the excavating.

(d) The appropriate reclamation standard to be applied will be determined by the nature of the claim. (See § 9.11(a)(1) and § 9.11(a)(2).)

(e) Operations conducted under a permit pursuant to this section shall be subject to all the limitations imposed by this Part.

(f) For the purposes of this section, each separate mining excavation shall be treated as an individual mining operation.

§ 9.5 Recordation.

(a) Any claimant of an unpatented mining claim in a unit shall, within 12 months after September 28, 1976, record the claim in the Office of the Superintendent of the unit. Actual receipt by the appropriate Superintendent on or before September 28, 1977, is required. Patented claims do not have to be recorded pursuant to this section.

(b) This recordation shall include, but is not limited to, the following instruments and information:

(1) A certified copy of each location notice should provide: Name of claim; locator(s); type (placer, lode, mill site, or tunnel site); mineral(s) for which claim was located; date of location, date of amendments or relocations, if any; recording date, book, page, county and State, where recorded; and a legal description of the lands included in the mining claim(s). If the location notice does not provide all of the foregoing information, it shall, to the extent possible, be attached in a supplement to the location notice. If the lands are surveyed or unsurveyed, the legal description shall be hy:

(i) A recitation of the appropriate location of all or any part of the claim or site within a 160 acre quadrant (quarter section) of a section or sections, if more than one is involved. In addition, there must be furnished the township, range, meridian and State obtained from an official survey plat or other U.S. Government map showing either the surveyed or protracted U.S. Government grid, whichever is applicable.

(ii) A map with a scale of not less than ½ inch to a mile (1:125,000) showing the survey or protraction grids on which there will be depicted the location of the claim or site. Contiguous claims or sites and groups of claims or sites in the same general area may be depicted on this single map so long as the individual claims or sites are clearly identified.

(2) Current claimant's(s) name(s) and address(es).

(3) Statement that annual labor was performed since September 1, 1970.

(c) Pursuant to section 8 of the Act, any unpatented claim not so recorded pursuant to this section shall be conclusively presumed to be abandoned and shall be void. Such recordation will not render valid any unpatented claim which was not valid on September 28, 1976, the effective date of the Act, or which becomes invalid thereafter.

(d) A claimant who initially records under this section or under the notice of October 20, 1976 (41 FR 46357) is in full compliance with all applicable provisions of law, including the recordation provisions of section 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2743, 43 U.S.C. 1701. Thus, a claimant does not have to file this initial notice with the Bureau of Land Management. Copies of all material received pursuant to this section or the notice of October 20, 1976, will be provided by the Regional Director to the Bureau of Land Management. However, subsequent annual filings of notice must be made under section 314 and implementing regulations with the Superintendent who will provide copies to the Bureau of Land Management. These subsequent filings with the Superintendent will satisfy the requirements of section 314 for mining claims in the National Park System.

§ 9.6 Transfers of interest.

(a) Whenever a claimant who has recorded his unpatented claim(s) with the Superintendent pursuant to the requirements of § 9.5 sells, assigns, bequeaths, or otherwise conveys all or any part of his interest in his claim(s), the Superintendent shall be notified within 60 days after completion of the transfer of: The name of the claim(s) involved; the name and legal address of the person to whom an interest has been sold, assigned, bequeathed, or otherwise transferred; and a description of the interest conveyed or received. Copies of the transfer documents will be provided by the Superintendent to the Bureau of Land Management. Failure to so notify the Superintendent shall render any existing access permit void.

(b) If the transfer occurs within the period of 12 months from the effective date of the Act and the prior owner has not recorded the unpatented claim with the Superintendent in accordance with these regulations, the holder by transfer shall have the remainder of the 12-month period to record the unpatented claim. Failure to record shall be governed by the provisions of § 9.5(c).

§ 9.7 Assessment work.

(a) An access permit and approved plan of operations must be obtained by a claimant prior to the performance of any assessment work required by Revised Statute 2324 (30 U.S.C. 28) on a claim in a unit.

(b) Permits will be issued in accordance with the following:

(1) In units subject to the surface disturbance moratorium of section 4 of the Act and § 9.4, no access permits will be granted for the purpose of performing assessment work.

(2) It has been determined that in all other units the Secretary will not challenge the validity of any unpatented claim within a unit for the failure to do assessment work during or after the assessment year commencing September 1, 1976. The Secretary expressly reserves, however, the existing right to contest claims for failure to do such work in the past. No access permits will be granted solely for the purpose of performing assessment work in these units except where claimant establishes the legal necessity for such permit in order to perform work necessary to take the claim to patent, and has filed and had approved a plan of operations as provided by these regulations. (For exploratory or development type work, see § 9.9.)

§ 9.8 Use of water.

(a) No operator may use for operations any water from a point of diversion which is within the boundaries of any unit unless authorized in writing by the Regional Director. The Regional Director shall not approve a plan of operations requiring the use of water from such source unless the right to the water has been perfected under applicable State law, has a priority date prior to the establishment of the unit and there has been a continued beneficial use of that water right.

(b) If an operator whose operations will require the use of water from a point of diversion within the boundaries of the unit can show that he has a perfected State water right junior to the reserved water right of the United States and can demonstrate that the exercise of that State water right will not diminish the Federal right, which is that amount of water necessary for the purposes for which the unit was established, he will be authorized to use water from that source for operations, if he has complied with all other provisions of these regulations.

§ 9.9 Plan of operations.

(a) No operations shall be conducted within any unit until a plan of operations has been submitted by the operator to the Superintendent and approved by the Regional Director. All operations within any unit shall be conducted in accordance with an approved plan of operations.

(b) The proposed plan of operations shall relate, as appropriate, to the proposed operations (e.g. exploratory, developmental or extraction work) and shall include but is not limited to:

(1) The names and legal addresses of the following persons: The operator, the claimant if he is not the operator, and any lessee, assignee, or designee thereof;

(2) A map or maps showing the proposed area of operations; existing roads or proposed routes to and from the area of operations; areas of proposed mining; location and description of surface facilities, including dumps;

(3) A description of the mode of transport and major equipment to be used in the operations;

(4) An estimated timetable for each phase of operations and the completion of operations;

(5) The nature and extent of the known deposit to be mined and a description of the proposed operations;

(6) A mining reclamation plan demonstrating compliance with the requirements of § 9.11;

(7) All steps taken to comply with any applicable Federal, State, and local laws or regulations, including the applicable regulations in 36 CFR, Chapter I;

(8) In units subject to the surface disturbance moratorium of section 4 of the Act and § 9.4, proof satisfactory to the Regional Director that the surface of the area on which the operation is to occur was significantly disturbed for purposes of mineral extraction prior to February 29, 1976, or if the area was not so disturbed, proof, including production records for the years 1973, 1974, and 1975, that new disturbance is necessary to maintain an average annual rate of production not to exceed that of the years 1973, 1974, and 1975;

(9) An environmental report analyzing the following:

(i) The environment to be affected by the operations,

(ii) The impacts of the operations on the unit's environment,

(iii) Steps to be taken to insure minimum surface disturbance,

(iv) Methods for disposal of all rubbish and other solid and liquid wastes,

(v) Alternative methods of extraction and the environmental effects of each,

(vi) The impacts of the steps to be taken to comply with the reclamation plan; and

(10) Any additional information that is required to enable the Regional Director to effectively analyze the effects that the operations will have on the preservation, management and public use of the unit, and to make a decision regarding approval or disapproval of the plan of operations and issuance or denial of the access permit.

(c) In all cases the plan must consider and discuss the unit's Statement for Management and other planning documents, and activities to control, minimize or prevent damage to the recreational, biological, scientific, cultural, and scenic resources of the unit.

(d) Any person conducting operations on January 26, 1977, shall be required to submit a plan of operations to the Superintendent. If otherwise authorized, operations in progress on January 26, 1977, may continue for 120 days from that date without having an approved plan. After 120 days from January 26, 1977, no such operations shall be conducted without a plan approved by the Regional Director, unless access is extended under the existing permit by the Regional Director. (See § 9.10(g).)

§ 9.10 Plan of operations approval.

(a) The Regional Director shall not approve a plan of operations:

(1) For existing or new operations if the claim was patented without surface use restriction, where the operations would constitute a nuisance in the vicinity of the operation, or would significantly injure or adversely affect federally owned lands; or

(2) For operations which had not significantly disturbed the surface of the claim for purposes of mineral extraction prior to January 26, 1977, if the claim has not been patented, or if the patent is subject to surface use restrictions, where the operations would preclude management for the purpose of preserving the pristine beauty of the unit for present and future generations, or would adversely affect or significantly injure the ecological or cultural resources of the unit. No new surface mining will be permitted under this paragraph except under this standard; or

(3) For operations which had significantly disturbed the surface of the claim for purposes of mineral extraction prior to January 26, 1977, if the claim has not been taken to patent, or the patent is subject to surface use restrictions, where the operations would constitute a nuisance in the vicinity of the operation, or would significantly injure or adversely affect federally owned lands. Provided, however, operations under this paragraph shall be limited by the provisions of § 9.4, notwithstanding the limitation of that section's applicability to the three enumerated units;

(4) Where the claim, regardless of when it was located, has not been patented and the operations would result in the destruction of surface resources, such as trees, vegetation, soil, water resources, or loss of wildlife habitat, not required for development of the claim; or

(5) Where the operations would constitute a violation of the surface disturbance moratorium of section 4 of the Act; or

(6) Where the plan does not satisfy each of the requirements of § 9.9.

(b) Within 60 days of the receipt of a proposed plan of operations, the Regional Director shall make an environmental analysis of such plan, and

(1) Notify the operator that he has approved or rejected the plan of operations; or

(2) Notify the operator of any changes in, or additions to the plan of operations which are necessary before such plan will be approved; or

(3) Notify the operator that the plan is being reviewed, but that more time, not to exceed an additional 30 days, is necessary to complete such review, and setting forth the reasons why additional time is required. Provided, however, that days during which the area of operations is inaccessible for such reasons as inclement weather, natural catastrophy, etc., for inspection shall not be included when computing either this time period, or that in subsection (b) above, or

(4) Notify the operator that the plan cannot be considered for approval until forty-five (45) days after a final environmental impact statement, if required, has been prepared and filed with the Council on Environmental Quality.

(c) Failure of the Regional Director to act on a proposed plan of operations and related permits within the time period specified shall constitute an approval of the plan and related permits for a period of three (3) years.

(d) The Regional Director's analysis may include:

(1) An examination of the environmental report filed by the operator;

(2) An evaluation of measures and timing required to comply with reclamation requirements;

(3) An evaluation of necessary conditions and amount of the bond or security deposit to cover estimated reclamation costs;

(4) An evaluation of the need for any additional requirements in access permit; and

(5) A determination regarding the impact of this operation and the cumulative impacts of all operations on the management of the unit.

(e) Prior to approval of a plan of operations, the Regional Director shall determine whether any properties included in, or eligible for inclusion in, the National Register of Historic Places or National Registry of Natural Landmarks may be affected by the proposed activity. This determination will require the acquisition of adequate information, such as that resulting from field surveys, in order to properly determine the presence of and significance of cultural resources within the area to be affected by mining operations. Whenever National Register properties or properties eligible for inclusion in the National Register would be affected by mining operations, the Regional Director shall comply with section 106 of the National Historic Preservation Act of 1966 as implemented by 36 CFR, Part 800.

(1) The operator shall not injure, alter, destroy, or collect any site, structure, object, or other value of historical, archeological, or other cultural scientific importance. Failure to comply with this requirement shall constitute a violation of the Antiquities Act (16 U.S.C. 431-433) (see 43 CFR, Part 3).

(2) The operator shall immediately bring to the attention of the Superintendent any cultural and/or scientific resource that might be altered or destroyed by his operation and shall leave such discovery intact until told to proceed by the Superintendent. The Superintendent will evaluate the discoveries brought to his attention, and will determine within ten (10) working days what action will be taken with respect to such discoveries.

(3) The responsibility for, and cost of investigations and salvage of such values that are discovered during operations will be that of the operator, where the claim is unpatented.

(f) The operator shall protect all survey monuments, witness corners, reference monuments and bearing trees against destruction, obliteration, or damage from mining operations, and shall be responsible for the reestablishment, restoration, or referencing of any monuments, corners and bearing trees which are destroyed, obliterated, or damaged by such mining operations.

(g) Pending approval of the plan of operations, the Regional Director may approve, on a temporary basis, the continuation of existing operations if necessary to enable timely compliance with these regulations and with Federal, State, or local laws, or if a halt to existing operations would result in an unreasonable economic burden or injury to the operator. Such work must be conducted in accordance with all applicable laws, and in a manner prescribed by the

Regional Director and designed to minimize or prevent significant environmental effects.

(h) Approval of each plan of operations is expressly conditioned upon the Superintendent having such reasonable access to the claim as is necessary to properly monitor and insure compliance with the plan of operations.

§ 9.11 Reclamation requirements.

(a) As contemporaneously as possible with the operations, but in no case later than six (6) months after completion of operations and within the time specified in an approved mining reclamation plan, unless a longer period is authorized in writing by the Regional Director, each operator shall initiate reclamation as follows:

(1) Where the claim was patented without surface use restriction, the operator shall at a minimum:

(i) Remove all above ground structures, equipment, and other manmade debris used for operations; and

(ii) Rehabilitate the area of operations to a condition which would not constitute a nuisance; or would not adversely affect, injure or damage, federally owned lands.

(2) On any claim which was patented with surface use restrictions or is unpatented, each operator must take steps to restore natural conditions and processes, which steps shall include, but are not limited to:

(i) Removing all above ground structures, equipment and other manmade debris;

(ii) Providing for the prevention of surface subsidence;

(iii) Replacing overburden and spoil, wherever economically and technologically practicable;

(iv) Grading to reasonably conform the contour of the area of operations to a contour similar to that which existed prior to the initiation of operations, where such grading will not jeopardize reclamation; and

(v) Replacing the natural topsoil necessary for vegetative restoration; and

(vi) Reestablishing native vegetative communities.

(b) Reclamation under paragraph (a)(2), of this section is unacceptable unless it provides for the safe movement of native wildlife, the reestablishment of native vegetative communities, the normal flow of surface and reasonable flow of subsurface waters, the return of the area to a condition which does not jeopardize visitor safety or public use of the unit, and return of the area to a condition equivalent to its pristine beauty.

(c) Reclamation required by this section shall apply to operations authorized under this Part, except that all terms relating to reclamation of previously issued special use permits revoked by this part for operations to be continued under an approved plan of operations shall be incorporated into the operator's reclamation plans.

§ 9.12 Supplementation or revision of plan of operations.

(a) An approved plan of operations may require reasonable revision or supplementation to adjust the plan to changed conditions or to correct oversights.

(1) The Regional Director may initiate an alteration by notifying the operator in writing of the proposed alteration and the justification therefor. The operator shall have thirty (30) days to comment on the proposal.

(2) The operator may initiate an alteration by submitting to the Superintendent a written statement of the proposal, and the justification therefor.

(b) Any proposal initiated under paragraph (a) of this section by either party shall be reviewed and decided by the Regional Director in accordance with § 9.10. Where the operator believes he has been aggrieved by a decision under this paragraph, he may appeal the decision pursuant to § 9.14.

§ 9.13 Performance bond.

(a) Upon approval of a plan of operations the operator shall be required to file a suitable performance bond with satisfactory surety, payable to the Secretary or his designee. The bond shall be conditioned upon faithful compliance with applicable regulations, the terms and conditions of the permit, lease, or contract, and the plan of operations as approved, revised or supplemented.

(b) In lieu of a performance bond, an operator may elect to deposit with the Secretary, or his designee, cash or negotiable bonds of the U.S. Government. The cash deposit or the market value of such securities shall be at least equal to the required sum of the bond.

(c) The bond or security deposit shall be in an amount equal to the estimated cost of completion of reclamation requirements either in their entirety or in a phased schedule for their completion as set forth in the approved, supplemented or revised plan of operations.

(d) In the event that an approved plan of operations is revised or supplemented in accordance with § 9.12, the Superintendent may adjust the amount of the bond or security deposit to conform to the plan of operations as modified.

(e) The operator's and his surety's responsibility and liability under the bond or security deposit shall continue until such time as the Superintendent determines that successful reclamation of the area of operations has occurred.

(f) When all required reclamation requirements of an approved plan of operations are completed, the Superintendent shall notify the operator that performance under the bond or security deposit has been completed and that it is released.

§ 9.14 Appeals.

(a) Any operator aggrieved by a decision of the Regional Director in connection with the regulations in this Part may file with the Regional Director a written statement setting forth in detail the respects in which the decision is contrary to, or in conflict with, the facts, the law, these regulations, or is otherwise in error. No such appeal will be considered unless it is filed with the Regional Director within thirty (30) days after the date of notification to the operator of the action or decision complained of. Upon receipt of such written statement from the aggrieved operator, the Regional Director shall promptly review the action or decision and either reverse his original decision or prepare his own statement, explaining that decision and the reasons therefor, and forward the statement and record on appeal to the Director, National Park Service, for review and decision. Copies of the Regional Director's statement shall be furnished to the aggrieved operator, who shall have 20 days within which to file exceptions to the Regional Director's decision. The Department has the discretion to initiate a hearing before the Office of Hearing and Appeals in a particular case. (See 43 CFR 4.700.)

(b) The official files of the National Park Service on the proposed plan of operations and any testimony and documents submitted by the parties on which the decision of the Regional Director was based shall constitute the record on appeal. The Regional Director shall maintain the record under separate cover and shall certify that it is the record on which his decision was based at the time it is forwarded to the Director of the National Park Service. The National Park Service shall make the record available to the operator upon request.

(c) If the Director considers the record inadequate to support the decision on appeal, he may provide for the production of such additional evidence or information as may be appropriate, or may remand the case to the Regional Director, with appropriate instructions for further action.

(d) On or before the expiration of forty-five (45) days after his receipt of the exceptions to the Regional Director's decision, the Director shall make his decision in writing; Provided, however, that if more than forty-five (45) days are required for a decision after the exceptions are received, the Director shall notify the parties to the appeal and specify the reason(s) for delay. The decision of the Director shall include (1) a statement of facts, (2) conclusions, and (3) reasons upon which the conclusions are based. The decision of the Director shall be the final administrative action of the agency on a proposed plan of operations.

(e) A decision of the Regional Director from which an appeal is taken shall not be automatically stayed by the filing of a statement of appeal. A request for a stay may accompany the statement of appeal or may be directed to the Director. The Director shall promptly rule on requests for stays. A decision of the Director on request for a stay shall constitute a final administrative decision.

§ 9.15 Use of roads by commercial vehicles.

(a) After January 26, 1977, no commercial vehicle shall use roads administered by the National Park Service without first being registered with the Superintendent.

(1) A fee shall be charged for such registration based upon a posted fee schedule, computed on a ton-mile basis. The fee schedule posted shall be subject to change upon 60 days notice.

(2) An adjustment of the fee may be made at the discretion of the Superintendent where a cooperative maintenance agreement is entered into with the operator.

(b) No commercial vehicle which exceeds roadway load limits specified by the Superintendent shall be used on roads administered by the National Park Service unless authorized by written permit from the Superintendent.

(c) Should a commercial vehicle used in operations cause damage to roads or other facilities of the National Park Service, the operator shall be liable for all damages so caused.

§ 9.16 Penalties.

Undertaking any operation within the boundaries of any unit in violation of this Part shall be deemed a trespass against the United States, and the penalty provisions of 36 CFR Part 1 are inapplicable to this Part.

§ 9.17 Public inspection of documents.

(a) Upon receipt of the plan of operations the Superintendent shall publish a notice in the FEDERAL REGISTER advising the availability of the plan for public review.

(b) Any document required to be submitted pursuant to the regulations in this Part shall be made available for public inspection at the Office of Superintendent during normal business hours. The availability of such records for inspection shall be governed by the rules and regulations found at 43 CFR Part 2.

§ 9.18 Surface use and patent restrictions.

(a) The regulations in 43 CFR 3826.2–5 and 3826.2–6, 3826.4–1(g) and 3826.4–1(h), and 3826.5–3 and 3826.5–4 will apply to any claimant who wishes to take his claim to patent in Olympic National Park, Glacier Bay National Monument or Organ Pipe Cactus National Monument.

(b) The additional provisions of 43 CFR, Subpart 3826 and 36 CFR 7.26 and 7.44(a) and (b) will continue to apply to existing permits until 120 days after January 26, 1977, unless extended by the Regional Director. (See § 9.10(g).)

Dated: January 19, 1977.

NATHANIEL P. REED,
Assistant Secretary of the Interior.

Title 41—Public Contracts and Property Management

CHAPTER 7—AGENCY FOR INTERNATIONAL DEVELOPMENT, DEPARTMENT OF STATE

[AIDPR Notice 77-4]

PROCUREMENT REGULATIONS

Miscellaneous Amendments

This notice amends various sections of the AID Procurement Regulations (41 CFR Part 7). The substantive changes are:

(1) Section 7-3.200-50 is revised to clarify that negotiated AID contracts are negotiated under the authority of the Foreign Assistance Act of 1961, as amended, and Executive Order 11223 (30 FR 6635). The circumstance permitting negotiations is FPR 1-3.215.

(2) The definition of "immediate family" in § 7-7.5002-3(1) is revised to reflect the current definition in the Uniform State/AID/USIA Regulations.

(3) AID has adopted FPR 1-1.323 as its rules for use of U.S. flag air carriers. Consequently, contract clauses dealing with requirements for use of U.S. flag air carriers for transportation of persons and things have been changed to incorporate the provisions of FPR 1-1.323.

(4) The "Termination for Convenience of the Government" clause has been moved from Section 7-7.5403-2 to Section 7-7.5401-35 thereby making it a required clause for fixed price contracts.

(5) New AIDPR Appendix G, "Contract Closeout Procedures", has been added.

This notice also contains a number of editorial and administrative changes to delete obsolete sections, update cross references, and make clarifications.

PART 7-1 GENERAL

Part 7-1 is amended as follows:

Subpart 7-1.3—General Policies

§§ 7-1.305-2, 7-1.305-3, 7-1.306-1 [Removed]

1. Sections 7-1.305-2, 7-1.305-3, and 7-1.306-1 are deleted.

2. Section 7-1.318 is redesignated as § 7-1.318-1 and revised as follows:

§ 7-1.318-1 Contracting Officer's decision under a disputes clause.

Before a decision is issued, the disputes clause in the contract must be examined, and the decision must be issued by the official designated in the clause, or his legal successor. Decisions shall be issued only after legal review. The text in FPR 1-1.318-1 may be modified as appropriate with the title "Administrator" inserted, unless the right of appeal is to an officer other than the Administrator. The AID contract appeal procedure is set forth in AIDPR 7-60.

§§ 7-1.323, 7-1.323-2 [Removed]

3. Sections 7-323 and 7-323-2 are deleted.

Subpart 7-1.6—Debarred, Suspended, and Ineligible Bidders

4. Sections 7-1.604-1(a)-1, through 7-1.604-1(b)-6 are consolidated and redesignated as § 7-1.604-1 and revised as follows:

§ 7-1.604-1 Procedural requirements relating to the imposition of debarment.

(a) *Initiation of debarment action.* Notice of proposed debarment shall be deemed to have been received by an affected person if the notice was properly mailed to the last known address of such person.

(b) *Hearings.*—(1) Debarment without a hearing. AID may debar a firm, individual, or an affiliate thereof without a hearing if:

(i) No hearing is requested within the period indicated in the notice described in FPR 1-1.604-1(a); or

(ii) There are no disputed questions of fact relevant to the debarment issue; or

(iii) The Administrator determines that the security interests of the supplier in an adversary hearing.

(2) Date of the hearing. Unless the Administrator determines that for good cause shown additional time should be granted, a hearing shall be instituted within 20 days after receipt of a request from an affected person for a hearing in response to the notice described in FPR 1-1.604-1(a).

(3) Hearing examiner. (i) The hearing shall be conducted before an impartial hearing examiner designated by the Administrator.

(ii) The Administrator shall not be limited in the choice of a hearing examiner to persons employed by AID or by any other agency of the U.S. Government.

(4) Report to the Administrator. The hearing examiner shall submit to the Administrator written findings of fact based upon the record established during the hearing and recommendations concerning the proposed debarment based upon these findings.

(5) Findings. (i) Findings of fact adequate to establish a cause for debarment shall be based upon substantial evidence Standards of proof necessary for criminal conviction shall not apply.

(ii) Evidence of criminal intent shall not be necessary to establish a cause for debarment.

(iii) Findings shall not be circumscribed by technical rules of evidence.

(6) Recommendations. The Administrator may approve or disapprove the recommendations of the hearing examiner in whole or in part.

PART 7-3 PROCUREMENT BY NEGOTIATION

Subpart 7-3.2—Circumstances Permitting Negotiation

5. Section 7-3.200-50 is revised as follows:

§ 7-3.200-50 Negotiation authority.

All negotiated AID contracts are negotiated under the authority of Section 633 of the Foreign Assistance Act of 1961, as amended, and Executive Order 11223, May 12, 1965, 30 FR 6635. The files of negotiated AID contracts shall cite, as the circumstance permitting negotiation, FPR 1-3.215 ("Otherwise authorized by law"). No other circumstances as set forth in FPR 1-3.2. need be cited.

§§ 7-3.204, 7-3.205, 7-3.211 [Removed]

6. Sections 7-3.204, 7-3.205, and 7-3.211 are deleted.

Subpart 7–3.3—Determinations, Findings, and Authorities

§ 7–3.305 [Removed]

7. Section 7–3.305 is deleted.

PART 7–4 SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 7–4.51—Mission Procurements Under Master Contracts [Removed]

Subpart 7–4.52—Procurement of Technical Assistance from U.S. Carriers [Removed]

Subpart 7–4.54—Procurement by Barter—Commodity Credit Corporation [Removed]

8. Subparts 7–4.51, 7–4.52, and 7–4.54 are deleted in their entirety.

Subpart 7–4.56—General Selection Procedure

§ 7–4.5603 [Removed]

9. Section 7–4.5603 is deleted.

Subpart 7–4.57—Educational Institution and International Research Center Selection Procedure

§ 7–4.5703 [Removed]

10. Section 7–4.5703 is deleted.

Subpart 7–4.58—Collaborative Assistance Selection Procedure

§ 7–4.5803 [Removed]

11. Section 7–4.5803 is deleted.

PART 7–6 FOREIGN PURCHASES

Subpart 7–6.2—Buy American Act—Construction Contracts

12. Subpart 7–6.2 is deleted in its entirety.

Subpart 7–6.52—U.S. Source Restrictions—Commodities

§ 7–6.5203 [Amended]

13. Section 7–6.5203 is amended to substitute "AID Handbook 15, Commodities" for "M.O. 1414.1.1" at the end of the section.

PART 7–7 CONTRACT CLAUSES

Subpart 7–7.50—Clauses for Cost Reimbursement Type Contracts

14. New § 7–7.5001–44 is added as follows:

§ 7–7.5001–44 Clean air and water.

Insert the clause set forth in FPR 1–1.2302–2 under the conditions set forth therein.

§ 7–7.5002–3 [Amended]

15. Section 7–7.5002–3 is amended to change the date in the title of the clause from "(September 1975)" to "December 1976)".

16. Section 7–7.5002–3(i)(1)(ii) is amended to read as follows:

§ 7–7.5002–3 Travel expenses.

* * * * *

(i) *Emergency and irregular travel and transportation.*

(1)

(ii) Death or serious illness or injury of a member of the immediate family of the employee or spouse. "Serious illness or injury" and "immediate family" are defined in accordance with Section 609.5 of the Uniform State/AID/USIA Regulations, as in effect on the date of such travel.

§ 7–7.5002–3 [Amended]

17. Paragraph (l) of § 7–7.5002–3 is deleted.

18. Section 7–7.5002–15 is amended to change the date in the undesignated center head from "(September 1974)" to "(December 1976)" and paragraph (d) is revised to read as follows:

§ 7–7.5002–15 Transportation and Storage Expenses.

* * * * * *

(d) *International ocean transportation.*—(1) All international ocean transportation of persons and things which is to be reimbursed in U.S. dollars under this contract shall be by U.S. flag vessels to the extent they are available.

(i) Transportation of things. Where U.S. flag vessels are not available, or their use would result in a significant delay, the Contractor may obtain a release from this requirement from the Transportation Support Division, Office of Commodity Management, Agency for International Development, Washington, D.C. 20523, or the Mission Director, as appropriate, giving the basis for the request.

(ii) Transportation of persons. Where U.S. flag vessels are not available, or their use would result in a significant delay, the Contractor may obtain a release from this requirement from the Contracting Officer or the Mission Director, as appropriate.

(2) Transportation of foreign-made vehicles. Reimbursement of the costs of transporting a foreign (non-U.S.) made motor vehicle will be made in accordance with the provisions of the Uniform State/AID/USIA Foreign Service Travel Regulations, as from time to time amended.

(3) Reduced rates on U.S. flag carriers. Reduced rates on United States flag carriers are in effect for shipments of household goods and personal effects of AID contract personnel. These reduced rates are available provided the shipper states on the bill of lading that the cargo is "Personal property—not for resale—payment of freight charges is at U.S. Government (AID) expense and any special or diplomatic discounts accorded this type cargo are applicable." The Contractor will not be reimbursed for shipments of household goods or personal effects in amount in excess of the reduced rates available in accordance with the foregoing.

19. New § 7–7.5002–16 is added as follows:

§ 7–7.5002–16 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2.

20. New § 7–7.5003–5 is added as follows:

§ 7–7.5003–5 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5(c) under the conditions set forth therein.

Subpart 7–7.52—Basic Ordering Agreement for Participant Training

21. Section 7–7.5201–1(h) is revised to read as follows:

§ 7–7.5201–1 Definitions.

* * * * *

(h) "Director" shall mean the individual who fills the AID position of Director, Office of International Training, or his representative acting within the limits of his authority.

22. New § 7–7.5202–3 is added as follows:

§ 7–7.5202–3 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5(c) under the conditions set forth therein.

Subpart 7–7.53—Contracts for Participant Training

23. Section 7–7.5301–(g) is revised as follows:

§ 7–7.5301–1 Definitions.

* * * * *

(g) "Director" shall mean the individual who fills the AID position of Director, Office of International Training, or his authorized representative acting within the limits of his authority.

24. New § 7–7.5302–3 is added as follows:

§ 7–7.5302–3 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5(c) under the conditions set forth therein.

Subpart 7–7.54—Clauses for Fixed Price Type Contract for Technical Services

25. Section 7–7.5401–35 is added as follows:

§ 7–7.5401–35 Termination for convenience of the Government.

Insert the appropriate clause in accordance with FPR 1–8.700–2(a) (1), (2), or (4).

26. New § 7–7.5401–36 is added as follows:

§ 7–7.5401–36 Clean air and water.

Insert the clause set forth in FPR 1–1.2302–2 under the conditions set forth therein.

27. Section 7–7.5402–8 is revised as follows:

§ 7–7.5402–8 International ocean transportation.

INTERNATIONAL OCEAN TRANSPORTATION (DECEMBER 1976)

All international ocean travel and transportation of persons and things (including commodities and equipment procured specifically for the performance of this contract as well as employee's vehicles, personal effects and household goods, if any) shall be made on United States flag carriers. Where United States flag carriers are not available, or their use would result in significant delays, the Contractor may request a waiver from this requirement. Waivers for shipments of things shall be obtained from the Transportation Support Division, Office of Commodity Management AID, Washington, D.C. 20523; waivers for transportation of persons from the Contracting Officer or Mission Director, as appropriate. If such a waiver is granted it shall be considered a change within the meaning of the "Changes" clause of this contract.

28. New § 7–7.5402–10 is added as follows:

§ 7–7.5402–10 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2.

§ 7–7.5403–2 [Removed]

29. Section 7–7.5403–2 is deleted.

30. New § 7–7.5403–6 is added as follows:

§ 7–7.5403–6 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5(c) under the conditions set forth therein.

Subpart 7–7.55—Clauses for Cost Reimbursement Contracts with Educational Institutions

31. New § 7–7.5501–40 is added as follows:

§ 7–7.5501–40 Clean air and water.

Insert the clause set forth in FPR 1–1.2302–2 under the conditions set forth therein.

32. New § 7–7.5502–19 is added as follows:

§ 7–7.5502–19 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2.

33. New § 7–7.5503–11 is added as follows:

§ 7–7.5503–11 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5(c) under the conditions set forth therein.

PART 7–8 TERMINATION OF CONTRACTS

Subpart 7–8.1—Definition of Terms [Removed]

34. Subpart 7–8.1 is deleted in its entirety.

Subpart 7–8.2—General Principles Applicable to the Termination for Convenience and Settlement of Fixed Price Type and Cost Reimbursement Type Contracts

§ 7–8.213 [Removed]

35. Section 7–8.213 is deleted.

PART 7–10 BONDS AND INSURANCE

Subpart 7–10.3—Insurance—General

§ 7–10.351 [Redesignated]

36. Section 7–10.351 is redesignated as § 7–10.502–3.

PART 7–12 LABOR

Subpart 7–12.8—Equal Opportunity in Employment

§ 7–12.802–51 [Removed]

37. Section 7–12.802–51 is deleted.

Subpart 7–12.52—Foreign Nationals [Removed]

Subpart 7–12.53—Workmen's Compensation (Defense Base Act) and War Hazards Compensation for Overseas Employees [Removed]

38. Subparts 7–12.52 and 7–12.53 are deleted in their entirety.

PART 7–15 CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 7–15.1—Applicability

§ 7–15.102–50 [Removed]

39. Section 7–15.102–50 is deleted.

§ 7–15.151 [Removed]

40. Section 7–15.151 is deleted.

Subpart 7–15.2—Contracts With Commercial Organizations

§ 7–15.200 [Removed]

41. Section 7–15.200 is deleted.

Subpart 7–15.3—Grants and Contracts With Educational Institutions

§ 7–15.301 [Amended]

42. Section 7–15.301 is amended to substitute "contract clause set forth in AID PR 7–7.55" for "form which is set out in AIDPR subpart 7–16" at the end of the section.

PART 7–30 CONTRACT FINANCING

Subpart 7–30.4—Advance Payments

§ 7–30.403 [Removed]

43. Section 7–30.403 is deleted.

§ 7–30.413 [Removed]

44. Section 7–30.413 is deleted.

APPENDIX F—DIRECT AID CONTRACTS WITH U.S. CITIZENS FOR PERSONAL SERVICES ABROAD

45. A new paragraph d. is added to Clause 9 of Attachment B (General Provisions, Contract with a U.S. Citizen for Personal Services Abroad) to Appendix F as follows:

9. *Insurance.*

* * * * *

d. Claims for private personal property losses.

The Contractor shall be reimbursed for private personal property losses in accordance with AID Handbook 23, "Overseas Support", Chapter 10.

46. Paragraph (b)(9) of Clause 10 of Attachment B to Appendix F is revised as follows:

(9) *Limitation on Travel.*

(a) Public Law 93–623 requires that all Federal agencies and Government contractors and subcontractors will use U.S. flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent service by such carriers is available. It further provides that the Comptroller General of the United States shall disallow any expenditures from appropriated funds for international air transportation on other than U.S. flag air carrier in the absence of satisfactory proof of the necessity therefor.

(b) The contractor agrees to utilize U.S. flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent service by such carrier is available, in accordance with the following criteria:

(1) Passenger or freight srevice by a U.S. flag air carrier is considered "available" even though:

(A) Comparable or a different kind of service by a non-U.S. flag air carrier costs less, or

(B) Service by a non-U.S. flag air carrier can be paid for in excess foreign currency, or

(C) Service by a non-U.S. flag air carrier is preferred by the agency or traveler needing air transportation, or

(D) Service by a non-U.S. flag air carrier is more convenient for the agency or traveler needing air transportation.

(ii) Passenger service by a U.S. flag air carrier will be considered to be "unavailable":

(A) When the traveler, while en route, has to wait 6 hours or more to transfer to a U.S. flag air carrier to proceed to the intended destination, or

(B) When any flight by a U.S. flag air carrier is interrupted by a stop anticipated to be 6 hours or more for refueling, reloading, repairs, etc., and no other flight by a U.S. flag air carrier is available during the 6 hour period, or

(C) When by itself or in combination with other U.S. flag or non-U.S. flag air carriers (if U.S. flag air carriers are "unavailable") it takes 12 or more hours longer from the original airport to the destination airport to accomplish the agency's mission than would service by a non-U.S. flag air carrier or carriers.

(D) When the elapsed traveltime on a scheduled flight from origin to destination airports by non-U.S. flag air carrier(s) is 3 hours or less, and service by U.S. flag air carrier(s) would involve twice such scheduled traveltime.

(c) In the event that the Contractor selects a carrier other than a U.S. flag air carrier for international air transportation, he will include a certification on vouchers involving such transportation which is essentially as follows:

CERTIFICATION OF UNAVAILABILITY OF U.S. FLAG AIR CARRIERS

I hereby certify that transportation service for personnel (and their personal effects) or property by U.S. flag air carrier was unavailable for the following reasons:

(state reasons)

(d) The terms used in this clause have the following meanings:

(1) "International air transportation" means transportation of persons (and their personal effects) or property by air between a place in the United States and a place outside thereof or between two places both of which are outside the United States.

(2) "U.S. flag air carrier" means one of a class of air carriers holding a certificate of public convenience and necessity issued by the Civil Aeronautics Board, approved by the President, authorizing operations between the United States and/or its territories and one or more foreign countries.

(3) The term "United States" includes the fifty states, Commonwealth of Puerto Rico, possessions of the United States, and the District of Columbia.

(e) The Contractor shall include the substance of this clause, including this paragraph (e), in each subcontract or purchase hereunder, which may involve international air transportation.

47. New Appendix G is added as follows:

APPENDIX G—CONTRACT CLOSEOUT PROCEDURES

1. *Purpose.* This Appendix G establishes procedures for the orderly and expeditious closeout of completed AID/W and Mission direct contracts.

2. *Closeout Procedures.* (a) For the purpose of this Appendix, the "closeout phase" is defined as the period of time extending from the date the work has been completed by the contractor (including submission of all reports required under the contract) until all remaining administrative actions have been satisfactorily accomplished and the contract file is retired. The closeout procedures

are administered by the Support Services Branch, Office of Contract Management (CM/SD/SUP).

(b) AID organizational elements accomplish their respective responsibilities during the closeout phase as follows:

(1) *Fixed-Price Type Contracts.* Within 4 months after the contractor has completed the work.

(2) *Cost-Reimbursement Type Contracts.* Within 21 months after the contractor has completed the work.

(c) Contract records are not officially retired by the contracting office until the closeout phase is completed.

3. *Responsibility.* (a) *Contracting Office.* The Contracting Officer is responsible for:

(1) Identifying outstanding closeout actions.

(2) Contacting other offices within AID having responsibilities during the closeout phase for status information.

(3) Assuring that all closeout actions have been accomplished, as evidenced by the information provided by responsible offices on the checklist form.

(4) Initiation of follow-up measures, as necessary, on administrative actions which have not been completed within a reasonable time.

(5) Submitting any contract file to the Office of the General Counsel for review when he feels that (i) litigation may be involved, or (ii) there is a legal problem which GC should comment on before the contract is closed out.

(b) *Other AID Offices.* Other AID offices (e.g., the Technical Office, Auditor General, AID/W or Mission Security, AID/W Paying Office or Mission Controller, and the Mission) are responsible for:

(1) Accomplishing administrative actions on a work-completed contract as expeditiously as possible.

(2) Providing completed checklist forms or other status information as requested by the Contracting Officer in accordance with the procedures in this appendix.

(4) *Procedures.* (a) As soon as feasible, but not more than 90 days after completion of the work under a contract (including receipt of all reports required thereunder), the Contracting Officer, or his designated representa- tracting Officer, or his designated representa- the outstanding closeout actions which must be accomplished prior to retiring the contract.

(b) The Contracting Officer or his designated representative (CM/SD/SUP for AID/W) prepares form AID 1420-15, Contract Closeout Checklist (see Attachment), for transmittal to each of the indicated AID action offices as follows:

Part I—AID/W Technical Office. Two copies.

Part II—AID Security or Mission Security Office. Two copies.

Part III—AID/W AG Audit. Two copies.

Part IV—AID/W Paying Office or Mission Controller. Two copies.

Part V—Mission. Two copies.

(c) The above checklists are sent concurrently to the action offices indicated. Each action office returns one copy of the completed part of the checklist to the Contracting Officer by the date indicated on the form. Additional remarks or comments by the action office may be attached to their reply. In closing out a mission contract, it may be necessary to obtain certain information from AID/W offices before completing the checklist. If an office indicates on the checklist that one or more items are still pending, they forward the second and final signed copy of the checklist when all of their outstanding actions have been completed.

(d) The Contracting Officer, or his designated representative, follows up periodically on outstanding administrative actions that have not been accomplished within a reasonable period of time.

(e) The Contracting Officer shall certify to the Security Office when the contractor has given notification that all classified information in the contractor's possession has been properly disposed of or retained (see Part VI, item 8 of Attachment).

(f) When the Contracting Officer has received the completed, certified checklists from the other action offices, he completes Part VI, the Contracting Officer checklist (form AID 1420-15F), assembles all checklist parts in order, signs the certification in paragraph B of Part VI, and places the document in the contract file. The signed checklist and supporting data then constitute the necessary authority to officially retire the contract file.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER I—MEDICAL CARE QUALITY AND COST CONTAINMENT

PART 100—COST CONTAINMENT AND QUALITY CONTROL

Policy on Lack of Timely Notice

Notice is hereby given of the adoption of a policy under section 1122 of the Social Security Act (42 U.S.C. 1320a–1) pursuant to which the Regional Health Administrators, under the authority of section 1122(d)(1) (previously delegated to them by the Secretary), will limit the period of withholding of reimbursement for a capital expenditure when it has been determined under section 1122(d)(1)(A) that timely notice of a proposed capital expenditure subject to review under section 1122 has not been provided as required.

This policy has been developed in response to reports of an increasing number of cases in which capital expenditures subject to review under section 1122 have not been submitted for review to the designated planning agency in the timely manner required by the statute and regulations. The circumstances surrounding the history of these cases are varied, and, while some cases apparently merit the withholding of all reimbursement, others do not.

The law and regulations provide two procedures for limiting the requirement to withhold all reimbursement related to the capital expenditure in cases where timely notice was not provided. One is to use the mechanism provided by section 1122(d)(2) whereby the Regional Health Administrators (to whom that authority is presently delegated) could decide not to withhold reimbursement on the grounds cited in the law and regulations, after submitting the matter to the appropriate national advisory council. This mechanism, however, offers serious disadvantages (among them, complexity, lack of flexibility, and lack of timeliness), and therefore has been rejected as the general procedures to be used in these cases. This mechanism remains available, however, for those cases where the designated planning agency has found a proposed capital expenditure not to conform to applicable plans, criteria, or standards, but where the Regional Health Administrator may wish not to withhold reimbursement on the ground that to do so would discourage the operations or expansion of the health care facility or health maintenance organization or of any facility of such organization which has demonstrated to his satisfaction proof of capability to provide comprehensive health care services (including institutional services) efficiently, effectively, and economically, or would otherwise be inconsistent with the effective organization and delivery of health services or the effective administration of title V, XVIII or XIX of the Social Security Act.

The second alternative is that provided by the language of section 1122(d)(1):

• • • if the Secretary determines that—

(A) neither the planning agency designated in the agreement described in subsection (b) nor an agency described in clause (ii) of subparagraph (B) of this paragraph had been given notice of any proposed capital expenditure (in accordance with such procedure or in such detail as may be required by such agency) at least 60 days prior to obligation for such expenditure; • • • then *for such period as he finds necessary in any case to effectuate the purpose of this section,* he shall, in determining the Federal payments to be made under titles V, XVIII, and XIX with respect to services furnished in the health care facility for which such capital expenditure is made, not include any amount which is attributable to depreciation, interest on borrowed funds, a return on equity capital (in the case of proprietary facilities), or other expenses related to such capital expenditure (italics added).

This language requires the Regional Health Administrator to determine the appropriate period of withholding in each case. In order to promote national uniformity in the application of this policy, and thus assure equitable treatment for

the health care facilities and health maintenance organizations involved, the following policy has been developed to describe the different kinds of cases which might occur and the period of withholding which will apply for each case:

NOTE.—Where the Secretary makes the determination described in 42 CFR 100.108(a)(1), he will follow the following policy in establishing the time period during which reimbursement will be withheld:

(1) Where the health care facility or health maintenance organization by or on behalf of which the expenditure was made demonstrates to the satisfaction of the Secretary that a reasonable effort had been made to determine from the designated planning agency whether the expenditure was subject to review, and the designated planning agency had not informed the facility or organization within a reasonable period of time that the proposed expenditure was subject to review, the Secretary will not withhold reimbursement related to the capital expenditure.

(2) Where the designated planning agency has, in accordance with the requirements of section 1122 of the Act and its regulations (42 CFR Part 100), submitted to the Secretary its finding that such expenditure is not consistent with the standards, criteria, or plans described in § 100.104(a)(2) of the regulations, and where subparagraph (1) above is not applicable the Secretary will withhold all reimbursement related to the capital expenditure: *Provided*, That where the designated planning agency, in accordance with § 100.109(c), submits to the Secretary a revised funding in accordance with paragraph (c)(2) of that section, the Secretary will apply the provisions of subparagraph (3) or subparagraph (4) below, whichever is applicable.

(3) Where (i) the designated planning agency submits to the Secretary its finding that for the proponent to comply with the requirement of § 100.106 for timely notice of intent to incur the obligation for a capital expenditure, which capital expenditure was not for the purpose of providing a new service or expanding the capacity of the health care facility or health maintenance organization to offer an existing service, would have placed in jeopardy the health or the safety of the patients of the facility or organization, and that the proponent gave such notice as, in the opinion of the designated planning agency, was reasonable under the circumstances, and (ii) if the facility or organization submitted to the designated planning agency within 60 days following the date of the obligation for the expenditure or 90 days following the date of publication of this policy in the FEDERAL REGISTER, whichever is later, a complete application and (iii) the designated planning agency submits to the Secretary its finding that the capital expenditure is consistent, with the standards, criteria, and plans described in § 100.104(a)(2) which apply at the time of the review by the designated planning agency, the Secretary will not withhold reimbursement related to the capital expenditure.

(4) Where the designated planning agency submits to the Secretary its finding that the capital expenditure is consistent with the standards, criteria, and plans described in § 100.104(a)(2) which apply at the time of the review by the designated planning agency, but the provisions of neither subparagraph (1) nor subparagraph (3) above apply, the Secretary will withhold reimbursement related to the capital expenditure for a period of one year.

Dated: January 14, 1977.

KENNETH M. ENDICOTT,
Administrator, Health Resources Administration.

Title 45—Public Welfare

CHAPTER XVI—LEGAL SERVICES CORPORATION

PART 1619—DISCLOSURE OF INFORMATION

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996l ("the Act"). Section 1006(b)(1), 42 U.S.C. 2996e(b)(1), provides that the Corporation shall have the authority to enforce compliance with the Act and Corporation rules, regulations and guidelines promulgated pursuant thereto.

On September 23, 1976 (41 FR 41724) a proposed regulation on disclosure of recipient policies was published. Interested persons were given until October 26, 1976 to submit comments on the proposed regulation. All comments received were given full consideration. The following issues were among those considered before adoption of the final regulation.

COMMENT

The final regulation is a substantial revision of the draft published for comment on September 23, 1976.

The disclosure requirements of the published draft were very similar to the ones that Part 1602 imposes on the Legal Services Corporation, although the Legal Services Corporation Act applies the Freedom of Information Act to the Corporation, and not to recipients. After considering the comments received, the Corporation concluded that there is a sound basis for the distinction made by the Congress in its treatment of the Corporation and of recipients.

The published draft gave insufficient weight to the fact that a legal services office is a law firm, and that its operations are fundamentally different from those of the Corporation. Opposing attorneys and parties to lawsuits in which the other side is represented by a legal services program attempted to use the proposed regulation as a means of discovery. The regulation sought to protect against such misuse, but its description of the materials exempt from disclosure was necessarily vague and likely to raise many questions of interpretation and application. Some programs that received requests under the regulation reported difficulty in defining the scope of disclosure with respect to information relating to specific cases or clients. Requiring a legal services program to furnish any information related to a client's case might put legal services clients at a disadvantage that is unjustified by the fact that they are being assisted with funds initially provided by the Congress.

Other legal services programs received requests for information from individuals seeking to show that the recipient was violating the Act or Corporation regulations. Insofar as the draft lent itself to this use, it was inconsistent with section 1618, Enforcement Procedures, and section 1604, providing for the establishment of State Advisory Councils. An individual who has reason to believe a legal services program may have violated the Act or Corporation regulations should not undertake a private investigation or fishing expedition, but should make a complaint to the State Advisory Council, the Director of the recipient, or the Corporation. Investigation is then carried out by the Corporation, as required by Part 1618, which informs the complainant of the results.

The public has a legitimate interest in knowing the rules and regulations of the Corporation and the recipient's policies and guidelines and the names and addresses of the members of its governing body. These should be made available for public inspection during business hours at any office maintained by a recipient. Other information concerning a recipient in which the public may have a legitimate interest may be obtained by an FOIA request to the Corporation pursuant to Part 1602.

The final regulation insures that information in which the public has a legitimate interest will be disclosed, and protects recipients against burdensome or inappropriate demands.

Sec.
1619.1 Purpose.
1619.2 Policy.
1619.3 Referral to the Corporation.
1619.4 Exemptions.

AUTHORITY: Sec. 1006(b)(1), (42 U.S.C. 2996e(b)(1)); sec. 1008(e), (42 U.S.C. 2996 g(e).)

§ 1619.1 Purpose.

This part is designed to insure disclosure of information that is a valid subject of public interest in the activities of a recipient.

§ 1619.2 Policy.

A recipient shall adopt a procedure for affording the public appropriate access to the Act, Corporation rules, regulations and guidelines, the recipient's written policies, procedures, and guidelines, the names and addresses of the members of its governing body, and other materials that the recipient determines should be disclosed. The procedure adopted shall be subject to approval by the Corporation.

§ 1619.3 Referral to the Corporation.

If a person requests information, not required to be disclosed by this part, that the Corporation may be required to disclose pursuant to Part 1602 of this chapter implementing the Freedom of Information Act, the recipient shall either provide the information or inform the person seeking it how to request it from the Corporation.

§ 1619.4 Exemptions.

Nothing in this part shall require disclosure of

(a) Any information furnished to a recipient by a client;

(b) The work product of an attorney or paralegal;

(c) Any material used by a recipient in providing representation to clients;

(d) Any matter that is related solely to the internal personnel rules and practices of the recipient; or

(e) Personnel, medical, or similar files.

Effective date: This part shall become effective February 25, 1977.

THOMAS EHRLICH,
President,
Legal Services Corporation.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1257]

PART 1033—CAR SERVICE

Priority in Movement of Fuel and Other Essential Commodities

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 21st day of January, 1977.

It appearing, That because of severe weather in the eastern portion of the United States available fuel supplies are seriously depleted; that excessive accumulations of snow and ice and extreme cold have also disrupted normal movement of freight by railroad; that shortages of fuel have caused numerous industries to discontinue operations, resulting in extensive unemployment; that supplies of food stuffs for farm animals and for humans are also being depleted; that there are needs for emergency supplies of equipment and chemicals used in removing snow from streets and highways; that certain other articles of commerce must continue to move to points of use promptly; that railroads in certain areas are unable to move currently all traffic available; that the establishment of priorities for the movement of certain commodities is essential to the national welfare; that in the opinion of the Commission an emergency exists; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1257 Priority in movement of fuel and other essential commodities.

(a) Any railroad which is unable to transport all of the freight traffic which it would normally move by any particular train or engine shall give priority in movement, over all other traffic of all essential commodities consigned for domestic use including but not limited to the following:

Liquid fuels, including liquefied petroleum gas, diesel fuel, fuel oil, gasoline, etc.
Coal.
Animal and Poultry Feed.
Food for human consumption.
Grain, soybeans and other agricultural products for processing into foods for either human or animal consumption.
Snow removal equipment and supplies, including salt and chemicals when consigned to a federal, state, county or municipal body.
Water and sewage processing supplies and equipment essential to the continuity of water and sewage installations.
Electric power, gas and petroleum, petroleum products, distribution and communication systems supplies, materials and equipment required for the continued operation of such systems.
Military freight on bills of lading issued by transportation officers of the military services.
Material moving on bills of lading specifically certified as essential by the Department of Defense, Energy Research and Development Administration or the Federal Energy Administration.
Empty tank cars which last contained liquid fuel or which the car owner certifies will next be used to transport such commodity.
United States mail in accordance with emergency orders of the United States Postal Service.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Effective date.* This order shall become effective at 11:59 p.m., January 21, 1977.

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911 (49 U.S.C. 1(10-17), 15(4), and 17(2)).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Lewis R. Teeple, and Thomas J. Byrne.

ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Individual Wildlife Refuge Areas

The following special regulations are issued and are effective on January 1, 1977.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

ALABAMA

CHOCTAW NATIONAL WILDLIFE REFUGE

Sport fishing on the Choctaw National Wildlife Refuge, Jackson, Alabama, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 2,000 acres, are shown on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season is open year-round on all refuge waters not closed by signs.

(2) Fishing permitted during daylight hours only.

(3) Boats and motors are permitted.

(4) Trotlines are not permitted in refuge impoundments.

(5) Equipment (boats, trailers, vehicles, etc.) not permitted overnight.

(6) Boat launching is permitted only at the refuge's north end boat ramp.

ARKANSAS

BIG LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Big Lake National Wildlife Refuge, Manila, Arkansas, is permitted on all water areas. These areas, comprising 4,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends year-round except for closure during duck hunting season.

(2) Limb lines not permitted.

(3) Trotline fishing permitted at night.

HOLLA BEND NATIONAL WILDLIFE REFUGE

Sport fishing is permitted on all waters of Holla Bend National Wildlife Refuge. Sport fishing shall be in accordance with all applicable State and Federal regulations covering fishing, subject to the following special conditions:

(1) Fishing is permitted only during the period March 15 through September 30, daylight hours only.

WAPANOCCA NATIONAL WILDLIFE REFUGE

Sport fishing on the Wapanocca National Wildlife Refuge, Turrell, Arkansas is permitted on Wapanocca Lake and other areas as designated by signs as open to fishing. These open areas are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from April 1, 1977 through September 30, 1977.

(2) Fishing permitted during daylight hours only.

(3) Motors larger than 10 horsepower are prohibited.

(4) The use of yo-yo's, jugs, drops, or trotlines is prohibited.

(5) The use of live carp, shad, buffalo, and goldfish for bait is prohibited.

(6) No fishing permitted within 100 yards of any refuge building or structure.

WHITE RIVER NATIONAL WILDLIFE REFUGE

Sport fishing on the White River National Wildlife Refuge, DeWitt, Arkansas, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 2,592 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 16, 1977 through October 31, 1977.

(2) Boats without owner's name plate affixed in a conspicuous place may not be left overnight.

(3) Taking of frogs is prohibited.

LAKE WOODRUFF NATIONAL WILDLIFE REFUGE

FLORIDA

Sport fishing on the Lake Woodruff National Wildlife Refuge, DeLeon Springs, Florida, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 650 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations, subject to the following special conditions:

(1) The sport fishing season is open year-round on designated refuge waters west of Norris Dead River, Lake Woodruff, and Spring Garden Creek. In addition, Highland Park Canal and the canal bordering the east side of Norris Dead River are open year-round. Refuge waters east of Norris Dead River Canal, Lake Woodruff, and Spring Garden Creek will be open to fishing only when such use does not result in undue disturbance to wildlife or does not interfere with wildlife management practices being carried out on the area. Such periods of permitted use will be designated by appropriate signing and will generally occur during the period from March 15 to October 15.

(2) Fishing and access on refuge lands and waters is permitted during daylight hours only.

(3) Air thrust boats are prohibited.

LOXAHATCHEE NATIONAL WILDLIFE REFUGE

Sport fishing is permitted in all waters of the Loxahatchee National Wildlife Refuge, Delray Beach, Florida, except those marked by signs as being closed. The open areas, comprising 61,352 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State and Federal regulations subject to the following special conditions:

(1) All public entry onto the refuge for any purpose is limited to the following points:

(a) S-5A (Twenty-Mile Bend) boat ramp.

(b) Headquarters area.

(c) Loxahatchee Recreation Area.

(2) Sport fishing is permitted yearround.

(3) Fishing is restricted to 1½ hours before sunrise until 1 hour after sunset.

(4) Boats must enter or leave the refuge through the three public ramps:

(a) S-5A (Twenty-Mile Bend) boat ramp.

(b) Headquarters boat ramp.

(c) S-39 (Loxahatchee Recreation Area) boat ramps.

(5) Method of fishing allowed is with attended rod and reel and/or pole and line.

(6) Air thrust boat use is authorized only by special permit issued by the refuge manager. Speed boats and racing craft are prohibited.

MERRITT ISLAND NATIONAL WILDLIFE REFUGE

Sport fishing on the Merritt Island National Wildlife Refuge, Titusville, Florida, is permitted only in open areas as delineated on a map available at the refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Salt and fresh water fish may be taken in accordance with all applicable State regulations subject to the following special conditions:

(1) Sport fishing is permitted during daylight hours, year-round, except when posted as closed.

(2) Bank fishing along Banana Creek is prohibited.

(3) Air thrust boats are not allowed on Refuge waters.

(4) Permitted fishing methods:

(a) Attended rod and reel and/or pole and line.

(b) Bow fishing with retrieving line attached.

(c) Cast nets with not more than 7 feet length and not more than 14 feet in diameter and no less than 1 inch mesh.

ST. MARKS NATIONAL WILDLIFE REFUGE

Sport fishing on the St. Marks National Wildlife Refuge, St. Marks, Florida, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 50,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 15, 1977, through October 15, 1977.

(2) Fishing permitted one-half hour before sunrise until one-half hour after sunset, 7 days a week.

(3) Boats with gasoline engines to 4 horsepower and electric motors are permitted.

(4) Trotlines shall be taken up prior to closing hour of fishing daily.

ST. VINCENT NATIONAL WILDLIFE REFUGE

Sport fishing on the St. Vincent National Wildlife Refuge, Franklin County, Apalachicola, Florida, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 360 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season extends from March 1, 1977 through October 30, 1977.

(2) Fishermen are permitted on the refuge from 1 hour before sunrise to 1 hour after sunset.

(3) No motors of any type may be used.

(4) Boats may be left on the island at designated points during the open season provided they are identified with their owner's name and address. Boats must be removed from the refuge no later than October 30, 1977.

(5) Use of live minnows as bait is prohibited.

GEORGIA

BLACKBEARD ISLAND NATIONAL WILDLIFE REFUGE

Fresh water sport fishing on the Blackbeard Island National Wildlife Refuge, McIntosh County, Townsend, Georgia, is permitted only on two areas. These open areas, comprising 350 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 15, 1977 through October 25, 1977.

(2) Fishing is permitted in daylight hours only. Fishermen must be off the refuge by dark.

(3) Boats with electric motors permitted. Gasoline powered motors prohibited.

(4) Use of live minnows as bait prohibited.

(5) Overnight storage of private boats on the refuge is prohibited.

OKEFENOKEE NATIONAL WILDLIFE REFUGE

Sport fishing is permitted on the Okefenokee National Wildlife Refuge, Waycross, Georgia. Certain isolated areas are closed and posted. The open areas are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) Fishing permitted during daylight hours only.

(2) Boats with motors not larger than 10 horsepower, canoes, and rowboats permitted.

(3) Use of live minnows as bait prohibited.

(4) Trotlines, limb lines, nets, or other set tackle prohibited.

(5) Persons entering refuge from main access points must register with the respective concessioner.

(6) Persons using the sill access ramp on the pocket are required to sign and register when they enter the swamp and again when they leave.

PIEDMONT NATIONAL WILDLIFE REFUGE

Sport fishing on the Piedmont National Wildlife Refuge, Round Oak, Georgia, is permitted only in the areas designated by signs as open to fishing. These open areas, comprising approximately 30 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

Open season. March 12, 1977 through September 17, 1977—The Falling Creek Bridge Area on Round Oak-Juliette Road and the Little Falling Creek Area at County Line Bridge; April 30, 1977 through September 17, 1977—Allison Lake.

Hours. Daylight hours only.

Boats permitted in Allison Lake only. Electric motors permitted; all other motors prohibited. Boats may not be left on the refuge overnight. Bank fishing permitted within posted areas only.

LOUISIANA

CATAHOULA NATIONAL WILDLIFE REFUGE

Sport fishing on the Catahoula National Wildlife Refuge, Jena, Louisiana, is permitted on the areas designated by signs as open to fishing. The open areas, comprised of the Cowpen Bayou Impoundment and Duck Lake Marsh, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from April 1, 1977 through October 31, 1977.

(2) Fishing permitted from 30 minutes before sunrise to 30 minutes after sunset.

(3) Gasoline powered outboard motors are not allowed in Cowpen Bayou. Electric trolling motors only may be used. Outboard motors may be used in Duck Lake Marsh.

(4) Boats may not be left in the refuge overnight.

DELTA NATIONAL WILDLIFE REFUGE

Sport fishing and sport shrimping on the Delta National Wildlife Refuge, Venice, Louisiana, are permitted only on the areas designated by signs as open to fishing. These open areas, comprising approximately 48,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing and sport shrimping shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing and sport shrimping season on the refuge shall be closed during the waterfowl hunting season.

(2) Fishing and shrimping permitted during daylight hours only.

(3) Sport shrimp trawls are restricted to a maximum of 25 feet.

(4) Air thrust boats are prohibited.

LACASSINE NATIONAL WILDLIFE REFUGE

Sport fishing on the Lacassine National Wildlife Refuge, Lake Arthur, Louisiana, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 28,000 acres, the delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 1, 1977 through October 15, 1977.

(2) Fishing permitted from one hour before sunrise to one hour after sunset.

(3) Entry to Lacassine Pool restricted to four roller-ways provided.

(4) Boats may not be left inside the refuge overnight.

(5) Boats with outboard motors no larger than 25 horsepower permitted in Lacassine Pool. No size restrictions on boats and motors in the canals and streams. Airboats of any size may not be used on the refuge.

SABINE NATIONAL WILDLIFE REFUGE

Sport fishing on the Sabine National Wildlife Refuge, Hackberry, Louisiana, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 40,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 1, 1977 through October 15, 1977.

(2) Fishermen must not enter refuge waters earlier than one hour before sunrise and shall leave refuge waters by one hour after sunset.

(3) Boats may be moored only at designated areas in Pool 1b or Pool 3. Boats left at these mooring sites must bear owner's name and address. All boats must be removed from the refuge prior to the close of the fishing season.

(4) Boats may not be dragged across levees for access to pool areas. Travel over the refuge is restricted to waterways. Fishermen are not to walk canal banks or levees. Boat access into Pool 1b is restricted to bridge sites on Road Canal.

(5) Boats with outboard motors not larger than 25 horsepower permitted in refuge lakes and impoundments. No size restrictions on boats and motors in the canals and bayous.

MISSISSIPPI

NOXUBEE NATIONAL WILDLIFE REFUGE

Sport fishing on the Noxubee National Wildlife Refuge, Brooksville, Mississippi, is permitted on all refuge waters not specifically posted as closed to entry. These open areas, comprising 2,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 1 through October 31, 1977.

(2) Fishing permitted during daylight hours only.

(3) A daily permit ($1.00) is required by the Mississippi Game and Fish Commission to fish in Bluff and Loakfoma Lakes and tail waters of the spillways.

(4) No limb lines or limb hooks are permitted in Bluff and Loakfoma Lakes.

(5) All trotlines will be removed from the refuge by the close of the refuge fishing season.

(6) Private boats may not be left overnight on the refuge.

(7) Snag lines prohibited.

YAZOO NATIONAL WILDLIFE REFUGE

Sport fishing on the Yazoo National Wildlife Refuge, Hollandale, Mississippi, is suspended during the 1977 season due to inadequate fishing opportunities.

NORTH CAROLINA

MATTAMUSKEET NATIONAL WILDLIFE REFUGE

Sport fishing, bow fishing, and herring dipping on the Mattamuskeet National Wildlife Refuge are permitted only on the areas designated by signs as open. These open areas, comprising 40,000 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. These activities shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) Sport fishing and bow fishing seasons extend from March 1 through November 1, except the following areas are open to bank fishing during the entire year.

(a) State Highway 94 Causeway.

(b) In the immediate vicinity of the Lake Landing water control structure.

(c) In the immediate vicinity of the Outfall Canal water control structure at Mattamuskeet Lodge.

(2) Herring (alewife) dipping will be permitted from March 1 through May 15 from the canal banks and water control structures in the immediate vicinity of the following locations:

(a) Waupoppin Canal control structure—daylight hours only.

(b) Outfall Canal control structure—daylight hours only.

(c) Lake Landing control structure—except closed from sunset Sunday to sunrise Monday; sunset Tuesday to sunrise Wednesday; sunset Thursday to sunrise Friday.

(3) Boats and outboard motors permitted except in areas posted closed to motor boat use. Airboats are prohibited.

PEE DEE NATIONAL WILDLIFE REFUGE

Sport fishing on the Pee Dee National Wildlife Refuge, Wadesboro, North Carolina, is permitted only on the areas designated by signs as open to fishing. These open areas are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) *Open season.* April 1 through September 30 except Brown Creek within 100 yards of the Brown Creek Recreation Area on U.S. Highway 52 is open yearround.

(2) Fishing permitted sunrise to sunset only.

(3) Only bank fishing permitted.

SOUTH CAROLINA

CAPE ROMAIN NATIONAL WILDLIFE REFUGE

Sport fishing on the Bulls Island Unit of the Cape Romain National Wildlife Refuge, Awendaw, South Carolina, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 610 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 15, 1977 through September 30, 1977.

(2) Fishing permitted during daylight hours only. No overnight camping allowed.

(3) Boats with electric motors permitted. Other motors prohibited.

(4) Boats must be removed from the refuge at the close of each day.

CAROLINA SANDHILLS NATIONAL WILDLIFE REFUGE

Sport fishing on the Carolina Sandhills National Wildlife Refuge, McBee, South Carolina, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising approximately 150 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends year-round on Lake Bee, and the Black Creek Bridge areas on State Road 33, State Road 145, and U.S. Highway 1; from March 14, 1977 through October 8, 1977 on Martin's Lake, and Pools A, B, C, D, G, and H; and from March 14, 1977 through September 10, 1977 on Lake 17 and Pools J and L.

(2) Fishing permitted from official local sunrise until one-half hour after official local sunset.

(3) Unpowered boats and boats with electric motors permitted only in Lake Bee, Lake 17, and Martin's Lake. Other type motors prohibited. All other areas are open only for bank fishing within posted areas.

SANTEE NATIONAL WILDLIFE REFUGE

Sport fishing on Santee National Wildlife Refuge is permitted on all areas except for those designated by signs as being closed. The closed areas are delineated on a map that is available at refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Waters within all land units (Cuddo, Pine Island, Bluff, and Dingle Pond) are closed to fishing.

(2) Cantey Bay, Blackbottom, and Savannah Branch are closed from November 1 to February 28.

(3) The overnight mooring of boats on the refuge is prohibited.

SAVANNAH NATIONAL WILDLIFE REFUGE

Sport fishing on the Savannah National Wildlife Refuge, Jasper County, Hardeeville, South Carolina, is permitted only on impounded waters, tidal creeks, ditches and canals in an area comprising 13,000 acres and delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 15, 1977 through October 25, 1977.

(2) Fishing is permitted during daylight hours only.

(3) Outboard motors prohibited in impounded waters.

(4) Tidal creeks may be fished from boat only from February 1 through October 25.

(5) Rod and reel, pole and line, artificial and live baits permitted.

(6) All areas posted with "closed area signs" are closed to all activities including fishing.

TENNESSEE

CROSS CREEKS NATIONAL WILDLIFE REFUGE

Sport fishing on the Cross Creeks National Wildlife Refuge, Dover, Tennessee, is permitted only on areas designated by signs as open to fishing. These open areas, comprising 3,260 acres, are delineated on a map that is available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season on refuge waters is April 1 through September 15, 1977 except the season is year-round on Barkley Lake.

(2) Fishing is permitted from 30 minutes before sunrise until 30 minutes after sunset, except fishing permitted 24 hours per day on Barkley Lake.

(3) Outboard motor size is limited to 6 horsepower or less, except motor size is not restricted on Barkley Lake.

(4) Methods of fishing the two reservoirs and impoundments are limited to hand fishing with rod and reel and/or pole and line.

(5) Overnight camping and/or overnight mooring of boats are prohibited on the refuge.

HATCHIE NATIONAL WILDLIFE REFUGE

Sport fishing on the Hatchie National Wildlife Refuge, Brownsville, Tennessee, is permitted on all waters within the refuge boundary unless designated otherwise. These open areas, comprising 100 acres, are delineated on a map available at the refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from April 1, 1977 through October 31, 1977.

(2) Fishing permitted during daylight hours only.

(3) Boats powered with electric outboard motors are permitted. Gasoline outboard motors are prohibited.

(4) Methods of fishing are limited to pole and line or rod and reel.

(5) Boats must be removed from refuge no later than November 7.

REELFOOT NATIONAL WILDLIFE REFUGE

Sport fishing on the Reelfoot National Wildlife Refuge, Samburg, Tennessee, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 9,092 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The fishing season on that portion of the refuge located north of Upper Blue Basin extends from February 15, 1977 through October 23, 1977. The fishing season on that portion of the refuge located south of Upper Blue Basin extends from January 21, 1977 until the day preceding opening of the 1977 waterfowl season.

(2) Fishing with bows and arrows is prohibited at all times.

(3) Boats with motors of not more than 10 horsepower may be used.

(4) Public use of the refuge is limited to the hours between sunrise and sunset unless otherwise provided by a refuge permit.

LAKE ISOM NATIONAL WILDLIFE REFUGE

Sport fishing on the Lake Isom National Wildlife Refuge, Tennessee, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 750 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The sport fishing season on the refuge extends from March 16, 1977 through September 30, 1977.

(2) Fishing with bows and arrows is prohibited.

(3) Boats with motors of not more than 6 horsepower may be used.

(4) Public use of the refuge is limited to the hours between sunrise and sunset unless otherwise provided for by a refuge permit.

The provisions of these special regulations supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1977.

RAY R. VAUGHN,
Deputy Regional Director,
U.S. Fish and Wildlife Service.

JANUARY 11, 1977.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for Industry No. 2522, and Industry No. 2591, for Purpose of Bidding on Government Procurements

Notice is hereby given that the Small Business Administration proposes to increase the definition of a small business for Industry No. 2522, Metal Office Furniture; and Industry No. 2591, Drapery Hardware and Window Blinds and Shades, from "number of employees" not exceeding 500 persons, to "number of employees" not exceeding 750 persons.

A review of the size structure of the 13 industries in Major Group 25, Furniture and Fixtures, reveals that in the above industries manufacturers that quality as small business under the currently effective 500-employee size standard for such industries account for a significantly smaller percentage of the total sales of that industry than that accounted for by the small businesses in the other 11 industries in the group.

Under such circumstances it is proposed to revise Schedule B of Part 121, Chapter I, Title 13 of the Code of Federal Regulations by inserting immediately after Major Group 22, Textile Mill Products, a new Major Group 25, Furniture and Fixtures, to read as follows:

Census classification code	Industry or class of products	Employment size standard (number of employees)
.	.	.
.	.	.
.	.	.
.	.	.
.	.	.
MAJOR GROUP 25—FURNITURE AND FIXTURES		
2522	Metal office furniture	750
2591	Drapery hardware and window blinds and shades	750

Interested parties may file with the Small Business Administration, on or before February 25, 1977, written statements of facts, opinions, or arguments concerning the proposal. All correspondence shall be addressed to:

William L. Pellington, Director, Size Standards Division, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59.009, Procurement Assistance to Small Business.)

Dated: January 14, 1977.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Rel. No. 34-13185; File No. S7-671]

QUESTIONABLE OR ILLEGAL CORPORATE PAYMENTS AND PRACTICES

Proposed Promotion of Reliability of Financial Information and Prevention of Concealment

The Securities and Exchange Commission today announced a series of rule-making proposals designed further to promote the reliability and completeness of the financial information which issuers are required to file with the Commission pursuant to the Securities Exchange Act of 1934. These proposals would require each issuer registered pursuant to Section 12 of the Securities Exchange Act, or required to file periodic reports pursuant to section 15(d), to:

(1) Maintain books and records accurately reflecting the transactions and dispositions of assets of the issuer; and

(2) Maintain an adequate system of internal accounting controls designed to provide reasonable assurance that specified objectives are satisfied.

In addition, the Commission, in order to protect the reliability of financial information required to be filed pursuant to the federal securities laws and to protect the integrity of the independent audit of issuer financial statements required under existing Commission rules, is proposing rules which would explicitly

(1) Prohibit the falsification of an issuer's accounting records; and

(2) Prohibit the officers, directors, or stockholders of an issuer from making false, misleading or incomplete statements to an accountant engaged in an examination of the issuer.

Although, as discussed herein, the Commission's authority to promulgate rules of this nature does not rest solely on Section 13 of the Securities Exchange Act, these rules, if adopted, would be codified in a new Regulation 13B, entitled "Accuracy of Books, Records, and Reports."

The Commission believes that these proposals, while not directed solely to the problem of questionable or illegal corporate payments and practices, would serve to create a climate which would significantly discourage repetition of the serious abuses which the Commission has uncovered in this area. The Commission's experience has indicated that improper corporate payments are rarely reflected correctly in the corporate books and records and, indeed, are often symptomatic of a failure in the system of corporate internal accounting controls. In addition, the need to suppress information concerning such payments frequently entails the falsification of records and the deception of auditors.

Because of the unique significance of such payments in the evaluation of the competence and integrity of corporate management, the Commission is also proposing to require disclosure, in connection with any proxy solicitation or information statement pursuant to Regulation 14A under the Securities Exchange Act, of the facts pertaining to the involvement of any officer or director in such corporate payments, and of any corporate policy concerning such matters.[1]

BACKGROUND

Beginning in 1973, as a result of the work of the Office of the Watergate Special Prosecutor, the Commission became aware of a pattern of conduct involving the use of corporate funds for illegal domestic political contributions. Because these activities involved matters of significance to public investors, the nondisclosure of which entail violations of the federal securities laws, on March 8, 1974, the Commission published a statement expressing the views of its Division of Corporation Finance concerning disclosure of these matters in public filings. See Securities Act Release No. 5466 (Mar. 8, 1974).

Subsequent Commission investigations revealed that instances of undisclosed questionable or illegal corporate payments—both domestic and foreign—were indeed widespread and represented a serious breach in both the operation of the Commission's system of corporate disclosure and, correspondingly, in public confidence in the integrity of the system of capital formation. On May 12, 1976, the Commission submitted to the Senate Banking, Housing and Urban Affairs Committee a detailed "Report on Questionable and Illegal Corporate Payments and Practices" ("May 12 Report"). That report describes and analyzes the history of the Commission's activities concerning improper corporate payments and outlines the legislative and other responses which the Commission, based on its experience, recommended to remedy these problems. One of the key conclusions drawn in the May 12 Report was that:

[1] It should be noted that, in large measure, the proposals herein codify existing law rather than create new obligations. One who, for example, falsifies corporate records or deceives corporate auditors would, depending on the facts and circumstances involved, have engaged under present law in a violation of the antifraud provisions of the federal securities laws. Likewise, disclosure of the items proposed to be included expressly in Schedule 14A would, if material, be required under existing law.

The almost universal characteristic of the cases reviewed to date by the Commission has been the apparent frustration of our system of corporate accountability which has been designed to assure that there is a proper accounting of the use of corporate funds and that documents filed with the Commission and circulated to shareholders do not omit or misrepresent material facts. Millions of dollars of funds have been inaccurately recorded in corporate books to facilitate the making of questionable payments. Such falsification of records has been known to corporate employees and often to top management, but often has been concealed from outside auditors and counsel and outside directors.

Accordingly, the primary thrust of our actions has been to restore the efficacy of the system of corporate accountability and to encourage the boards of directors to exercise their authority to deal with the issue. May 12 Report at a.

On the basis of the conclusions in the May 12 Report, the Commission, in addition to pursuing its enforcement and disclosure programs actively, proposed a 2-pronged approach to prevent further such abuses. First, the Commission recommended that Congress enact legislation aimed expressly at enhancing the accuracy of the corporate books and records and the reliability of the audit process which constitute the foundations of the system of corporate disclosure. Specifically, the Commission proposed legislation which would:

(1) Require issuers to make and keep accurate books and records;

(2) require issuers to devise and maintain a system of internal accounting controls meeting the objectives articulated by the American Institute of Certified Public Accountants in Statement on Auditing Standards No. 1, Section 320.28 (1973);

(3) prohibit the falsification of corporate accounting records; and

(4) prohibit the making of false, misleading, or incomplete statements to an accountant in connection with any examination or audit.

The second prong of the Commission's suggested attack on the problem of questionable and illegal corporate payments involved strengthening the independence and vitality of corporate boards of directors by requiring that companies maintain audit committees comprised of independent directors and by encouraging the separation of the functions of independent corporate counsel and director. In the May 12 Report, the Commission proposed that, at least initially, these principles could best be implemented by amendment to the listing requirements of the New York Stock Exchange and the rules of the other self-regulatory organizations, rather than by direct Commission action.[2]

[2] Exhibit D to the May 12 Report is a letter, dated May 11, 1976, from Chairman Hills to Exchange Chairman Batten suggesting that the New York Stock Exchange ("NYSE") consider action of this nature. Subsequently, on September 7, 1976, the NYSE circulated a proposal requiring listed domestic (but not foreign) issuers to establish independent audit committees and, on January 6, 1977, took final action thereon. The Commission, pursuant to Section 19(b) of the Securities Exchange Act, will formally consider the terms and conditions of the Exchange's proposal, after opportunity for public comment.

To date, neither the NYSE nor the other self-regulatory organizations have taken action with respect to the Commission's suggestion that consideration be given to "whether members of law firms which have the responsibility of advising the corporation, including the board, should also serve as members of that board of directors." May 12 Report at 67 and at Exhibit D, p. 2.

Senator Proxmire, Chairman of the Senate Committee on Banking, Housing and Urban Affairs, introduced, as S. 3418, the Commission's legislative proposal, and held hearings on that and other bills related to the problem of illicit corporate foreign payments.[3] Ultimately, the Committee referred a bill to the Senate floor—S. 3664—which embodied all of the Commission's legislative recommendations (as well as certain other proposals).[4] On September 15, 1976, the Senate, by a vote of 88–0 unanimously passed S. 3664. The House of Representatives, however, was unable to complete work on this legislation before adjournment sine die on October 2, 1976.

The Commission continues to believe that Congressional action on the legislation which it proposed in the May 12 Report would be the most desirable means of demonstrating a national commitment to ending the types of corporate misconduct, and defiance of the recordkeeping systems on which disclosure under the securities laws is premised, which the Commission's investigations have uncovered.[5] The Commission also believes that the serious abuses which its May 12 Report and subsequent activities have disclosed require prompt remedial action and has never taken the position that legislation is the sole means by which the substantive goals of its proposals could be effected. Indeed, the Commission believes that the close relationship between the objectives which Congress, in 1934, sought to accomplish by enactment of the Securities Exchange Act and the substance of its legislative proposals places those proposals within the reach of the Commission's general rulemaking authority under section 23 (a) of the Securities Exchange Act. Accordingly, the Commission is today publishing for comment rulemaking proposals which would accomplish the objectives of its earlier legislative recommendation.

MAINTENANCE OF ACCURATE CORPORATE BOOKS AND RECORDS AND AN ATTENDANT SYSTEM OF INTERNAL ACCOUNTING CONTROL

The Commission has found that improper and undisclosed expenditures of corporate assets are frequently accompanied by inaccurate maintenance, or outright falsification, of corporate accounting records and, similarly, failure in the internal controls system designed to insure the accuracy of corporate records and the utilization of assets solely for proper purposes. In this regard, the May 12 Report states:

[M]ost of the instances of reported abuse also involved some falsification of corporate records or the maintenance of records that appear to be inadequate. In many of the reports submitted voluntarily by corporations, the description of the payments and their documentation appears to have been inadequate to permit ready identification or verification of the purpose of the payments. Similarly, the reports the Commission obtained as a result of enforcement actions disclose flagrant instances of abuse of the system of corporate accountability, including the establishment and maintenance of substantial off-book funds that were used for various purposes, some questionable and some clearly illegal.

Many of the defects and evasions of the system of financial accountability represented intentional attempts to conceal certain activities. Not surprisingly, corporate officials are unlikely to engage in questionable or illegal conduct and simultaneously reflect it accurately on corporate books and records. We regard this to be a significant point, and one that is central to [remedial measures]. May 12 Report at 41–42.

a. *Maintenance of accurate records.* In light of these findings, the Commission is proposing for comment new Securities Exchange Act Rule 13b–1 which would require every issuer registered with the Commission pursuant to Sections 12 or 15(d) of the Securities Exchange Act to make and keep books, records, and accounts which accurately and fairly[6] reflect the transactions of the issuer and the dispositions of its as-

[3] Hearings Before the Committee on Banking, Housing and Urban Affairs U.S. Senate, on S. 3133, S. 3379, and S. 3418, 94th Cong. 2d Sess. (May 18, 1976).

[4] See S. Rep. No. 94–1031, 94th Cong. 2d Sess. (1976).

[5] Cf. May 12 Report at 57: [T]he question of illegal or questionable payments is obviously a matter of national and international concern, and legislation in this area is desirable in order to demonstrate clear Congressional policy with respect to a thorny and controversial problem.

[6] In connection with Congressional consideration of S. 3418 and its progeny, some concern was expressed over whether the phrase "accurately and fairly" in the legislation connoted an unattainable measure of exactitude. As the Senate Banking, Housing and Urban Affairs Committee observed:

The term "accurately" in [S. 3664] does not mean exact precision as measured by some abstract principle. Rather, it means that an issuer's records should reflect transactions in conformity with accepted methods of recording economic events. Thus, for example, recording depreciation in a manner permitted by the Internal Revenue Code may not be a precise measurement, but it is nevertheless clearly a permissible one within the intent of [this requirement]. S. Rep. No. 94–1031, supra, at 11.

The Commission agrees with this observation. Moreover, the Commission believes that to require a lesser standard in defining the obligation to keep books and records could lead to the argument that falsifications or omissions below a certain dollar amount may be tolerated.

sets.[7] The Commission believes that such a rule will discourage the types of misconduct which thrive in the absence of adequate recordkeeping.

The Commission's authority to promulgate such a rule under existing law, and the obligation to maintain accurate books and records, stems from the reporting requirements of the federal securities laws.[8] Section 12(b)(1) of the Securities Exchange Act, for example, permits registration of issuers only upon the filing with the Commission of such information as the Commission may require, as necessary or appropriate in the public interest or for the protection of investors, in respect of, among other things:

(A) the organization, financial structure and nature of the business;

• • • • •

(J) balance sheets for not more than the three preceding fiscal years, certified if required by the rules and regulations of the Commission by independent public accountants;

(K) profit and loss statements for not more than the three preceding fiscal years, certified if required by the rules and regulations of the Commission, by independent public accountants; and

(L) any further financial statements which the Commission may deem necessary or appropriate for the protection of investors.

Likewise, section 13(a) authorizes the Commission to compel the filing of annual reports, certified by independent public accountants if the Commission so requires, and other information necessary to up-date section 12 registration statements.[9] The Commission's activities concerning questionable or illegal corporate payments and practices have demonstrated a connection between the failure to disclose such misconduct in reports filed pursuant to section 12, and 13, 15(d) and the failure to maintain reliable and auditable corporate records. Accordingly, rules such as proposed Rule 13b–1 constitute "such rules and regulations as may be necessary or appropriate to implement the provisions of [the Exchange Act]" section 23(a)(1). Absent reliable underlying corporate records, the preparation of financial statements in accordance with generally accepted accounting principles would be extremely difficult.

b. *Maintenance of a system of internal accounting controls.* Proposed Rule 13b–2, which requires management to devise and maintain a system of internal accounting controls, is closely related to proposed Rule 13b–1 in both purpose and statutory foundation. The reliability of corporate records is dependent on the effectiveness of the procedures adopted to insure that corporate transactions are, in fact, reflected in those records and, conversely, to insure that assets are not exposed to unauthorized access and use. Accordingly, proposed Rule 13b–2 would require that issuers filing reports pursuant to sections 12 or 15(d) of the Securities Exchange Act maintain an adequate system of internal accounting controls sufficient to provide reasonable assurance that:

(a) transactions are executed in accordance with management's general or specific authorization;

(b) transactions are recorded as necessary (1) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements and, (2) to maintain accountability for assets;

(c) access to assets is permitted only in accordance with management's authorization; and

(d) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences.

These proposed objectives for a system of internal accounting controls have been drawn from the objectives of such a system defined by the American Institute of Certified Public Accountants in Statement on Auditing Standards No. 1, Section 320.28 (1973). The Commission believes that these goals provide a reasonable basis for the implementation of the required system of controls, and that such objectives are already familiar to the business community.

The establishment and maintenance of a system of internal controls is an important management obligation. A fundamental aspect of management's stewardship responsibility is to provide shareholders with reasonable assurance that the business is adequately controlled. Additionally, management has a responsibility to furnish shareholders and potential investors with reliable financial information on a timely basis. An adequate system of internal accounting controls is necessary to management's discharge of these obligations.[10]

Systems of controls will, of course, vary from company to company. The size of the business, diversity of operations, degree of centralization of financial and operating management, amount of contact by top management with day-to-day operations, and numerous other circumstances are factors which management must consider in establishing and maintaining an internal accounting controls system. The design of any such system necessarily involves exercise of management's judgment, and entails the balancing of the cost of implementing any given internal accounting control against the benefit to be derived. By requiring that a system provide reasonable assurance that the specified objectives are met, the Commission's proposed rule recognizes that the issuer must, in good faith, balance the costs and benefits as they relate to the circumstances of that company. The definition of the term "reasonable assurance" in proposed Rule 13b–2 is, like the objectives for a system of internal accounting controls, taken from existing accounting literature. See Statement on Auditing Standards No. 1, supra, section 320.32.

Although the Commission understands that there may be practical limitations to the implementation of internal accounting controls,[11] the Commission believes that, despite the inherent limitations on a system of internal accounting controls, all companies should establish and maintain such systems. A properly functioning system should provide reasonable assurance to investors that the data generated by that system and embodied in interim financial data or annual financial statements fairly reflect the issuer's financial position. Moreover, a properly functioning system of internal accounting controls, including articulated policies relating to improper payments, should significantly discourage questionable or illegal payments and practices.[12]

[7] In proposing this language in the May 12 Report, the Commission did not, of course, intend the phrase "dispositions of its assets" as in any sense a limitation on the scope of the requirement that accurate books and records be maintained. The issuer's responsibility to keep records correctly reflecting the status of its liabilities and equities is no less than its obligation to maintain such records concerning its assets. The word "transactions" in the proposal encompasses accuracy in accounts of every character, and the phrase "disposition of its assets" was added simply to reflect the fact that the abuses outlined in the May 12 Report involved almost exclusively improper accounting for assets. In any event, proposed Rule 13b–1 is intended to require accuracy throughout an issuer's accounting records.

[8] See S. Rep. No. 94–1031, supra, at 11.

[9] In this regard section 13(b) authorizes the Commission to prescribe the form or forms in which the required information shall be set forth, the items or details to be shown in the balance sheet and the earning statement, and the methods to be followed in the preparation of reports, in the appraisal or valuation of assets and liabilities, in the determination of depreciation and depletion, in the differentiation of recurring and nonrecurring income, in the differentiation of investment and operating income, and in the preparation, where the Commission deems it necessary or desirable, of separate and/or consolidated balance sheets or income accounts of any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer • • •.

[10] The term "internal accounting controls" does not ordinarily encompass all corporate policies and procedures. Matters of efficiency, employee relations, and production quality control, for example, should not be confused with the accounting controls established to insure the reliability of financial information.

[11] Statement on Auditing Standards No. 1 sets forth some of these limitations:

There are inherent limitations that should be recognized in considering the potential effectiveness of any system of accounting control. In the performance of most control procedures, there are possibilities for errors arising from such causes as misunderstanding of instructions, mistakes of judgment, personal carelessness, distraction, or fatigue. Furthermore, procedures whose effectiveness depends on segregation of duties obviously can be circumvented by collusion.

Similarly, procedures designed to assure the execution and recording of transactions in accordance with management's authorizations may be ineffective against either errors or irregularities perpetrated by management with respect to transactions or to the estimates and judgments required in the preparation of financial statements. In addition to the limitations discussed above, any projection of a current evaluation of internal accounting control to future periods is subject to the risk that the procedures may become inadequate because of changes in conditions and that the degree of compliance with the procedures may deteriorate. Statement on Auditing Standards No. 1, supra, Section 320.34.

FALSIFICATION OF ACCOUNTING RECORDS AND DECEPTION OF AUDITORS

The Commission is also soliciting comment on a rule—proposed Rule 13b–3—which would prohibit the falsification of corporate accounting records maintained pursuant to proposed Rule 13b–1, and on a rule—proposed Rule 13b–4—which would prohibit issuer officers, directors, or shareholders from deceiving or obstructing accountants in the discharge of their responsibilities in connection with the examination of the financial statements of issuers subject to Rule 13b–1. The Commission believes that express prohibitions of this nature, while already implicit in existing law, are necessary to insure the effectiveness of the proposed corporate recordkeeping requirement and that such prohibitions uniquely respond to problems which the Commission's investigations have disclosed:

The most devastating disclosure that we have uncovered in our recent experience with illegal or questionable payments has been the fact that, and the extent to which, some companies have falsified entries in their own books and records. A fundamental tenet of the recordkeeping system of American companies is the notion of corporate accountability. It seems clear that investors are entitled to rely on the implicit representations that corporations will account for their funds properly and will not "launder" or otherwise channel funds out of or omit to include such funds in the accounting system so that there are no checks possible on how much of the corporation's funds are being expended or whether in fact those funds are expended in the manner management later claims.

Concomitantly, we believe that any legislation in this area should also contain a prohibition against the making of false and misleading statements by corporate officials or agents to those persons conducting audits of the company's books and records and financial operations. May 12 Report at 58.

a. *Prohibition against falsification of accounting records.* Proposed Rule 13b–3 would prohibit any person from falsifying corporate acounting records required to be maintained pursuant to proposed Rule 13b–1. The Commission believes that such a prohibition is a necessary compliment to the requirement that the issuer maintain accurate books and records. In many cases, instances of concealed corporate payments and off-book cash funds have resulted from the activities of particular individuals, acting with or without the knowledge or authorization of top management, to cause such transactions to be improperly reflected on the corporate records. Proposed Rule 13b–3 would permit the Commission to take action to preclude such individuals from further frustrating either the system of corporate recordkeeping or the broader system of accountability by which management monitors the activities of the entire array of individuals entrusted with corporate assets.

The Commission has given consideration to certain facets of the issue, discussed below, and has tentatively concluded that proposed Rule 13b–3 would fall within its authority to promulgate rules "necessary or appropriate to implement the provisions of (the Exchange Act)" section 23(a)(1). At the outset, it must be recognized that, while the Commission proposes to codify the prohibition in question under section 13 of the Act, the Commission does not rely on that provision, in itself, to furnish a complete foundation for the proposed rule. In addition to the periodic reporting requirements, the rule also is predicated upon sections 10(b), 14(a), 20(b) and 20(c) of the Act. The Commission, from experience with the problems treated in its May 12 Report, has concluded that the falsification of accounting records has a strong propensity to lead to a variety of evils against which Congress has authorized it to take rulemaking action including:

(1) The utilization of deceptive devices, such as materially false statements or material omissions, in connection with the purchase or sale of securities by the means of interstate commerce;

(2) The filing of inaccurate and incomplete periodic and annual reports with the Commission;

(3) The solicitation of proxies in contravention of Rule 14a–9, 17 CFR 240.14a–9; and

(4) The hindrance, delay, and obstruction of the making and filing of required documents, reports and information.

Accordingly, the Commission believes that a remedial provision such as proposed Rule 13b–3 would, if adopted, be within the scope of sections 10(b), 13(a), 14(a), and 20(c) of the Act.

The Commission believes it appropriate to outline briefly its present views concerning two issues related to the scope of Rule 13b–3. First, although section 13(a) authorizes the Commission to impose certain *requirements* upon *issuers*, the proposed rule would create a *prohibition* applicable to *any person*. The effects of a falsification in making reports required under Section 13 misleading or incomplete are not, of course, contingent on the identity of the wrongdoer or on whether he acts with the knowledge or acquiescence of management. The falsification of accounting records constitutes an obvious hindrance to the preparation of required reports, the evil which section 20(c) was designed to prohibit, and, therefore, section 20(c) of the Act would permit the Commission to promulgate a rule of this nature applicable to "any director or officer of, or any owenr of any securities issued by, any issuer required to file any document, report or other information." While a prohibition applicable to directors, officers, or securities holders might well serve to encompass many of the problems the Commission has encountered, the Commission thinks it desirable that the rule be broadened to reach any person who engages in the falsification of accounting records. This is especially appropriate in light of section 32(a) of the Securities Exchange Act, which provides criminal penalties for "*any person* who willfully and knowingly makes, or causes to be made, any statement in any application, report, or document required to be filed under this title or any rule or regulation thereunder" (emphasis added).

Likewise, section 10(b) of the Act authorizes the Commission to prohibit deceptive devices—regardless of by whom employed—in connection with the purchase or sale of securities. Because the falsification of accounting records, especially in order to conceal questionable corporate payments, has an unavoidable tendency to lead to the concealment of material information from purchasers and sellers of the issuer's securities, and to the omission of such information from proxy solicitations, the Commission believes that the extension of proposed Rule 13b–3 to any person is warranted.

Second, the Commission recognizes that not every falsification of an accounting record will necessarily have the effect of causing a violation of Rule 10b–5 and section 20(c). The Commission believes, however, as stated above, that the nexus between altered books and these violations is so close as to justify a rule of the type proposed. An attempt to define a class of "harmless" falsifications would appear to be futile and would serve only to provide a loophole for the unscrupulous.

b. *Prohibition against deceptive or misleading statements to auditors.* Proposed Rule 13b–4 would prohibit any officer, director or shareholder of the issuer from making a materially false or misleading statement, or omitting to state any material fact necessary to make statements made not misleading, to an accountant in connection with an audit of the financial statements the issuer or the filing of required reports.[13] The purpose and authority for this proposal are, in large measure, similar to those discussed in connection with pro-

[12] The Commission recognizes that no system of internal controls can, in itself, prevent every kind of misconduct which the Commission has encountered in this area. It does not follow, however, that a requirement that such a system be maintained is idle or superfluous, and the Commission believes that effective systems of internal accounting controls can discourage such misconduct.

[13] The Commission intends that this rule would encompass the audit of issuer financial statements by independent accountants; the preparation of any required reports, whether by independent or internal accountants; the preparation of special reports required to be filed with the Commission, as, for example, pursuant to judicial orders incident to Commission enforcement proceedings; and any other examination conducted by an accountant and culminating in the filing of a document with the Commission.

posed Rule 13b–3. The accountant's examination of the issuer's financial statements is one of the key safeguards to the reliability of the system of financial disclosure; to the extent that individuals hamper or frustrate the accountant's work, the reliability of that system is diluted.

Although the Commission's legislative proposal would prohibit "any person" from engaging in the types of interference with the accountant's work which proposed Rule 13b–4 proscribes, the proposed rule itself extends only to the individuals to which section 20(c) of the Securities Exchange Act applies: "any director or officer of, or any owner of any securities issued by, any issuer." The Commission adheres to its position that a prohibition extending to "any person" would be desirable and has not concluded that it would lack the authority to promulgate a rule of that scope. The Commission has, however, determined that, for the present, a rule identical in coverage to section 20(c) would be adequate to meet the abuses which it has uncovered in this area, and that rulemaking action of greater coverage is inappropriate.[14] It must be stressed, however, that the exclusion from the express language of proposed Rule 13b–4 of low-level corporate employees and persons unaffiliated with the issuer does not indicate that those individuals may mislead the issuer's accountants with impunity. In appropriate circumstances, the existing antifraud provisions of the federal securities laws, and the concept of aiding and abetting, can be invoked against those who deceive the auditors of a publicly held corporation. In this area, as in other areas where duties and liabilities are created under the federal securities laws, case-by-case balancing of the needs of the investing public against the interests of those who have engaged in conduct injurious to investors is essential.[15]

[14] The fact that proposed Rule 13b–4 is narrower in scope than its legislative counterpart does not indicate that the Commission has determined to accept the position of certain commentators who, in response to the Commission's legislative proposal, argued that a prohibition applicable to third parties would discourage such persons from responding to requests for confirmation of account balances or otherwise cooperating with accountants. In this regard, the Senate report on S. 3664 states:

By specifically prohibiting material false or misleading statements or omissions to state material facts to auditors, the bill is designed to encourage careful communications between the auditors and persons from whom the auditors seek information in the audit process. The Committee does not believe that this provision will inhibit such communications and intends that this prohibition is to be directed only at those who fail to exercise due care in furnishing information to auditors engaged in an audit, a standard that we believe represents what is customarily expected in normal commerce. S. Rep. No. 94–1031, 94th Cong. 2d Sess. at 12 (1976).

[15] Cf. Sections 11 and 12 of the Securities Act of 1933, 15 U.S.C. 77k and 77l; see H. Rep. No. 85, 73rd Cong. 1st Sess. at 9 (1933).

It has been suggested that any prohibition such as proposed Rule 13b–4 be limited to proscribing misleading written communications with auditors. The Commission believes, however, that such a limitation would be ill-advised. One engaged in an audit of corporate books and records can be misled by an oral misstatement just as by a written one, and the resulting injury to investors can be serious. Moreover, section 12(2) of the Securities Act, and also the several antifraud provisions of the Securities Exchange Act, have long been applied in Commission and private actions to oral misstatements without unusual or unintended consequences.

Disclosure Concerning Questionable Payments in Proxy Solicitation

The Commission is also proposing amendments to Schedule 14A under the Securities Exchange Act of 1934 to require information in proxy statements concerning the involvement of top management in specified types of questionable or illegal corporate payments or transactions and concerning formal corporate policies as to such matters. Specifically, these amendments would add two new Subitems, 6(d)(1) and 6(d)(2) to Schedule 14A which would deal, respectively, with disclosure of questionable transactions and disclosure of corporate policies regarding such matters. As discussed below, the Commission believes that this type of information is particularly relevant to shareholder proxy and voting decisions.

Proposed Item 6(d)(1) would require disclosure of the material facts pertaining to the involvement of any director of the issuer, any person nominated for election as director, or any executive officer of the issuer in any material political contributions by the issuer or from its assets, whether legal or illegal;[16] the disbursement or receipt of corporate funds outside the normal system of accountability; payments, whether direct or indirect, to or from foreign or domestic governments, officials, employees or agents for purposes other than the satisfaction of lawful obligations, or any transaction which has as its intended effect the transfer of issuer assets in the manner described; the improper or inaccurate recording of payments and receipts on the books of the issuer or its subsidiaries; or any other matters of a similar nature involving disbursements of issuer assets.[17]

Discussion could, however, be omitted of any facts which have previously been both reported in a filing with the Commission and described in an issuer document distributed to shareholders.

The Commission believes that information concerning disclosure of the facts regarding the involvement of directors or top officers in reported instances of questionable payments is highly significant to shareholders in determining whether to give a proxy. A previous Commission public inquiry suggested that many investors use different criteria in determining whether to give a proxy than in making investment decisions.[18] The proxy solicitation process is, of course, the most direct opportunity which shareholders have to endorse or reject the stewardship of those entrusted with the discharge of corporate affairs. Nevertheless, in many of the disclosures concerning questionable or illegal corporate transactions appearing in current and annual reports filed on Forms 10–K and 8–K—which are designed to supply updated and current information concerning the registrant—the role of particular members of management has not been fully set forth. Where individuals who are standing for election to a corporate board or who are a part of top management which is soliciting proxies have been involved in, or personally aware of, questionable or illegal corporate transactions, the Commission believes that shareholders are entitled to more detailed information concerning their role in such matters than might otherwise be necessary.

Concerning the existence and substance of any corporate policies dealing with questionable transactions, the Commission believes that, in at least some circumstances, such policies are of sufficient importance to investors to merit inclusion in proxy statements. The Commission also recognizes, however, that, in a different context, it declined to require the disclosure of policy statements alone in light of the fact that such statements are subject to public relations posturing or to the recitation of boilerplate assertions of good faith, and do not permit of any type of verification.[19]

In the case of the specified types of questionable practices, however, the Commission believes that the opportunity for investors to compare any stated policy to the actual conduct of those seeking shareholder proxies or votes is especially meaningful. And, given the fact that over 200 registrants have made disclosure concerning specific instances of misconduct of this nature, any policy statement which may have been adopted will be readily subject to comparison with specific fact situations. Because, however, of these special considerations regarding general corporate policy pronouncements, the Commission is considering two alternative formulations of proposed Subitem (d)(2) concerning corporate policies as to questionable payments and transactions. Alternative A would require all issuers subject to Regulation 14A to include in every proxy solicitation disclosure or whether or not the issuer has adopted any formal policy regarding the types of questionable payments and transactions specified in proposed Item 6(d)(1). Alternative B, on the other hand, would require such disclosure only where the issuer was also required, by virtue of proposed Item 6(d)(1), described above, to disclose facts concerning some particular questionable or illegal payment or transaction. The Commission invites comment on the advantages and disadvantages of each approach in order to assist it in determining which, if either, should be adopted.

[16] The Commission specifically invites comment on whether lawful corporate political contributions should be included in this instruction.

[17] The Commission intends that the phrase "disbursement or receipt of corporate funds outside the normal system of accountability" would encompass the full range of schemes by which off-book pools of assets are accumulated, including, for example, over-billing, unrecorded transactions in violation of foreign exchange controls, and embezzlement incident to the diversion of corporate assets to improper purposes. Likewise, abuses such as the maintenance of a fictitious set of books would fall within "improper or inaccurate recording of payments or receipts."

[18] See Securities Act Release No. 5627 at 36 (Oct. 14, 1975) (40 FR 51656).

[19] See id. at 33.

Conclusion and Request for Comment

The Commission believes that the proposed rules herein, in conjunction with its suggestion that the self-regulatory organizations consider requiring certain certain steps to enhance the independence of corporate boards, have the potential significantly to enhance the reliability and accuracy of issuer financial reporting.[20] Likewise, the Commission believes that a specific disclosure requirement concerning the involvement of top management in improper corporate payments may be appropriate in connection with the solicitation of proxies. The Commission recognizes, however, that the area is difficult and complex, and intends to afford careful consideration to the views of all interested persons before taking final action on all, or any part of, these proposals.

All interested persons are invited to submit their views and comments, in triplicate, on the foregoing proposals to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before the close of business March 11, 1977. The Commission specifically invites comment on (1) the effect, operation, and desirability of the proposals herein; (2) the impact which these proposals, if adopted, would be likely to have on the abuses outlined in the May 12 Report; (3) the extent of the Commission's authority in the areas involved; (4) whether it would be appropriate to exempt issuers registered under the Investment Company Act of 1940 from the operation of any of these proposals; and (5) pursuant to section 23(a)(2) of the Securities Exchange Act, the likely impact, if any, which these proposals would have on competition.

All such communications should refer to File S7–671 and will be available for public inspection and copying at the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. The text of the proposed amendments discussed herein is set forth below.

Text of Proposed Amendments

[NEW] REGULATION 13B: ACCURACY OF BOOKS, RECORDS, AND REPORTS

[Existing Rule 13b–1 shall be renumbered as Rule 13b–18.]

[20] The Commission is also considering soliciting comment on the question of whether to require some form of reporting to shareholders concerning the issuer's system of internal accounting control.

§ 240.13b–1 Accounting records.

Every issuer which is required to file any report pursuant to section 13 or 15(d) of the Act (and the Commission's rules and regulations thereunder) shall make and keep books, records, and accounts which accurately and fairly reflect the transactions of the issuer and the dispositions of its assets.

§ 240.13b–2 Internal controls system for accounting records.

(a) Incident to the making and keeping of such books, records, and accounts as are required pursuant to Rule 13b–1 of this regulation, every issuer shall devise and maintain an adequate system of internal accounting controls sufficient to provide reasonable assurance that:

(1) Transactions are executed in accordance with management's general or specific authorization;

(2) Transactions are recorded as necessary (i) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements, and (ii) to maintain accountability for assets;

(3) Access to assets is permitted only in accordance with management's authorization;

(4) The recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences.

(b) As used in (a) of this rule, the term "reasonable assurance" shall mean that the cost of internal accounting control need not exceed the benefits expected to be derived. The benefits consist of reductions in the risk of failing to achieve the objectives implicit in the definition of accounting control.

§ 240.13b–3 Falsification of accounting records.

It shall be unlawful for any person, directly or indirectly, to falsify, or cause to be falsified, any book, record, account, or document made or kept pursuant to Rule 13b–1 of this regulation.

§ 240.13b–4 Obstruction of accountants.

It shall be unlawful for any director or officer of, or any owner of any securities issued by, any issuer:

(a) directly or indirectly, to make, or cause to be made, a materially false or misleading statement; or

(b) directly or indirectly, to omit to state, or cause another person to omit to state, any material fact necessary in order to make statements made, in the light of th circumstances under which such statements were made, not misleading, to an accountant in connection with (1) any audit or examination of the financial statements of the issuer required to be made pursuant to this subpart, or (2) the preparation of filing of any document or report required to be filed with the Commission pursuant to this subpart or otherwise.

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

Item 6. Nominees and directors.[21]

* * * * *

(d) * * *

(1) State the material facts pertaining to the involvement of any director of the issuer, any person nominated for election as director, or any executive officer of the issuer in any material political contributions by the issuer or from the issuer's assets, whether legal or illegal; the disbursement or receipt of corporate funds outside the normal system of accountability; payments, whether direct or indirect, to or from foreign or domestic governments, officials, employees or agents for purposes other than the satisfaction of lawful obligations, or any transaction which has as its intended effect the transfer of issuer assets for the purpose of effecting such a payment; the improper or inaccurate recording of payments and receipts on the books of the issuer or its subsidiaries; or any other matters of a similar nature involving disbursements of issuer assets. Disclosure need not be made of any matter which has been previously reported in a filing with the Commission and described in an issuer document distributed to shareholders.

(d)(2) Alternative Amendments

ALTERNATIVE A

(2) Indicate whether or not the issuer has any policy regarding payments or transactions of the type described in (1). If the issuer has such a policy, briefly describe it. If the policy is set forth in a written document, three copies thereof are to be filed with the Commission at the time preliminary materials are filed pursuant to Rules 14a–6 or 14c–5.

ALTERNATIVE B

(2) If the issuer is required to disclose any payment or transaction pursuant to (1), then, in addition to such disclosure, indicate whether or not the issuer has any policy regarding payments or transactions of the type described in (1). If the issuer has such a policy, briefly describe it. If the policy is set forth in a written document, three copies thereof are to be filed with the Commission at the time preliminary materials are filed pursuant to Rules 14a–6 or 14c–5.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

JANUARY 19, 1977.

[FR Doc.77–2469 Filed 1–21–77;1:31 pm]

[21] The Commission has previously announced a proposal to amend Schedule 14A, including the alteration of the caption of Item 6 to read "Information Regarding Management." See Securities Act Release No. 5758 (Nov. 2, 1976) (41 FR 49493).

TENNESSEE VALLEY AUTHORITY

[18 CFR Part 301]

GOVERNMENT IN THE SUNSHINE

Proposed Implementation

Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 552b, requires each agency subject to its provisions to promulgate regu-

lations to implement the requirements of section 552 (b)–(f) of Title 5 of the U.S. Code by March 12, 1977, following consultation with the Office of the Chairman of the Administrative Conference of the United States and published notice in the FEDERAL REGISTER of at least 30 days and opportunity for written comment by any person.

Notice is hereby given that the Board of Directors of the Tennessee Valley Authority (TVA) proposes to amend 18 CFR Part 301 by adding a new Subpart C, entitled "Government in the Sunshine Act," to implement the requirements of that act with respect to TVA. It is proposed to make the regulations effective as of March 12, 1977.

Written comments concerning the proposed regulations may be submitted to Herbert S. Sanger, Jr., General Counsel, Tennessee Valley Authority, Knoxville, Tennessee 37902. All comments received on or before the 30th day after the date of publication of these proposed regulations will be considered. Copies of all comments in response to this proposal will be available for public inspection during normal business hours at the TVA Technical Library, room E2B7, 400 Commerce Avenue, Knoxville, Tennessee.

In accordance with the Government in the Sunshine Act and TVA's practice over the past two years, TVA proposes that all formal meetings of the TVA Board be open to public observation, except in certain specified instances when the Board by recorded vote may decide to close a meeting. TVA proposes to make public announcement, at least one week in advance, of the time, place, and subject matter of each formal Board meeting. If the meeting, or any portion thereof, is to be closed to the public, that fact will also be announced.

TVA anticipates that the Government in the Sunshine Act and these proposed regulations will result in very little change in TVA's procedures for holding formal Board meetings, which TVA has been holding in public for the last two years. The act and these proposed regulations do not grant the public any right to participate in TVA Board meetings, but TVA plans normally to continue its practice of holding question and answer sessions for the public and the news media following the end of the business portion of each formal meeting.

Because of the size, scope, and complexity of the TVA program, decisions on TVA business requiring TVA Board action cannot always be deferred until the next regularly scheduled formal Board meeting. Of necessity then, the TVA Board must gather at informal Board meetings to conduct or dispose of official TVA business during the intervals between formal Board meetings. As with formal TVA Board meetings, TVA proposes that deliberations at such informal meetings be open to public observation, unless closed for one of the specified reasons by a recorded vote of the Board members. Some matters will require that such unscheduled deliberations be convened on very short notice; however, TVA proposes to make public announcement of the time, place, and subject matter of such deliberations as soon as practicable.

Not all gatherings of TVA Board members are meetings subject to the Government in the Sunshine Act. For instance, the act is not intended to prevent any two members of three-member agencies, like TVA, from engaging in informal background discussions which clarify issues and expose varying views, and such discussions do not come within the act's open meeting requirements. Congress' intent in regard to the special problems faced by three-member boards is particularly applicable to TVA's situation and the recognization of these special problems is necessary to maintain the corporate flexibility provided for in the TVA act. The work of the TVA Board is a full-time job and has never been limited to approving or disapproving formal proposals submitted by the TVA staff. The work of Board members includes informal gatherings with the staff and with each other in the day-to-day operations of TVA. Of necessity, this work includes discussions of TVA business on an impromptu basis in the office of one or another Board member, at lunch, while traveling together, or in other similar situations.

Serious and more formalized discussions among Board members on specific topics are generally the result of matters being brought to it for consideration or approval by TVA's General Manager in accordance with longstanding practice under TVA's administrative release system. Consequently, in implementing the Government in the Sunshine Act, TVA intends to use the Board's receipt of a matter from the General Manager for consideration or approval to signal the beginning of the period during which discussions among Board members may become deliberations. TVA's General Counsel has advised its Board members that they should be aware that the Government in the Sunshine Act carries the presumption that all their joint discussions on such matters will be open but that they may continue to have informal and preliminary discussions in private so long as such discussions do not effectively predetermine official actions.

In addition, TVA staff briefings of Board members will not generally be meetings subject to the open meeting requirement so long as the Board members do not engage in deliberations which determine or result in the joint conduct or disposition of TVA business on such occasions. Furthermore, the Government in the Sunshine Act permits TVA to continue its longstanding practice of circulating written material to Board members sequentially for each member to consider and act on individually. This practice has been followed by TVA largely because of the volume,' detail, and urgency of the business handled by the TVA Board and not delegated to the TVA staff. When TVA business is conducted in this manner, there is no meeting subject to the act. In continuing to follow this procedure, TVA is not attempting to circumvent the spirit of the Government in the Sunshine Act but only to carry its statutory responsibilities under the Tennessee Valley Authority Act of 1933 as efficiently and effectively as possible.

NOTE.—The Tennessee Valley Authority has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

In consideration of the foregoing, TVA proposes to amend 18 CFR Part 301 by adding a new Subpart C, as follows:

Subpart C—Government in the Sunshine Act

Sec.
301.41 Purpose and scope.
301.42 Definitions.
301.43 Open meetings.
301.44 Notice of meetings.
301.45 Procedure for closing meetings.
301.46 Criteria for closing meetings.
301.47 Transcripts of closed meetings.
301.48 Public availability of transcripts and other documents.

AUTHORITY: Sec. 3(a), Pub. L. No. 94–409, 90 Stat. 1241 (5 U.S.C. 552b), and 48 Stat. 58, as amended (16 U.S.C. 831–831dd).

§ 301.41 Purpose and scope.

(a) The provisions of this Subpart are intended to implement the requirements of section 3(a) of the Government in the Sunshine Act, 5 U.S.C. 552b, consistent with the purposes and provisions of the Tennessee Valley Authority Act of 1933, 16 U.S.C. 831–831dd.

(b) Nothing in this subpart expands or limits the present rights of any person under the Freedom of Information Act (5 U.S.C. 552) and the provisions of Subpart A of this Part, except that the exemptions set forth in § 301.46 shall govern in the case of any request made pursuant to the Freedom of Information Act and Subpart A to copy or inspect the transcripts, recordings, or minutes described in § 301.47.

(c) Nothing in this Subpart authorizes TVA to withhold from any individual any record, including transcripts, recordings, or minutes required by this Subpart, which is otherwise accessible to such individual under the Privacy Act (5 U.S.C. 552a) and the provisions of Subpart B.

(d) The requirements of Chapter 33 of Title 44 of the United States Code shall not apply to the transcripts, recordings, and minutes described in § 301.47.

§ 301.42 Definitions.

For the purposes of this Subpart:

(a) The term "Board" means the Board of Directors of the Tennessee Valley Authority;

(b) The term "meeting" means the deliberations of two or more members of the TVA Board where such deliberations determine or result in the joint conduct or disposition of official TVA business, but the term does not include deliberations required or permitted by § 301.44 or § 301.45;

(c) The term "member" means an individual who is a member of the TVA Board; and

(d) The term "TVA" means the Tennessee Valley Authority.

§ 301.43 Open meetings.

Members shall not jointly conduct or dispose of TVA business other than in accordance with this Subpart. Except as provided in § 301.46, every portion of every meeting of the agency shall be open to public observation, and TVA shall provide suitable facilities therefor, but participation in the deliberations at such meetings shall be limited to members and certain TVA personnel. Public observation does not include the recording of any deliberations or actions by means of electronic or other devices or cameras.

§ 301.44 Notice of meetings.

(a) TVA shall make a public announcement of the time, place, and subject matter of each meeting, whether it is to be open or closed to the public, and the name and telephone number of a TVA official who can respond to requests for information about the meeting.

(b) Such public announcement shall be made at least one week before the meeting unless two or more members determine by a recorded vote that TVA business requires that such meeting be called at an earlier date. If an earlier date is so established, TVA shall make such public announcement at the earliest practicable time.

(c) Following a public announcement required by paragraph (a) of this section, the time or place of the meeting may be changed only if TVA publicly announces the change at the earliest practicable time. The subject matter of a meeting or the determination to open or close a meeting or portion of a meeting to the public may be changed following the public announcement required by paragraph (a) of this section only if two or more members determine by a recorded vote that TVA business so requires and that no earlier announcement of the change was possible and if TVA publicly announces such change and the vote of each member upon such change at the earliest practicable time.

(d) Immediately following each public announcement required by this section, notice of the time, place, and subject matter of a meeting, whether the meeting is open or closed, any change in one of the proceedings, and the name and phone number of the TVA official designated to respond to requests for information about the meeting shall be submitted for publication in the FEDERAL REGISTER.

§ 301.45 Procedure for closing meetings.

(a) Action under § 301.46 to close a meeting shall be taken only when two or more members vote to take such action. A separate vote shall be taken with respect to each meeting a portion or portions of which are proposed to be closed to the public pursuant to § 301.46 or with respect to any information which is proposed to be withheld under § 301.46. A single vote may be taken with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular matters and is scheduled to be held no more than 30 days after the initial meeting in such series. The vote of each member participating in such vote shall be recorded and no proxies shall be allowed.

(b) Notwithstanding that the members may have already voted not to close a meeting, whenever any person whose interests may be directly affected by a portion of a meeting requests that the agency close such portion to the public for any of the reasons referred to in paragraphs (e), (f), or (g) of § 301.46, the Board, upon request of any one of its members made prior to the commencement of such portion, shall vote by recorded vote whether to close such portion of the meeting.

(c) Within one day of any vote taken pursuant to this section, TVA shall make publicly available in accordance with § 301.48 a written copy of such vote reflecting the vote of each member on the question. If a portion of a meeting is to be closed to the public, TVA shall, within one day of the vote taken pursuant to this section, make publicly available in accordance with § 301.48 a full written explanation of this action closing the portion together with a list of all persons expected to attend the meeting and their affiliation.

(d) For every meeting closed pursuant to § 301.46, there shall be a certification by the General Counsel of TVA stating whether, in his or her opinion, the meeting may be closed to the public and each relevant exemptive provision. A copy of such certification shall be retained by TVA and shall be made publicly available in accordance with § 301.48.

§ 301.46 Criteria for closing meetings.

Except in a case where the Board finds that the public interest requires otherwise, the second sentence of § 301.43 shall not apply to any portion of a meeting and such portion may be closed to the public, and the requirements of § 301.44 and § 301.45 (a), (b), and (c) shall not apply to any information pertaining to such meeting otherwise required by this subpart to be disclosed to the public, where the Board properly determines that such portion or portions of its meeting or the disclosure of such information is likely to—

(a) Disclose matters that are (1) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and (2) in fact properly classified pursuant to such Executive order;

(b) Relate solely to the internal personnel rules and practices of an agency;

(c) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. § 552), provided that such statute (1) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (2) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(d) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Involve accusing any person of a crime, or formally censuring any person;

(f) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(g) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (1) interfere with enforcement proceedings, (2) deprive a person of a right to a fair trial or an impartial adjudication, (3) constitute an unwarranted invasion of personal privacy, (4) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (5) disclose investigative techniques and procedures, or (6) endanger the life or physical safety of law enforcement personnel;

(h) Disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of any agency responsible for the regulation or supervision of financial institutions;

(i) Disclose information the premature disclosure of which would—

(1) In the case of any agency which regulates currencies, securities, commodities, or financial institutions, be likely to (i) lead to significant financial speculation in currencies, securities, or commodities, or (ii) significantly endanger the stability of any financial institution; or

(2) In the case of any agency, be likely to significantly frustrate implementation of a proposed agency action, except that this provision shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final action on such proposal; or

(j) Specifically concern an agency's issuance of a subpena, or its participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by an agency of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

§ 301.47 Transcripts of closed meetings.

(a) For every meeting closed pursuant to § 301.46, the presiding officer of the meeting shall prepare a statement setting forth the time and place of the meeting, and the persons present, and such statement shall be retained by TVA.

(b) TVA shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or portion of a meeting, closed to the public, except that in the case of a meeting, or portion of a meeting, closed to the public pursuant to paragraphs (h), (i) (1), or (j) of § 301.46, TVA shall maintain either such a transcript or recording, or a set of minutes. Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of any actions taken, and the reasons therefor, including a description of each of the views expressed on any item and the record of any rollcall vote (reflecting the vote of each member on the question). All documents considered in connection with any action shall be identified in such minutes.

(c) TVA shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or portion of a meeting, closed to the public, for a period of at least two years after such meeting, or until one year after the conclusion of any TVA proceeding with respect to which the meeting or portion was held, whichever occurs later.

§ 301.48 Public availability of transcripts and other documents.

(a) Public announcements of meetings made pursuant to § 301.44, written copies of votes to change the subject matter of meetings made pursuant to § 301.44(c), written copies of votes to close meetings and explanations of such closings made pursuant to § 301.45(c), and certifications of the General Counsel made pursuant to § 301.45(d) shall be available for public inspection during regular business hours in the TVA Technical Library, room E2B7, 400 Commerce Avenue, Knoxville, Tennessee.

(b) TVA shall make promptly available to the public at the location described in paragraph (a) of this section the transcript, electronic recording, or minutes (as required by § 301.47 (b)) of the discussion of any item on the agenda, or of any item of the testimony of any witness received at the meeting, except for such item or items of such discussion or testimony as TVA determines to contain information which may be withheld under § 301.46. Each request for such material shall be made to the Director of Information, Tennessee Valley Authority, Knoxville, Tennessee 37902; state that it is a request for records pursuant to the Government in the Sunshine Act and this Subpart; and reasonably describe the discussion or item of testimony, and the date of the meeting, with sufficient specificity to permit TVA to identify the item requested.

(c) In the event the person making a request under paragraph (b) of this section has reason to believe that all transcripts, electronic recordings, or minutes or portions thereof requested by that person and required to be made available under paragraph (b) of this section were not made available, the person shall make a written request to the Director of Information for such additional transcripts, electronic recordings, or minutes or portions thereof as that person believes should have been made available under paragraph (b) of this section and shall set forth in the request the reasons why such additional material is required to be made available with sufficient particularity for the Director of Information to determine the validity of such request. Promptly after a request pursuant to this paragraph is received, the Director of Information or his designee shall make a determination as to whether to comply with the request, and shall immediately give written notice of the determination to the person making the request. If the determination is to deny the request, the notice to the person making the request shall include a statement of the reasons for the denial, a notice of the right of the person making the request to appeal the denial to TVA's General Manager, and the time limits therefor.

(d) If the determination pursuant to paragraph (c) of this section is to deny the request, the person making the request may appeal such denial to TVA's General Manager. Such an appeal must be taken within 30 days after the person's receipt of the determination by the Director of Information and is taken by delivering a written notice of appeal to the General Manager, Tennessee Valley Authority, Knoxville, Tennessee 37902. Such notice shall include a statement that it is an appeal from a denial of a request under § 301.48(c) and the Government in the Sunshine Act and shall indicate the date on which the denial was issued and the date on which the denial was received by the person making the request. Promptly after such an appeal is received, TVA's General Manager or his designee shall make a final determination on the appeal. In making such a determination, TVA will consider whether or not to waive the provisions of any exemption contained in § 301.46. TVA shall immediately given written notice of the final determination to the person making the request. If the final determination on the appeal is to deny the request, the notice to the person making the request shall include a statement of the reasons for the denial and a notice of the person's right to judicial review of the denial.

(e) Copies of materials available for public inspection under this section shall be furnished to any person at the actual cost of duplication or transcription.

Dated: January 19, 1977.

LYNN SEEBER,
General Manager.

PENSION BENEFIT GUARANTY CORPORATION

[29 CFR Part 2610]

VALUATION OF PLAN BENEFITS

Notice of Proposed Rulemaking

On November 3, 1976, the Pension Benefit Guaranty Corporation (hereinafter referred to as the "PBGC") issued an interim regulation establishing the methods for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 (hereinafter referred to as the "Act"). (41 FR 48484 et seq.) The regulation includes an appendix containing rates and factors to be used to value benefits in plans which terminate on or after September 2, 1974, but before October 1, 1975.

On November 3, 1976, PBGC published for comment in the FEDERAL REGISTER additional rates and factors for valuing benefits in plans which terminate on or after September 2, 1974, but before September 1, 1976. (41 FR 48503 et seq.)

The appendices to the regulations did not provide rates and factors for valuing benefits in plans that terminate on or after September 1, 1976. PBGC has now developed rates and factors to value benefits in plans that terminate on or after September 1, 1976, but before December 1, 1976. Notice is hereby given that the PBGC proposes to amend Chapter XXVI of Title 29 of the Code of Federal Regulations to provide valuation factors for plans that terminate on or after September 1, 1976, but before December 1, 1976.

Interested persons may submit written comments on this proposal to the Office of the General Counsel, Pension Benefit Guaranty Corporation, Suite 7200, 2020 K Street, NW, Washington, D.C. 20006. Each person submitting comments should include his/her name and address, identify this notice and give reasons for any recommendation. Comments should be submitted before February 7, 1977. Copies of written comments will be available for examination by interested persons in the Office of Communications, Suite 7100, 2020 K Street, NW, between the hours of 9 a.m. and 4 p.m. The proposal may be changed in the light of comments received.

In consideration of the foregoing, it is proposed to amend Part 2610 of Chapter XXIV of Title 29, Code of Federal Regulations by adding a new Table VI to Appendix B to read as follows:

VI. The following interest rates and quantities used to value benefits shall be effective for plans which terminate on or after September 1, 1976 and on or before November 30, 1976:

Table I—*Interest rate for valuing immediate annuities.* An interest rate of 7 percent shall be used to value immediate annuities, to compute the quantity "G" in § 2610.6, and for valuing both portions of a cash refund annuity.

Table II—*Interest rate for valuing death benefits.* An interest rate of 5 percent shall be used to value death benefits other than the decreasing term insurance portion of a cash refund annuity pursuant to § 2610.8.

Table III—*Interest rates and quantities used to value deferred annuities.* The following factors shall be used to value deferred annuities pursuant to § 2610.6:

$k_1 = 1.06$
$k_2 = 1.0475$
$k_3 = 1.035$
$n_1 = 8$
$n_2 = 10$

(Secs. 4002(b)(3), 4041(b), 4044, 4062(b)(1)(A), Pub. L. 93-406, 88 Stat. 1004, 1020, 1025-27, 1029 (29 U.S.C. 1302(b)(3), 1341(b), 1344, 1362(b)(1)(A)).)

Issued at Washington, D.C., on this 21st day of January, 1977.

MATTHEW M. LIND,
Acting Executive Director,
Pension Benefit Guaranty Corp.

NOTE: Issued on the date set forth above, pursuant to a resolution of the Board of Directors authorizing the Executive Director to issue same.

HENRY ROSE,
Secretary,
Pension Benefit Guaranty Corp.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

[33 CFR Part 207]

CAPE FEAR RIVER, NORTH CAROLINA

Proposed Navigation Regulation

Notice is hereby given that pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) the regulations set forth below in tentative form are proposed by the Secretary of the Army (acting through the Chief of Engineers) to govern the use, administration and navigation of the three locks on the Cape Fear River, North Carolina. This proposal would establish a schedule of operation for the three locks and dams operated by the Corps of Engineers of navigational purposes.

The locks are currently available for navigation 24 hours a day, every day of the year. In view of declining use of the river for navigation and the small number of vessel lockages, combined with the increasing cost of operation and maintenance, continuous operation is uneconomical. It is apparent that the cost of making the locks available on a continuous basis far outweighs the benefits of accommodating the very few vessels currently using the locks. The proposed schedules would reduce the cost of operation by about 50 percent.

Prior to the adoption of the proposed regulations, consideration will be given to any comments, suggestions or objections thereto which are submitted in writing to the Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attention: DAEN-CWO-N on or before February 20, 1977.

§ 207.161 Cape Fear River, Navigation Locks, Between 29 and 94 River Miles North of Wilmington, North Carolina; Use, Administration and Navigation.

(a) The owner of or agency controlling the locks shall be required to open the navigation locks upon demand for passage of vessels during the following hours and periods:

Lock and dam No. 1, Lock and dam No. 2, Wm. O. Huske lock and dam		
Apr. 1 through Oct. 31.	Monday through Friday.	7 a.m. to 11 a.m., 12 noon to 4 p.m.
	Saturday and Sunday.	7 a.m. to 9 a.m., 6 p.m. to 8 p.m.
Nov. 1 through Mar. 31.	Monday through Friday.	8 a.m. to 11 a.m., 12 noon to 5 p.m.

In addition, lockages will be provided during other hours if prior requests are made 48 hours in advance to the District Engineer, U.S. Army Engineer District, Wilmington, North Carolina.

(b) The owner of or agency controlling the locks shall place signs, of such size and description as may be designated by the District Engineer, U.S. Army Engineer District, Wilmington, North Carolina, at the locks indicating the nature of the regulations of this section.

(40 Stat. 266 (33 U.S.C. 1).)

Dated: January 13, 1977.

MARVIN W. REES,
Colonel, Corps of Engineers,
Executive Director of Civil Works.

[33 CFR Part 207]

SAN FRANCISCO BAY, SAN PABLO BAY, CARQUINEZ STRAIT, SUISUN BAY, SAN JOAQUIN RIVER, AND CONNECTING WATERS, CALIF.

Proposed Navigation Regulation

Notice is hereby given that pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) the regulations set forth in tentative form below are proposed by the Secretary of the Army (acting through the Chief of Engineers) to amend 33 CFR 207.640. We propose to amend only paragraphs (j) and (n) by changing the descriptive titles, changing the designated command having authority over the restricted areas, and redefining the limits of the restricted area in paragraph (n). These changes are proposed in accordance with a request by the Commanding Officer, Naval Weapons Station, Concord, California, to revise the limits of the restricted area off Port Chicago to include the Seal Islands East Lighter Mooring and to make editorial changes outlined above.

Prior to the adoption of the proposed regulations consideration will be given to any comments, suggestions or objections thereto which are submitted in writing to the Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attention: DAEN-CWO-N on or before February 25, 1977.

§ 207.640 San Francisco Bay, San Pablo Bay, Carquinez Strait, Suisun Bay, San Joaquin River, and connecting waters, California.

• • • • • •

(j) San Francisco Bay in vicinity of the NSC Fuel Department, Point Molate; restricted area.

(1) • • •

(2) *The regulations.* Vessels not operating under supervision of the local military or naval authority or public vessels of the United States shall not enter this area except by specific permission of the Commanding Officer, Naval Supply Center, Oakland.

• • • • • •

(n) Suisun Bay at Naval Weapons Station, Concord; restricted area—

(1) *The area.* Beginning at a point on the shore and on the easterly side of the mouth of a small slough (known as Hastings Slough) bearing 189°, 2,412 yards from Tripon at Preston Point on Roe Island; thence 340°30', 400 yards, to the shore line of the westerly of the two Seal Islands; thence 60°30', 940 yards; thence 75°, 1,650 yards; thence 102°, 1,850 yards; thence 99°, 1,880 yards; thence 180°, 435 yards, to the shore line; thence following the high water shore line in a general westerly direction to the point of beginning.

(2) *The regulations.* Vessels and other craft not operating under the authority of the local military or naval authority shall not enter, lie to, anchor, or moor in this area except by specific permission of the Commanding Officer, Naval Weapons Stations, Concord.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 639-1]

[40 CFR Part 60]

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Sewage Sludge Incinerators

Subpart O sets forth standards of performance for new, modified, and reconstructed sewage sludge incinerators in sewage treatment plants. The standards limit emissions of particulate matter to 0.65 g/kg dry sludge input (1.30 lb/ton dry sludge input) and visible emissions to 20 percent opacity. The State of Alaska recently requested EPA to revise § 60.150 of the regulation. The basis of the request is that incinerators which are small enough to meet the needs of small communities in Alaska and also comply with the particulate matter standard are not available, and the disposal of sewage sludge in landfills is not a viable option because of permafrost and other factors resulting in landfill problems (shallow and soft landfills). The proposed amendment would exempt incinerators with a capacity of less than 140 kg/hr (300 lb/hr) dry sludge provided that disposal by land application or sanitary landfill are shown to be infeasible because of freezing conditions.

BACKGROUND

The standards of performance for sewage sludge incinerators were promulgated March 8, 1974 (39 FR 9308), under section 111 of the Clean Air Act. Section 111 directs the Administrator to establish standards of performance for new stationary sources which reflect the degree of emission limitation achievable through the application of the best system of emission reduction which (taking into account the cost of achieving such reduction) the Administrator determines has been adequately demonstrated. The best system of emission reduction for sewage sludge incinerators (multiple hearth and fluid bed reactor type incinerators) was determined to be low energy venturi scrubbers.

At the time the standards were promulgated EPA was developing a standard for murcury emissions from sewage sludge incinerators and guidelines for municipal sludge management. The standard limiting mercury emissions was promulgated under section 112 (Hazardous Air Pollutants) of the Clean Air Act on October 14, 1975 (40 FR 48302), and the proposed guideline was issued for public comment on June 3, 1976, under the title "Technical Bulletin on Municipal Sludge Management: Environmental Factors."

Incineration is just one of several methods available for sludge disposal. The standards, which limit emissions of mercury and particulate matter, insure that adequate emission control systems are employed when incineration is used as the method of sludge disposal. Incineration is only a volume reduction method. After incineration, the ash, either dry or in scrubber water, remains to be disposed of to the land. Ash disposal must be designed to protect ground water, to prevent dust, and to insure no erosion to surface waters.
